I can only join my colleague, Mr. CONTE of Massachusetts, who has stated that this "so-called jobs bill (which) is supposed to create jobs and meet national needs will do neither very well."

Are we really serious about unemployment? I think that is a fair question. If we are really serious we will take a close look at unreasonable requirements in the Clean Air Act that are strangling development; at the Natural Gas Policy Act that is forcing consumers to pay more for gas than they should; at transfer programs that maintain the cycle of dependency for too many people; and yes, we should scrutinize weapons procurement policy that lock us into costly, and ineffective defense systems.

If we are serious about unemployment, we will reject this bill and vote to recommit it. Higher and higher deficits have chased people out of work and out of homes and off their farms. This bill puts jobs and homeownership further out of reach for our people.

We are now at a critical point in this economy. There are signs, unmistakable signs of recovery from the long night of inflation. Let us not darken the future with the false promise of another jobs bill.

● Mr. PERKINS. Mr. Chairman, I shall vote for the passage of H.R. 1718, the emergency appropriations bill for 1983, and I urge my colleagues to also vote for it.

My major concern is not what the bill proposes to do by the way of creating jobs, but what it fails to do—and this Congress should be doing.

Some are saying that, taken in toto, the bill will create fewer than 90,000 jobs. While this is about 90 million jobs too few, it is 90,000 jobs and deserves every Member's support.

Some analysts of the legislation are saying that the projects funded are not targeted to the areas of most critical need—to those areas where the unemployment is the highest and where people are desperately looking to their Government for assistance.

This may be true, but operating under the restraints that this is an appropriations bill, utilizing to the fullest extent possible authorizations for public works where they exist, it does call for the construction of much-needed public works.

I am very hopeful that—

The $200 million provided to the Economic Development Administration;

The $200 million provided the Farmers Home Administration for water and sewer grants;

The $150 million to the Department of Energy for low-income weatherization; and

The funds provided for day care, Head Start, and the food and nutrition program will make meaningful impact on the suffering of the people of eastern Kentucky who are facing hardships and unemployment equal to those that confronted us in the thirties.

At this point in the RECORD, I ask that there be inserted the unemployment figures for the counties of the Seventh Congressional District of Kentucky for the most recent month that these data are available.

KENTUCKY LABOR FORCE ESTIMATES, PRELIMINARY DECEMBER 1982

County	Civilian labor force	Employment	Unemployment	Unemployment rate
Total	1,710,548	1,517,726	192,822	11.3
Bath	4,230	3,421	809	19.1
Boyd	23,115	20,189	2,926	12.7
Breathitt	7,548	6,762	786	10.4
Carter	9,128	7,250	1,878	20.6
Elliott	2,975	2,618	357	12.0
Fleming	5,149	4,563	586	11.4
Floyd	17,791	14,576	3,215	18.1
Greenup	17,331	14,231	3,100	17.9
Johnson	8,749	7,581	1,168	13.4
Knott	5,857	4,339	1,518	25.9
Lawrence	3,942	3,323	619	15.7
Letcher	9,185	5,747	3,438	37.4
Lewis	5,267	4,374	893	17.0
Magoffin	6,295	5,446	849	13.5
Martin	8,890	8,343	547	6.2
Mason	9,754	8,935	819	8.4

KENTUCKY LABOR FORCE ESTIMATES, PRELIMINARY DECEMBER 1982—Continued

County	Civilian labor force	Employment	Unemployment	Unemployment rate
Menifee	1,552	1,103	449	28.9
Morgan	4,762	4,040	722	15.2
Perry	14,090	11,666	2,424	17.2
Pike	36,586	30,220	6,366	17.4
Powell	4,438	3,720	718	16.2
Rowan	9,029	8,108	921	10.2
Wolfe	2,128	1,738	390	18.3

Overall unemployment of Kentucky is 11 percent.

As you can see from the county breakdown, unemployment is much more severe in the Seventh Congressional District—which leads me again to the concerns that I have about the passage of this legislation.

I hope that my colleagues—and indeed the Congress—in enacting this into law—and I believe that it will certainly be enacted—will not then declare a victory over unemployment and an end to our legislative efforts to solve the serious economic problems confronting the Nation.

This in only a beginning and only a bare beginning at that.

In one instance, the legislation could have been easily made stronger and could have justifiably been made stronger. This occurs in the last paragraph of section 101 containing the congressional findings, Here it is stated:

It is essential that interest rates, which have been reduced following a General Accounting Office investigation of the Federal Reserve System at the request of the committee, continue at present or lower rates for industrial and agricultural recovery.

To the extent that this statement may be construed to indicate congressional tolerance of the present level of interest rates, we should immediately repudiate that notion. To the extent that it is telling the Federal Reserve System to get interest rates lower, then we should applaud it.

On this point Congress has only itself to blame, as Prof. Lester Thurow, MIT economist, testified on February 1, 1983, before the Committee on Education and Labor:

The Federal Reserve Board is legally independent of the President, but it is not legally independent of the Congress. Congress has just never exercised its inherent powers. The Federal Reserve Board will shortly be giving Congress its money supply targets for the year. Congress can insist on real interest rate targets and, if necessary, use its legal powers to lower short-term real interest rates if the Fed targets are too high. If Congress doesn't exercise its rights and responsibilities, it has no one but itself to blame for a sinking economy.

We cannot begin to eliminate the causes of cyclical unemployment until interest rates are much much lower.

They are breaking the back of the small businessman.

They are breaking the back of the farmer.

They are destroying the small coal truck operator,

The small coal companies.

And, if present high interest rates are maintained, we are simply writing these people out of the economy.

Mr. Chairman, we can take a big step forward in eliminating the causes of cyclical unemployment by bringing interest rates down to a rational level.

It will take far more imaginative efforts to solve the causes of structural unemployment.

As Dr. Gar Alperovitz, codirector of the Center for Economic Alternatives, put it before the committee on February 3 this year:

> What they involve and what they require, I think, are pretty self-evident. First, there needs to be a very massive retraining program. Secondly, we need a program for short-term jobs in areas that can be fast start-up and low skilled. Third, we need to bring on stream those longer-term investments from housing, roads, ports, back to energy conservation. Fourthly, larger public investment to support some of our basic and/or high technology industries.
>
> But I do want to stress that it must be part of a comprehensive strategy, not just a little one-dab program, something that could actually promise to deliver the goods and get the economy back into motion.

The pace of technological change is such that jobs are being eliminated daily but at the same time the evidence is that new jobs are emerging.

The Committee on Education and Labor in preparation for submission of its March report to the House Budget Committee has conducted 8 days of hearings on the subject of underlying causes of unemployment. It has heard the testimony of economists, educators, administrators, and representatives of management and labor with special knowledge in the field of economics, commerce, training, and employment.

Taking into account those working only part time, those who have given up the search of employment and have dropped from the job market, as many as 20 million Americans are carrying the brunt of the worst economic depression since the Great Depression of the thirties.

The sharp cuts in domestic programs under the jurisdiction of the Committee on Education and Labor have resulted in disappearing opportunities for education, training, and retraining which are essential paths for millions of Americans to reach employment.

Almost as rapidly a jobs change due to technological change or relocation, it is expected that new employment opportunities should emerge. To address these structural changes in our job picture, it is essential that training programs exist with full opportunity for participation. Training as used in this sense must equip the very young entering the elementary and secondary grades with a fundamental knowledge of math, language, and science that will prepare them to enter a technologically advancing society.

We took a step forward yesterday in the House by passing H.R. 1310, the math and science education bill. This legislation will assist in preparing students at every level of education to be better prepared for the emerging jobs of the future.

In addition, we need to enlarge and strengthen retraining and education programs for unemployed adults so as to enable them to reenter the market.●

● Mr. ROYBAL. Mr. Chairman, I rise in support of H.R. 1718, the emergency supplemental appropriations for fiscal year 1983. At last, we all seem to agree that we are faced with a crisis situation in this country. Unemployment has risen to double digits—in human terms that means that over 12 million people are without jobs. Countless others are so discouraged they have stopped looking. Our productive plant capacity has reached a postwar low. Businesses are filing for bankruptcy at an incredible pace, and thousands of our people are without the most basic necessities of life.

We recognized the need for some action on a national level last year when we passed a $5.4 billion jobs package as part of the continuing resolution. Unfortunately, the President had not yet grasped the seriousness of the situation, or did not want to admit it, and threatened a veto of the measure. We were forced to withdraw the jobs portion of the bill, but we now have to take some action soon. Fortunately, the administration has finally begun to comprehend the desperate straits of thousands of Americans. Frankly, having been inundated with discouraging facts and figures for the past couple of years. I do not see how anyone could have failed to grasp the urgency of the situation.

Can we even begin to imagine the depth of frustration felt by the jobless and their families? According to the National Institute of Mental Health, a series of studies underway since 1977 have found that declines in the work force are significantly related to reported child abuse. Other studies have demonstrated that increases in unemployment are usually followed by increases in the rates of suicide and other health problems. These findings are being confirmed by figures released from sources all over the country who are currently studying the effects of this recession. It is certainly not difficult to figure out how a loss of income and self-esteem, coupled with related events, can lead to violence, alcoholism, drug abuse, and a host of other physical and mental problems. These problems will exist even after our economy begins to recover, and at a terrible price to society. Without question, it is in the national interest to act now.

The emergency jobs bill we are considering today will not be a panacea for all our ills, but it will at least be a start. We will be putting up to 600,000 Americans back to work, in one way or another, if we pass this measure. I don't view these as make-work jobs either, but rather as productive jobs that will contribute to the strength of our Nation, both now and for the future. Let us take a look at how we would be spending the $4.6 billion this bill would allocate for jobs creation and humanitarian aid:

The sum of $1.6 billion for Federal construction and repair projects. As chairman of the Appropriations Subcommittee on Postal Service, Treasury, and General Government, I am especially gratified that we have allocated $125 million to GSA for projects that will be of benefit to both the Federal Government and to the people who will get the jobs. We were even able to provide a boost to the beleaguered auto industry by appropriating $75 million for the purchase of motor vehicles to replace those that are old and fuel-inefficient. We estimate that this will cause the creation of 1,500 auto and auto-related jobs.

The sum of $720 million for flood prevention and control and water resource projects.

The sum of $110 million for mass transit projects.

The sum of $1.25 billion for community development block grants. This is especially important to communities such as my own district of Los Angeles, which has had to let many important projects lapse due to severe budget constraints.

The sum of $400 million for economic and business development, including $200 million for loans to small businesses for plant and capital expansion and improvement and inventory enhancement. This has to be gratifying to anyone who has seen recent figures on the rate of small business failures.

The sum of $839 million for rural water and sewer development, including funds for Indian homes and communities.

The sum of $1 million for assistance to businesses and homeowners to help them meet their financing and mortgage obligations.

The sum of $240 million for natural resource enchancement, preservation and improvement projects. These funds, while only a drop in the bucket, might help undo some of the damage caused by the Department of the Interior's callous, unfeeling, and often dangerous attitude toward our public lands, our wildlife, and our resources.

The sum of $232.4 million for employment and training programs, including $75 million for retraining. It is my feeling that we are going to have to focus much more of our employment and training efforts in this direc-

tion. Technological changes and advances are sweeping this Nation, and our work force must be prepared for them. At least we are beginning to recognize this fact and are starting to deal with it.

Also included is $25 million for part-time community service jobs for older Americans. As chairman of the Aging Committee, I must applaud the recognition of the valuable contributions older workers make to our society.

The sum of $425 million for social services. We will be providing funds for programs we urgently need right now, including those dealing with alcohol, drugs, mental health, and child abuse. A large portion of these funds will be targeted to the areas of highest unemployment, and therefore greatest need.

The sum of $225 million for emergency food and shelter for the needy.

The sum of $5 billion for the unemployment compensation trust funds.

While it is true that the targeting of specific projects is not always perfect, it can truthfully be said that the vast majority of the funds contained in this measure will go to worthwhile, necessary projects. Most of the activities will fill an important void in existing funding priorities, while providing thousands of jobs in the very occupations that have been hardest hit by the recession.

I urge the passage of H.R. 1718. We cannot ignore the desperate situation in which so many Americans are finding themselves. We must get this country back to work—there will be no economic recovery until this is accomplished. Our society will be feeling the effects of this recession for a long time to come. We must do what we can to minimize the impact. It is past time for action.●

● Mr. HEFTEL of Hawaii. Mr. Chairman, I rise in support of H.R. 1718, the first step in this Congress resumed battle against the recession and its resulting unemployment and poverty.

Mr. Chairman, this measure does not please any of us completely, yet it is a program which I believe permits us to get the beginnings of aid quickly to many of those who need it desperately.

Hawaii's jobless banks are filled with those who have remained without employment for extremely lengthy periods. Seventy percent of the unemployed have remained so for 5 weeks or longer; a full 30 percent have been jobless 14 weeks or more. Those who are suffering as a result of Honolulu's ailing construction industry will certainly benefit from the infusion of community development block grant (CDBG) and other construction funds provided by this legislation.

I am, however, deeply concerned that the measure before us will not adequately aid the rest of our long-term unemployed. A more direct and substantial means of providing jobs must be produced to assist these structurally unemployed in Hawaii and the rest of the Nation.

Accordingly, Mr. Chairman, I urge my colleagues to swiftly adopt H.R. 1718, but just as swiftly develop further legislation with far greater job-creation value.●

● Mr. McDADE. Mr. Chairman, I rise in support of H.R. 1718 providing $4.6 billion in emergency expenditures to create new jobs and to urge its approval by the House.

Mr. Chairman, the committee report cites a 13.6 unemployment rate in my home State of Pennsylvania. In some sections of my congressional district it is nearly double that figure. And for those of us who have wished prosperity and those of us who have supported policies we thought would speed that prosperity these are cold and grim and disappointing statistics. For in themselves they contain those who have given up the hope for work and those who are now saying "I'll do anything for a job." They do not speak to those just entering the job market fearing their skills will have no place to be put to the test.

We agreed to meet those needs and I believe today this bill takes a positive step in that direction. I know there will be members and critics who will deride this bill as another make-work bill. In these days of high unemployment the term make-work carries less of a stigma than in times of prosperity. We have to make work and we have to make more work than is even dreamed of in this bill if our Nation is to prosper.

Before the Members of this House raise the roof over the issue of make-work jobs, let me ask you to take a look at the $5 billion you are about to appropriate to keep the unemployment compensation fund solvent and keep benefits flowing to the unemployed. Ask yourselves whether or not we should put those people to work or whether we ought to meet here again in 6 months and vote for another multibillion-dollar replenishment.

My friends, I call your attention to the segments of the bill relating to the Interior and related agencies appropriations. We provided funds for activities with a quick payout. We funded programs that were already in place and ready to go. and we funded programs where we knew that there were a meaningful number of jobs created for the money spent.

We added funds for the successful weatherization program. This program not only helps save energy it puts roughly 50 people to work full time in a construction program for every million dollars we spend. We added $50 million for cyclic maintenance to the National Park Service, relying heavily on the administration's priority needs and committing money now for this work in time for the spring construction season. Likewise we added another $45 million for maintenance and construction needs of the national forest system, another $40 million for badly needed Indian health construction and $25 million for cyclic maintenance at the Nation's fish and wildlife refuges and hatcheries.

This bill also contains significant outlays of money for our existing community development block grant program, urban action grant program and to the programs of the Economic Development Administration. Mr. Chairman, I can think of no quicker way to get jobs, especially construction jobs, underway on vital public improvements than to expand the community development program. To those who believe as I do that the Federal dollar is a carrot on the stick that builds private investments into public expenditures let me suggest that the urban action grant program and the economic development grant program leverage private dollars from a tight economy that otherwise might not be invested. These programs have proven track records of generating as much as five and six private dollars for every one Federal dollar invested in the creation of new jobs.

Mr. Chairman, the most optimistic among us must concede that at most we may be creating 300,000 jobs. The most pessimistic among us may say that is not enough. Both are right. But I will vote for this bill rather than sit idly by and wait for our appropriations committee to come forth with the next installment in the replenishment of the unemployment compensation fund.

This bill is not perfect. It contains no new ideas on job creation. It relies mostly on existing programs. It requires few if any new structures. I intend to support it and I am hopeful that the investment we make here today will create new jobs tomorrow.●

● Mr. HAMMERSCHMIDT. Mr. Chairman, last Wednesday, the director of the Employment Security Division in Arkansas notified me that as of this Friday, March 4, due to insufficient funds they would be forced to resort to mailing IOU's to over 70,000 unemployed citizens. Fortunately; however, information was received today advising that $8,030,461 has been allocated, to Arkansas in addition to the $6,524,000 which was provided earlier. This total of $14,554,461 will now be sufficient to provide funds through March 15. I know my colleagues will agree that it is preposterous to think that unemployment checks would not have been issued had this not occurred. It is my understanding that at least 29 States were similarly situated.

The $5 billion for advances to the unemployment trust fund contained in

this bill is indeed an emergency supplemental in the truest sense of the word. These moneys will enable Congress to fulfill a fundamental responsibility to the unemployed people of this Nation and their families. It would be a cruel paradox if this body fails to act swiftly in securing these funds and averting this crisis. Congress must not show such insensitivity to the complicated and difficult plight of the unemployed worker.

Amidst the many provisions that have been tacked on to this appropriation measure, it is important that Members be alerted to the critical nature of this $5 billion for urgently needed advances to the Federal and extended unemployment accounts. I deeply regret that this important issue has not been considered promptly on its own merits rather than being buried under other extraneous concerns.

Hopefully my colleagues will approve this much needed expenditure today to avoid the recurrence of this situation again on March 15.●

● Mr. HARKIN. Mr. Chairman, today we are considering an emergency jobs bill that will hold out hope to millions of unemployed people across the country, and will offer help to some. For Democrats, it is a victory in that the President has finally faced reality and admitted that something must be done to relieve the suffering of the men, women, and children who have been affected by the worst recession since the Great Depression. Contrary to his past statements, Mr. Reagan has come to realize that the Federal Government does have an important role to play in our country's economy. In fact, during a time such as this, the Government's role in stimulating the economy is crucial.

It is estimated that the legislation we are discussing today will create 600,000 jobs and will not add to the budget deficit. While this is commendable, it will scarcely make a dent as far as the 10 million and more unemployed are concerned. Much more is needed to correct the damage done during the past 2 years. The best way to reduce the budget deficit is to reorder Government spending in a more rational manner, and create jobs that will take people off the unemployment rolls and turn them into productive taxpayers and consumers.

Both Republicans and Democrats say they are committed to a second jobs bill that will go further than this one. I, for one, am disappointed in the decision to limit the scope of this bill. One of our major concerns should be to reduce the startup time necessary to get projects going so that those who need help receive it as soon as possible. This problem has plagued previous public works programs, and delaying action by waiting for Congress to pass yet another bill will mean that those who have borne the brunt of the economic hard times must wait even longer for relief.

Under this bill, an extra $4.6 billion is provided for fiscal year 1983 programs to create jobs in repair and rehabilitation of public facilities, resource conservation projects, park improvement and maintenance, and urban and rural development programs. Humanitarian aid is also provided in the form of emergency food and shelter services. Major funding areas include: $1.25 billion for community development block grants, to be divided on a 70 percent urban, 30 percent rural basis; $720 million for Federal land and water projects; $225 million for food and shelter distribution, including $100 million for the women, infants, and children program (WIC); and $207.4 million for Job Corps, summer youth employment, and displaced worker training under the Jobs Training Partnership Act.

The measure also provides $5 billion to the Federal unemployment compensation trust funds.

Unfortunately, another problem common to past jobs bills is present in this one; that is, the inclusion of "pork barrel" programs. These programs generally benefit a very limited group, and are of questionable value in terms of creating jobs where they are most needed. For example, over one-half billion dollars are provided for water projects to be carried out by the Army Corps of Engineers and the Bureau of Reclamation. Much of this funding cannot be effectively spent during the remainder of this fiscal year, and more jobs per dollar could be produced by putting the money in other areas. Even worse, by not specifying which water projects are to be funded, there is no assurance that the money will not be spent on costly boondoggles such as the Tennessee-Tombigbee Waterway, the O'Neil unit, and other impractical ventures. Previous public works/public service programs developed a bad reputation in the minds of many due to a lack of quality control and safeguards to assure that money was spent in the best possible way. I am hopeful that the next jobs bill we consider here in Congress will be more stringent in targeting its funds.

Unemployment places a tremendous strain on our country. Its effects are felt from the corner store to the solvency of the social security system. For many, unemployment means homelessness, and the breaking up of families. Recession is not just numbers on a chart; it is broken lives, pain, and suffering. I have talked with people in my home State who have told me of their sense of hopelessness, and their willingness to do anything to get a job. I have received letters from some who speak of heart attacks and even death in the family due to the pressure caused by economic hardship. In 1980, Iowa's average unemployment rate was 5.7 percent. In January 1983, the average had risen to 10.9 percent. Delinquency payments on Farmers Home Administration loans doubled between 1981 and 1982.

Even if every available job were filled tomorrow, we would achieve only a slight reduction in the unemployment count. With the national unemployment rate at 10.4 percent, the number of unemployed persons most likely exceeds the number of vacant jobs by about a factor of 10. Thus, the current situation cannot be blamed on the unemployed lacking interest in work. Even training, though necessary, is not the answer. The economy is simply not generating enough jobs to go around.

Although inflation has dropped significantly during the past 2 years, I do not believe the country is better off. I do not believe that a sound economic policy would have created the circumstances we are in today. I believe the past 2 years prove that it is wrong to look at the economy simply in terms of numbers, indicators, and statistics. People make up the economy. If economic policy ignores the human aspect, as I believe it has during the past 2 years, our economy will not work.

This emergency jobs bill should be passed, but our larger effort here in Congress must be to formulate an integrated economic policy that will create jobs by getting the economy moving again.●

● Mr. BIAGGI. Mr Chairman, at long last—after we see 11 million of our fellow citizens endure the indignity of unemployment—at long last after we see men and women reduced to the indigity of homelessness—at long last when soup kitchens—the symbol of despair from another era—begin sprouting up in the neighborhoods of our Nation—are we finally able to emerge with a bipartisan response—and that is the bill before us, H.R. 1718.

This bill is appropriately titled, "the jobs bill," although it does provide a great deal more. However, it is proper to give it this designation because its emphasis is on tackling the unemployment problem—the only way we can—by providing funds to put people back to work. Unemployment has become a gaping national wound which is infecting our national economy—and our sense of national pride. Last October, unemployment broke through the 10-percent barrier—something people always feared but never felt would actually happen. A closer examination of the unemployment problem as presented by the Appropriations Committee makes for an even more graphic situation.

Unemployment among black workers has jumped to 20.8 percent;

Unemployment among hispanic workers has jumped to 15.5 percent;

Unemployment among women who maintain families has jumped to 13.2 percent; and

Unemployment in the construction industry is now at 20 percent.

Perhaps the most devastating statistic I have seen is that we are now spending some $32 billion annually on unemployment compensation. Finally with the consideration and hopeful passage of H.R. 1718—we can begin to spend billions on employment compensation.

All told H.R. 1718 appropriates $4.6 billion in additional funding for this fiscal year for programs to create jobs in repair and rehabilitation of public facilities and a host of other important work—creating endeavors. Some of the components of this $4.6 billion include some $1.25 billion for community development block grants which will be targeted to our urban areas suffering from high levels of unemployment or structural unemployment. Another $207 million will be provided for Job Corps, summer youth employment, elderly employment and retraining of displaced workers under the Job Training Partnership Act. It is felt that the job-creating features of this legislation will provide anywhere from 300,000 to 600,000 bona fide new jobs for those Americans who want so desperately to work.

It makes both good fiscal and common sense to target a portion of these jobs to trying to fix our decaying infrastructure. There are far too many bridges in this Nation that are unsafe for normal commuter requirements. Our highways and sewers are deteriorating—we have too many schools laden with asbesto which must be repaired. The list of available work goes on and on in every community in this Nation. Therefore people's apprehensions about public service employment being make-work type of jobs are unfounded. The jobs which would be created under this bill, and more importantly the funds expended for jobs in this bill, will make for a good investment.

There are a number of other provisions related to this part of the bill that I would like to address. I am pleased that the committee chose to disapprove a deferral request of $244 million in fiscal year 1983 funding for urban development action grants. UDAG has been a highly successful program in my home city of New York—and the decision of the administration not to provide fiscal year 1983 funds was a matter of great concern to me.

As a main cosponsor of the 1978 and 1981 Older Americans Act, I am especially supportive of the committee's decision to provide an additional $25 million in funds for title V the Senior Community Service Employment Act. There are few Federal programs which have been more successful over time than title V. Today some 54,200 low-income elderly are employed in a variety of public service jobs in the communities and more than one-half of them are working with other seniors. Last year—Congress overwhelmingly reaffirmed its support for title V when it voted to override the veto of the President to the supplemental appropriations bill which had restored $277 million in funds for this program. Earlier the fiscal year 1983 administration budget had proposed eliminating separate funding for the program. However, the CONGRESSIONAL RECORD is complete with supportive statements on a bipartisan basis for title V—as an employment program that works. The additional $25 million proposed as part of this bill should provide an additional 4,900 jobs for low-income elderly and will allow this program to have some needed expansion.

I might note for the record my continued concern about the revision made in the way title V funds are distributed and would hope that by the time we reach the fiscal year 1984 appropriations for this program, we could return to the original formula of 76 percent national contractors and 24 percent State and area agencies.

I believe that the job-creating features of this legislation are going to help restore people's faith in the fact that government does have a role to play in alleviating the problems of unemployment. It is ludicrous to expect the private sector to assume all responsibilities for the employment of individuals especially without special incentives to do so. If we are serious about reducing unemployment we need a partnership of purpose between all levels of government and the private sector. It should be a concerted goal and should be pursued with vigor.

Let me also note that any efforts we embark on to reduce unemployment will have corresponding benefits for the social security system which is in desperate need of new workers to provide contributions to the trust funds.

The committee has recommended that a total of $425 million be provided for increased funding for a variety of social services including low-income home weatherization—social service block grants, community services block grants, community and home health services, maternal and child care, and drug abuse and mental health programs. I consider this to be a most urgently needed commitment on the part of government to the growing human needs developing as a result of these difficult economic times.

It is estimated that by providing additional funds for such important services as child abuse and neglect prevention day care—nutrition education and other programs that this too can produce new jobs, as many as 10,000 temporary jobs to be exact.

A total of $225 million is provided in this legislation for emergency food and shelter services for the unemployed and needy. Almost one-half of this total is directed toward the all important WIC program which provides needed nutritional food to high-risk women and children from low-income families.

A vitally important provision of this bill is the allocation of some $75 million for the purchase and distribution of perishable surplus foods. For the past several months I have been deeply involved in trying to rectify a serious shortcoming in the USDA surplus commodity food program which was threatening its very effectiveness. The Department is estimated to spend in the vicinity of $2 billion a year purchasing and storing commodity foods. Money for distribution of said commodities has not been provided by USDA and is left to State and local discretion. The results, with few exceptions have been disastrous. Thousands upon thousands of tons of foods such as cheese and butter sit in warehouses—rotting because localities and organizations do not have the money necessary for distribution. In response, I introduced H.R. 1162 and H.R. 1513, which called upon USDA to include actual distribution of surplus foods within their budget.

While people are going hungry in our Nation—USDA estimates that there is more than 1 billion pounds of nonfat dry milk, 762 million pounds of cheese and 436 million pounds of butter sitting in warehouses. This is an absurd situation.

The bill before us takes some important steps in relieving this situtation. It provides some $75 million to be used to "purchase, process, and distribute surplus perishable commodities." It would be my sincere hope that these funds will be used effectively to allow neighborhood organizations to be provided with direct aid for distribution of surplus foods including but not limited to funds being used to establish more localized distribution sites. It is time to get surplus food to the people—where it is needed.

Let me also make a reference in support to the provisions in this bill aimed at providing extra help for those of our citizens who because of the times have to rely on soup kitchens and food banks for their daily meals. Many of these same people have had to resort to emergency shelters to live. H.R. 1718 provides $50 million to be made available to private voluntary organizations for emergency food and shelter programs for the needy.

All in all—the bill before us is a bill of conscience. We are all having to admit—perhaps from different per-

spectives—that we are in the midst of severe economic times—which is presenting genuine hardships to millions of American people. There is only so long one can ignore these dramatically human problems. There is only so long when relief can be held hostage by ideology or political considerations. There is only so long that government can abdicate on its responsibilities to help those of its citizens in need. Passage of this legislation today will send an important message that we view reduction of unemployment and alleviation of human suffering as our single most important priority. It would be advantageous for us to pass this legislation now—at a time when economic recovery is beginning to occur. The combination could provide real improvements in the lives of many Americans.●

● Mr. BROWN of California. Mr. Chairman, we have before us today a bipartisan emergency supplemental appropriations bill which will, it is hoped, help to stimulate the economy. I am pleased that both Congress and the President now agree that we must act.

While this bill has been formulated, I have been listening to the arguments on both sides. In addition to creating jobs, this bill provides money for relief services, including $425 million for social programs and $225 million for programs to feed and shelter victims of the recession. But the severity and length of the recession have created an unbearable strain on the social service budgets of Federal, State, and local governments, and private charitable organizations. Due to previous budget cuts, this problem has been exacerbated.

Anywhere from 300,000 to 600,000 desperately needed jobs will be created by this bill. But it is not enough in the face of 11 million unemployed, nor is the bill specifically targeted to high unemployment areas. This bill concentrates primarily on forward funding of Federal construction projects. While these projects are needed and will be of value, the problems of youth, minorities, and women who have been hurt severely by the recession have not been addressed.

While jobs will obviously be created, I am also concerned about who will get them. It does not appear that it will be the long-term unemployed, nor the unskilled. Far too little money will be spent on training and retraining. I fear this is merely a temporary, stop gap measure, that while perhaps needed, will have little effect upon our long-term fundamental economic problems.

Mr. Chairman, this bill is a collection of projects and programs designed to deal with the current economic emergency. Some needed projects are funded, such as: the much needed additional $5 billion for unemployment compensation; the $545 million for flood prevention and damage repair projects which will help to offset recent damage done by the torrential rains to southern California; an additional $75 million has been appropriated to the new displaced workers program; $150 million goes to the low-income weatherization project; $75 million is allocated for surplus commodity distribution, a program I am intimately familiar with and endorse wholeheartedly; and $243 million for family housing for the military, including $5.7 million for March Air Force Base.

Let us not delude ourselves, however. These are the very same programs that have been unhesitantly cut over the last 2 years. This bill is just enough in the right direction to perhaps be of some help to those who have been adversely affected by the recession.

But we have far too many unanswered problems which we must address. I understand that phase II of the emergency supplemental appropriations bill will be proposed shortly, and I hope that it will address these problems. Like many others, I have been pleased to hear the good economic news of the last few days, and I am cautiously optimistic that the worst recession since the Great Depression may be over. However, unemployment traditionally lags behind a recovery, and so we should not forget that the need to create a wide spectrum of jobs is paramount.●

● Mr. LOWERY of California. Mr. Chairman, I, along with each and every one of my colleagues, am deeply concerned with our current unacceptably high unemployment rates, and feel that we must seek the most effective way to deal with this problem. Unfortunately, there are several reasons why this legislation is definitely not the most effective solution.

As others have mentioned today, there is a real question of timing. There is increasing evidence, culminating in the most recent economic indicators, that we are, on the verge of an economic recovery in this country. The most effective jobs program of all is sustained economic growth.

A second very obvious problem is the distribution of funds. Are the funds in this bill really going to the areas of the country that have the highest unemployment rate? It certainly appears that they are not. Is this effective legislation? I feel that it is not.

Third, there is the matter of the cost per job created. Estimates range from a low of $1,000 per job for summer youth program, to a high of $27,500 for the Corps of Engineers. While I do not wish to criticize any specific group, the purpose of this legislation is meet neglected urgent needs, and we are looking at unprecedented Federal budget deficits. Are we really appropriating these funds in the most effective way possible to meet these needs?

These are general issues. As a member of the Banking Committee, I wish to address some more specific provisions.

First of all, this bill appropriates $500,000 for administrative expenses for HUD to implement a homeowner's emergency mortgage assistance program, effective upon enactment of such a program. And what is the status of the legislation that would enact the program? Hearings have been concluded. The subcommittee markup will be held next Tuesday. Obviously there is a long way to go in the legislative process. Why are the administrative expenses covered in this bill, and not in H.R. 1330? Why are we creating a bureaucracy to administer a program that does not yet exist, and in fact may not ever exist? Most important, these funds, in and of themselves, do nothing to provide new jobs.

Another $500,000 is appropriated to the Department of the Treasury under this legislation for administrative expenses to develop plans for three new entities—a Reconstruction Finance Corporation to address business problems; a Home Owners Loan Corporation for housing problems; and a Farm Credit Agency to meet the problems of farmers. Frankly, I question the choice of Treasury for this planning, in spite of the fact that the legislation does specify that "in preparing the plans, the Department of the Treasury is authorized and expected to obtain the views of experts in other government departments." Would it not be more direct and effective to have HUD, with its expertise in housing finance, develop plans for a Home Owners Loan Corporation? Beyond that question, do we need a Home Owners Loan Corporation? There are numerous HUD programs to assist housing, and Federal regulators and insurance funds for those financial institutions that finance housing. I submit to my colleagues that this sum, although relatively small, does not have a positive short-term jobs impact.

We all want to help those Americans who, through no fault of their own, find themselves unemployed. We owe it to these same people to provide assistance in the most responsible way possible. This legislation is not the answer.●

● Mr. ANNUNZIO. Mr. Chairman, this is the fourth time in less than a year that the House of Representatives has had the opportunity to pass legislation to significantly help the Nation's unemployed. Our past three efforts have been thwarted by vetoes, the Republican Senate, and threats of vetoes. Now, once again, we have a bill which I sincerely hope will be the start of some meaningful expenditures of limited Federal Government funds.

I agree with many of my colleagues that this bill does not go far enough to help those who have been ravaged by this recession. But I also believe that we must be realistic. Let us not sacrifice what we can obtain now in the hope of getting more. Let us get this bill enacted, and then work from there.

I have advocated, supported, pushed for, and endorsed programs similar to those outlined in this bill for years. It gives me great satisfaction to see them so close to reality. I have always said that the beauty of public improvement programs is that results ultimately save the amount expended many times over. It is a simple and clear proposition of having to spend money to save money.

The provisions of this bill will not just get people back to work and provide needed social services. While both of these ends are highly desirable and long overdue, the programs in this bill will also provide needed tangible services to this country. Activity which you can see and results which you can touch.

We are not talking about digging ditches and filling them up again. We are talking about putting people to work repairing, improving, and maintaining public facilities that need attention. We are talking about creating up to 600,000 jobs within 90 days from enactment.

And still there are those who cry "make work" at the programs outlined here. Let me ask them, What takes more work, repairing a bridge or rebuilding one which has collapsed? And what takes more money?

With programs such as these, time is the worst enemy, both in human terms and in terms of what is to be physically accomplished.

Wait—and the cost goes up monetarily and in human suffering.

Wait—and this $4.6 billion will be swallowed up elsewhere.

Wait—and the opportunity is lost, especially given the past performance and monetary preferences of this administration.

I fear that trying to amend this legislation to accomplish more will jeopardize its enactment. Let us get this one through and prove that it is the Democratic ideas that work for this country. And then let us work at getting more legislation to do more.●

● Mr. GONZALEZ. Mr. Chairman, yesterday all of us heard that the so-called leading economic indicators suggest that economic recovery is at last on the horizon. If it is, we owe no thanks to the administration. We owe thanks to the fall of oil prices, which puts money in the pockets of our people. And we owe thanks to ourselves that the Federal Reserve heard the results of the last election, and moved to stop killing the economy.

Even if we have a strong economic recovery, and even if it is now underway, it will take months, even years, to undo the human damage of these past 2 years. It is a long and uncertain way between an economic indicator and a decent job. It is a long and treacherous route between the promise of a better tomorrow and the reality of being able to put a meal on the table.

There are probably 2½ million Americans who have been looking for jobs for better than 6 months, with no success. It is an absolute certainty that we have no less than 5 million citizens who have been jobless for better than 3 months. For these millions, and for the millions of others who do not draw unemployment benefits—and for the added millions who will soon find themselves broke because of long-term unemployment—recovery is already too late.

It is too late for Toledo, whose Republican mayor only this week appealed for food, because the city is overwhelmed by desperate need. It is too late for Pittsburgh, where mass mortgage foreclosure is already a reality. It is too late for the homeless who hover about our cities in vast and growing numbers. It is too late for the half million who lost their homes during the closing months of 1982.

That is why we have this jobs bill. And that is why this bill represents only a start toward repairing the damage of a callous, indifferent policy of economic calamity.

The committee has been wise to provide a $1.25 billion expansion of the community development block grant program. As chairman of the Subcommittee on Housing and Community Development, I can assure the committee, and assure the House, that these are funds that can be used immediately. Every city in the country has an efficient, effective planning process for community development block grant funds. This planning process has generated concrete programs that need only funding in order to put in place. This process also has administrative agencies and all the necessary skills in place. Expanding CDBG is one of the fastest and most efficient ways of meeting two needs—creating jobs, and helping cities and towns meet some of their most urgent needs.

I am happy to note also that the committee has anticipated the enactment of an emergency mortgage assistance program, which I expect to report from my subcommittee early next week. By providing funds to set up the necessary administrative machinery, the committee has made it possible for the mortgage assistance program to get underway promptly, once the authorization can be cleared.

Let me commend also the action to provide $50 million to assist in emergency shelter operations, a matter of great need in a nation that is overwhelmed by the need for shelter for homeless people.

Last December, my subcommittee held a hearing to learn about the plight of homeless people. This was the first hearing of its kind since the Great Depression. What we learned was that the homeless are ordinary people. They are people who would work if they could only find jobs. These are people who have worked all their lives, who have saved and done their best. Some, even with fine educations, could find no job at all; some not only lost their jobs, but found that the companies they worked for had disappeared altogether. Women, and especially women with children, find it difficult to locate emergency shelter. The needs are vast. We came close to getting an emergency shelter program in the last Congress, only to see it abandoned because of adamant opposition from the President. This time, we must not fail. I want to tell the House that I expect my subcommittee to report a $100 million emergency shelter authorization, in H.R. 1330, the Emergency Housing Act.

The bill before us today is only a beginning. There is much that remains to be done. As I have indicated, my own subcommittee is fashioning a program that dovetails with the bill before the House today. In H.R. 1330, which we will report out of subcommittee next week, there is funding for emergency mortgage assistance—for which administrative groundwork will be laid through today's legislation. Also, that bill will provide for emergency shelter, building on what is in today's bill. Later this month, my subcommittee will report H.R. 1, the Housing Act of 1983, and it will contain an expanded community development block grant program, again dovetailing with what is being initiated today.

We have to remember, all of us, that the same administration that now accepts this legislation, opposed nearly identical efforts only a few weeks ago. This is only because they see enactment of today's bill as politically necessary. It does not mean that there has been a sudden change of heart in the White House. Far from it. For when we get down to the real business of economic reconstruction, and when we get down to the real efforts to return fairness and decency to our Federal program, we can expect a hard fight every step of the way. The people who brought disaster upon the land have not repented. They are only retreating a step, in the face of the wrath of the people of this country. Let us resolve that today's step will only be the first of a long road back, a road to decency and prosperity, a road toward a rebuilt confidence among the sorely abused people of our country.●

● Mr. STARK. Mr. Chairman, I, too, rise in support of this jobs bill and am paticularly gratified to see a provision in this legislation which will provide $50 million in emergency aid for the homeless.

There are now some 2 million homeless, many of whom are middle class families, and their numbers are growing at a frightening pace. Local communities are being literally overwhelmed with requests for food and shelter. Private charities by themselves cannot bridge the gap because, as the Urban Institute points out, some 300,000 private charities will lose $33 billion in Federal aid between 1982-85. The administration's budget documents show that they are planning on several more years of high levels of unemployment.

Thus, knowing that the problem of the homeless will be with us for the next several years I will be asking the Public Assistance and Unemployment Compensation Subcommittee, on which I serve, to enact permanent legislation—H.R. 927—with a different administrative formula. The goal of any proposal should be to get the money out to the shelters as quickly as possible with the least amount of administrative costs. I believe that utilizing the existing State welfare agencies will do just that. The State welfare agencies have an existing structure designed to address the kinds of needs about which we are concerned. In fact, a number of States, such as my home State of California, as well as Michigan and New York, have already set up quick-response programs to provide for the homeless. Not only can the States provide fast and cost efficient aid but they offer a sure means of accounting for the expenditure of Federal funds.

I hope that the Congress will soon be able to consider my proposal to place this assistance for the homeless on a more orderly basis.

Mr. Chairman, I would also like to make it clear that domestic violence shelters would not be precluded from applying for the money contained in the emergency food and shelter provision contained in this bill.●

● Mr. RODINO. Mr. Chairman, I strongly support the emergency supplemental appropriations bill before the House, and also the four amendments to it which have been made in order.

I think we all recognize that this measure is only the first step in the recession relief and jobs creation program we are working to enact. It certainly does not solve the many problems we face, but it offers some immediate and most essential aid.

Of particular concern to me is the humanitarian assistance provided for victims of the recession—those of our citizens who every day struggle to find food and shelter to keep alive, and who have been deprived of vital health, education, and social services. The bill contains $225 million, and of this $100 million will go for the women, infants, and children supplemental food program. New Jersey's share should be about $2 million, enabling the State to serve an additional 6,000 individuals; $75 million is provided for the purchase and distribution of agricultural commodities and $50 million for aid to voluntary organizations to provide food and shelter. These funds will be distributed according to need, and with New Jersey's growing and increasingly organized network of food centers we should be able to quickly use funds available.

In the area of employment and training, $232 million is available for four existing programs: the Jobs Corps, the summer youth program, displaced workers, and the Older Americans program. New Jersey is likely to receive about $5.7 million—$3.3 million for summer youth, $1.7 million for the displaced workers program, and $700,000 for the Older Americans program. It is estimated that 3,900 more young people will be placed this summer as a result of these funds and that 540 more displaced workers will be assisted.

It is anticipated that $12 million will be allocated for repair and improvements at Fort Dix, Fort Monmouth, and Maguire Air Force Base, thus creating employment in the housing and construction industries. We expect about $3.8 million under the low-income weatherization program which can certainly generate jobs speedily.

The provisions authorizing $1.25 billion for the community development block grant program are intended to create 80,000 jobs in the light construction industry nationally. Of this amount, $250 million will be targeted to high unemployment entitlement areas. New Jersey can expect to receive about $42 million under this program—$39 million in entitlement funds and $3 million in small cities funds.

One most encouraging provision in this bill is the inclusion of $50 million for the urban parks program, which was not funded in fiscal year 1983. The program provides matching grants to local governments to repair recreational facilities in urban areas on a competitive basis.

Mr. Chairman, the four amendments to be proposed will further improve this bill in several areas. Representative OBEY's amendment to add $200 million for health services to unemployed and destitute families will permit 1 million additional patient visits over the next 12 months and create about 10,000 new jobs. Representative WISE's amendment to delete funding for the Stonewall Jackson Dam, described by him as "a wasteful construction project in my congressional district," is certainly important in trying to eliminate unnecessary spending.

Representative EDGAR's amendment would target 75 percent of all discretionary funds in the bill to communities with high unemployment, so that transportation, construction, infrastructure, and other specific projects could be directed into these areas. New Jersey's 10th District should greatly benefit from such targeting, for our average unemployment rate in the state for 1982 was a distressing 9 percent.

Of special importance to New Jersey is Chairman HOWARD's amendment to the bill's mass transit provisions. It would increase total funding for mass transit capital projects from $110 million to $400 million, partly by disapproving the requested deferral of $229 million for mass transit generated by the gasoline tax bill. Of the restored $229 million, New Jersey would receive approximately $12 million. The amendment would provide $171 million for the discretionary grant program and eliminate all earmarking of projects in the committee bill. Since none of the earmarked projects are in New Jersey, and since New Jersey has been able to compete effectively under the discretionary grant program in the past, it is likely that this amendment would increase funds for New Jersey's mass transit needs.

Mr. Chairman, this is a bill which should have been passed in the last Congress. Let us move swiftly to bring about its enactment as soon as possible to meet the desperate needs of so many of our citizens.●

● Ms. FERRARO. Mr. Chairman, last December this House considered a jobs bill. The need was clear—more than 11 million American men and women were out of work—a postwar record.

Although, I strongly supported that bill, I was concerned, and I expressed concern, that the bill would not provide job opportunity for a major sector of our work force—women.

A lot has happened in the intervening 3 months. The administration has come to recognize, as we did then, that unemployment is a severe and crushing condition that must be addressed.

And the jobs bill on which we vote today is different from the December version. It clearly recognizes the important role women play in our economy.

The leadership of this House and the chairman and members of the Appropriations Committee have done an outstanding job in making this bill one which will give new hope to all unemployed Americans.

Others have spoken here today about the overall impact of this legislation. I just want to highlight the provisions which are of special impor-

tance to women—in the work force and on the unemployment rolls.

Women are 43 percent of the Nation's work force and they are over 40 percent of the unemployed. The unemployment rate for women who are supporting families on their own—15.5 percent of all households—is 11.7 percent—well about the overall jobless rate.

Modifications made in this legislation will directly assist women who need jobs and will also help women and families who have been deprived of vital services. These services have been squeezed by Federal budget cuts, even as the need has been increasing, due to unemployment.

H.R. 1718 contains about $700 million specifically designed to create jobs while also providing services to needy people.

In addition, H.R. 1718 allows local communities the flexibility to use community development block grant money to create even more service jobs, as well as providing money for light construction and infrastructure repairs.

A coalition of unions and women's organizations fought for the removal of the 10 percent services expenditure cap on community development block grants. Let there be no mistake about their intention and our intention. The intent is to permit a greater share of the $1.25 billion emergency allocation to CDBG to be used to create useful work in child care, health care, and other areas of great need.

Immediate job openings for thousands of women will result from this combination of enriched funding for service programs and community development block grant flexbility.

As I said in December, when I addressed this same subject, there is no reason why women, too, cannot benefit from the creation of construction jobs by this bill.

No reason except the fact that, right now, 80 percent of all women work in just 20 job classifications. Only 6 percent of highway and street construction workers are women.

No reason except a traditional pattern of discrimination which this administration is virtually ignoring.

But while we work to break down these employment barriers, women need jobs here and now.

So, Mr. Chairman, I enthusiastically endorse this bill as an excellent first step in our fight against unemployment. This step assures America's women workers a fair chance to participate in economic recovery while meeting their immediate pressing needs.●

● Mr. WEISS. Mr. Chairman, we are today considering the emergency supplemental appropriations bill, H.R. 1718, which would provide a $4.6 billion in fiscal year 1983 to create jobs in repair and maintenance of public facilities, parks, and conservation projects, and in urban and rural community development programs. Although this legislation is inadequate in many ways and not enough of the jobs created will go to women and minorities, I support this emergency legislation as a means of helping to relieve the human misery brought on by intolerable levels of unemployment, and I urge my colleagues to join with me in passing this sorely needed initiative.

The need for this emergency jobs bill, measured in the deep despair of nearly 12 million unemployed Americans, is staggering. The administration's myopic and ill-advised economic programs over the last 2 years have not delivered the prosperity based on the private sector initiative that Mr. Reagan promised. On the contrary, we now have the largest number of unemployed, involuntary part-time workers, and discouraged workers who have dropped out of the labor force since the beginning of World War II.

Perhaps more telling is the fact that the numbers of individuals and families ravaged by joblessness who find themselves homeless, forced to live with family, friends, or in the public facilities, continues to grow. This is the bitter legacy of administration policies that put the lowering of inflation rates above the health, safety, and dignity of millions of Americans.

H.R. 1718 deserves our support not only because it provides jobs; it also provides $275 million of badly needed humanitarian relief for those Americans most desperately in need of aid.

However, we cannot let the red lights of alarm over our current economic decline and dismal levels of unemployment blind our vision of our Nation's long-range economic and employment needs. Cyclical change notwithstanding, many projections of the future include changing demographic trends leading to a tightened labor market and the continued transition of our economy toward the production of high-technological goods and labor-intensive services. If these projections are correct, our Nation will benefit tremendously from the public investment we make now to educate, train, and retrain our labor force to adapt to these new tasks. Moreover, we must make a special effort to expand, not limit, the paths toward economic achievement of those now at the bottom of the economic ladder. The economic revitalization of America will require the participation of all our citizens, not just a privileged few.

The future manpower needs of our society, and consequently the economic viability of the Nation, require a bold legislative package that emphasizes training and employment programs and public infrastructure improvements. Less than a year ago, I offered several principles for a national policy to achieve full employment. I offered them in light of a then-astonishing 8.8 percent level of unemployment. With unemployment now well above 10 percent and showing no signs of abating significantly in the near future, I again offer these proposals.

First, increased appropriations for current training and employment programs that are designed to increase self-sufficiency of the disadvantaged and meet the present and future skill needs of the economy. The degree of national commitment to these programs is vastly more important than programmatic changes in structure, administration, and ideology.

Second, expand existing youth programs to provide work experiences. We have learned that supported work experiments for youth have led to a reduction in crime. Why, then, do we allow the teenage unemployment rate to remain over 20 percent? In New York City, the unemployment rate of minority teenagers is over 45 percent, as it is in many cities. We cannot afford this loss in potential productivity. Yet, while jobs for youth are needed, we must not allow them to become second-class workers by paying them subminimum wages, as the Reagan administration has proposed.

Third, establish a structure for countercyclical public works projects that enables all levels of government to plan rationally necessary improvements in our Nation's infrastructure so that they can be rapidly undertaken during periods of rising unemployment.

Fourth, additional discretionary funding should be provided to State and local employment programs to assist older, dislocated, or reentering workers through specially designed education, training, or retraining programs; through improved labor market information, placement, and counseling; and relocation assistance. For these forms of transitional aid, a matching grant or voucher could be given directly to the individuals considered most in need and most likely to benefit.

Fifth, countercyclical public employment programs should be reestablished to serve as employer of last resort for people who have exhausted their unemployment insurance benefits, and phased out gradually whenever unemployment rates decline to below a specified level. In a society in which the work ethic is so widely and strongly held, we must not neglect public employment programs, especially as unemployment lines remain at record lengths.

Sixth, continued experimentation with partial wage subsidies for targeted groups of disadvantaged workers such as the handicapped should be attempted and evaluated. This form of assistance may be necessary for some

willing workers with special handicaps to acquire jobs and sustain employment.

I fully realize that these suggestions may be considered bold and consequently intimidating to some. But the magnitude of the problem of unemployment and the certainty that emergency relief—while sorely needed—will not solve our long-range economic problems demand that we seriously consider this sort of program. It is imperative that Congress exercise strength and foresight now if we are to avert a cataclysmic disaster.●

● Mr. ROYBAL. Mr. Chairman, I rise in support of H.R. 1718, the emergency supplemental appropriations for fiscal year 1983. This bill will be lifesaver for many unemployed workers throughout the Nation.

In particular, Mr. Chairman, I would like to commend Chairman WHITTEN and my colleagues on the Appropriations Committee for their support of older worker programs. This bill includes an appropriation of $25 million for employment of older Americans through the senior community service employment program. It also appropriates $75 million for job training of displaced workers, many of whom are middle-aged and older. I assure you that this will be money well spent.

The senior community service employment program now provides minimum wage part-time jobs for more than 54,000 low-income workers age 55 and older. The appropriation provided in this bill will fund an additional 4,891 jobs. More importantly, I am told by those who administer this program that these jobs can be filled literally overnight.

This legislation comes at a critical time for many older Americans. Unemployment is devastating at any age, but it is much worse when you are older. Older workers find it much more difficult to locate another job than young people. Once unemployed, older workers remain out of work more than 20 weeks, which is nearly twice as long as young workers. My committee has heard testimony from some older people that their social security just is not enough. People need to work, and when they cannot, some use up their savings or sell their homes. A few, reluctantly, become burdens on their families or on their government.

Critics argue that older people do not want to work, that they would rather stay at home in their rocking chairs and spend their remaining days in unproductive activities. The facts suggest otherwise. Studies show that as many as one-half of all retired persons would like to be working in a paid job. These are healthy individuals who need to work and who have much to contribute.

Those who are fortunate enough to have a job will fight to hang on to it. You will recall last summer when the President vetoed legislation which included an appropriation for the older worker program, that there was a huge outcry from older workers across the country. There was such an outpouring of support for this employment program that the President's veto was overridden.

I am confident that the President learned a lesson from last year's appropriations struggle. Providing jobs for older workers is as important as providing employment for all other age groups. The President has indicated he will support this legislation, and I encourage all the Members of this body to do the same.●

● Mr. LELAND. Mr. Chairman, the emergency supplemental appropriations bill for fiscal year 1983, H.R. 1718, is a necessary first step in providing immediate benefits for the Nation's 11 million known unemployed. This bill is intended to ease human suffering and hardship the quickest way possible, by funding essential social services, as well as labor-intensive projects targeted for the areas experiencing the highest unemployment.

Considering the 1982 annual average unemployment rate was 9.7 percent—the highest annual jobless rate in the postwar period—I urge my colleagues to support this bipartisan effort in order to create almost 600,000 jobs. One need only look at the abysmal statistics characterizing our Nation today: Adult men experienced the greatest increase in unemployment at 10.1 percent; the proportion of adult women without jobs was 9.2 percent; the percentage of teenagers out of work was 24.5 percent as of December 1982.

This bill would particularly assist the employment problem that blue collar workers are currently experiencing, since the recession has affected their situation more so than any other occupational group—at 16.3 percent, up 29 percent from December 1981 figures. It has been estimated that the mean duration of unemployment exceeded 4 months in December 1982 compared to 3 months in the same month in 1981. We must also keep in mind the unknown percentage of individuals who became sufficiently discouraged about finding jobs that they have withdrawn from the labor force.●

● Mr. ST GERMAIN. Mr. Chairman, the emergency jobs and assistance package is one small step for the unemployed. It will be a step toward recovery if it is followed by a full-scale effort to attack the causes of unemployment and if a major effort is launched to revitalize the economy from the grassroots up.

For those of us who tried desperately to sound the alarm when the Reagan administration pushed the economy down the icy supply side slopes in 1981, it is gratifying to see, at long last, a semblance of bi-partisan recognition of problems that have been all too apparent to the people for all too long. I hope that the "bi-partisanship" does not fade when the tougher economic issues come before us.

Faced with a timetable designed to move assistance quickly, the Appropriations Committee is to be commended for pulling together this package. It is a start which will signal that this Congress will not sit idly by and allow the unemployed and the disadvantaged to sink further into the swamp of hopelessness created by this administration. It is a beginning on which we can build a true recovery.

We on the Banking Committee are especially pleased to see an acceleration of funding for community development and urban development action grants and additional money for weatherization of homes of low-income families. The legislation provides $1,250,000,000 for community development grants, which is estimated to provide for 80,000 jobs, and to insure that jobs are created quickly the committee provided that these funds would be distributed within 30 days of enactment. The legislation also provides $150,000,000 for wetherization—so important to Rhode Island and the Northeast.

Certainly, the Appropriations Committee should be commended for reordering priorities which will now allow funding for nutrition programs for women and children and money for local nonprofit agencies to provide food and shelter for jobless people.

The small business community has been devastated by the administration's policies—particularly high interest and tight money—and the committee wisely included funds for direct loans to small businesses. I am also pleased that some additional funding is in the bill to upgrade Amtrak in the Northeast and to improve mass transit facilities. And certainly, no one can argue against the need to do more in the area of summer jobs for youths where the unemployment levels are staggering.

As soon as phase 1—this first step—moves we must go back to work on programs to attack jobless problems and to set in motion actions which will move the economy forward.

The Banking, Finance and Urban Affairs Committee, for example, has a number of initiatives. These include:

First, housing stimulus, particularly for low- and moderate-income units. We need the units and the jobs which are produced throughout the economy when the housing industry revives.

Second, emergency programs, to "work out" and limit foreclosures on homes of families who have been hit by unemployment in the current economic crisis. The Appropriations Com-

mittee bill before us today includes administrative funds for a "foreclosure forbearance" program. The Banking Committee is currently working on authorizing legislation to provide assistance to families who face the loss of their homes because of economic conditions beyond their control.

Third, amendments to the Defense Production Act which would provide funds to train, retain, and upgrade skills of workers and creation of a National Development Bank to provide funding for job producing industries.

Fourth, efforts to push for lower interest rates and a fair flow of credit to small businesses, job-producing industries, homebuyers, and similar areas starved by funds in recent years. This includes a hard look at credit controls and an effort to upgrade the reporting and economic targeting by the Federal Reserve.

These are a few of the areas in which the Banking Committee will move during this Congress. As I promised the House in December, we intend to explore every niche of the committee's jurisdiction to discover what can be done to push the economy forward and to provide jobs.

We must regard today's action as a beginning; as a start on the long road to economic sanity and stability; as a signal of hope to the millions who were forgotten in the great economic experiment of the past 2 years.●

● Mrs. SCHNEIDER. Mr. Chairman, I rise in support of H.R. 1718, the emergency supplemental appropriations for 1983. Although I stand opposed to several provisions of the legislation, I feel the bill, with amendments, will serve to assist those 11 million people currently unemployed. Immediate action is necessary to alleviate some of the damage done to those whose lives have been hard pressed during the recession.

Mr. Chairman, the seriousness of the employment issue demands that this Congress lay down partisanship for the sake of providing gainful employment for America's jobless. In my eyes, dollars targeted toward pork barrel water projects could better be used for school and hospital energy conservation programs, Youth Conservation Corps, and other more labor-intensive projects. We in Congress must put the needs of the Nation's unemployed before any of our own special interests. I trust that amendments to the bill, designed to rectify some of its inadequacies, will gain the approval of the House.

Despite these weaknesses, however, I feel that a great number of its provisions will prove valuable to many Americans. The $100 million appropriation for the women, infants and children program, for instance, is essential to the welfare of many Rhode Islanders. Presently, the waiting list for those eligible for WIC, but unable to enter the program, stands at 150 women. In Rhode Island alone, $96,000 more dollars are needed to sustain this year's program at the same level of service. With every $1 spent on WIC saving $3 in future health care costs, this additional appropriation is money well spent.

Child care funding, through the Day Care and Head Start programs, also serves to make this bill more palatable. These programs are essential for increasing the numbers of women in full-time and skilled employment.

I am particularly pleased to see included in the legislation a $25 million appropriation for title V of the Older Americans Act. This successful program, which last year provided 300 jobs to seniors in Rhode Island and 52,000 seniors nationwide, has proven its value and most certainly deserves the support of this Congress. Seniors also stand to gain from the inclusion of a $150 million appropriation for low-income weatherization. In addition to providing quick employment for unskilled and semiskilled workers, the program, by cutting energy bills by 20 percent, puts money directly in the pockets of the elderly and low-income families hardest hit by the recession.

Last, I am pleased by the specific targeting of funds within the health care area. The need for expanded community care programs for alcohol and drug abuse, as well as mental illness, is well recognized.

I am also supportive of the $30 million appropriation for health care aimed at the disadvantaged and umemployed, with $10 million of the funds directed toward home health care at community health centers.

Mr. Chairman, this bill, while in need of revision, provides the dollars necessary to put thousands of Americans back into the work force, thereby making them productive and contributing members of the society. I urge each of my colleagues to assist those who have carried the burden of the recession by voting for H.R. 1718.●

● Mr. MARKEY. Mr. Chairman, I wish to join with my colleagues today in support of H.R. 1718 which will make appropriations for emergency expenditures to meet neglected economic needs. I find it ironic that this jobs bill contains many of the elements of the Democratic proposal that was killed at the end of the 97th Congress by the threat of an administration veto. It is unfortunate that the administration realized 4 months later that this type of legislation was needed. It is outrageous that thousands of American workers and their families have had to suffer an extra 4 months so that the administration could save face.

This measure will create over 500,000 jobs and prime the economic pumps of the construction industry. It will also provide badly needed maintenance and repair that has been deferred by hard-pressed State and local governments.

We must not forget that this administration has shown no concern for the unemployed other than in terms of political rhetoric. The empty promises of imminent economic recovery are no longer enough for the American jobless. Rather, this legislation must serve as a small step on the long road to economic recovery. It must serve as a solid foundation for a second phase of job creation. Because, as so many of my colleagues have pointed out today, the United States is a "work ethic" society, providing meaningful work to the unemployed of our Nation should be our top priority. This bill will accomplish this goal in a way which, although small, moves us in the right direction.●

● Mr. BOUCHER. Mr. Chairman, I rise in strong support of H.R. 1718, the emergency jobs legislation.

In southwest Virginia, which I represent, unemployment exceeds 17 percent. In one county, the jobless rate is over 30 percent. This level of unemployment tears at the very fabric of our society, and in the communities of southwest Virginia, you can see the suffering.

Because of unemployment, families have been forced to change their way of life. Families are hungry, health care coverage has been lost, and savings accounts have been depleted. In thousands of cases, unemployment benefits have been exhausted, leaving families destitute. Those hardest hit by this recession are living on little more than their powerful faith, and on the hope that their government will take action to put people back to work.

Short of a broad-based resurgence in every sector of the economy, we must help provide jobs to the unemployed. To those who object to this bill with the disparaging cry of "make work," I say, listen to the cries of those who need work. Explain to the people of Buchanan County, Va., where unemployment is over 30 percent and where the actual rate may be double that level, that some jobs are not good enough, and that they would be better off without the income a job from this bill might provide.

For the unemployed in the coalfields of southwest Virginia, the issue is family survival—not economic philosophy.

The emergency jobs bill will provide up to 600,000 jobs across the country. People will be employed on such projects as repairing veterans hospitals, improving national parks, weatherization of homes for low income families, flood control senior citizen employment, and soil conservation.

With unemployment remaining in the double-digit range, the American

people will be justified in finding this Congress guilty of malfeasance should we fail to pass this emergency jobs legislation.

Title II of H.R. 1718 addresses the critical problem facing States that have been forced to borrow from the Federal Government in order to meet their regular obligations for unemployment benefits. Without title II, States would rapidly be forced to terminate benefits as their State trust funds run dry. My own State of Virginia has already been forced to borrow more than $19 million to pay regular unemployment benefits.

I regret that H.R. 1718 does not amend the extended unemployment benefits program to make eligible those people living in high unemployment areas within low unemployment States. Virginia's relatively low unemployment rate statewide is well below the trigger to qualify for extended benefits. But in my district, unemployment is more than twice the statewide average and is nearly 70 percent above the national rate. I will be working to close this unfortunate loophole which discriminates against the unemployed in southwest Virginia.

In the meantime, today's bill is urgently needed. Titles I and II represent a genuine effort by the Congress to help those hurt most by the recession. I urge my colleagues to support the emergency jobs legislation.●

● Mr. FRENZEL. Mr. Chairman, this amalgam, euphemistically characterized as a jobs bill, has already been unmasked by the press as a bulging barrel of pork.

I cannot further embellish the revelations which have been shown nightly on our television set. All the House and Appropriations Committee big shots have lorded their particular projects into the bill with the customary disregard for need.

But, even if the projects were the neediest, the concept of the bill is wrong. Public works bills have proved again and again to be slow, expensive and ineffective ways to stimulate real jobs or the general economy. More spending for personal public works projects is an old House habit, but it has not worked.

If we want to provide the best stimulus for permanent jobs in this recovery period, we must concentrate on reducing spending, cutting the out year deficits and lowering interest rates. That is how to build jobs.

Merely titling a bill as jobs bill does not create jobs. Voting for a title or a symbol does not create jobs. All it does is to spend money, and to build deficits.

So when this little piggy goes to market, it will go without my support, and the taxpayers will cry all the way home.●

● Mr. FORD of Michigan. Mr. Chairman, I rise in support of H.R. 1718, the emergency supplemental appropriations for fiscal year 1983. As we are all aware, Mr. Chairman, jobs are America's No. 1 priority. In my hard hit district and throughout the depression-torn State of Michigan, jobs are needed to get us back on track to economic growth.

Job creation, phase I, as this bill is sometimes called, is only the beginning of our efforts. It is simply an emergency package of accelerated public works programs and humanitarian aid for the jobless. There are many similarities between this measure and the measure passed last December, which was scrapped because of President Reagan's threatened veto. There will be a phase II jobs package which will include a more comprehensive approach to stimulating the economy.

The importance of this legislation cannot be overlooked, however. One of the most important features concerns unemployment insurance. Over 800,000 Americans exhausted some form of unemployment insurance during December, 1982, of whom 300,000 exhausted their supplemental benefits. The administration estimates that the supplemental program will deplete its funds by the middle of this month. The $5.1 billion in the bill for this program is designed to carry it through the end of 1983.

The supplemental bill we are considering today contains funds to assist the jobless in a multitude of ways. There is money to help local communities provide emergency shelters, to assist with day care services, to provide immediate jobs in Federal building repair and maintenance, necessary work on local community projects, and most importantly funds for essential efforts such as the nutrition program for women, infants, and children (WIC), and weatherization help for low-income Americans.

Mr. Chairman, this bill can take effect almost immediately and it is good news to know that the machinery is in place to administer the funds contained in the legislation. Reaganomics sent this country into a tailspin and this legislation will not create enough jobs to repair all the damage done. It is a start, though, and I am happy to have the opportunity to tell my constituents in the 15th District of Michigan that we in Congress understand that America's jobless need productive employment, not just money and other aid to wait out this recession.●

● Mr. STOKES. Mr. Chairman, I rise in strong support of H.R. 1718, the Emergency Supplemental Appropriations Act of 1983, providing jobs and humanitarian relief for the millions of Americans who now find themselves without work and without hope of securing a job in the near future. Our Nation has just emerged from the depths of one of the deepest recessions ever—a recession which has cut a wide swath of misery and human suffering touching nearly every American family. As a result, of the Nation's slide into economic chaos, a record 18 million Americans find themselves out of work or working part time because no full-time jobs are available. People have lost their homes and their self respect. Unemployed workers have had to leave their families, moving from town to town and State to State looking for work. Families have had to forego not the luxuries, but the basic necessities of life, such as food and medical care.

Yes, Mr. Chairman, an emergency jobs bill should have passed long, long ago before unemployment escalated into America's No. 1 domestic tragedy—before thousands of families were pushed over the edge of economic disaster. H.R. 1718 is a long overdue and a much needed step, but still a small step. I strongly believe that Congress has a responsibility and an obligation to do much more than this because our Nation is only as strong as its people. And, our people need and deserve more help from their Government than this limited bill can provide. H.R. 1718 takes one small step, but a giant leap is needed.

Therefore, Mr. Chairman, I urge this body to pass the measure before us as only phase 1 of an employment and economic stimulus package, and I urge my colleagues to press for phase 2 legislation—as I will be doing—to complete the task of providing real relief to the American people.

Now, I would like to address my remarks to some of the specific provisions of the bill before us, which provides $4.6 billion in emergency job-creating appropriations, humanitarian relief, and an emergency supplemental to keep the unemployment compensation system from running out of funds this spring.

There are some who believe that this measure is not targeted sufficiently to communities experiencing very high unemployment. They may or may not be right. I do know, however, that there are a number of provisions in H.R. 1718 which will provide important and significant aid to Ohio and to Cleveland—my own State and congressional district—currently experiencing the pain of nearly the highest unemployment rates in the country.

For example, Ohio and Cleveland will benefit significantly from the $1.25 billion appropriation in H.R. 1718 for community development block grants. Cleveland's share of about $12 million will provide jobs for housing rehabilitation, parks improvements, and other projects essential to maintaining the vitality of Cleveland's neighborhoods. This bill also disapproves a deferral in UDAG funds for which Cleveland has a number of applications pending. These projects can

be implemented quickly and will create many needed construction jobs in Cleveland.

The $232.4 million for employment and training assistance in this bill is already targeted to high unemployment areas under existing formulas for summer youth and displaced worker programs. About 50,000 to 60,000 persons in Cleveland qualify for this type of job training assistance and some will benefit from the funds provided in this measure.

Mr. Chairman, several days ago I participated in a walking tour of several hunger service centers in Cleveland and the things I saw were shocking. Clevelanders are routinely waiting 2 hours for free Government cheese and bread; church soup kitchens and hunger centers are filled to capacity. Several thousand women in Cleveland are on the waiting list for nutritious food supplements under the WIC program. Mr. Chairman, it became painfully clear to me that the $75 million for the distribution of surplus food, the $50 million for emergency food and shelter services, and the $100 million for WIC included in H.R. 1718 will only begin to address the need for emergency assistance which exists in Cleveland and in the Nation.

Cleveland and Ohio also desperately require congressional approval of the $5.033 billion in this bill for advances to the States for unemployment compensation benefits. The onerous burden of nearly 15 percent unemployment has forced Ohio to borrow heavily from the Federal Government to meet unemployment compensation payments. The approval of this supplemental funding will enable Ohio and 28 other States to continue life-sustaining unemployment compensation benefits to thousands of people who have no other resources.

In closing, Mr. Chairman, I believe strongly that congressional passage of this bill is critical to my own community, Cleveland, to the State of Ohio, and to the Nation. I urge its swift adoption, granting essential jobs and relief to the unfortunate victims of the Nation's economic problems.●

Mr. NATCHER. I yield myself the balance of my time.

The CHAIRMAN. The gentleman is recognized to conclude debate.

Mr. NATCHER. Mr. Chairman, certainly H.R. 1718 does not answer all of the problems that we are confronted with today in this country concerning unemployment. With 10.4 percent unemployed, a little over 11 million people, much more needs to be done. This bill does provide some $4.6 billion to deal with some of our most pressing problems on an emergency basis. The amount in the bill approximates the total suggested by the administration. The committee recommendations represent an immediate first step in responding to the grave economic situation in which we find ourselves. Title I of the bill provides additional funds in some 38 different programs, all designed to create jobs by stimulating economic activity, or to provide assistance to those who have been most adversely affected by unemployment.

Title II of the bill provides $5,033 million for adverses to the unemployment trust fund. This money must be provided as soon as possible to make loans to States whose funds for payment of unemployment benefits have been, or will soon be, depleted. Title II also contains $276.1 million for additional funds for processing unemployment claims. The amounts in title II were requested by the President, and should be provided without further delay.

As my Chairman pointed out at the beginning of the debate on this bill, we are today spending $32 billion a year in unemployment compensation. It makes good sense to spend money to create employment—productive employment. That is what this bill will do. It also makes sense to use the programs which are now in place to provide food, shelter, and health services to the needy. This bill does that, as well. This is an important bill. As I said a few moments ago, certainly, Mr. Chairman, it does not answer all the problems confronting our people today, but it is a step in the right direction. Mr. Chairman, we ask approval of this bill by the committee.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read for amendment under the 5-minute rule. No amendments are in order except the following amendments printed in the CONGRESSIONAL RECORD of March 2, 1983, which shall be considered only in the following order and which shall not be subject to amendment but shall be debatable as provided in House Resolution 113:

First, the amendment by, and if offered by, Representative OBEY which shall be considered en bloc;

Second, the amendment by, and if offered by, Representative HOWARD;

Third, the amendment by, and if offered by, Representative WISE; and

Fourth, the amendment by Representative EDGAR, and if offered by Representative EDGAR or Representative COUGHLIN.

The text of the bill is as follows:

H.R. 1718

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year 1983, and for other purposes in order to increase the wealth of the Nation, putting women and men back to productive work made necessary by the conditions described as follows:

TITLE I—MEETING OUR ECONOMIC PROBLEMS WITH ESSENTIAL AND PRODUCTIVE JOBS

CONGRESSIONAL FINDINGS

SEC. 101. The Congress finds that unemployment has increased to 10.4 per centum on a national basis, reaching 17.8 per centum in West Virginia, 12.6 per centum in Illinois, 15.5 per centum in Michigan, 14.0 per centum in Ohio, and 13.6 per centum in Pennsylvania. This is exclusive of the military, which, though essential, is not of any substantial economic benefit. Actual filings of business-related bankruptcies for the year ending June 30, 1982, reached a total of seventy-seven thousand five hundred and three as compared with a prior year figure of sixty-six thousand three hundred and thirty-two and business failures, as reported by Dun and Bradstreet, are up 49 per centum compared to one year ago. Delinquencies are many times greater. Only 35.7 per centum of the raw domestic steel industry's capacity is currently being utilized which represents the lowest capacity since 1932. The American farmers are more than $215,000,000,000 in debt. Financed last year at rates of interest varying from 15 to 20 per centum, unless fortunate enough to have inherited their land, hundreds of thousands of farmers are faced with bankruptcy. Local papers are filled with announced sales of farm equipment and machinery, most of it selling for a small percentage of its worth, benefiting neither the creditor nor the debtor. While our farm commodities are held off world markets at competitive prices, those in the business of supplying agricultural equipment, chemicals, seeds and other supplies, including those from whom they borrow, are in desperate financial condition, either bankrupt or near it.

The result is a financial breakdown of the Nation, for agriculture is an integral part of the Nation's production and by far the biggest customer of industry and labor. History shows that if agriculture goes down, the rest follows.

The news media carry the pitiful picture of thousands of unemployed seeking a few hundred jobs; people who have spent a lifetime buying a home put out into the streets, having lost everything; businesses closed, with the owner having nowhere to go. We must prevent further imposition on the agricultural industry of the cost of United States foreign policy since heretofore the burden of embargoes or the failure to export has been borne solely by those engaged in agriculture. Today every possible means must be made to increase American production to sell American, instead of continuing to make competitors out of former customers. The current unacceptable level of unemployment which has not existed since the Great Depression prior to World War II creates an economic and humanitarian problem requiring immediate action. This bill does not provide for make-work employment but does provide for neglected needs of the Nation at a cost of less than one-seventh the cost of unemployment compensation for this year which has reached the staggering total of $32,000,000,000. The Nation must take immediate steps such as those contained in this bill to retain and restore our physical wealth.

It is essential that interest rates, which have been reduced following a General Accounting Office investigation of the Federal Reserve System at the request of the committee, continue at present or lower rates for industrial and agricultural recovery.

THE NEED FOR NEW CORPORATIONS OR AGENCIES WITH NEW AUTHORITY

SEC. 102. In view of—

(a) the current economic crisis in the private sector and the need for specific emphasis toward long-term economic recovery; and

(b) the successful history of past Federal activities, such as the Reconstruction Finance Corporation, which had a proven track record for assisting banks and other corporations in getting back into a viable position; and

(c) the need to find a means to avoid wholesale foreclosures on homes, farms, and small and large businesses; and

(d) the need to establish an appropriate corporate structure required for such an activity to maximize a Government and industry partnership that will foster cooperation in the rebuilding of our national economy;

there is hereby appropriated to the Department of the Treasury $500,000 for administrative expenses to enable such Department to develop plans for (1) a Reconstruction Finance Corporation type governmental entity to help meet business problems, (2) a Home Owners Loan Corporation type governmental entity for housing problems, and (3) a farm credit type agency to help avoid forced sale under mortgage. Such plans, based on prior experience, should be made within thirty days to the appropriate legislative committees of the House and Senate, and the Appropriations Committees of the House and Senate. In order to reduce foreclosures and defaults, the plans should address the benefits of providing operating capital to give debtors and creditors a chance to work out their financial problems under supervision. In preparing the plans, the Department of the Treasury is authorized and expected to obtain the views of experts in other government departments.

COMPETITION IN WORLD MARKETS

SEC. 103. The Secretary of the Treasury and the Secretary of Commerce, with the cooperation of the American business community are directed to analyze and report on the current trade crisis with the objective of keeping American exports competitive in world markets and strengthening our commitment to sell what we have and don't need to those who have a great need.

REDUCING AND STABILIZING INTEREST RATES

SEC. 104. The Board of Governors of the Federal Reserve and the Federal Open Market Committee should continue such actions as are necessary to achieve and maintain a level of interest rates low enough to generate significant economic growth and thereby reduce the current intolerable level of unemployment as they have since the Committee on Appropriations on April 26, 1982 obtained an investigation of the Federal Reserve System by the General Accounting Office.

MAINTAINING AND PROTECTING PUBLIC INVESTMENT FEDERAL BUILDINGS

In order to assist in reducing the backlog of needed maintenance and repair of Federal buildings across the Nation, $125,000,000 for payment to the "Federal Buildings Fund", General Services Administration, to remain available until expended, which shall be available under the subactivity "Alterations and repairs" for projects which do not require prospectuses.

REBUILDING AMERICA'S HIGHWAYS

To accelerate the construction and reconstruction of the Nation's highways and to improve safety on the Nation's highways, which will result in productive jobs, an additional amount of $33,000,000, to remain available until expended, to demonstrate methods to accelerate the widening of existing highways: *Provided*, That nothing in this Act shall be construed to modify the policy for purchases set forth in Public Law 97-424: *Provided further*, That, notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and Highway safety construction programs for fiscal year 1983 shall not exceed $12,600,000,000: *Provided further*, That this limitation shall be administered in accordance with section 104 of Public Law 97-424.

TO SPEED UP IMPROVEMENT OF MASS TRANSPORTATION

To accelerate the construction, modernization and improvement of urban mass transportation systems, to increase the mobility of the urban work force which will result in productive jobs, an additional amount of $44,000,000, to remain available until expended, for "Interstate transfer grants—transit" and an additional amount of $66,000,000, to remain available until expended, for "Urban discretionary grants".

REBUILDING RAILROAD INFRASTRUCTURE

To provide for the improvement of railroad rights-of-way and facilities, the Secretary of Transportation shall make capital grants to the National Railroad Passenger Corporation of $110,000,000, to remain available until expended, of which $90,000,000 shall be for improvements of railroad rights-of-way and $10,000,000 shall be made available only for the rehabilitation, renewal, replacement, and other improvements on the line between Attleboro, Massachusetts, and Hyannis, Massachusetts, to insure that such track will meet a minimum of class III standards as prescribed by applicable Federal Railroad Administration regulations.

IMPROVING FACILITIES AND SERVICES PROVIDED TO VETERANS

For an additional amount for "Medical care", Veterans Administration, $75,000,000, which will result in productive jobs to improve the facilities and care being provided to veterans throughout the country.

PROTECTION FROM FORECLOSURE—EMERGENCY MORTGAGE ASSISTANCE

For an additional amount for "Salaries and expenses", Department of Housing and Urban Development, for administrative expenses to expedite the implementation of a program of emergency mortgage assistance for homeowners pursuant to legislation to be enacted by the Ninety-eighth Congress in response to the growing number of foreclosures, defaults, and delinquencies attributable to continuing adverse economic conditions, $500,000, which shall become available only upon enactment of such legislation.

COMMUNITY DEVELOPMENT GRANTS

For an additional amount for "Community development grants", to be made available in accordance with the provisions of title I of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301), for worthwhile and necessary projects which will result in productive jobs in communities, including towns and villages, throughout the country through the funding of local community development programs, $1,000,000,000, to remain available until September 30, 1985; and an additional amount of $250,000,000, to remain available until expended, for "Community development grants", to be made available to metropolitan cities and urban counties in accordance with the provisions of section 106(b) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301), to fund programs in areas of high unemployment: *Provided*, That the Department of Housing and Urban Development shall submit detailed quarterly reports to the appropriate committees of Congress on the use of these funds: *Provided further*, That the 10 per centum limitation on the amount of funds for public services activities contained in section 303(a)(1) of the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35, approved August 13, 1981) shall not apply to the funds provided under this heading in this Act.

URBAN DEVELOPMENT ACTION GRANTS

(DISAPPROVAL OF DEFERRAL)

The Congress disapproves the proposed deferral D83-32A relating to the Department of Housing and Urban Development, Community Planning and Development, Urban development action grants, as set forth in the message of January 6, 1983, which was transmitted to the Congress by the President. This disapproval shall be effective upon the enactment into law of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation.

ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING

(DISAPPROVAL OF DEFERRAL)

The Congress disapproves the proposed deferral D83-54 relating to the Department of Housing and Urban Development, Housing Programs, Annual contributions for assisted housing, as set forth in the message of February 1, 1983, which was transmitted to the Congress by the President. This disapproval shall be effective upon enactment into law of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation: *Provided*, That all contract authority and budget authority, including the amounts disapproved for deferral in this Act, which is available to make reservations to incur obligations in fiscal year 1983 shall be used in accordance with the provisions included in Public Law 97-377, approved December 21, 1982, under the heading "Annual contributions for assisted housing" to carry out the following budget program:

ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING—GROSS RESERVATIONS, FISCAL YEAR 1983

	Units (approximate)	Cost (approximate)	Contract authority	Term	Budget authority
Use of authority:					
Public housing:					
Indian	2,000	$6,460	$12,920,000	28	$361,760,000

Provided further, That the limitation on the Department's fiscal year 1983 official reception and representation expenses contained in Public Law 97-272, approved September 30, 1982, under the heading "Salaries and expenses" is increased by $2,000: *Provided further,* That of the amount made available to the Department of Housing and Urban Development under the heading "Research and technology" in Public Law 97-272, no less than $950,000 shall be made available to the Housing Assistance Council within 45 calendar days of enactment of this Act.

TO AID LOCAL ECONOMIC DEVELOPMENT TO OFFSET PRESENT BUSINESS AND PLANT CLOSURES

Toward the objective of restoring the prior level of Federal support for economic development purposes throughout a wide geographic area as provided for by the Public Works and Economic Development Act of 1965, as amended, and Public Law 91-304, and such laws that were in effect immediately before September 30, 1982, an additional amount of $200,000,000 is appropriated for "Economic development assistance programs", Economic Development Administration.

INCREASING SMALL BUSINESS ACTIVITIES

For additional capital for the "Business loan and investment fund", authorized by the Small Business Act, as amended, $2,000,000, to remain available without fiscal year limitation; and for additional capital for new direct loan obligations to be incurred by the "Business loan and investment fund", authorized by section 7(a) of the Small Business Act, as amended, $200,000,000, to remain available without fiscal year limitation, to help small businesses throughout the Nation to employ additional personnel where economically feasible.

DEVELOPING PARKS AND RECREATION AREAS

An additional amount of $50,000,000, to remain available until expended, is appropriated for "Salaries and expenses", Small Business Administration to be available only for grants to any State government or agency thereof or public institution of higher education for small business oriented employment or natural resources development programs, pursuant to section 21(a)(1) of the Small Business Act.

REPAIRING AND RESTORING PARKS AND RECREATIONAL FACILITIES

There is appropriated for expenses necessary for the "Urban Parks and Recreation Fund" for rehabilitation grants and repairs, under the provisions of the Urban Park and Recreation Recovery Act of 1978 (title 10 of Public Law 95-625), $50,000,000, to remain available until expended.

To accelerate programs of improvement and maintenance of National Park Service roads, trails, and other existing facilities which will receive an estimated three hundred and fifty-eight million visits in 1983, there is appropriated an additional $50,000,000 for "Operation of the National Park System", National Park Service, under the same conditions provided for under this appropriation in Public Law 97-394, to remain available for obligation until September 30, 1984.

PRESERVING THE NATIONAL FOREST SYSTEM

To restore, repair, and provide forest roads, trails, and other existing facilities which are part of the real wealth of this country, there is appropriated an additional amount of $25,000,000, to remain available for obligation until September 30, 1984, for the "National Forest System".

In order to provide jobs which will result in the construction of real assets for this country, an additional amount of $20,000,000 is appropriated, to remain available until expended, for "Construction", Forest Service.

IMPROVING INDIAN HEALTH FACILITIES

In order to provide for construction, repair and improvements, and other services to Indians there is appropriated an additional amount of $39,000,000, to remain available until expended, for "Indian Health Facilities", Indian Health Service.

IMPROVING FISH AND WILDLIFE SERVICE FACILITIES

To accelerate programs for the rehabilitation and maintenance of wildlife refuges, fish hatcheries, and research facilities, of real benefit to people across the Nation under the jurisdiction of the United States Fish and Wildlife Service, Department of the Interior, there is appropriated an additional $25,000,000, for "Resource Management", to remain available for obligation until September 30, 1984.

IMPROVING NATURAL RESOURCES ON INDIAN RESERVATIONS

To accelerate programs to improve natural resources on Indian reservations, including range and agricultural improvements, reforestation and timber stand improvement, there is appropriated an additional amount of $20,000,000 for "Operation of Indian Programs", Bureau of Indian Affairs.

ASSISTING IN RURAL DEVELOPMENT AND RESOURCE CONSERVATION

In order to provide assistance for basic human amenities, to alleviate health hazards, to promote stability of rural areas by meeting the need for new and improved rural water and waste disposal systems and to meet national safe drinking water and clean water standards, there is appropriated an additional amount of $200,000,000 under the 1981 formula and regulations for "Rural Water and Waste Disposal Grants", Farmers Home Administration, Department of Agriculture, to remain available until expended.

In order to assist eligible borrowers such as communities and others to provide assistance for basic human amenities, alleviate health hazards and promote the orderly growth of rural areas by meeting the need for the financing of new and improved rural water and waste disposal systems and meet the National Clean Water Standards and the Safe Drinking Water Act and to assist in achieving these objectives which create and conserve real wealth throughout the country, $600,000,000 for additional loans to be insured, or made to be sold and insured, under the "Rural Development Insurance Fund", Farmers Home Administration, Department of Agriculture in accordance with and subject to the provisions of 7 U.S.C. 1928 and 86 Stat. 661-664.

For an additional amount for "Salaries and Expenses", Farmers Home Administration, Department of Agriculture, $6,500,000 for 500 additional permanent full-time staff at the county office level for the purpose of handling and supervising loans in an effort to avoid foreclosures.

In order to assist States, local units of government, groups and individuals in develop-

ing area plans for resource conservation and development and to create jobs to increase and conserve the real wealth of this country, there is appropriated an additional amount for "Resource Conservation and Development", Soil Conservation Service, Department of Agriculture, $15,000,000, to remain available until expended.

INCREASING THE EFFECTIVENESS OF SOIL CONSERVATION ACTIVITIES

In order to assist in installing works of improvement and rehabilitation of existing works; reduce damage from floodwater sediment and erosion; for the conservation, development, utilization, and disposal of water; and for the conservation and proper utilization of land, there is appropriated an additional amount for "Watershed and Flood Prevention Operations", Soil Conservation Service, Department of Agriculture, and to assist in providing jobs which will increase and conserve the real wealth of this country, and to meet the needs for emergency work, including repairs to local roads and bridges, to remedy damages resulting from recent floods, $150,000,000, to remain available until expended: *Provided*, That an additional $25,000,000 in loans may be insured, or made to be sold and insured, under the Agricultural Credit Insurance Fund of the Farmers Home Administration (86 Stat. 663).

For an additional amount for emergency measures to repair flood damage as authorized by sections 403-405 of the Agricultural Credit Act of 1978 (16 U.S.C. 2203-2205), $10,000,000, to remain available until expended.

ENHANCEMENT OF WATER RESOURCE, HYDROELECTRIC POWER BENEFITS AND FOR EMERGENCY FLOOD CONTROL WORK

To improve flood control, shore protection, and other measures as authorized by law, to provide water resource and hydroelectric power benefits, to meet emergency requirements and remedy damages resulting from disastrous rains and floods, which will result in productive jobs, an additional amount of $125,000,000, to remain available until expended, is hereby appropriated for "Construction, general", Corps of Engineers—Civil, Department of the Army.

To maintain harbor channels and other navigable waterways essential to the conduct of commerce, to preserve and operate existing river and harbor and flood control measures which will protect the real wealth of the Nation, to meet emergency requirements and remedy damages resulting from disastrous rains and floods, which will result in productive jobs, an additional amount of $76,000,000, to remain available until expended, is hereby appropriate for "Operation and maintenance, general", Corps of Engineers—Civil, Department of the Army.

To plan, construct, and maintain flood control measures for the river system which drains more than two-fifths of the Nation, to perform necessary rescue work, and repair and restoration of flood control projects including local roads and bridges; together with cooperative projects with the Soil Conservation Service authorized by law, to meet emergency requirements and remedy damages resulting from disastrous rains and floods, and to prevent future damages, an additional amount of $203,000,000, to remain available until expended, is hereby appropriated for "Flood control, Mississippi River and tributaries", Corps of Engineers—Civil, Department of the Army.

RECLAMATION AND IRRIGATION PROJECTS

To accelerate the completion of projects which will provide additional industrial and municipal water, irrigation water, and hydroelectric capability, an additional amount of $50,000,000, to remain available until expended, is hereby appropriated for "Construction program", Bureau of Reclamation, Department of the Interior.

To accelerate hydrogenerator uprating, soil and moisture conservation operations on reclamation projects, levee construction, repair and restoration, improvements of recreation areas, and to assist in creating new productive jobs, an additional $21,000,000, to remain available until expended, is hereby appropriated for "Operation and maintenance", Bureau of Reclamation, Department of the Interior.

To accelerate loans to irrigation districts and other public agencies for construction of distribution systems on authorized Federal reclamation projects, and for loans and grants to non-Federal agencies, an additional $30,000,000, to remain available until expended, is hereby appropriated for "Loan program", Bureau of Reclamation, Department of the Interior.

In order to provide for improved maintenance, renovation, construction, and repair of Tennessee Valley Authority facilities, there is appropriated an additional amount of $40,000,000, to remain available until expended, for the Tennessee Valley Authority Fund.

FEDERAL, STATE, AND LOCAL PRISON MODERNIZATION

For planning, acquisition of sites and remodeling, and equipping necessary buildings and facilities at existing penal and correctional institutions, including all necessary expenses incident thereto, by contract or force account, for "Buildings and facilities", Federal Prison System, Department of Justice, $90,000,000, to remain available until expended: *Provided*, That of this amount, $30,000,000 shall be transferred to "Support of United States Prisoners", Legal Activities for the Cooperative Agreement Program for the purpose of renovating, constructing, and equipping State and local jail facilities that confine Federal prisoners.

CONSTRUCTION AND MODERNIZATION OF HOUSING UNITS FOR MILITARY FAMILIES

In order to accelerate the construction and maintenance of family housing, to increase the quality of life of military personnel and their families, which will result in jobs in the construction industry and its related trades, there is appropriated for expenses of family housing for the Army for maintenance, $100,600,000.

In order to accelerate the construction and maintenance of family housing, to increase the quality of life of military personnel and their families, which will result in jobs in the construction industry and its related trades, there is appropriated for expenses of family housing for the Navy and Marine Corps for construction, including addition, expansion, extension and alteration, and for maintenance, as follows: for construction, $16,230,000; for maintenance, $34,301,000; in all, $50,531,000: *Provided*, That the amount provided for construction shall remain available until September 30, 1984.

In order to accelerate the construction and maintenance of family housing, to increase the quality of life of military personnel and their families, which will result in jobs in the construction industry and its related trades, there is appropriated for expenses of family housing for the Air Force for construction, including addition, expansion, extension and alteration, and for maintenance, as follows: for construction, $47,501,000; for maintenance, $44,368,000; in all, $91,869,000: *Provided*, That the amount provided for construction shall remain available until September 30, 1984.

Notwithstanding the provisions of Sections 102, 202, 302, and 605 of the Military Construction Authorization Act, 1983, funds appropriated by the Military Construction Appropriation Act, 1983 may be used to carry out projects otherwise authorized.

LOW-INCOME ENERGY CONSERVATION

There is appropriated an additional amount for "Energy conservation," Department of Energy, $150,000,000, to remain available until expended for low-income weatherization: *Provided*, That funds for low-income weatherization activities appropriated under this Act shall be expended according to the regulations pertaining to the maximum allowable expenditures per dwelling unit which were in effect on October 1, 1982, and to the regulations pertaining to priority in providing weatherization assistance which were in effect on October 1, 1982.

SCHEDULED MOTOR VEHICLE PROCUREMENT

In order to assure the timely replacement of planned Federal motor vehicle replacement by American plants in accordance with established practices, $75,000,000 for the General Services Administration to increase the capital of the General Supply Fund, established by section 109 of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 756), for the purchase of motor vehicles: *Provided*, That the funds made available by this appropriation may be used only to procure domestically manufactured vehicles.

INCREASING EMPLOYMENT AND TRAINING OPPORTUNITIES

(EMPLOYMENT AND TRAINING ASSISTANCE)

To improve the opportunity for productive work through job training and job creation, an additional $207,400,000 for "Employment and Training Assistance", Department of Labor, of which $32,400,000 shall be for the Job Corps, $100,000,000 shall be for summer youth employment and $75,000,000 shall be for services to displaced workers under title III of the Job Training Partnership Act: *Provided*, That none of the amounts made available by this paragraph for summer youth employment shall be paid to any individual except upon written certification by the supervising official that the assigned job was performed.

INCREASING EMPLOYMENT OPPORTUNITIES FOR OLDER AMERICANS

(COMMUNITY SERVICE EMPLOYMENT FOR OLDER AMERICANS)

For an additional amount to carry out the activities for national grants or contracts with public agencies and public or private nonprofit organizations under paragraph (1)(A) of section 506(a) of title V of the Older Americans Act of 1965, as amended, $19,500,000.

For an additional amount to carry out the activities for grants to States under paragraph (3) of section 506(a) of title V of the Older Americans Act of 1965, as amended, $5,500,000.

INCREASING ESSENTIAL COMMUNITY AND HOME HEALTH SERVICES

(HEALTH SERVICES)

To expand the availability of essential health care services for the disadvantaged and unemployed, including those in rural towns and villages, an additional $30,000,000 for "Health Services", Department of Health and Human Services, for carrying out titles III and XIX of the Public Health Service Act with respect to community and migrant health centers: *Provided*, That $10,000,000 of these funds shall be for the provision of home health care services at such centers.

INCREASING MATERNAL AND CHILD HEALTH SERVICES

(HEALTH SERVICES)

To increase the availability of essential health services for disadvantaged children and mothers, an additional $10,000,000 for "Health Services", Department of Health and Human Services, for maternal and child health grants under title V of the Social Security Act: *Provided*, That such funds shall be available notwithstanding section 502 for special grants to title V agencies in those States experiencing high levels of unemployment: *Provided further*, That no grant shall be made to a State unless such State offers assurances satisfactory to the Secretary that it will use such amounts in addition to rather than in lieu of existing Federal or State funds currently available for these purposes.

INCREASING ALCOHOL, DRUG ABUSE AND MENTAL HEALTH SERVICES

(ALCOHOL, DRUG ABUSE AND MENTAL HEALTH)

To expand community care programs for the prevention and treatment of mental illness, alcoholism and drug abuse, especially to meet problems associated with extended unemployment, an additional $30,000,000 for "Alcohol, Drug Abuse, and Mental Health", Department of Health and Human Services, for carrying out the Alcohol, Drug Abuse and Mental Health Block Grant: *Provided*, That no grant shall be made to a State unless such State offers assurances satisfactory to the Secretary that it will use such amounts in addition to rather than in lieu of existing Federal or State funds currently available for these purposes.

INCREASING DAY CARE AND SOCIAL SERVICES

(SOCIAL SERVICES BLOCK GRANTS)

To expand the availability of day care and other social services available to unemployed and disadvantaged Americans, which also shall include Expanded Food and Nutrition Education (Nutrition Aides), an additional $150,000,000 for "Social Services Block Grants", Department of Health and Human Services, for carrying out title XX of the Social Security Act of which $50,000,000 shall be used only for child day care services: *Provided*, That the State allotment for fiscal year 1983 shall not be reduced to offset any reduction in a prior year allotment made pursuant to the Department of Health and Human Services, OIG control number 030550 and 030551: *Provided further*, That no grant shall be awarded to a State under this paragraph unless such State offers assurances satisfactory to the Secretary that it will use these funds in addition to rather than in lieu of existing Federal or State funds currently available for these purposes.

INCREASING HEADSTART SERVICES

(HUMAN DEVELOPMENT SERVICES)

To expand the availability of essential early childhood education programs serving disadvantaged families, an additional $30,000,000 for "Human development services", Department of Health and Human Services for carrying out the Headstart Act of 1981.

INCREASING COMMUNITY AND HUMANITARIAN SERVICES

(COMMUNITY SERVICES BLOCK GRANT)

To expand the availability of essential humanitarian assistance to the unemployed and disadvantaged including those in rural towns and villages, an additional $25,000,000 for "Community Services Block Grant", Department of Health and Human Services, for carrying out the Community Services Block Grant Act.

PROVIDING URGENTLY NEEDED SCHOOL FACILITIES

(SCHOOL ASSISTANCE IN FEDERALLY AFFECTED AREAS)

To construct or improve school facilities to assure adequate, safe, and barrier-free buildings in school districts demonstrating an immediate and urgent need, there is appropriated an additional $35,000,000 to remain available until expended for "School Assistance in Federally Affected Areas", Department of Education for carrying out the Act of September 23, 1950, as amended (20 U.S.C., Ch. 19): *Provided*, That $15,000,000 shall be for sections 5 and 14(c), $10,000,000 shall be for section 10, and $10,000,000 shall be for sections 14 (a) and (b).

RELIEVING HUMAN SUFFERING OF INDIGENT PEOPLE

For an additional amount for "Food and Nutrition Service", Department of Agriculture, for administrative expenses to accelerate the implementation of programs to provide emergency feeding for the truly needy pursuant to legislation subsequently enacted by the Congress in response to the recognized and growing problem of individuals in the country suffering from malnutrition or undernutrition, $250,000, which shall become available only upon enactment into law of such legislation.

In carrying out the feeding programs provided for by this Act, participation in the programs shall be limited to those individuals certified by a local unit of government or charitable organization. Funds or commodities provided under this Act except for WIC shall be matched by a 25 per centum non-Federal contribution which may be monetary or represented by in-kind contributions such as volunteer labor and operating expenses including buildings, utilities, equipment, rent, and supplies.

DISTRIBUTION OF AGRICULTURAL COMMODITIES

For an additional amount to be added to and merged with the funds currently available to the Department of Agriculture for surplus removal operations in connection with perishable agricultural commodities (7 U.S.C. 612c), $75,000,000. Such funds shall be used to acquire and distribute surplus agricultural commodities in areas of high unemployment for use in cooperative emergency feeding facilities for indigent persons and shall be accounted for separately and in addition to existing funds held in reserve to support the price of perishable commodities as the need may arise. The Secretary's ability to support prices is contingent upon maintaining reserves adequate to announce large scale purchase. Prices tend to stabilize based on the announcement of intent to purchase, thereby reducing the need for actual purchase.

FEEDING PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC)

In order to provide supplemental food to low-income pregnant, postpartum and breastfeeding women, their infants and young children up to five years of age who are at nutritional risk due to inadequate income resulting from the serious decline in the economy and the unacceptably high levels of unemployment, funds shall be made available to local health clinics through State departments of health and to Indian groups; and upon determination of nutritional risk by competent health care professionals supplemental food shall be provided to such needy individuals to prevent health problems and to improve the future status of their health, $100,000,000.

FOOD DISTRIBUTION AND EMERGENCY SHELTERS

There is hereby appropriated $50,000,000 to the Federal Emergency Management Agency to carry out an emergency food and shelter program. Notwithstanding any other provision of this or any other Act, such amount shall be made available under the terms and conditions of the following paragraphs:

The Director of the Federal Emergency Management Agency shall, as soon as practicable after enactment of this Act, constitute a national board for the purpose of determining how the program funds are to be distributed to individual localities. The national board shall consist of seven members. The United Way of America, the Salvation Army, the Council of Churches, the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., the American Red Cross, and the Federal Emergency Management Agency shall each designate a representative to sit on the national board. The representative of the Federal Emergency Management Agency shall chair the national board.

Each locality designated by the national board to receive funds shall constitute a local board for the purpose of determining how its funds will be distributed. The local board shall consist, to the extent practicable, of representatives of the same organizations as the national board except that the mayor or appropriate head of government will replace the Federal Emergency Management Agency member.

The Director of the Federal Emergency Management Agency shall award a grant for $50,000,000 to the national board within thirty days after enactment of this Act for the purpose of providing emergency food and shelter to needy individuals through private voluntary organizations.

Eligible private voluntary organizations should be nonprofit, have a voluntary board, have an accounting system, and practice nondiscrimination.

Participation in the program should be based upon a private voluntary organization's ability to deliver emergency food and shelter to needy individuals and such other factors as are determined by the local boards.

Total administrative costs shall not exceed 2 per centum of the total appropriation.

As authorized by the Charter of the Commodity Credit Corporation, the Corporation shall process and distribute surplus food owned or to be purchased by the Corporation under the food distribution and emergency shelter program in cooperation with

the Federal Emergency Management Agency.

TITLE II—SUPPLEMENTAL UNEMPLOYMENT APPROPRIATIONS

DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

For an additional amount for "Advances to the Unemployment Trust Fund and Other Funds", $5,033,000,000, to remain available until September 30, 1984.

GRANTS TO STATES FOR UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICES

For an additional amount for "Grants to States for unemployment insurance and employment services", $276,100,000, which may be expended from the Employment Security Administration Account in the Unemployment Trust Fund and which shall be available only to the extent necessary to meet increased costs of administration resulting from changes in a State law or increases in the number of unemployment insurance claims filed and claims paid or increased salary costs resulting from changes in State salary compensation plans embracing employees of the State generally over those upon which the State's basic grant was based, which cannot be provided for by normal budgetary adjustments: *Provided*, That any portion of the funds granted to a State in the current fiscal year and not obligated by the State in that year shall be returned to the Treasury and credited to the account from which derived.

AVAILABILITY OF FUNDS

No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

AMENDMENT OFFERED BY MR. OBEY

Mr. OBEY. Mr. Chairman, I offer an amendment which is made in order under the rule.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. OBEY:

Page 24, line 10, strike out "$30,000,000" and insert in lieu thereof "$78,000,000".

Page 24, line 14, insert "up to" after "That" and insert ", to the extent practicable," after "shall".

Page 24, line 15, insert before the period the following: ": *Provided further*, That each center may apply up to 20 percent of these funds provided to the center for the purchase (at rates not exceeding those prevailing under the applicable State plan approved under title XIX of the Social Security Act) of inpatient hospital services for delivery and postpartum care to pregnant women and infants who have no other source of payment for the care".

Page 24, line 20, strike out "$10,000,000" and insert in lieu thereof "$110,000,000".

Page 24, beginning on line 24, strike out "in those States experiencing high levels of unemployment" and inserting in lieu thereof the following: "and shall be allotted among the States based on the product, for each State, of the number of children under six years of age in the State and the unemployment rate in that State".

Page 25, after line 4, insert the following new paragraph:

INCREASING ASSISTANCE FOR PUBLIC HOSPITALS AND EMERGENCY ROOM SERVICES

(Preventive Health Services)

For an additional amount for allotments to States under part A of title XIX of the Public Health Service Act, $52,000,000 to be allotted among the States on the basis of the number of unemployed individuals in each of the States: *Provided*, That funds provided herein may only be used to provide financial assistance to public hospitals and to provide financial assistance to community hospitals to compensate for some portion of free emergency room services. *Provided further*, That funds provided herein may only be used to provide services to persons unable to pay for them: *Provided further*, That no grant shall be made to a hosptial unless the hospital offers assurances that it will use such amounts in addition to rather than in lieu of existing Federal, State, or local funds currently available for these purposes.

Mr. OBEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The CHAIRMAN. Before the gentleman proceeds, the Chair will state that pursuant to House Resolution 113, the gentleman from Wisconsin (Mr. OBEY) will be recognized for 30 minutes, and a Member opposed to the amendment will be recognized for 30 minutes.

Does any Member seek recognition for opposition to the amendment? The Chair will inquire later after the gentleman addresses the issue.

Mr. OBEY. Mr. Chairman, for the moment I yield myself 9 minutes.

Mr. Chairman, this amendment is being offered on behalf of myself, Chairman DINGELL of the Committee on Energy and Commerce, Chairman WAXMAN of the Subcommittee on Health of the Commerce Committee and Mr. EARLY, a member of the Appropriations Subcommittee on Labor—HEW.

Very briefly, it adds $200 million for health services for the unemployed and the destitute by providing $48 million above the amount listed in the bill for community health centers, $110 million above the amount listed in the bill for maternal and child health care and $52 million to States under the preventative health services block grant, again to provide assistance to the health institutions who are being deluged about requests for services by the unemployed.

It is supported, among other groups, by the American Medical Association, the American Hospital Association, the American Academy of Pediatrics, the American Public Health Association, AFL-CIO and various other organizations who on many occasions do not normally find themselves on the same side.

Mr. Chairman, this amendment is here for a variety of reasons. It is here for instance because on January 16, an unemployed Michigan man was convicted of falsifying documents in order to get health care for bleeding ulcers. He was sentenced to 5 years. In February, an Alabama hospital announced that it was closing its emergency room on weekends to stem the flood of requests for free health care that were threatening to bankrupt the institution.

It is here because the long and steady decline in infant mortality, which we experienced in this country for over 30 years, is tragically being reversed today in high unemployment areas of the country. In a large number of areas in the country the chances of an infant living to age 1 are actually declining.

We ought to find that a disgraceful situation.

The CBO estimates that there are more than 10 million people who lost health insurance coverage last year because they became unemployed. Added to that the 20 million people in the society who for a variety of other economic reasons have no health coverage at this time and you have some idea of the problem.

The reality today is that when you lose your job and you go on unemployment, you also lose your health benefits. Some people keep them for 30 days, some people are not that lucky. It also means if you get sick during that time and you are unlucky enough to wind up in the hospital so sick you cannot get up, so sick you cannot go down to the unemployment office and keep up an active job search, you do not just lose your health insurance, you can also lose your unemployment compensation as well. A civilized society ought to be able to do a little better than that.

This bill provides, and I commend the committee for it, this bill provides a fairly ambitious plan for the distribution of food to the poor. It provides a modest program of shelter for the homeless. It provides not so modest proposals and programs for brick and mortar; it provides next to nothing in the area of health care.

As I said earlier in general debate, I think you have a real philosophical problem in dealing with this bill, because we are so restrained by the administration's unwillingness to go beyond $5 billion that we cannot do much to really attack the unemployment problem.

So, that means that we are really, in effect, going to be affecting unemployment only on the margins. Under those circumstances, rather than pretend we are doing something grand for jobs, we should use as large a portion as possible of the funds under this bill simply for mercy initiatives, for people

who we know are going to be out of luck and down on their luck for a long time. People have a right to know that if they are sick, they are going to get taken care of, at least to a minimal degree.

I am embarrassed by the fact that this proposal does so little in that regard but it is certainly better than nothing. As I indicated I tried to add $445 million in committee and when that failed I tried to finance these health programs with cuts in other areas that I thought were less essential. We failed.

So, I went to the Rules Committee and asked them just in the interest of mercy to people who are in this incredible crunch because of unemployment to at least provide a small initiative on health care. That is why this amendment is here. It seems to me if we are going to provide money for all of the brick and mortar items in the bill, we ought to provide a little better balance; we ought to provide a little more assistance to flesh and blood as well. We have an item in here for instance for prison construction. I have no objection to it, our prisons are a national disgrace. We have $90 million in here to upgrade prison construction.

But, it seems to me that you have an imbalance. If you are a prisoner and you have a heart attack, your needs are going to be taken care of. If you are an unemployed steelworker down on your luck and you have a heart attack you are going to have to beg for health care. I think we ought to strike a better balance than that. The only argument against this amendment, last week, that I thought anybody really believed was the argument that the bill would be vetoed if it were added. I think it is now clear this bill is not going to be vetoed if we add this embarrassingly small effort to deal with the basic health needs of human beings.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Pennsylvania.

Mr. McDADE. I thank my colleague from Wisconsin for yielding to me and for bringing this entire matter to the attention of the House.

I am personally going to vote for the gentleman's amendment which I know has been substantially reduced from what it was in committee. I know that you asked the Rules Committee to try to let you get an offsetting provision here on the floor and were not able to get it. I am deeply concerned about this problem of people who are unemployed losing their health benefits. I am happy to be able to say to the House that in my own State of Pennsylvania, which has a terribly unacceptable rate of unemployment, a bipartisan group has gotten together, and trying to work on this problem, to seeing that those who lose their employment, their jobs, do not lose that health component that protects them and their families. I am going to work on the bill and I invite my colleague; I hope to next week have a comprehensive bill that will address this problem. I am shocked to see such things as the rise in infant mortality and all sorts of consequences because of individuals suffering health deprivation because of job losses. So, I say to my friend, I think what he has done in bringing this to the attention of the House is important. I am going to support his initiative. I commend him for it and I hope it passes.

I want to commend the gentleman from Wisconsin for his efforts, as represented by his proposed amendment to increase funding for medical care.

I, myself, am particularly concerned about the immediate medical needs of the families of unemployed workers who, with the loss of their job, have also lost lost their medical insurance protection.

We have been shocked by reports that infant mortality may have been increasing. Field professionals are sending back reports of a greater incidence of tragic infant death even before our data-collecting mechanisms can give us any real figures on the scale of the problem.

The State of Pennsylvania has been out in front in attempting to develop a program to provide medical insurance to the families of those who are on the unemployment compensation roles. Our State, of course, has a very high unemployment rate—12.5 percent in December, 2 points above the national average.

I believe, however, that the problem of protecting the health of the families of the jobless requires a comprehensive approach—one that may utilize both the private insurance network and the public health system.

I am working on such a program, working with the State of Pennsylvania. It might incorporate several different elements:

First, each State should be involved in planning the details and carrying out an emergency program to assure medical care for those hurt by the recession.

Second, some form of short-term, interim medical insurance should be provided for workers whose families are not eligible for medical care either under their spouse's insurance plan or from public health facilities.

Third, we should make the fullest possible use of State and community hospitals and health services. Our own State General Hospital in Scranton, Pa., for example, has been underutilized and has not been able to provide full staffing.

I know that many, if not all, of our colleagues share these concerns.

A sound, comprehensive, fiscally responsible program to provide medical care for the jobless and their families is needly as quickly as possible. Even as recovery from the recession begins to show signs of arriving, we know that it will take a number of years to bring down the unemployment rate. We need a program that is designed to cover a period of several years at least. At this point I include the following article:

[From the Scranton Times, Feb. 24, 1983]

STATE HOSPITAL OPERATING AT DEFICIT

(By Jim Haggerty)

State General Hospital ran up at $1.7 million deficit in the past seven months as result of spiraling operating costs and because SGH still is suffering from the stigma of being a facility for indigents.

The hospital's board of trustees received news of the deficit, which was less than expected, and the reasons for the shortfall during a meeting Wednesday night.

Marie Brutico, SGH's acting business manager, reported that the facility ran up $8,138.240 in expenses since the beginning of the fiscal year July 1, while collecting $6,429,700. The deficit stands at $1,708.540.

Peter Yestrumsaks, director of administrative services for the Northeast Region of the state Welfare Department reported in February 1982 that SGH was expected to enter its current fiscal year with a $1.9 million deficit.

Board chairman Michael Schipp cited higher hospital operating costs as the major reason for the facility's continuing deficit.

He noted, however, that lack of occupancy historically has created deficit problems at SGH. Although occupancy there has been reported higher now than it has been in several years. Schipp said the facility still bears a stigma as the local hospital for indigents and lacks the "prestige" of the city's three other hospitals.

Schipp pointed out that the other city hospitals have been leaning toward medical specialties which he believes has contributed to SGH's occupancy problems.

He also said SGH has lagged behind other local hospitals in several medical specialties because of the low wage scale established by the state for those fields.

In another development, Schipp said the hospital board is awaiting word from the state Department of Welfare on the appointment of a firm to manage SGH.

Mediqu of Pennsauken, N.J., was awarded a contract in January by the state to manage SGH but the Welfare Department has not approved the pact. The hospital is operating under Mrs. Brutico's acting direction and a temporary administrator, Dr. Edward Gombar, who also is the hospital's medical director.

Schipp said he has not been told by Welfare Department officials why the management contract approval has been delayed. He said appointment of a permanent administrator at SGH will not necessarily follow soon after the contract is approved by the Welfare Department because the hospital board must interview candidates and reach a consensus as to who should be named to the position.

Dr. Gombar reported to the board that the state has lifted a hiring freeze at SGH in order to reopen a section of the hospital where some 20 beds have not been used because of a shortage of nurses.

Dr. Gombar said several nurses have been hired but more are needed before the closed

area of the hospital is to be reopened. Dr. Gombar said he has experienced a problem in finding nurses willing to work at SGH.

Mr. OBEY. I thank the gentleman. I have also been working on a proposal to provide health insurance coverage for the unemployed and I appreciate his compassion.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Texas.

Mr. KAZEN. I thank the gentleman.

I believe the gentleman already answered one question that I had. I understand it the amount of money that you propose in your amendment will be an increase over what is in the bill?

Mr. OBEY. Yes.

Mr. KAZEN. How much is that?

Mr. OBEY. $200 million.

Mr. KAZEN. $200 million, that is a very modest amount. Let me ask the gentleman the procedure of earmarking. How does it really work? Suppose I am out there without a job, without any health insurance and I get sick and I do not have any money, how does this bill help me?

□ 1430

Mr. OBEY. Well, we do not create new programs under this amendment, we simply expand funding for existing programs so that those people can go to a community health center, so that they can go to a public hospital for instance if they require in-patient treatment, or they can go to a community hospital for example if they require emergency service.

Mr. KAZEN. But what I am asking is these funds flow to those clinics, to those centers, to those hospitals for the purpose of taking care of these people; is that the way it works?

Mr. OBEY. That is right. And we specifically limit the usage of these moneys to persons who are unemployed.

Mr. KAZEN. I thank the gentleman.

The CHAIRMAN. The gentleman from Wisconsin (Mr. OBEY) has 29 minutes remaining.

PARLIAMENTARY INQUIRY

Mr. KAZEN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. KAZEN. Mr. Chairman, may I ask, which Member controls the time on the other side on this amendment?

The CHAIRMAN. The Chair will state that any Member who wishes to respond may control the time.

Mr. CONTE. Mr. Chairman, is the gentleman opposed to the bill?

Mr. KAZEN. No, I just wanted to know. The chairman said that he would not recognize the gentleman awhile ago because time was controlled and I wondered who controlled the time.

The CHAIRMAN. The Chair will advise the gentleman from Texas that the gentleman from California (Mr. DANNEMEYER) was recognized for a insertion of remarks into the RECORD, but the Chair will advise the gentleman that no Member has requested time in opposition to the amendment.

Mr. OBEY. Mr. Chairman, I yield myself 2 minutes simply for an explanation of a narrow point.

I have been asked by Mr. WAXMAN whether the intent of this amendment with respect to funds appropriated for the community and migrant health centers program whether the intent is that the $78 million be obligated before the end of fiscal 1983, but be available for distribution through March 31, 1984, and I simply want to make it clear in the RECORD that that is our intention, that this be spent over a 12-month period. And it is also the intention of the amendment that in allocating funds among the States under the maternal and child-health-care block grant that the Secretary accept applications and give due consideration to Indian tribes and tribal organizations with high unemployment and infant mortality rates.

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from North Carolina.

Mr. HEFNER. I thank the gentleman for yielding.

One question. In the case of an unemployed automobile worker or steel worker who has lost his job, do I understand that some of these moneys would be used to pay the premium?

In the case that the gentleman mentioned that many times they were ill, if they did not appear, they would lose their unemployment checks, how does this work for their health care? They would be paying a premium while they were employed, but their existing insurance after a certain amount of time if they were not working, they could not pay them, does this go to pay premiums?

Mr. OBEY. I wish it did, it does not. You would need many more dollars than we have in the amendment to do that. This simply provides money to the health institutions to whom they would be most likely to go in order to receive services.

Mr. HEFNER. I thank the gentleman.

● Mr. LELAND. Mr. Chairman, I rise in support of my colleague from Wisconsin. Congressman OBEY's amendment will increase the funding for three health care programs by $200 million. Of particular importance are the sections that will provide a $100 million block grant for maternal and child health care.

Few programs have had the startling beneficial achievements of this program. A study in Boston, Mass. in 1978 found that 18 percent of the children were malnourished; 27 percent were obese, and 23 percent had short stature—a measure of chronic malnutrition. These statistics were comparable to developing countries in Latin America. However, after the inception of the WIC program in the course of less than 3 years, little or no serious malnutrition was found. Few other Federal programs can claim such achievement of their goals.

This amendment will insure the survival of a good program, and more importantly protect our Nation's greatest resource, our children.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. OBEY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HOWARD

Mr. HOWARD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HOWARD: Page 7, strike out line 20 and all that follows through line 2 on page 8 (relating to mass transportation) and insert in lieu thereof the following:

TO SPEED UP IMPROVEMENT OF MASS TRANSPORTATION

To accelerate the construction, modernization and improvement of urban mass transportation systems, to increase the mobility of the urban work force which will result in productive jobs, an additional amount of $171,000,000, to remain available until expended, for "Urban discretionary grants", to be obligated at the discretion of the Secretary of Transportation in accordance with section 3 of the Urban Mass Transportation Act of 1964.

The Congress disapproves the proposed deferral of budget authority in the amount of $229,000,000 for the Mass Transportation Capital Fund (deferral numbered D83-59), as set forth in the President's special message which was transmitted to the Congress on February 1, 1983. This disapproval shall be effective on the date of enactment of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation.

The CHAIRMAN. Pursuant to House Resolution 113, the gentleman from New Jersey (Mr. HOWARD) will be recognized for 15 minutes, and a Member opposed to the amendment will be recognized for the other 15 minutes.

Is there a Member opposed who wishes to control that time?

No Member has responded, and the Chair recognizes the gentleman from New Jersey (Mr. HOWARD) for 15 minutes.

Mr. HOWARD. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, let me begin by explaining why my amendment is needed.

The bill before us today, the Emergency Supplemental Appropriations Act for fiscal year 1983, provides a total of $110 million for mass transit. Of this amount, $44 million is for interstate transfer grants and $66 million is for urban discretionary grants.

The Appropriations Committee report earmarks all of these funds—each and every penny. The interstate transfer money is earmarked for projects in Boston, Mass.; northern Illinois; Oregon; Sacramento, Calif.; and Twin Cities, Minn. The urban discretionary funds are earmarked for projects in Dade County, Fla.; Hartford, Conn.; Long Island, N.Y.; Philadelphia, Pa.; Detroit, Mich.; and Hillsdale, Mich.

I have some problems with this approach, Mr. Chairman.

For one thing, I am opposed to earmarking the entire $110 million for a handful of sites around the country. The only areas that would receive any of the $110 million are the 11 areas named in the Appropriations Committee report. The Secretary of Transportation would not have any discretion with respect to any of the funds, even though other projects might be more worthy or might create more jobs.

Transit-intensive cities such as Buffalo, Los Angeles, New York, Atlanta, or Houston would not receive one penny of this money. Nor would any money go to the rural areas of the country. The only areas that would benefit are the chosen 11.

In addition, I have a second problem with the provision in the appropriations bill. The $110 million for mass transit is far less than the $400 million which was included in the bipartisan jobs package agreed to by the President and the House leadership. Frankly, Mr. Chairman, this administration has not been a strong supporter of mass transit, and I can find no justification for reducing the level of funding it has proposed.

For the reasons, Mr. Chairman, I have concluded that the mass transit portion of the bill needs to be amended. My amendment is in lieu of, not in addition to, the provision in H.R. 1718. Briefly stated, the purposes of my amendment are to: Restore the funding level for mass transit to the $400 million level agreed to in the bipartisan jobs package, and provide for equitable nationwide distribution of the funds.

My amendment is made up of two parts.

The first part provides an additional $171 million for discretionary capital grants under section 3 of the Urban Mass Transportation Act. Consistent with our efforts to create jobs, these funds would be available at the discretion of the Secretary of Transportation, with emphasis given to projects which are labor intensive and which can begin construction or manufacturing within the shortest possible time.

All communities would not eligible to apply for a discretionary grant. Not one penny of the $171 million would be earmarked. The projects listed in the appropriations committee report will be eligible for funding but will not have a higher priority than any other project.

The second part of my amendment would have the effect of disapproving the President's deferral of $229 million in mass transit capital funding.

The Surface Transportation Assistance Act of 1982 provided contract authority of $779 million for fiscal year 1983 to be funded from the newly established mass transit account of the highway trust fund. This funding was to be distributed to both cities and rural areas in accordance with a new block grant formula and was to be available for capital expenditures only.

Less than 1 month after the President signed the historic piece of legislation, the administration took action to defer $229 million or nearly one-third of the authorized funds.

My amendment would disapprove this deferral, and thus would have the effect of making available the full $779 million in authorized gas tax funds.

These funds would be made available to both cities and rural areas in accordance with the formula in the Surface Transportation Assistance Act. Each city or rural area receiving mass transit funds would receive about one-half of the amount it received under its initial apportionment. The initial apportionments were printed in the Federal Register of January 24, 1983, starting on page 3303, and were also printed in yesterday's CONGRESSIONAL RECORD on pages 3704 through 3707 Staff has copies if any Member would like to see how much various localities would receive.

As I mentioned previously, you can calculate how much an area will roughly receive by multiplying the amount in the chart by one-half.

One final point: The total cost of my amendment is $400 million. However, this needs some explanation. Since $229 million is simply the freeing up of budget authority already on the books, only $171 million of the $400 million is actually new budget authority. This is only $61 million more than the $110 million currently in H.R. 1718.

In summary, Mr. Chairman, let me say that I believe that my amendment has a number of advantages over the provision in H.R. 1718.

Instead of earmarking funding for 10 or 11 localities, my amendment will distribute funds nationwide. All 376 cities will receive funds. And all 50 States will receive funds for the rural areas of the country.

Instead of providing only $110 million, my amendment will provide $400 million—the amount agreed to in the bipartisan jobs package.

And most importantly, the amendment will result in spending all the funds collected from the 5-cent-gas-tax increase—a committee that was made to win passage of the Surface Transportation Assistance Act.

Mr. Chairman, I urge the adoption of my amendment.

Mr. LEHMAN of Florida. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Florida.

Mr. LEHMAN of Florida. Mr. Chairman. I thank the gentleman for yielding.

Mr. Chairman, I certainly have no objection to the gentleman's amendment.

The amendment provides additional funding for mass transportation, which I support. The amendment also permits these funds to be allocated at the discretion of the Secretary. I am confident that when Secretary Dole reviews the administration's list of potential transit projects, she will find that those items identified by the committee are meritorious projects which will put people to work on a timely basis.

Finally, the amendment would disapprove the deferral of $229 million. I also support this part of the amendment and would have recommended that it be included in the committee bill, but we were unsure of whether or not this properly came within the jurisdiction of the Appropriations Committee.

I, personally, intend to vote for the Howard amendment and will make every effort I can to retain as much of this funding as is possible in conference with the other body.

Mr. HAMMERSCHMIDT. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Arkansas (Mr. HAMMERSCHMIDT), a member of the committee.

Mr. HAMMERSCHMIDT. I thank the gentleman for yielding.

Mr. Chairman, I also am pleased to rise in support of the amendment offered by the gentleman from New Jersey (Mr. HOWARD), which addresses one of the main problems I have with this bill.

As a matter of principle and a matter of equity, the requested deferral of $229 million in contract authority, authorized to be apportioned by formula for transit capital in fiscal year 1983 should be rejected. Any measure which could conceivably be called a jobs bill should do that at minimum.

It seems a little odd to come to the floor with a measure which appropriates general funds for the creation of jobs, and to ignore the fact that obligations can be increased without further appropriations by insisting that the full $779 million in transit capital authorized by the Surface Transporta-

tion Assistance Act of 1982 be made available for obligation.

The public transportation account in the highway trust fund, supported by the earmarked 1 cent of the 5-cent gas tax increase just enacted into law, assures that the full amount can be obligated without adding to the deficit.

If this deferral is rejected, the total amount of transit capital made available by formula to Arkansas will be increased by $512,000, from $1,256,000 to $1,768,000. I ask unanimous consent that a breakdown of those figures by system or category be included in the RECORD at the conclusion of my remarks.

I also support the other element of the gentleman's amendment; namely, the appropriation of an additional $171 million for transit capital projects allocated at the discretion of the Secretary of Transportation. This is consistent with my long-held belief that public investment in public works can best serve both the long-term and short-term needs of the Nation.

The administration estimates that each billion dollars of transit capital spending produces 10,240 onsite jobs plus 14,812 offsite jobs, for a total of 25,052. To this you can add roughly another 30,000 induced jobs also in the private sector. I will concede that this does not provide as many jobs per amount of investment as programs which simply go for salaries or payments to subsidize individual needs.

But the construction programs have a plus in the form of enduring physical facilities which—in the highway and transit area—contribute to economy and efficiency of transportation and the physical environment in which economic activity is carried on.

This has been my position as ranking minority member of the Economic Development Subcommittee for several Congresses and now the Aviation Subcommittee.

I urge adoption of the amendment.

FISCAL YEAR 1983 PRELIMINARY ESTIMATE OF APPORTIONMENT OF FUNDS MADE AVAILABLE FROM THE MASS TRANSIT ACCOUNT OF THE HIGHWAY TRUST FUND AS PROVIDED UNDER THE FEDERAL PUBLIC TRANSPORTATION ACT OF 1982

[In thousands of dollars]

State/urbanized area	100 percent [1]	71 percent level [2]	Difference
Arkansas:			
Little Rock-North Little Rock	825	586	239
Fort Smith, Arkansas-Oklahoma	197	140	57
Pine Bluff	177	126	51
Fayetteville, Springdale	129	92	37
Nonurbanized	440	312	128
State total	1,768	1,256	512

[1] 100 percent apportionment based upon current data.
[2] 71 percent level, based upon 29 percent less in obligational authority under President's deferral.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the able ranking member of the full Committee on Public Works and Transportation, the gentleman from Kentucky (Mr. SNYDER).

Mr. SNYDER. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the amendment of the gentleman from New Jersey (Mr. HOWARD), the chairman of the Committee on Public Works and Transportation, to provide $400 million in mass transit capital funding for fiscal year 1983.

This amendment is a substitute for language in the bill before us, and differs in the following respects:

First, it would disapprove of the administration's deferral of $229 million out of a total $779 million in transit capital authorized for fiscal year 1983 by the Surface Transportation Assistance Act of 1982.

Second, it would appropriate an additional $171 million in transit capital granst allocated at the discretion of the Secretary of Transportation—This is in addition to $1.606 billion already appropriated for discretionary transit capital in fiscal year 1983.

Third, this combination of $229 million and $171 million in new money would equal the $400 million add-on contemplated by the bipartisan jobs package negotiated by the administration and the House leadership, rather than the $110 million in the appropriations bill.

Fourth, it would put out most of the funds by statutory formula and the remainder at the discretion of the Secretary, unlike the appropriations bill which targets its entire $110 million to 11 communities.

Mr. Chairman, the sum of $229 million which the administration would defer is authorized from the newly created public transit account of the highway trust fund and is derived from 1 cent of the 5-cent gas tax increase.

I think most of us believed a certain principle was built into the relationship between authorization and revenue provisions in the 1982 act: When you impose on the taxpayer a specific tax—or you increase an existing tax—for a specific purpose, you ought to make those funds available to the fullest extent for the intended purpose.

That is not happening here. In its budget request affecting both fiscal years 1983 and 1984, the administration is attempting to hold obligations in both years to the amounts of revenue generated by the fund in those years.

This totally ignores the provisions of the revenue title of the 1982 act, which permits reliance on future-year funding to pay future year bills which result from current year obligations. Recognizing the slow payout rate associated with construction projects, the Committee on Ways and Means carefully examined this principle, reaffirming it in the case of the highway trust fund extension and expansion, applying it to the new transit fund as well.

If we permit these constraints in the form of deferrals and similar limitations, the relatively slow spend-out rate of this program—only 5 percent in the first year—will mean the following: Unnecessary buildup of the transit account balance, deferral of needed construction projects, and a reduction—paper—of the deficit in the unified budget.

I have consistently opposed attempts of this sort in connection with other programs under other administrations of both parties. It is wrong here and I oppose it.

I urge adoption of the amendment.

Mr. FAZIO. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from California.

Mr. FAZIO. I thank the gentleman for yielding.

I would appreciate a clarification from the gentleman. I support the amendment in tandem with my subcommittee chairman, the gentleman form Florida (Mr. LEHMAN), but I am interested in knowing whether or not the chairman of the Committee on Public Works and Transportation has any concern for the inclusion of interstate transfer funds.

As the gentleman knows, many areas of the country have foregone freeway development and are attempting to develop transit systems with those dollars. They have not been coming back, and I know the gentleman shares my concern for this, with the rate of speed that we would like. And many transit developments are behind for that reason.

With regard to the development of the light rail project in Sacramento, for example, we received only $18.5 million last year although we requested $25.5 million for the final design and construction phase. The amount appropriated in this bill simply makes up the difference and will allow for the initiation of construction on grading, drainage, some bridges, and a maintenance and storage shop for light rail cars.

And in addition this project would create 350 to 375 jobs in an area with 12.9 percent overall unemployment and a 40 percent unemployment rate in the construction trades.

In light of that, does the gentleman have any objection to including at some point in the process interstate transfer funding?

Mr. HOWARD. At some point in the process, I would like to state to the gentleman, we do have the ongoing legislation which does provide for interstate transfer in the legislation we passed last December. I believe

there perhaps is more money available under that portion to be utilized. I would hope it would be utilized. I would hope in the end we could get almost a cap off that transfer so that we could get rid of the interstate program, complete it, and get rid of the transfers and get on with a lot of other things we have to do over the next 20 years.

Mr. FAZIO. If the gentleman will yield further, I appreciate his comments. I am in support of that. I would hope that this bill, the jobs bill that we are talking about right now, before it is finally put to bed, might at some point include some funding for these projects. I know the gentleman is supportive of seeing us move ahead on it.

Mr. HOWARD. We have a technical amendment bill coming up from our committee. If there is any fooling around with the transportation legislation, I would hope that the authorizing changes might come in the future from the Public Works Committee rather than another committee.

Mr. FAZIO. I have no problem with that, but these projects do not need to be authorized. The Appropriations Committee has appropriate jurisdiction to expedite the funding for the administration.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I am happy to yield to the gentleman from Mississippi.

Mr. WHITTEN. I thank the gentleman for yielding.

I would say to my colleague that as the gentleman knows through the years the Appropriations Committee has worked very closely with the gentleman's Committee on Public Works and Transportation. I am sure that we will continue to do so. There are some differences that might come up as to how we solve this and that detail but I am sure we can agree on major objectives.

The gentleman deserves great credit for the job he has done through the years. As I say there is a little difference about how we should handle this, that, and the other, personally I hope we can work those out.

Mr. HOWARD. If we can do as well in the future as we have done in the past, I say to the gentleman I thank him very much for his remarks.

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Michigan.

Mr. PURSELL. I thank the gentleman for yielding.

I serve on the Subcommittee on Transportation and we were asked to submit component pieces line items for specific projects which we did, in keeping with our committee. So our committee is one of the few subcommittees that has input to this bill.

Mr. HOWARD. I would like to say the Public Works and Transportation Committee had none.

Mr. PURSELL. I know it. And other subcommittees on appropriations had none, too. But the point I wanted to make is that I do not quarrel with the gentleman's overall perspective position and I will support it, because I think we can work with the Secretary and authorization appropriations committee, but why did the gentleman not include the next section under transportation with respect to railroads which lists eight States including the gentleman's which gives New Jersey $19 million. And I am asking my question, I come from Michigan, the highest unemployment State in the Nation, some of us are criticized for putting some projects into high unemployment areas in our State and yet this amendment that the gentleman is proposing does not address transportation or railroads which gives certain States money including New Jersey.

Mr. HOWARD. I tell the gentleman the reason I did not include it is because that does not come under the purview of the Public Works and Transportation Committee. That is with Amtrak and that comes under the Committee on Energy and Commerce and while we are very protective of our committee jurisdiction, we do not want to delve into others. And that is exactly why we did not get ourselves involved in trying to change something that was under the jurisdiction of another committee.

Mr. PURSELL. I appreciate that. But we are arguing a case of principle here to have not earmarked specific projects either for a city or State which I can readily support. I am just suggesting that were it not consistent in this bill that military housing projects have earmarked projects, Corps of Engineers, parks, harbors, and all of the other projects marked in this bill are line item. But I am suggesting that your policy is a good one and I would suggest that maybe it apply to the whole bill and we be consistent philosophically with the gentleman's position, which I happen to support.

□ 1445

Mr. HOWARD. I thank the gentleman. I want to try to say that everyone should have the same principles as the Public Works and Transportation Committee.

Mr. MRAZEK. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I am happy to yield to the gentleman from New York.

Mr. MRAZEK. Mr. Chairman, I thank the gentleman. I rise to commend my colleague, the gentleman from New Jersey for this amendment, which I do plan to support.

I think the augmented funding that will be provided for a number of different mass transit systems that were not taken care of in the original bill drafted by the Appropriations Committee are going to be very important for systems all over the country.

I would like to talk just very briefly about the system, as a perfect example of one that would provide a number of jobs in as productive a fashion as I can conceive of and that is to relieve the misery of commuters on what is the largest commuter rail line, suburban commuter rail line in the United States of America, and that is the Long Island Railroad. It is a line where commuters have been promised for as long as I can remember, and I have lived in the same town all my life, major improvements in that service and it seems to have gotten just worse.

Anything I can do to see that funds are included for electrification on that railroad, I know will serve a productive purpose for those people I represent and I am going to work hard with the gentleman on those kinds of issues.

Mr. HOWARD. Mr. Chairman, I thank the gentleman for his statement.

I would like to say that in my district I have an awful lot of commuters coming from the other side of New York City with electrification. I know the problems the gentleman has and I know the problems are the same and I believe the priorities for the railroad that the gentleman speaks of, I know so well is certainly a priority item. I believe the amount of money that would have been earmarked ought properly to go to that under the discretionary program. I believe that even more is needed if we are going to adequately provide for our people who live in the suburban areas.

I thank the gentleman.

Mr. MRAZEK. I thank the gentleman for the time and I commend him for the amendment.

Mr. CLINGER. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Pennsylvania, a member of the committee.

Mr. CLINGER. I thank my chairman for yielding.

The chairman's amendment would have a beneficial impact on both rural and urban areas?

Mr. HOWARD. Absolutely. There is a list of how much will go in each State to nonurban areas and in each State that is in the record at the desk available for the Members' perusal as well as the formula to cities throughout the country.

Mr. CLINGER. I think what we see is that in many areas there would be a great reduction in the amount of money that would be available for very important transportation problems.

Mr. HOWARD. In almost every place in the country, it would be reduced to zero without this amendment.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, I want to tell the gentleman so that we set the record straight, that if the gentleman's amendment is adopted, and I see with the gentleman from Florida (Mr. LEHMAN) agreeing to it, it will be adopted, we will take the gentleman's amendment in our substitute bill, so everyone knows where we stand on this issue.

Mr. HOWARD. I thank the gentleman. The gentleman and I have discussed already this whole issue and I thank him very much for his statement.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I am happy to yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, I just would like to commend the gentleman for his amendment. I think it is right. It is targeted to the areas that really have the need in public transportation. I think the gentleman makes a contribution to the legislation.

Mr. HOWARD. Mr. Chairman, I thank the gentleman.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Are the Members opposed to the amendment who wish to control the time? Seeing none, the question is on the amendment offered by the gentleman from New Jersey (Mr. HOWARD).

For what reason does the gentleman from Michigan rise?

Mr. PURSELL. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. The gentleman has to rise in opposition, to control the time.

Mr. PURSELL. I am supporting the amendment also.

The CHAIRMAN. The proper procedure would be to have the gentleman from New Jersey (Mr. HOWARD) yield time to the gentleman.

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. Mr. Chairman, how much time do I have?

The CHAIRMAN. The gentleman has 2½ minutes left.

Mr. HOWARD. Mr. Chairman, I first yield for a brief statement to the chairman of the Subcommittee on Surface Transportation, the gentleman from California (Mr. ANDERSON).

Mr. ANDERSON. Mr. Chairman, I rise in strong support of the amendment offered by the chairman of the Public Works Committee, my colleague from New Jersey.

The amendment would accomplish several tasks. First, it would overturn the administration's deferral of $229 million in budget authority from the public transit trust fund account established in the Surface Transportation Assistance Act of 1982. These funds are generated by a penny from the 5-cent fuel tax increase that was included in that legislation. Mr. Chairman, it was not easy for any of us to support legislation that increased that tax. We could do so only with the knowledge that our constituents would have the benefit of an improved transportation network as a result. But now, the administration would delay that benefit. It has not been even 3 months since those of us who were privileged to serve in this body in the 97th Congress stood in this Chamber and passed the Surface Transportation Assistance Act. And it has been less than 2 months since the President signed that bill into law with his signature at the White House ceremony. But now, he would have us forget those events. He would say, I suppose, that he did not really like that section of the bill; even though, I might add, that the administration has never for a moment denied the legitimate Federal role in financing transit capital projects.

Or the administration might protest that it needs to cut back on Federal spending; and there are certainly few among us who would argue that cuts do not need to be made. But let me point out to our colleagues that, by the administration's own admission, only 5 percent of transit funds obligated for a typical capital project are paid out the first year, with 20 percent paid out in the second year, 30 percent in the third year, and the remaining 45 percent by the sixth year.

So, the deferral this amendment would overturn will not fuel inflation. But it will delay the construction and purchase of needed capital projects by transit properties, large and small, around the country. The money the President would defer is distributed on a formula basis, so it impacts upon all of our constituents.

Mr. Chairman, this amendment, when approved by both bodies and enacted by the President, would have the same impact in overturning the deferral as does House Resolution 97, which I introduced 10 days ago.

If this were the only provision of the amendment before us, it would merit the support of all of us. But this amendment does more. It deletes the $110 million in general funded capital money that the report accompanying this legislation conveniently earmarks to the penny, and provides instead for $171 million in urban discretionary grants that will be apportioned at the discretion of the Secretary. And, under provisions of Public Law 97-424, the Secretary is directed to emphasize projects that are labor intensive and that can begin construction or manufacturing in the shortest possible time. In other words, it helps promote the "jobs" concept of this legislation.

I urge the support of all our colleagues for this fine amendment.

PARLIAMENTARY INQUIRY

Mr. SNYDER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. SNYDER. Mr. Chairman, since no one has risen in opposition, would it be permissible to ask unanimous consent to transfer 5 minutes of the opposition time to the gentleman from New Jersey?

The CHAIRMAN. Under unanimous consent, yes.

Mr. SNYDER. Mr. Chairman, I make that request.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The CHAIRMAN. The gentleman from New Jersey (Mr. HOWARD) is recognized for 5 additional minutes.

Mr. HOWARD. I thank the Chair and I thank the gentleman from Kentucky for getting this additional 5-minute time. I do not wish to drag the proceedings on, but I do think it would be proper to recognize the gentleman from Michigan who has expressed some concern.

Mr. PURSELL. Mr. Chairman, I congratulate the chairman and the chairman of the committee.

I am not in opposition to the amendment.

Mr. HOWARD. I understand.

Mr. PURSELL. I support the gentleman's amendment, but I just want to recognize for Members of Congress that we ought to look at the other parts of the bill.

When I go through the military part of the bill, I see family housing for the Army, every single item on this page, in the committee report, page 22: Alabama, Red Stone Arsenal, $1,100,000.

I just want to point out that the entire military portion of this bill, which is very, very significant, is all earmarked in all line items.

I just think what we have here is an inconsistency in public policy of setting aside some mass transit projects, particularly for a State that has major unemployment, No. 1 in the Nation, No. 2 now, and yet we are looking at military renovation and rehabilitation in all the military projects in this Nation with no relevance to unemployment and targeting; so I am very hopeful that the Edgar amendment, which is yet to be debated, will be supported. I think this will help alleviate the problem overall.

I appreciate the leadership of the gentleman. I just wish the gentleman's amendment would apply to the rest of the bill.

Mr. HOWARD. Well, I am happy that the Public Works and Transportation Committee amendment has been cleared up.

I would like to say to the gentleman that in the earmarking, with the $110 million, I believe that the total projects for the State of Michigan is somewhere about $4.5 million or $5 million.

Mr. PURSELL. Under a figure of $5 million for a State with the highest unemployment.

Mr. HOWARD. Well, under my amendment, just under the $229 million in the rejection of the deferral, the State of Michigan will receive about $7 million just for that and still be eligible under the discretionary segment of $171 million.

Mr. PURSELL. I have no argument with the gentleman's amendment and the gentleman's issue. There may be additional dollars, but I think we miss the point, that we are not applying this amendment universally across all the committee jurisdictions. That is what we ought to do in terms of public policy and not play games with certain subcommittees and not with others.

Mr. HOWARD. I agree with the gentleman.

Mr. PURSELL. We ought to be uniform.

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from North Carolina.

Mr. HEFNER. Mr. Chairman, I just would like to answer one point that the gentleman from Michigan makes as regards military construction.

Now, what we tried to do in military construction, as the gentleman knows, all across the country, it is no respector of States, the housing industry, and the construction trades are in depression all across the country. What we tried to do in Milcon, military construction, was go to areas that had projects that were ready to go within 6 months. We got no new starts, but we felt that all across the country the construction trades are in depression. Any place you go in the building trades, you are going to hit high unemployment.

Mr. PURSELL. Mr. Chairman, if the gentleman will yield, I have no qualms about putting military money in this bill for areas that need it. Why do we not look at the military bases that are in high-unemployment States and put the money where the target should be?

Also, it should be discretionary. I am just arguing the case that we ought to apply public policy here of earmarking money or not earmarking money, the discretionary money ought to be throughout the entire bill and it should be consistent.

Mr. HEFNER. Mr. Chairman, if the gentleman will yield further, what we tried to do was work within the constraints that we had to have projects that were ready to go within 6 months, so we looked at these areas all across the country.

Mr. PURSELL. Regardless where the unemployment is, and that is my point.

Mr. HEFNER. The unemployment in the construction trades is 18 to 20 percent in every State in that particular area.

Mr. HOWARD. Mr. Chairman, I thank the gentleman. Before we get too far on military construction, I would like to yield back the balance of my time so that we may vote on a transit amendment.

● Mr. GREEN. Mr. Chairman, I rise in support of the amendment.

First, let me say that I think mass transit money in this or any other bill should be distributed fairly, and, by that, I mean in accordance with the regular formula contained in current law. I do not think mass transit money should be earmarked for any special projects anywhere around the country, including New York City. I just do not think that the earmarking in the bill as it came from my committee is fair. The amendment by the gentleman from New Jersey would remove that earmarking, would leave distribution of the funds to the regular formula contained in current law, and, thus, would make this bill much fairer.

Second, this amendment is not a budget buster. The effect of the amendment would be simply to put mass transit funding at the $400 million level which the administration had originally proposed for this legislation.

When we on the appropriations committee considered this legislation last Friday, I offered an amendment which, when coupled with the denial of the deferral request, would have brought us up to the same level; that is, $400 million. Unfortunately, the committee defeated any amendment which would have increased funding in any area. I am pleased that the gentleman has pursued the matter I began last Friday, and I am pleased to join him today in a simple amendment which would add basic fairness to the mass transit provisions.●

● Mr. LELAND. Mr. Chairman, I rise in support of my colleague from New Jersey, Mr. HOWARD'S amendment to the jobs bill we are considering today. Congressman HOWARD'S amendment would provide $400 million for funding of local mass transit systems. The Appropriations Committee's bill provides only $110 million for mass transit, and all of that money would be earmarked for just 11 cities. Many localities, such as my home district of Harris County, Tex., which is developing a mass transit system, would be totally excluded from funding under the Appropriations Committee bill.

The amendment would provide for equitable distribution of funding for mass transit, and would insure that all States and localities would be eligible for such funding. The amendment also proposes a disapproval of the administration's proposed deferral of $229 million in gas tax money for mass transit funding. Last December, when the Congress approved the gas tax, the expectation was that moneys realized from that tax would be used for mass transit funding. This amendment provides that funds from the gas tax be distributed to State and local governments, which can use the money for any eligible mass transit program.

Passage of this amendment will result in jobs where they are needed, and equally important, increased funding for local mass transit systems. I urge my colleagues to support this amendment.●

● Ms. FERRARO. Mr. Chairman, I rise in support of the amendment offered by the distinguished chairman of the Public Works and Transportation Committee. Little more than 2 months ago, the House passed landmark legislation, the Surface Transportation Assistance Act of 1982.

That act addresses two of the most critical problems facing this country—providing jobs for the unemployed and rebuilding our transportation infrastructure. For the first time, we forged a coalition in support of the creation of a mass transit fund within the highway trust fund. This fund would provide approximately $1.1 billion a year in new revenue for transit and would assure our Nation's public transportation systems a stable, reliable source of funding. For New York State and New York City, the Surface Transportation Act means more than $2 billion for mass transit over a 4-year period.

Yet less than a month after this act was signed into law, the Reagan administration proposed budget reductions totaling nearly $1 billion. These proposed cuts in funding for mass transit essentially would wipe out the increase in revenue resulting from the gas tax. These proposals are an affront to the Congress, and to the broad-based coalition of transit officials, labor, local elected officials, environmental, business, and citizens groups who worked so diligently on behalf of this legislation.

While the jobs bill does not provide adequate funding for mass transit, the amendment offered by the chairman is an important step in upholding the principles and commitments that are central to the Surface Transportation Act. It provides for a substantial increase in funding for transit and rejects the administration's request for deferral of $229 million in section 9 money in the current fiscal year. Mr. Chairman, the need for Federal transit assistance was clearly recognized when the House passed the Surface Transportation Act, and this amendment will restore funds that are vital both to the Nation's transit systems

and to the economic well-being of the country.

I urge my colleagues to support this amendment.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. HOWARD).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. EDGAR

Mr. EDGAR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. EDGAR: On page 31, after line 9, insert the following general provision:

"TARGETING JOBS TO AREAS OF HIGH UNEMPLOYMENT"

"Of the budget authority provided in this title, at least seventy-five percentum shall be made available only for projects and activities in civil jurisdictions with high unemployment, or in political units or in pockets of poverty that are currently or should meet the criteria to be eligible under the urban development action grant program administered by the Department of Housing and Urban Development. For purposes of this section, a "civil jurisdiction" is:

(1) A city of 50,000 or more population on the basis of the most recently available Bureau of the Census estimates; or

(2) A town or township in the state of New Jersey, New York, Michigan, or Pennsylvania of 50,000 or more population and which possesses powers and functions similar to those of cities; or

(3) A county, except those counties which contain any of the types of civil jurisdictions defined in paragraphs (1) or (2) of this section; or

(4) A 'balance of county' consisting of a county less any component cities and townships identified in paragraphs (1) or (2) of this section; or

(5) A county equivalent which is a town in the states of Massachusetts, Rhode Island, and Connecticut.

(6) A portion of a city or jurisdiction that meets the pockets of poverty criteria as defined by the Department of Housing and Urban Development.

"For purposes of this section, a 'civil jurisdiction with high unemployment' is a civil jurisdiction that has been so classified by the Assistant Secretary for Employment and Training, United States Department of Labor. The Assistant Secretary shall classify a civil jurisdiction as having high unemployment whenever, as determined by the Bureau of Labor Statistics, the civil jurisdiction has had an average unemployment rate over the previous twelve months no less than ninety percent of the National Average unemployment rate during the same period, or if the civil jurisdiction is currently or should become designated a Labor Surplus Area by the Department of Labor. The Assistant Secretary, upon petition submitted by the appropriate state agency, may classify a civil jurisdiction as having high unemployment whenever the civil jurisdiction has experienced or is about to experience a sudden economic dislocation resulting in job loss that is significant both in terms of the number of jobs eliminated and the effect upon the employment rate of the area. The Assistant Secretary shall publish a list of civil jurisdictions with high unemployment, together with geographic descriptions thereof, within thirty days after enactment of this act, and on a monthly basis thereafter.

"The provisions of this section shall not apply to any program or portion of a program under which funds are allocated by formula, or for humanitarian aid and training programs, including Emergency Mortgage Assistance; Indian Health Facilities; Operation of Indian Program; Community and Home Health Services; Maternal and Child Health Services; Head Start; Feeding Programs for Women, Infants and Children; and Food Distribution and Emergency Shelters."

Mr. EDGAR (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The CHAIRMAN. Pursuant to House Resolution 113, the gentleman from Pennsylvania (Mr. EDGAR) will be recognized for 30 minutes, and a Member opposed to the amendment will be recognized for 30 minutes.

The Chair will inquire at this point if a Member seeks recognition in opposition to the amendment?

The gentleman from Pennsylvania (Mr. EDGAR) is recognized for 30 minutes.

Mr. EDGAR. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I stand in the well to offer an amendment dealing with targeting of this legislation to areas of high unemployment and economic distress. I stand here as the author of the amendment, but in deep gratitude to many Members on both sides of the aisle who have played an enormous role in putting together language in the targeting amendment that meets the needs of dealing with unemployment.

I would like to pay special attention and note to the gentleman from Pennsylvania (Mr. COUGHLIN) who had a similar amendment and agreed to cosponsor this amendment and at the appropriate time I will yield time to him.

I also would like to pay special attention to the gentleman from Massachusetts (Mr. CONTE) who, I believe, has made a good contribution to this debate, particularly in the area of targeting. Both his substitute and, if this amendment passes, the committee bill should, in fact, have language in it which targets the funds to areas of economic distress.

□ 1500

I would also like to recognize that the freshmen Members of Congress also were very anxiously aware that if we simply pass the jobs bill without a targeting provision, much of the money might go to communities that, in fact, had very low levels of unemployment and, in fact, neglect those areas of high unemployment in Michigan and Ohio and Mississippi and Alabama and California.

I think that the amendment that all of us have drafted today is fair and equitable, and I urge all of my colleagues to support it.

Let me share some specifics of what the amendment will do.

At least 75 percent of the discretionary funds in the bill would be targeted specifically to areas of high unemployment. What does that mean? Of the $4.6 billion in this bill, $2.45 billion of it deals with discretionary programs. Of that $2.45 billion, which is approximately 52.7 percent of the entire bill, 75 percent of those discretionary funds would, in fact, be targeted into the areas of highest unemployment, approximately $1.8 billion of the total appropriation.

Mr. Chairman, this particular targeting amendment does take into account the need to zero the money into areas that are pockets of poverty, areas that are UDAG eligible, areas that are labor surplus eligible. It does take into account the need for small cities as well as large cities, rural areas as well as urban areas. The bottom line is that it states that as we place before the House and hopefully before the President of the United States a jobs package, that that jobs package, as limited as it is, should be targeted to those who are in most need. I believe that as you study the implications of this targeting amendment, everyone—Democratic, Republican, Conservative, and Liberal—would agree that this package can be improved by having a targeting amendment with it.

A number of Members are interested in the legislation. A number of Members care deeply about this targeting amendment. I would like to announce to my colleagues that I do plan to have a recorded vote because I think we need to tell the other body, we need to tell the President of the United States, that whatever version of this jobs legislation appears from Congress, that we, as Members of Congress, believe that the legislation should be carefully and specifically targeted to areas of high unemployment.

In Michigan there are thousands and thousands of people unemployed. In Philadelphia, in some of the pockets of poverty within that city, there is a high percentage of people who are without work. In Mississippi and Alabama and Florida and California, there are areas of this country where the unemployment rate reaches 20 and 25 percent. There are areas where unemployment rates simply have led to the total decay and problems that those communities are facing.

Mr. FAZIO. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from California.

Mr. FAZIO. I appreciate the gentleman yielding to me, and I appreciate his amendment.

Mr. Chairman, as one who comes from an area with a high rate of unemployment, perhaps 3 percent above the national average in the urban area and higher in the rural counties that surround it, I particularly want to applaud the gentleman for the way he presented this amendment because I think too many of our colleagues perceive our unemployment problems as perhaps regionally based in the Northeast or the Midwest.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. EDGAR) has expired.

Mr. EDGAR. Mr. Chairman, I yield myself 1 additional minute.

Mr. FAZIO. Mr. Chairman, I know the gentleman, as the leader of the coalition that is so effective on this floor representing that area may be somehow, in some people's minds, identified with an effort to target this bill to solely those areas. But I know that the gentleman understands, as many others of us from other parts of the country do, that unemployment rates are high in many sectors.

The construction unemployment rate, for example, has gone up so rapidly in so many parts of California that we have 40 to 50 percent of our workers in the building trades out of work at this time.

With the sensitivity with which the gentleman has drafted this amendment, I know most if not all Members of this body can readily accept it and it can be, I hope, integrated into the final enactment that we make in several weeks.

Mr. EDGAR. I thank the gentleman for his comments.

Mr. Chairman, I would like now to yield 5 minutes to the gentleman from Pennsylvania (Mr. COUGHLIN).

Finally, Mr. Chairman, I want to include at this point a list of those programs in the bill that would be included under the amendment and those which would be exempted:

Programs to be exempted in the amendment[1]

Program	Amount
Emergency mortgage assistance	$500,000
Community development block grants	1,250,000,000
Indian health facilities	39,000,000
Bureau of Indian Affairs	20,000,000
Low-income weatherization—DOE	150,000,000
Jobs Corps	32,400,000
Summer Youth	100,000,000
Displaced Workers	75,000,000
Older Americans employment	25,000,000
Community and home health services	30,000,000
Maternal and child health	10,000,000
Alcohol, drug abuse, and mental health	30,000,000
Social services block grant	150,000,000
Day care	(50,000,000)
Head Start	30,000,000
Community services block grant	25,000,000
Humanitarian assistance plan	250,000
Distribution of agricultural commodities	75,000,000
Women, infant, and children feeding program	100,000,000
Food distribution and shelters—FEMA	50,000,000
Total	2,192,150,000

[1] 47.3 percent of the funds are to be exempted from this amendment (of the $4.63 billion).

Note: To be exempted: Programs that distribute funds by a formula; humanitarian aid programs and training programs.

Programs to be included in the amendment[1]

Programs	Amount
Business and housing plans	$500,000
GSA—Repairing Federal buildings	125,000,000
Highway demonstration projects	33,000,000
Mass transit grants	100,000,000
Amtrak grants	120,000,000
Repairing VA hospitals	75,000,000
Economic Development Administration	200,000,000
SBA—New direct loans	202,000,000
SBA—Natural resources development	50,000,000
Repairing urban parks	50,000,000
Improving and maintaining our national parks	50,000,000
Preserving our national forests	45,000,000
Fish and wildlife facilities	25,000,000
Rural water and sewer grants	200,000,000
Farmers Home administrative expenses	6,500,000
Resource conservation and development	15,000,000
Soil Conservation Service—Flood prevention	160,000,000
Corps of Engineers—Emergency flood control	404,000,000
Bureau of Reclamation	101,000,000
Tennessee Valley Authority	40,000,000
Repairing prison facilities	90,000,000
Family housing for the military	243,000,000
GSA—Federal motor vehicle replacement	75,000,000
School facilities	35,000,000
Urban development action grants—UDAG[2]	(244,000,000)
Total	2,445,000,000

[1] 52.7 percent of the $4.63 billion.

[2] The UDAG program moneys are a deferral disapproval and not new moneys—it is not counted in the $4.6 billion total.

Mr. COUGHLIN. I thank the gentleman from Pennsylvania for yielding this time to me.

Mr. Chairman, I want to commend the gentleman from Pennsylvania (Mr. EDGAR) and the gentleman from Massachusetts (Mr. CONTE) who were instrumental in drafting this version of the amendment. It is a good amendment which I urge on my colleagues.

As it stands title I of this bill reminds me of the old song "Roll Out the Barrel." Roll out the barrel, we will have a barrel of pork. Roll out the barrel, there will be none left for New York—or Pennsylvania or Ohio or Illinois or Michigan or Mississippi for that matter.

This amendment would require that 75 percent of the funds for each discretionary program in the bill be made available in areas where unemployment is highest.

Jurisdictions eligible for this 75 percent of $1.84 billion of targeted jobs assistance would be those with average unemployment at least 90 percent of the national jobless rate—or 8.7 percent unemployment— during the past year, those designated as labor surplus areas, those eligible for funds under the urban development action grant program, or those meeting the criteria for pockets of proverty under the UDAG program.

Let us be clear, our amendment would exempt from the targeting requirement the $2.1 billion provided in the bill for programs with existing allocation formulas as well as humanitarian aid and training programs such as emergency mortgage assistance, community and home health services, Head Start, feeding programs and food distribution and emergency shelters. These programs are already targeted to need.

Let us also be clear. It would still leave $600 million to be allocated to projects in areas including those with lower rates of unemployment.

Mr. Chairman, the economic recession has affected the lives of individuals in every city, town, county, and rural area of the Nation. Yet, it is clear that the recession has impacted the country far more severely in some areas than in others. The Bureau of Labor Statistics reports that in December of 1982, unemployment in major metropolitan areas ranged from 4 percent in Stamford, Conn., to 22.7 percent in Johnstown, Pa.

It makes no sense that a major economic stimulus bill, which is being trumpeted as an "emergency jobs and recession-relief package," fails to make even a modest effort to target assistance to those areas where it is most desperately needed. The amendment which we are offering today corrects this flaw in the bill.

The emergency supplemental appropriations bill under consideration today has been criticized because of the many "pork barrel" projects included in it. I share in that criticism and urge adoption of the Edgar-Coughlin amendment in order to redirect funds to projects in areas where the need for jobs is most critical.

Mr. SMITH of Iowa. Mr. Chairman, I rise in opposition to the amendment.

The CHAIRMAN. The gentleman from Iowa (Mr. SMITH) rises in opposition to the amendment, and under the rule the gentleman is allocated 30 minutes.

Mr. SMITH of Iowa. Mr. Chairman, I yield myself such time as I may consume.

The debate on this amendment started out as if it were going to be a love fest and no one was going to bring up the adverse points of this amendment. There are some very serious adverse points to this amendment that I believe should be pointed out.

To start with, it assumes that we have accurate measurements of unemployment in this country, and we do not have them. The Labor Department has been working for 5 or 6 years to try to develop some more accurate measurements, but we do not have them today. What they measure today more than anything else is how many have been lucky enough to have had jobs in the past and drawn unemployment compensation.

We have areas in this country that have a greater percentage looking for a job this is the case in other areas which according to the statistics have higher unemployment but show up as having less unemployment because they have more people who have never had a job. Everyone in Detroit about 3 or 4 years ago who wanted a job had a job but today they have terribly high unemployment and they have terribly high unemployment under our statistics, but that does not mean that there are any more people looking for a job per job available than there are in some other areas which show up as having lower unemployment because those who have never had a job felt there was not any use going to the employment office are not sufficiently reflected.

I will just give you one example. Back under the poverty program we had a study of this for 6 or 7 months. At the time, Seattle had measured 15-percent unemployment. Iowa had 5.4-percent unemployment. Yet the study showed that there were more people looking for jobs per job available in Iowa than there were in Seattle.

That is one of the things that is wrong with this amendment. It assumes that we can take these inaccurate statistics and distribute money on that basis, and we should not be trying to do it.

□ 1510

Second, the amendment assumes that someone is not suffering as much unless 9.7 percent of their neighbors are unemployed. Well, whether they live in an 8.4-percent unemployment area, as it is overall in Iowa—although we have some areas where more than 20 percent are unemployed—whether it is 8.4-percent unemployed or 10-percent unemployed, that does not mean the suffering is any less for those who are unemployed. So why should they be excluded from any of these job programs, especially if it is a more worthy application that can give more people immediate employment when some of the so-called higher unemployment areas do not have a project or program which can provide the employment opportunities.

Let us take EDA. EDA projects are funded on the basis of need already, and the project eligibility criteria takes into account unemployment rates in project areas. What we are doing is adding another layer of determinations on top of what we have already. That is going to delay it. I do not know how long, but for weeks at least. The amendment says they should identify the areas eligible within 30 days. Baloney. They are not going to make a report in 30 days. They cannot do it. There is no way they can do it.

There are SBA funds in here, and we have guarantees, and EDA, and a number of things that the administration does not want. What this amendment does is to deliver to the administration an excuse to kill any one of these jobs programs that they do not like by delaying determinations. It will take them so long to figure out where this money is supposed to go, whether or not the contractor is in the right area or the employees reside in the right area or under what rules he will have to proceed in order to hire these people that they can kill any program without openly opposing it. They will just delay it to death administratively.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I will yield in just a minute.

Let us talk about this pork barrel business. What is this? It says: "A town or township in the State of New Jersey, New York, Michigan, or Pennsylvania of 50,000 or more population." What is wrong with the other cities?

Mr. EDGAR. Mr. Chairman, will the gentleman yield at that point?

Mr. SMITH of Iowa. I will yield in just a minute.

The amendment also says: "A county equivalent which is a town in the States of Massachusetts, Rhode Island, and Connecticut." What is wrong with the other States?

Mr. Chairman, I will yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, I thank the gentleman for yielding.

The language that is included in the amendment which the gentleman is referencing is already language that is in public law designating labor surplus. The reason for the designation the gentleman asked about, the "town or township in the State of New Jersey, N w York, Michigan, or Pennsylvania," is that they are the only States that have that unique jurisdiction, towns or townships, as opposed to cities.

If the gentleman will go down further, he will see that it says: "A county equivalent which is a town in the States of Massachusetts, Rhode Island, and Connecticut." That is not the language of the gentleman from Pennsylvania; that is language that is in the law. That is language in the law that defines what is meant by civil jurisdictions, and it is used in present law that we in this Congress have developed for labor surplus areas.

The only addition we made was an addition that was requested by the Democratic freshmen, and that was in paragraph (6), which says:

> A portion of a city or jurisdiction that meets the pockets of poverty criteria as defined by the Department of Housing and Urban Development.

Mr. SMITH of Iowa. Mr. Chairman, the gentleman helps to make my point. We have tried targeting around here for several years, and the more we write regulations and the more we write rules into law, the more we find out it does not work as planned. This kind of thing has been tried, it has been perfected, it has been reperfected, and it still has serious problems. It is a bad way to do it.

Mr. EDGAR. Mr. Chairman, will the gentleman yield further?

Mr. SMITH of Iowa. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, one of the reasons for suggesting this particular targeting language the way it is, is that all the agencies covered by this bill have already written regulations that are already part of the Federal Register and part of the Federal rules and regulations according to these criteria.

I also point out to the gentleman that there is a provision in the amendment that within 30 days of enactment and signing into law of this particular bill each agency would have to give a list of the jurisdictions covered. So that is in answer to the gentleman's point of delay.

Mr. SMITH of Iowa. There is no way, absolutely no way that they can do it in 30 days. In fact, they say they cannot do it in 6 weeks, or 7 weeks, or 8 weeks.

Mr. EDGAR. Mr. Chairman, if the gentleman will yield further, I have three documents with me. One is a computer printout of the communities that would be covered by county. I also have two computer printouts on listings from the Federal Register which lists small cities and large cities that would be eligible by the criteria laid out.

So much of the work of the agencies has already been handled by these three separate documents that are already part of the procedure.

Mr. SMITH of Iowa. Mr. Chairman, the gentleman is assuming that the agency wants to go ahead and implement this as soon as possible. But we combine this with the language in the recommittal of the gentleman from Massachusetts (Mr. CONTE) that says that it has got to be spent in this fiscal year—and incidentally I think it ought to be—we combine the two together and we are not going to get the money spent. That is what is going to happen. They will just delay it and delay it, and we are giving the agencies a blank check to delay this as long as they want to.

Mr. Chairman, I think this is a bad amendment, and members ought to be aware of the problems involved before its goes to conference.

The CHAIRMAN. The gentleman from Iowa (Mr. SMITH) has consumed 7 minutes of his 30 minutes.

The Chair recognizes the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Chairman, I yield 11 minutes to my colleague, the gentleman from Michigan (Mr. LEVIN).

Mr. LEVIN of Michigan. Mr. Chairman, in the sections of this bill dealing with funds for health and social services, the committee report makes it clear that those funds shall be targeted based on unemployment and the greatest demand for services. This amendment assures that the provisions of the bill aimed at job creation shall be focused on the areas where there is the greatest need for job creation. Therefore, the amendment is both necessary and consistent with other portions of the bill.

This Nation has reached a point where CARE packages are being sent to the unemployed in Michigan from West Germany and the mayor of Cleveland states that his city is running out of ways to feed its hungry. It is time for action.

This is the sentiment that has strongly prevailed among new Democratic Members as we have spent hours working on the jobs issue. Influenced by this work, Congressman BRUCE MORRISON and I presented to the Rules Committee a targeting amendment, a proposal now incorporated in this amendment; 12 days ago when I was talking to unemployed women and men in a suburban Detroit unemployment compensation office, an unemployed worker said to me: "The toughest job in Michigan today is finding a job."

This amendment is critical if we are to respond to that poignant commentary on the state of the Nation in March 1983.

Mr. MORRISON of Connecticut. Mr. Chairman, will the gentleman yield?

Mr. LEVIN of Michigan. Mr. Chairman, I yield to the gentleman from Connecticut.

Mr. MORRISON of Connecticut. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, this targeting amendment is one of the most important goals we should have in considering this bill. This is a jobs bill. This is a bill that is intended to bring relief to millions of unemployed people in this country, and if we are to bring that relief, we should to the greatest extent possible target it in accordance with the need.

Now, there is some concern that had been expressed about individuals who have been out of the work force for so long that they are not counted among the unemployed. There are many such individuals in my community, in one of the towns I represent, New Haven, Conn. In fact, New Haven, Conn., has the seventh largest rate of poverty in the United States, and, in fact, New Haven, Conn., has a relatively low unemployment rate. It is true that when individuals have been so long out of the work force, they stop being counted as unemployed.

But something else happens. They are counted as poor. They enter the statistic about the poverty rate, and one critical element of this amendment is that it takes that fact into account. The poverty rate, as well as the unemployment rate, is being used to target these funds. That is being done by using the urban development action grant program which targets on communities in distress.

We have achieved in this amendment a way of targeting that group that the distinguished gentleman from Iowa (Mr. SMITH) has referred to, the unemployed poor who have been out of work for so long that they are no longer counted as unemployed. We have done that for all jurisdictions, towns, townships, cities, and counties, and we have also done it for pockets of poverty within jurisdictions where the poverty rate or unemployment itself is not high.

Targeting is a key to this bill, and the addition of this amendment will give us the targeting that we need, both in those communities of high unemployment and in those communities of high rates of poverty.

□ 1520

Ms. KAPTUR. Mr. Chairman, will the gentleman yield?

Mr. LEVIN of Michigan. I yield to the gentlewoman from Ohio.

Ms. KAPTUR. Mr. Chairman, I rise in support of the Emergency Supplemental Appropriations Act of 1983 because the unemployment situation in the United States is intolerable. Aid to the jobless and humanitarian relief are essential elements of this measure. I view this bill as our first, positive step in translating the message of last November's congressonal elections into legislation for our people.

However, I believe that the impact of this bill would be greater if it would target its benefits to those areas of the country suffering from the greatest unemployment. I thus strongly stand in favor of the Edgar amendment which establishes in our first major piece of jobs-related legislation in this Congress the important principle of targetting funds on the basis of unemployment and poverty rates.

Although the rates of unemployment and the extent of dislocation are severe throughout the Nation, many areas like my own in the Greater Toledo area have been especially hard hit. Our Nation's industrial areas are in a depression, facing unemployment rates far in excess of the national average. In Ohio, for example, the January rate of unemployment was 14.9 percent, almost 50 percent more than the rate for the Nation. Well over one-half million Ohioans are out of work and in my own area over 50,000 are jobless. All of you are well aware of the pain that accompanies the erosion not only of a manufacturing base, but of human dignity. Thus, members of the Ohio delegation were active in trying to get targetting language in this bill and I strongly support this amendment.

The prospects for either short- or long-term economic recovery are dismal for the hard-hit regions of this country. Though the national unemployment rate dropped from 10.8 percent to 10.4 percent from December to January, the unemployment rate in Ohio rose from 14.1 percent to 14.9 percent. The average duration of unemployment is also growing with over one-third of the unemployed being out of work for over 17 weeks. In my district, unemployment has risen again recently, now to a level of 14.3 percent. The Toledo area has lost 10,800 manufacturing jobs in the last 2 years and 25,000 jobs in the last 10 years.

The working people of these depressed regions must be rescued and the most effective way to do that is to channel benefits directly to their area. Unless benefits are targetted to areas with the highest levels of unemployment—from Laredo, Tex., Pittsburgh, Youngstown, Milwaukee, Seattle, Yuba City, Calif., to Buffalo, N.Y., and Birmingham, Ala., and yes, Toledo—this Congress will have failed the American people. To do so, would be unconscionable. I urge your support for the Edgar amendment.

Mr. WISE. Mr. Chairman, will the gentleman yield?

Mr. LEVIN of Michigan. I yield to the gentleman from West Virginia.

Mr. WISE. I thank the gentleman for yielding.

Mr. Chairman, I come from a State at the top of the list of page 2 of your bill. That State is West Virginia, and it is listed at 17.8 percent unemploy-

ment. I can tell you factually that many counties I come from, coal mining counties, manufacturing counties, the number is double that.

We have got a problem under the present bill. We are not urban, so where are we? We are not populous so who considers us? What we are, Mr. Chairman, are unemployed, and unemployed in record numbers in my State.

Mr. Chairman, I would like to make a special plea for targeting, such as the Edgar amendment embraces. I am seeing something in my State I have not seen in 15 years. When I was a boy cutting brush on the roadside in a rural county, I used to see the commodity trucks from the Department of Welfare come through, and they would drop off cheese and milk. That was the way you distributed and fed people in those days. Then we had food stamps, and we had economic redevelopment.

Mr. Chairman, the other night in Nicholas County, a county of unemployed coal miners, they came and asked me how we could get the commodity trucks back.

Mr. Chairman, I urge that you target help for us and that we adopt the Edgar amendment.

Mr. EDGAR. Mr. Chairman, if the gentleman will yield for a moment, I would like to commend the gentleman for his statement. I think the gentleman points out that this amendment helps rural and suburban areas as much as it does urban areas, and the gentleman's level of unemployment would be better served under a targeting amendment. I thank the gentleman for his statement.

Ms. FIELDER. Mr. Chairman, will the gentleman yield for a question?

Mr. LEVIN of Michigan. I yield to the gentlewoman from California.

Ms. FIEDLER. Mr. Chairman, I have a question regarding this. I am wondering whether or not the EPA sanctions which were brought against 150-plus counties in this country would be held to deem them unable to have some of these special projects as a result of the sanctions. I wonder if the gentleman or the Chairman might be able to answer that question.

Mr. EDGAR. Mr. Chairman, if I can respond to the gentlewoman's question, we do not go into that level of detail. Twenty-five percent of those discretionary funds are still available to EPA to target to those areas if they are included in the language of the bill itself. It simply says that 75 percent of their effort has to be in areas of high unemployment. And if the gentlewoman would like, I can show the small city, county, and large city in her district, to know what areas would be qualifying under the language of the amendment.

Ms. FIEDLER. But my question goes to the fact that right now that would leave the discretion to EPA, if I understand the gentleman's response. I am concerned that there are 150 counties in the country which would not be eligible because of those sanctions, and I am wondering whether or not there might be any waiver provisions, either in the gentleman's amendment or in the bill, to cover that issue.

Mr. EDGAR. Our amendment would not cover any waiver conditions at all. Under the committee bill, the agencies are left to do what they want with all of the money. All we are simply saying is that in that discretionary area, 75 percent of it has to be targeted to areas that meet the criteria in the Edgar amendment.

Ms. FIEDLER. So, in essence, it is silent, both in the bill and the gentleman's amendment, to that issue?

Mr. EDGAR. That is right.

Ms. FIEDLER. Thereby leaving the existing law in place.

Mr. PHILIP M. CRANE. Mr. Chairman, will the gentleman yield?

Mr. LEVIN of Michigan. I yield to the gentleman from Illinois.

Mr. PHILIP M. CRANE. Mr. Chairman, Congress is an immensely compassionate body. If there is an identifiable problem in society, Congress rarely misses it. Sooner or later, major—and sometimes minor—problems become the focus of congressional attention.

Unemployment is one of those problems. I remember debates over public works jobs in this body in 1976 to alleviate the problems of the 1973-75 recession. I remember similar debates over public works legislation in 1972 to deal with the problems arising from the recession of 1970.

Some colleagues in this body remember the public works legislation in 1962 designed to deal with the unemployment arising from the 1960 recession.

The significant fact is that in every instance, Congress acted to address the problem well after it was in the process of disappearing.

You have all heard or seen the encouraging economic statistics of late. Since President Reagan took office, inflation has dropped from a high of 13.5 percent under President Carter to 2 percent today. The prime rate under President Carter hit 21.5 percent. Today it is 10.5 percent and expected to drop another 1 percent very soon. Housing starts are up almost 100 percent over a year ago. Automakers are rehiring and plan to increase production 35 percent this spring over a year ago.

But the most encouraging economic indicator—and the most reliable—is Congress itself. By the time this body gets around to dealing with unemployment—which has already started to decline—you can rest assured that the economy is well on its way to recovery.

Now what are the inherent flaws in this legislation?

First, we are proposing to spend $4.6 billion that we do not have. Since we are not proposing to raise this unanticipated spending burden with a $4.6 billion tax increase, we must go into the capital markets and borrow it in competition with the private sector at the very time business will be borrowing aggressively in a business recovery. This can only retard a healthy recovery in the private sector. The loss of $4.6 billion to the private sector represents a loss of over 100,000 productive jobs in the private sector, jobs that give workers a future and improve the overall state of our economy.

Second, OMB studies reveal that public works jobs result in hiring no more than 12 percent to 27 percent of the unemployed; 75 percent, almost 90 percent of these jobs will go to people already employed.

Third, the jobs that sponsors of this legislation intend to promote are not jobs in the areas of greatest unemployment. Why are we taking precious capital out of our economically distressed heartland—with the highest levels of unemployment in the land—to spend it in areas that have infinitely less suffering? That is why I support this amendment.

But if jobs are really at issue, there are any number of preferable positive actions that could and should be taken by this body instead of resorting to counterproductive, misplaced, and misguided legislation such as we have under consideration today.

For example, if we were to repeal the anachronistic Davis-Bacon legislation, we could save the taxpayer an estimated $2 billion and simultaneously create an estimated 100,000 new jobs, many of which would offer expanded opportunities to minorities and the disadvantaged.

If we provided a youth differential under the minimum wage, we could generate another 50,000 jobs for the young, especially black teenagers who are hurt the most.

By accelerating scheduled social security tax hikes to 1984, the chamber of commerce estimates we will be losing another 500,000 jobs that otherwise would be created.

By granting eminent domain to coal slurry pipelines, we could create another 150,000 jobs.

If we refrain from cutting the defense budget by $10 billion, according to the Christian Science Monitor, we can save another 350,000 jobs.

There are many other positive steps we could take as well, but just these few examples would net us over a million jobs.

Mr. Chairman, this bill is cosmetic as far as affecting unemployment. Moreover, it is injurious to the economy. And finally, it seriously aggravates an already depressing budget deficit. I urge my colleagues to defeat

the resolution and go back to the drawing boards.

Mr. EVANS of Illinois. Mr. Chairman, will the gentleman yield?

Mr. LEVIN of Michigan. I yield to the gentleman from Illinois.

Mr. EVANS of Illinois. Mr. Chairman, I rise in support of the Edgar amendment. I thank the gentleman from Michigan for yielding to me, and I want to commend him for his efforts to target needed assistance to areas of highest unemployment.

I also want to express my appreciation for the effort that the gentleman from Mississippi and the committee has put into this bill. I believe that this first phase of action by the Congress to aid the unemployed of our Nation is essential.

But if Noah had worked on this scale, he would have built a rowboat instead of an ark.

I was elected 4 months ago to take action against the unemployment that afflicts one of every five of my constituents. I support this jobs bill because it provides badly needed benefits extensions for our unemployed and emergency assistance for those hardest hit by the recession.

However, this bill, by itself, is not enough.

The Edgar amendment is a necessary and important addition to this preliminary fight against unemployment.

We also need an immediate followup bill to provide a million jobs by January 1 of next year. We could pay for it by canceling the July 1 tax cut.

Millions of Americans are desperate for jobs. We cannot wait for a gradual and uncertain recovery to supply those jobs. Congress must not conclude its job-creating efforts with the bill we are voting on today.

The floodwaters of unemployment are unabated. We need an ark, not a rowboat.

I wish to thank the gentleman for yielding and ask permission to revise and extend my remarks.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. LEVIN) has expired.

The gentleman from Iowa (Mr. SMITH) has 23 minutes remaining, and the gentleman from Pennsylvania (Mr. EDGAR) has 9 minutes remaining.

Mr. SMITH of Iowa. Mr. Chairman, I yield 5 minutes to the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Chairman, as I pointed out earlier, we have worked through the recess and other times trying to reach what it is said this amendment will reach. I agree with the gentleman from Iowa (Mr. SMITH) that, on the face of it, it could lead to all sorts of delays. But the description of its intent is certainly in line with what we have done from the start.

Our friends from Michigan and elsewhere have called on me to try to target funds to these areas, and at that time I agreed and got the committee to agree that we have a quarter of a billion dollars in the community development block grant program specifically targeted to areas of high unemployment. The gentleman's description of what his amendment will do is in line with what we have tried awfully hard to do already.

Now, the gentleman from Iowa (Mr. SMITH) has arguments on his side as to whether it could be used as written, to delay the job being done. So I would rise in support of the intent of it, with the right to see what we can do to be sure that it is not used to delay but that it is used to carry out the projects.

I mention that to you, having worked all of this time to try to bring something we can agree on. Certainly we need balance between rural and city, between North and South, between everybody, to meet this problem because it is national and it needs correction.

So I rise to say that I am in favor of the intent, and I suggest that we do accept the amendment on this side and that we work it out with the author to be sure that it does not delay the process but that it be carried out as he intends.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Pennsylvania.

□ 1530

Mr. EDGAR. I would just like to thank the gentleman for his acceptance and also his commitment to work within the conference committee for a strong targeted amendment.

Mr. WHITTEN. I have spent days trying to do just what you intended to do, to give this to somebody intentionally, and I will be glad to work with you and the other body to accomplish this.

Mr. EDGAR. I thank the gentleman.

Mr. SMITH of Iowa. Mr. Chairman, I yield 1 minute to the gentleman from Maryland (Mr. HOYER).

Mr. HOYER. I thank the distinguished chairman of the subcommittee for yielding. I rise to enter into a colloquy with the chairman of the committee.

I understand, Mr. Chairman, that the WIC program is exempted under the Edgar amendment. My State is particularly concerned with how that money is to be funded and I would ask the following question.

Mr. Chairman, it is my understanding that the USDA has considerable discretion in allocating funds to the States under the WIC program. In order to assist the State agencies responsible for administering this program to plan their caseloads, is it not the intent of the Congress that the additional $100 million included in this bill for the WIC program be allocated to the States on the same basis as the allocation of the funds appropriated in the fiscal year 1983 agriculture appropriations bill?

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. HOYER. I yield to the chairman.

Mr. WHITTEN. That is my understanding. May I say that these funds are included in the bill because with the depressed conditions quite evidently the size and the need for this program has grown. We intend that the funds will be allocated under the present requirements.

Mr. HOYER. I thank the chairman for his assurance.

Mr. SMITH of Iowa. I yield 1 minute to the gentleman from South Dakota (Mr. DASCHLE).

Mr. DASCHLE. Mr. Chairman. I must rise in opposition to the amendment before us which would designate that 75 percent of funds for each program in this bill be spent in what are defined as "high unemployment" areas. I do so not because I think that these funds should not go to areas where there is high unemployment, but because the statistical methods used to determine these unemployment rates work a disservice to low population, rural States like my one.

Consider, for instance, the following figures from the Bureau of Labor Statistics report of February 15, 1983. In December of 1981, South Dakota's civilian labor force was estimated at 323,000. In December of 1982, however, that same labor force was given as 313,000. Though to some areas of the country, this drop of 10,000 members of the work force might not be considered substantial, in a low population State like South Dakota it represents a significant percentage of the total work force. In contrast, for example, in the same time period, Pennsylvania's work force increased from 5,437,000 to 5,523,000. Michigan's work force increased from 4,261,000 to 4,327,000, and California's work force increased from 11,884,000 to 12,236,000.

Looking through the BLS statistics, it becomes apparent what is happening. Predominantly rural States like South Dakota, Iowa, and Mississippi all lost numbers in their work force, while other agricultural States like North Dakota, Minnesota, and Nebraska stayed about even. This leads to the conclusion that, in fact, these States are experiencing a serious outmigration of their working people. There are simply no jobs, or the hope of future jobs, available in these largely rural, unindustrialized States, and the depressed state of the farm economy is drying up what nonagricultural jobs in sales and services are available. These people are leaving our States and

adding to the unemployment picture of other States.

By doing so, however, a false picture is painted of the unemployment situation in rural States. If jobs were available in our States, people would stay. We would not be subject to the serious outmigrations which apparently give us a low unemployment rate but, in truth, paint instead a dark picture of an economic climate in which even the prospect of employment is so dim that people are forced to leave the State.

One other factor must be spoken of in talking about South Dakota's low unemployment. A little over 6 percent of my State's population consists of Native Americans, primarily residing on reservations. Estimates of unemployment on these reservations run at about 80 percent, giving an underlying employment rate in the State as a whole of 4.8 percent. These figures, however, are generally not used in computing South Dakota's unemployment rate, further distorting the overall picture. Therefore, the Edgar amendment might not even benefit the unemployed on Indian reservations.

My State has been trying very hard, in recent years to bring in as many new businesses as possible to diversify our largely agricultural economy, and provide jobs in the private sector so that our young people and working men and women would not be forced to leave our State. We will continue these efforts. However, the false unemployment figures painted by Federal statistics should not be used as a tool to punish my State, or other rural States experiencing the same outmigration. It is for this reason that I oppose the amendment, and urge my colleagues to do likewise.

Mr. Chairman, the commitment made by the Federal Government to adequately compensate the State of South Dakota for the loss of 536,875 acres of productive land sacrificed for the construction of mainstream dams to provide residents of the Lower Missouri River Basin protection against devastating dams has not been honored. The WEB rural water development project, authorized by section 9 of the Rural Development Policy Act and reauthorized by Public Law 97-273, provides recognition and partial payment of the debt owed to the State of South Dakota for this sacrifice. Accelerated design, construction, and completion of the WEB rural water development project is an important, if small, step toward adequately compensating the people of South Dakota for the sacrifice made in the interest of protecting and preserving the life and property of the residents of the Lower Missouri River Basin.

The Missouri National Recreation river project was originally conceived by local citizens of South Dakota and Nebraska in the early 1970's when bank erosion along the 57.9-mile stretch of river between Yankton, S. Dak., and Ponca, Neb., was beginning to become severe. After forming the Missouri River Bank Stabilization Association in 1971, landowners in the area obtained the support of Congress, and the project was finally authorized in section 707 of Public Law 95-625, the National Parks and Recreation Act of 1978. The project is unique in that it combines the planning capabilities and efforts of the Department of the Interior and the Army Corps of Engineers in a dual purpose project to both stabilize the bank erosion along the river and provide additional recreational opportunities for the citizens of Nebraska, South Dakota, and Iowa.

I stress the seriousness of the continual loss of prime farmland, a loss which is occuring at a phenomenal rate in this area. Erosion rates exceeding 90 acres per mile of bankline per year—90 acres per mile a year, Mr. Chairman—are not uncommon. Erosion has created ever-widening floodways and vast areas of sandbars to replace the eroded crop and woodlands, and chronic bank erosion continues to damage or threaten numerous public works, farms, and irrigation activities along this stretch of river.

Mr. Chairman, annual erosion rates of up to 90 surface acres per river mile are far larger than normal. The fact is that this 57.9 acre stretch of the Missouri River is immediately below the last downstream Pick-Sloan mainstream dam. The scheduling of released flows from the Gavins Point Dam contribute to that excessive erosion rate. Yes, the very worthy Corps of Engineers' efforts are a major cause of the erosion, but we have failed to protect the downstream property owner from the resulting huge erosion losses. This is inequitable and the Congress ought to act to correct this continuing inequity. I urge the House to earmark a substantial amount of funding in this bill for this urgent project.

Mr. Chairman, I wish to direct a question to the distinguished Chairman of the Energy and Water Development Subcomittee, Mr. BEVILL.

Are the design and construction of riverbank protection works on the Missouri River between Yankton, S.D. and Ponca State Park, Neb., as authorized by section 707 of the National Parks and Recreation Act of 1978 and are design and constuction of the WEB rural water development project, as authorized by section 9 of the Rural Development Policy Act of 1980 and reauthorized by Public Law 97-273, eligible under the provisions of the bill?

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Alabama.

Mr. BEVILL. The answer to my colleague, the gentleman from South Dakota, is "Yes."

Mr. DASCHLE. I thank the subcommittee chairman.

Mr. SMITH of Iowa. Mr. Chairman, I yield such time as he may consume to the gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 1718, the emergency supplemental appropriations bill.

This legislation is a solid, timely and extremely important congressional response which will stimulate the economy by providing immediate and productive employment opportunities.

But it is much, much more than that.

This bill is also a signal to all of the American people, including the more than 3.2 million American citizens in Puerto Rico, that Congress, on a bipartisan basis has honored a commitment to the citizens of this Nation.

The commitment is that the elected officials to the Congress of the United States have recognized that vigorous steps have to be taken to respond to the current economic dilemma in which many ordinary citizens find themselves.

At the outset, I wish to commend the House leadership and the gentleman from Washington Mr. FOLEY who, working with Speaker O'NEILL, the majority leader Mr. WRIGHT and the committee chairman have participated in the lengthy and complex negotiations with the White House that made it possible for this legislation to reach the House floor.

Mr. Chairman, all of us must commend Chairman JAMIE WHITTEN who, by bringing this bill speedily to the House floor, once again displays his extraordinary legislative expertise in molding different viewpoints and ways to stimulate the economy into this package which we consider today.

This is a temporary measure. We do not want to raise false expectations that this bill will solve all of the current economic problems.

But, as I speak today, our Nation faces an unemployment of 10.4 percent and Puerto Rico is suffering under a staggering 25.3 percent unemployment rate.

No one today needs a recitation of the litany of problems which have confronted States and every congressional district in this Nation.

Like others, Puerto Rico has experienced cutbacks in Federal programs that have provided business opportunities, loans and "ladders of opportunity" for citizens in such programs like the Economic Development Administration, Farmer's Home Administration, and the Small Business Administration.

As in every State of the Union, unemployment lines have grown, business bankruptcy levels have risen, and outmigration from the island of some

of our most skilled and productive talent has increased.

This has to stop. It has to stop in West Virginia and in Ohio and in Michigan, and in every other part of the United States.

This immediate injection of Federal funds, amounting to slightly more than $4.6 billion, is not a panacea, and the committee report makes it clear that the Congress will—in coming months—hopefully resolve our current dilemma and come up with a more comprehensive and enduring program to achieve and sustain a healthy national economy.

But, in the meantime, for Puerto Rico this legislation is welcome news.

The additional $1.250 billion national appropriation level of the community development block grant program will allow entitlement cities in Puerto Rico and our smaller municipalities, all of which participate in the CDBG program, to expect additional funds for construction of facilities and local public works contributing to the development of our economy when this supplemental bill is signed into law.

I am particularly pleased by the committee's allocation of $250 million in additional CDBG funds, part of the $1.250 billion total, for areas of high unemployment.

This will immediately target the CDBG stimulus to areas of greatest need.

There are other provisions of the emergency appropriations bill which I welcome.

With a high unemployment rate, Puerto Rico can make immediate use of some portion of the $200 million in additional funds to continue the programs of the Economic Development Administration.

These funds will stimulate the private sector and new projects—many of them already on the drawing board—can be undertaken for water and sewer developments, industrial park development, improvement of inner city housing, and other activities which have traditionally been funded by EDA. The UDAG program will also be provided with more resources as a result of the action taken in this bill.

In other areas such as employment and training assistance, Puerto Rico will speedily put to use the island's share of an estimated $648,000 for Job Corps activities, $2.5 million to help summer youth employment in a few months, and $1.7 million to support displaced workers.

I am happy to note that there will be $25 million in new funds for older Americans community service employment.

In the areas of social services, I welcome the wide variety of programs for maternal and child health, day care, Head Start, and expansion of the community services block grant program.

In other areas of this legislation, the injection of additional funds for construction of Farmer's Home Administration rural and water sewer grants will help our island's rural areas continue time-tested expansion of vital infrastructure facilities.

Mr. Chairman, the House Appropriations Committee has done a commendable job in reporting this legislation, as I have noted before. I am hopeful that this legislation will pass the Senate in a similar fashion, and that the House-Senate conferees will send this bill speedily to the President for his signature.

It is only a first step toward national recovery, but it is one that sends a signal of hope to your more than 3.2 million fellow American citizens in Puerto Rico that this strong and prosperous Nation will not turn its back on a segment of the American population in great need of help.

Mr. SMITH of Iowa. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Chairman, I rise to congratulate the committee on the composing of a good bill and to urge all of our colleagues to support it on final passage and to reject the Republican substitute which has been somewhat hastily thrown together and which will be offered in just a few moments.

This is not a perfect bill but it is, indeed, a very good bill. It is a much needed piece of help for people who desperately need help.

This is not by any manner of means all that needs doing, nor, may I assure my colleagues, is it by any manner or means all we intend to do.

I have heard some apprehensions expressed for fear if we pass phase 1 in this somewhat modified form there will not be any phase 2. I would remind anybody who feels that already in this week we have taken two very decisive actions which set the stage for portions of phase 2—two needed and extremely important actions: The creation of the American Conservation Corps, which will provide wholesome outdoor employment for many hundreds of thousands of American youth, and the science and math and foreign languages provision that was adopted yesterday after a full day's debate.

So this legislative session has begun with a very active start.

In this bill today we are doing things that will help the helpless. we are providing measures that will feed the hungry. We are providing some help that will house the homeless.

There are an estimated 2 million Americans today who have been rendered homeless. We see the reemergence of soup lines in all of our major cities and in many of our average cities throughout America.

To respond to that urgent need, the committee has done a very good job and so I want to commend them. They have provided projects that are ready to go. They have provided work for those who are without work. They have provided certain activities that will be undertaken by people who have no high school education, by people who have exhausted their unemployment compensation. There are such things as local parks and recreation projects that permit the unskilled to have immediate work in communities throughout America where work is most desperately needed, and doing things that need doing for those communities.

I understand that is one of the things that would be left out in the Republican substitute.

The Bureau of Reclamation and the soil conservation activities which this bill encourages will allow portions of this help to go to badly smitten unemployed areas in rural America. These would be drastically reduced by the terms of the Republican substitute that would be offered.

Small business loans would be eliminated from the bill by that substitute. Historically in the private sector small business, newly created entrepreneural businesses have provided 80 percent of all of the new jobs that have been created in America, either privately or publicly.

It seems to me that by shutting off the well springs for small business, were we to adopt the Republican substitute, we would be going counter to the direction in which we desire to move.

So for all of those reasons, recognizing that this bill is not a perfect vehicle, but believing that it is probably the best that we can put together under the circumstances, recognizing that the need exists immediately and should be addressed immediately, accepting and welcoming the degree of cooperation that has been received from the administration and from the other party, I would just like to end by a whimsical poem that came to mind when certain Members were criticizing certain projects in the bill:

To hold this job that we have got,
And earn the pay we're makin',
Each works with might to gain some fame
As one who brings home the bacon.
A project in another state
As "pork," despised and utter;
The same thing in our own hometown
Is wholesome bread and butter.

This is a bread and butter bill. This is not a pork barrel bill. This is a bill which provides help where help is needed and it provides it in a simple way. For that reason I commend the committee and commend my colleagues for having drafted and brought this bill to the floor. And here are four more lines of whimsy:

The Conte bill's a seductive thing,
Attractive as Alberghetti;
But it isn't pork he complains about:
It's good old American spaghetti.

I urge all of my colleagues to support this bill and to reject any effort to weaken it.

Mr. EDGAR. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. HARRISON).

Mr. HARRISON. Mr. Chairman, I rise in strong support of the amendment of my colleague from Pennsylvania (Mr. EDGAR).

This bill has been called, by us and by the press, a jobs bill. More than that it has been called an emergency jobs bill. And yet, as it is before us now, it talks in terms of specific projects and not in terms of creating jobs where unemployment is the greatest.

Mr. EDGAR'S amendment addresses the purpose for which this bill was intended, and is understood throughout the country, by insuring limited funds will be directed precisely to those areas where unemployment is the greatest, and, therefore, the need for relief is most pressing.

This amendment has been carefully contructed to insure that the needs of both large and small cities and urban and rural areas would be met in distribution of funds. It would exempt humanitarian aide programs and those programs that distribute funds on the basis of a formula. As a result, this amendment would affect approximately $2.45 billion of the amount appropriated, and direct that money to those areas of the country where the need is greatest.

In my judgment, Mr. Chairman, this amendment significantly improves upon the reported bill and is worthy of all our support.

Mr. EDGAR. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Chairman, I wish to speak in support of the jobs bill we are now considering and I commend the leadership for its efforts on behalf of the unemployed in our country. Any efforts to relieve their increasingly desperate plight are to be welcomed.

It is well known that we are in the midst of the most difficult economic times in the last 50 years. The difficult situation of my own State of Ohio deserves particular mention. Four years ago in January 1979, the unemployment rate in Ohio was 6.6 percent. In January of this year, the Ohio Bureau of Employment Services reports a tragic 14.9-percent unemployment rate for the State. Only the neighboring State of Michigan with its 17 percent unemployment rate exceeds Ohio's depression-level joblessness.

Clearly, any jobs bill must be targeted toward the area of greatest need. Ohio is a major manufacturing and agricultural center of our country. The same is true of our neighbors, Michigan, Pennsylvania, Indiana, West Virginia, and Illinois which have all suffered from double-digit unemployment for a long time now. The problems of these States are national problems, not just regional ones. Any jobs bill must target jobs legislation to the areas of greatest need. The humanitarian relief that this legislation will provide is essential. The stimulus to the economies of the States with greatest needs will have a national impact. For those reasons, I feel the Edgar amendment will significantly improve this bill by insuring that the funds spent under this emergency legislation will be targeted to those people and places suffering from the greatest economic hardship.

It is my hope that the administration, which supports this bill, will also seek other means in its power to target Federal spending toward the areas of greatest need, which means toward those areas where Federal spending will do the greatest good. Its efforts to speed up projects that are already planned are to be commended. An acceleration of that policy at this time would be welcome and useful. The Surface Transportation Assistance Act of 1982, for example, places three Ohio bridges on the Secretary of Transportation's priority list for discretionary funding. Prompt allocation of funds for these projects—the Main Avenue Bridge and the Brooklyn-Brighton Bridge, both in Cleveland and the Tinker's Creek Bridge on State Route 8—would help to relieve some of Ohio's enormous unemployment and would assist the State's economy by insuring that vitally needed access routes are safe and functioning. There are many similar projects in Ohio and elsewhere which could be started to help us cope with the lingering problem of joblessness.

The unemployed of our country face a daily problem of economic survival. Many of us have heard heart-rending stories of individuals who have lost their jobs in the last number of years and endure an unhappy existence and face an uncertain future. It is these people that we must consider and I urge passage of this bill as amended by the Edgar amendment.

Mr. EDGAR. Mr. Chairman, I yield such time as he may consume to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Chairman, I thank the gentleman for yielding and rise in support of the gentleman's amendment.

Earlier this afternoon, I outlined my concerns with this bill. Some $3.6 billion will go to public works, which are just about the worst way of putting people to work that we, in our collective wisdom, could dream up.

The Edgar amendment will make a bad situation a little bit better. it requires that 75 percent of the funds that are not allocated by formula or for humanitarian purposes will go to the areas with the most unemployment. The Edgar amendment will direct about half of this package to areas of high unemployment.

My own State, Vermont, is characterized by a relatively low unemployment rate statewide. However, this rate hides the fact that the State contains areas with severe unemployment problems. I understand from the author of this amendment that parts of the Northeast Kingdom, including Essex and Orleans Counties, will qualify as jurisdictions of high unemployment. Many other communities severely affected will be eligible as pockets of poverty meeting the criteria of the urban development action grants. And still other cities and towns, such as St. Johnsbury, Springfield, and Windsor, hard hit by recent layoffs, will most likely qualify due to harsh economic dislocation.

Since our purpose today is ostensibly to do something about unemployment, it seems reasonable to direct this money to those areas where the problem is the worst, rather than those areas that have the good fortune to be represented on the Appropriations Committee.

Public works of the type contemplated by this bill will never do much for the unemployed. But Mr. EDGAR'S amendment, the product of serious thought and reasonable compromise, will do much for this bill. I urge my colleagues to support it.

Mr. EDGAR. Mr. Chairman, I yield 5 minutes to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Chairman, I am pleased to cosponsor and rise in support of this amendment to require that 75 percent of the funds for the job creating programs in title I of this bill be spent in those areas of the country that are experiencing the most serious unemployment.

I have enjoyed working with BOB EDGAR on this. From the very beginning when this bill came up, this was one of the sore points as far as I was concerned, and although it might be easier in other circumstances simply to spread the money in this bill all across the country with a flat brush, our current economic conditions do not permit that kind of a luxury.

We face a budget deficit of $200 billion and we simply cannot afford to squander the limited amount of money in this bill on areas that are experiencing little need.

□ 1540

Mr. Chairman, this is simply a matter of equity—limited Federal

funds must be targeted to those areas that need them the most.

Let me clear up some misconceptions. First of all, this does not discriminate against rural areas in favor of cities. The amendment has been constructed to insure that both large and small cities and urban and rural areas would have equal access to funds, dependent upon meeting the criteria of high unemployment.

Second, this amendment would not affect the distribution of funds that are allocated according to a formula, or that are intended for humanitarian assistance such as emergency food and shelter or the various health programs. The only funds affected would be the approximately $2.45 billion that are clearly intended to provide job-creating ecomomic stimulus under title I of this bill.

Mr. Chairman, probably the greatest defect of the committee bill is that it permits the funding of projects in some of the lowest unemployment areas in the country. This bill has park money for Hawaii, which at the end of 1982 had an unemployment rate of 6.3 percent, the lowest in the country.

And I gave you some earlier today.

Frankly, Mr. Chairman, we will wind up with egg on our face if we permit the "cover-the-Earth with money" approach currently embodied in this bill to remain. I urge the adoption of the amendment. It will not take much time. The gentleman from Iowa says this will slow down the issuance of funds. The mechanism for creating a list of eligible areas can be done through a Department of Labor computer run. Just because projects in areas of low unemployment have already been planned and they are ready to go, is no reason for us to throw our scarce resources where they are not truly needed. Let me say, Mr. Chairman, in answer to my good friend, JIM WRIGHT, for whom I have nothing but the greatest respect: He says, "What is wrong, what is wrong if we get a couple of slices of bacon for our district?" That is right. That is right, as long as you were in the butcher shop when the hog was being slaughtered and you were able to get nice big chunks of bacon to take home. But you guys and gals that were not in the butcher shop when the hog was slaughtered you are gong home with pretzels and not bacon. Let me say we have a good notion to recommit. The National Wildlife Federation said just now:

DEAR MR. CONTE: We wish to extend our support to your motion to recommit the Emergency Supplemental Appropriations Bill with instructions to report the bill in amended form. As reported by the Appropriations Committee on February 25, the bill contained over a half billion dollars for Federal water projects—projects known to be environmentally damaging and economically questionable. Given the wide range of useful public investment that might be funded at this time, additional spending for new dams, canals, and irrigation projects cannot be justified.

Of particular note, your substitute would maintain needed funding for fish and wildlife facilities and urban parks; increases funding for energy conservation and the Youth Conservation Corps; and substantially reduce funding for the water projects of Army Corps of Engineers, Bureau of Reclamation, and Soil Conservation Service. In our judgment, your proposal strikes a far better balance in the distribution of funds for natural resource programs than the bill as reported by the committee.

We urge the adoption of your motion.

Mr. SMITH of Iowa. Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to the amendment. Just very briefly I say to my colleagues that we are not here looking out for areas, we are here looking out for people. I thought this was a jobs bill for people. All of a sudden we have an amendment offered that is to take care of areas. I would like to submit, Mr. Chairman and my colleagues, people who are unemployed are having serious, serious problems. Whether they live in the high unemployment area of 15 to 20 percent or in an area where the unemployment rate is 5 to 6 percent; does not make that much difference to the person who is unemployed. If he is out of a job he needs a job. I think we ought to be very careful about denying money or projects or support to those parts of the country that have a lower percentage of unemployment but still have people out of a job. I oppose this amendment. I would hope we could allow the money to be distributed fairly throughout the country, so someone unemployed in a rural area, or an area that has maybe 8 percent unemployment, can be helped with a job just as much as a worker in an area with 10 or 12 percent unemployment or even more. I think we ought to make sure this is a people bill rather than an area bill.

The CHAIRMAN. The gentleman from Iowa (Mr. SMITH) has 11 minutes remaining, and the gentleman from Pennsylvania (Mr. EDGAR) has 4 minutes remaining.

Mr. EDGAR. Mr. Chairman, I yield such time as he may consume to the gentleman from West Virginia (Mr. MOLLOHAN).

Mr. MOLLOHAN. I rise in strong support of the Edgar amendment.

Mr. Chairman, as we debate the Emergency Supplemental Appropriations Act, I want to express support for its major provisions. It is imperative that we immediately take steps to put Americans back to work. However, to make this bill more effective, we must target its funds to areas of greatest need. West Virginia is one of those areas. With a staggering 17.8 percent unemployment rate that shows no sign of abating, my State's situation is critical.

Without Congressman EDGAR's amendment, there will be no mechanism in this legislation which will target discretionary spending of the bill's programs to economically crippled areas such as West Virginia. Because this is the first major jobs bill to be considered by the House in this Congress, and because there is no guarantee that an anticipated second jobs bill will address our urgent concerns, it is vital that this emergency program be a commitment to the millions who are waiting for us to take firm action. A targeting amendment will accomplish this goal as it would transform that part of the bill which is basically public works into a jobs bill.

As a representative of thousands of workers who have been directly affected by the economic ills that have plagued our Nation. I urge the adoption of the Edgar amendment which will insure that our efforts are aimed at their distress.

Mr. EDGAR. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Connecticut (Mrs. JOHNSON).

Mrs. JOHNSON. Mr. Chairman, I rise in strong support of the amendment offered by the gentleman from Pennsylvania (Mr. EDGAR.)

Mr. EDGAR. Mr. Chairman, I yield 1 minute to the gentleman from Wisconsin (Mr. MOODY.)

Mr. MOODY. Mr. Chairman, I rise to urge strong support of the Edgar amendment to target the benefits of this bill to areas of high unemployment and specific pockets of poverty. I represent a district with both high and moderate levels of unemployment, and urge that we concentrate the benefits of this bill to the areas that have been hurt the most.

Everyone agrees that the $4.6 billion in this bill is far from adequate to meet the need. In fact, only $2.45 billion of this money will be distributed for job creation, with the rest being allocated to humanitarian aid or distributed by formula. This $2.45 billion will probably create jobs for no more than 250,000 people—far less than the 12 million unemployed Americans now looking for work. With this scarcity of funds relative to the need, nothing is more important than targeting the money to where the need is greatest.

This amendment, which I helped draft, would require that 75 percent of the available money go to areas where the unemployment rate is at least 90 percent of the national average over the preceding 12 months. Money would also be targeted to special pockets of poverty, as defined in statutory law, where the unemployment rate in-

adequately captures the true level of economic deprivation.

These two components of the amendment insure that the $2.45 billion will be carefully focused so that areas of little unemployment will not receive a disproportion amount of the money. That would have happened in the bill's original version.

Mr. Chairman, I urge support of this amendment.

Mr. SMITH of Iowa. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. FAZIO).

Mr. FAZIO. Mr. Chairman, those of us who have been through these afternoons with Mr. CONTE and his colleagues are aware of the fact that occasionally we end up in a bidding war in terms of where we can seek additional political coalitions and support. Mr. CONTE is a very avid newspaper reader, he is a great admirer, I am sure, of Queen Elizabeth and he has been paying a great deal of attention to the weather in California. Mr. CONTE, as I understand it, will include in his motion to recommit an amendment which would grant the California delegation, I suppose, some very seductive candy, in effect, a request for $100 million in additional support to battle the damage that has occurred in the storms we have encountered out there this winter.

□ 1550

I think it is important to point out that the bill as drafted is adequately written to meet and address the problems that all of us from California and indeed those from other parts of the country, the Southeast for example, which earlier this winter had tremendous flooding problems, will need resolved in this bill. In order to have our problems rectified by the Corps of Engineers, we will need some inclusions in this jobs bill.

This measure would improve flood control, shore protection and allow for other measures authorized by law to meet emergency requirements and remedy damage resulting from disastrous rains and floods.

That is in the bill as currently drafted. I think it is important for all the Members to realize that if we want a signature on this bill, however, imperfect it may be, we are going to need to have the kind of fiscal restraint that all of us have come to understand is fundamental.

This bill provides for the kind of attention that we need for our problems in California, and, indeed, all Members on this floor need, across the country, for the problems that we have encountered through the disastrous weather we have had this year.

There is $200 million in the corps construction and operation and maintenance accounts and FEMA, the Federal Emergency Management Agency, has over $600 million available for obligation as of February 15 for areas declared disasters.

This amendment is superfluous, it is not needed to resolve our problems in California. The corps has already identified areas of Federal and non-Federal damage to beaches, rivers, and streams and assessed the problem. I would like to attach the list and the assessment for the RECORD:

DAMAGES IN CALIFORNIA

(Federal and non-Federal)

Serious damage to beaches and adjacent coastal property and facilities: Seal Beach, San Diego, Santa Monica, Huntington Beach, Santa Barbara, Imperial Beach, Mission Beach, San Clemente, Oceanside, Newport Beach, Surfside-Sunset, Malibu, Redondo Beach, Venice Beach, Carpenteria, Rincon, Oxnard, Santa Benecia, Corte Madera, Stinson Beach, Mendocino, Sea Cliff State Beach, Half Moon Bay, Edgerly Island, San Francisco, San Pablo Bay Island, Mill Valley, Attos, and Capitola.

Shoaling: Ventura Harbor and Santa Barbara Harbor.

Flooded streams: Eel River, Russian River, Napa River, San Rafael Canal, Alviso Creek, Novata Creek—levee break, Van Duzen Creek, Petaluma River, Corte Madera Creek, Guadalupe River, Sacramento River, Cashe Creek.

Also: 20 mud slides statewide; 2 bridges damaged; 4 bridges closed including Golden Gate Bridge; $100 million in damages; 10 deaths; 4,000 persons displaced; 30 homes destroyed; 3,500 homes damaged; Public Law 99 funds committed $1.3 million; SP railroad tracks damaged in Ventura County; 4 sewage pumping stations damaged in La Jolla; Kern County—power outages;

Eight delta islands inundated: Van Sickle, Mildred, Fay, Little Trunk Shiva, Joice, Prospect, and Grizzly.

In addition, 43 other islands in delta partially inundated sewage treatment and shoreline of Clear Lake damaged Cashe Creek, Yolo County roads damaged.

Mr. LEHMAN of California. Mr. Chairman, will the gentleman yield?

Mr. FAZIO. I am happy to yield to the gentleman from California.

Mr. LEHMAN of California. I thank the gentleman for yielding.

The 18th District of California is as diverse as California itself.

Small towns nestled in the foothills.

Delta farmlands new ravaged by floods.

Farming communities and large urban centers—and everywhere hard-working men and women have seen their jobs lost.

One worker out of five in my district is now without a job. It's impossible to see an imminent recovery when the latest unemployment figures from all over my district show more not less people out of work. In large parts of my district unemployment has nearly doubled since 1980. The latest January unemployment figures illustrate that point more eloquently than anything I could say—Fresno County—17 percent unemployed; San Joaquin County—19.8 percent unemployed; Calaveras County—21.6 percent unemployed; and Tuolumne County—23.9 percent unemployed.

My district is not an urban district but of small towns and cities, and our problems are just as bad, if not worse, than the unemployment we see reported in big cities.

This bill will put people to work on reclamation and conservation projects in Calaveras and Tuolumne Counties. It will allow the Army Corps of Engineers to do more flood control work in the delta farmlands and it will put people to work preserving our Nation's parks and forests.

Mr. Chairman, this Congress will be judged on what we do to spur economic recovery. Putting people back to work is the first step in that recovery.

I urge an aye vote.

The CHAIRMAN. The time of the gentleman from California (Mr. FAZIO) has expired.

Mr. SMITH of Iowa. I yield 1 additional minute to the gentleman from California.

Mr. LEHMAN of California. If the gentleman will yield further, I am confident in the language in this bill. I think it is what we need. It is a comprehensive package.

Mr. FAZIO. I appreciate the gentleman's comments. I think it points out that not only is this targeted by high rates of unemployment, but it is also targeted to areas of great concern.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. FAZIO. I yield to the gentleman from Massachusetts.

Mr. CONTE. First of all, let me say there is no money in this bill for that disaster. Sure I read the paper like anyone else. I have been here 25 years and I have always responded to disasters, whether they were in Italy or Yugoslavia or California.

Mr. FAZIO. I supported all of those.

Mr. CONTE. I cleared this amendment before I put it in with O&M. Now if the gentleman does not want to give those poor people in California this money, move to strike it out now and I will accept the gentleman's amendment.

Mr. FAZIO. I do not want to move to strike it out. I just want the Members to get truth in packaging. I want them to know what it is in the version reported out by the Appropriations Committee and I want them to feel confident they can vote for it without doing any damage to California.

Mr. SMITH of Iowa. Mr. Chairman, I yield 1 minute to the gentleman from Michigan (Mr. ALBOSTA).

Mr. ALBOSTA. Mr. Chairman, I rise today to speak in support of this vitally important piece of legislation, the emergency supplemental appropriations for jobs bill. The key here, I believe, is jobs, emergency jobs for those people in depressed areas of our country with high unemployment like my

home State of Michigan that is bleeding to death. Let me emphasize here that this jobs bill, which I wholeheartedly support, is just a first step in our fight to get people back to work. But it is an important first step, for it demonstrates this Congress commitment to assisting our unemployed in their time of need.

With an unemployment rate in Michigan of 17 percent, and reaching upward of 25.7 percent in many parts of my congressional district, I can tell you first hand of the pain and human suffering associated with high unemployment. The unemployed are facing uncertainty about their present and future financial security. When will the unemployment benefits run out? Will the unemployed ever to able to find a job again?

This jobs bill addresses both of these questions. Without this emergency legislation, unemployment funds, which aid States in paying their regular and extended unemployment benefits, will run out in March. This bill provides the necessary $5 billion to the trust fund to insure that benefits can continue for those who have been hardest hit by unemployment—the long termed unemployed.

In order to make the emergency jobs bill effective it must be targeted to States like Michigan with high unemployment. I will not allow my State of Michigan to continue to be bled to death by our economic depression. Yes—depression because that is exactly what we have in Michigan where our unemployment rate has averaged over 13 percent for the last 3 years.

The time has come to say enough—we will not continue to finance the rest of the country with Michigan tax dollars while we do not receive the help our residents to desperately need. I am sick and tired of these voodoo doctors of economics that tell us recovery is just around the corner. Our State will be dead by the time we reach the corner unless the Federal Government acts now in a prompt and effective way to start taking people off the unemployment rolls instead of putting them on unemployment rolls. Joblessness has caused high increases in alcoholism, family abuse, and crime. We absolutely must deal with these problems.

The way to deal with 15 percent unemployment is to target Federal aid to those States with high unemployment. The amendment offered by the gentleman from Pennsylvania will do just that by requiring that 75 percent of the funding for job creation in the bill must be spent in areas with highest unemployment during the past 12 months. We need the Edgar amendment so that the funds from the emergency jobs bill will go to parts of the country that have suffered the most from the failure of Reaganomics and its half baked economic theories.

For example, the employment and training administration will receive $232 million which will among other things be directed to assist Michigan in providing for the retraining of displaced workers. In addition, another $25 million will go to assure that our older workers can continue to work under the popular and beneficial title V community service job program.

The very important community development block grant program, funded at $1.25 billion, will be directed to areas of high unemployment as well and used for programs such as housing rehabilitation and the construction of public facilities and parks. This provision alone is expected to create over 80,000 new jobs.

Rural areas will receive additional aid through new grant and loan programs for the construction of sewer and water systems administered by the Farmers Home Administration. The Economic Development Administration will get a $200 million shot in the arm for public works programs such as industrial park development and water and sewer improvements. These kinds of programs are crucial to the recovery of our Michigan economy and for the creation of jobs for my constituents in the 10th District.

As well as a job, the American dream of owning our own home has been indefinitely postponed for many Americans during our present recession. This bill includes a provision to restore hope in this dream. An additional $500,000 has been included to assist in expediting implementation of a homeowner's emergency mortgage assistance program. We need to put the American dream back within the grasp of Americans. I feel that this bill begins to do that.

Last, and very importantly, I would like to express my support for the more than 10,000 temporary jobs that will be created to provide social services to our poor, hungry, and unemployed Americans. No State has been hit harder by the recession—or in the case of our State, depression—than Michigan has. Not only a loss of jobs and economic security are facing my constituents in the 10th district, but the horrifying reality of a sharply declining standard of human health and in some cases, human life. Michigan has in recent months experienced a dramatic increase in the infant mortality rates due to the Federal and State cutbacks in essential maternal and child health care grants and nutrition programs. This is a tragedy that can only be remedied through the allocation of funds in this area. This bill will provide the desperately needed funding of $40 million to communities with high unemployment such as is the case in Michigan and direct these funds for the purpose of nutrition and health programs, and thus, improve the quality of health and life for Americans.

In closing, I would like to reemphasize to my colleagues that this is only a first step. It is not enough to cure all of the economic and human problems created by this recession. We need additional programs focusing on aid to our farmers and small business people who are experiencing unprecedented bankruptcies and foreclosures, and to make sure our unemployed receive adequate health care protection. As one of my top priorities in the next few months, I will work with my colleagues in the House to insure that phase II of this anti-recession package addresses these concerns. The time for rhetoric is over, the time for action is now. Let us get on with the job of putting America back to work by passing the emergency jobs bill.

Mr. SMITH of Iowa. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. FROST).

Mr. FROST. Mr. Chairman, I thank the gentleman for yielding.

I do intend to support the amendment offered by the gentleman from Pennsylvania (Mr. EDGAR) and I would like to ask the gentleman from Pennsylvania a question.

If I understand correctly the pockets of poverty language in this amendment, it would mean that cities that have 6, 7, 8 percent unemployment, cities like Dallas, Fort Worth, San Antonio, and Houston, who otherwise would not be eligible for funds would be if sections of that city were UDAG eligible under the pockets of poverty concept, sections of that city that had a great degree of high concentration of poverty.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. FROST. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I would like to suggest to the gentleman that the answer to the gentleman's question is yes, the gentleman who serves on the Rules Committee provided great leadership yesterday as we crafted this compromise amendment to make sure the pockets of poverty were in fact included.

Mr. FROST. I thank the gentleman and I thank his acceptance of that provision in the amendment.

Mr. EDGAR. I thank the gentleman for his leadership.

Mr. Chairman, I yield 1 minute to the gentleman from Illinois (Mr. DURBIN).

Mr. DURBIN. Mr. Chairman, I fear that our action today on the phase 1 jobs bill by this action Congress will let loose a great roar across this Nation and deliver a mouse. Many of us appreciate the obvious shortcomings of this effort today, both in its scope and level of funding.

But if our efforts are limited let them at least be just.

I support the Edgar amendment. I would sincerely hope that by this amendment we will focus our efforts on the committees, urban and rural, that have been so sorely hurt by this recession. With this amendment, I say to the gentleman from Massachusetts (Mr. CONTE), let us hope that those of us who are returning to our districts with either bacon or pretzels do not go home emptyhanded to face the unemployed who have suffered so long in this recession.

Mr. EDGAR. Mr. Chairman, I yield 30 seconds to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. I thank the gentleman for yielding.

And I want to congratulate the gentleman for his amendment. We very badly needed to have the money targeted toward the real unemployed in the country. This amendment goes part of the way toward that. I would prefer to see it targeted toward specific unemployed people.

The gentleman from Massachusetts is going to have that in his substitute. But I think the gentleman goes a long, long way and I intend to support the amendment.

Mr. EDGAR. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. RITTER).

Mr. RITTER. Mr. Chairman, I rise in support of my colleague's amendment.

Mr. Chairman, I rise in support of the amendment offered by my colleague and fellow Pennsylvanian. Pennsylvania's 15th Congressional District, which I represent, like much of the Northeast, is weighted down by high unemployment. Unemployment in the L.V. region stood greater than 13 percent as of December 1982. While the emergency supplemental appropriations bill provides $4.6 billion for job creation, it makes no provision to target these funds to areas of highest unemployment.

Congressman EDGAR'S amendment significantly improves this bill by targeting 75 percent of the funds for each program to areas of greatest economic distress. The intent of this emergency supplemental is to help those with unemployment levels at 90 percent or above the national average. It would be inconsistent with this intent to ignore those areas with highest unemployment. If Federal tax dollars must be spent for job creation, they should be spent as wisely as possible. Congressman EDGAR'S amendment attempts to do just that.

However, as we deliberate the pros and cons of this bill and the amendment before us, we cannot overlook the fact that a Federal jobs bill is still only a short-term solution to the unemployment problem. What we really need is a strong and growing economy. But, we in Congress have a lot of work ahead of us if we want an economy that can maintain the jobs we have and create jobs to put our people back to work.

Mr. SMITH of Iowa. Mr. Chairman, I yield myself the balance of the time remaining.

A number of speakers here have talked about not putting the money in areas that do not need it. I would like to know where any of these areas are. Could anybody in this House tell me an area in this country that does not have high unemployment. It must be near an aircraft factory or a defense plant. I just do not understand that if you have an area of 8-percent unemployment, even though you have a contractor who can provide jobs he cannot have the project because the unemployment rate is below the national average, but somebody who is in an area that has 10 percent can have the contract.

It just does not make sense to me.

Now, for example, the gentlewoman from California brought up EPA. There is not any question about it, this amendment will interfere with those cities that need the money the worst. They will have to first go through the process of proving that they are within the 25-percent allotment and then they will have to find out how much money there is for those places and where the money should go.

There is no question about it that it is going to interfere with that process. And that is what is wrong with this kind of amendment. It is just a signal to those administering the program, to administer to death any of the programs in the bill they do not like. They will take all the time they want to draw up regulations and administrative procedures and then by next October 1 we will find out that people have not been employed.

A number of speakers today have spoken of people whose unemployment compensation has run out. We have millions of unemployed who have never had a job and they do not all live in ghettos; they do not all live in so-called pockets of unemployment. Many of them are minorities, but not all of them are minorities. The point is that they are unemployed and need a job whether they have not had one for 3 or 4 years or since they graduated from high school, whether they live in one of these pockets of poverty or they live just outside one of these pockets, the approach taken in this amendment is just simply a bad way to do it.

What we have done is take a national bill and turn it into a nonnational bill. We have splintered it up. We have taken a white dog and made a Dalmatian out of it. And it is not the way to treat a national jobs bill.

Now I know the amendment is going to pass. We are all expecting it to pass, but I thought that it was important to bring these points out in this debate so that when we go to conference people are not expecting the provision to come back in exactly the same form that it went to conference. There are a lot of improvements which could be made in this amendment and I hope that there is more reflection on it and that it will be improved in conference.

□ 1600

Mr. EDGAR. Mr. Chairman, I yield myself the balance of my time.

Mr. RIDGE. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from Pennsylvania.

Mr. RIDGE. Mr. Chairman, is it the gentleman's intent that those administration officials that will be monitoring this program will give favorable or even preferential treatment to those applications that demonstrate that unemployed people, actually people that have been suffering from long-term unemployment, go back to work through this program?

Mr. EDGAR. It is my hope, that is the intention of the language of the legislation, although it does not say so specifically and I thank the gentleman for his question.

Mr. Chairman, we have come down to the last minute on this amendment. There has been a lot of controversy.

This amendment is the sum total of a lot of thought that went in by both Democrats and Republicans who came together and said, "Can't we target these funds to those who are in the greatest need?"

I think it is important to say to all of you that it is really tough to find work when there are 12 million people out of work. It is tough to find work when there is 10.4 percent unemployment and in pockets of poverty in States throughout the Nation there are areas that have astronomically high unemployment. This amendment will help.

It is tougher to find work in areas of high unemployment when there is a higher number of people who are in fact out of work.

This amendment tries as best it can to focus the attention of the House on the need to target this legislation to help the largest number of people who are presently out of work, many of whom are structurally unemployed, many of whom lack the basic skills needed for work.

I commend all of my colleagues who spoke on behalf of the amendment. I urge adoption of the amendment.

I will repeat, I am going to ask for a recorded vote so that we can send a message to the other body and to the President that we want a jobs bill that is targeted.

● Mr. LAFALCE. Mr. Chairman, I rise in support of the amendment being offered by our colleague from Pennsylvania (Mr. EDGAR).

The amendment would target 75 percent of the funds appropriated under title I of the emergency jobs bill to high-unemployment areas.

Title I appropriates $4.6 billion in additional funding in fiscal year 1983 to create jobs in repair and rehabilitation of public facilities, resource conservation projects and park improvement and maintenance, and urban and rural community development projects. It also provides humanitarian aid in the form of emergency food and shelter services.

The Edgar amendment incorporates legislation I introduced last week to target the $1.2 billion in supplementary community development block grant (CDBG) assistance to high-unemployment areas. It is also similar to a bill I introduced along with our former colleague Gary Brown in 1976. That bill passed the House but was defeated in conference with the Senate in favor of a countercyclical aid program in the public works jobs bill.

Today, 7 years later, our country lies mired in a national recession. But recession is too mild a word to describe the economic dislocation affecting many communities throughout the country. In several areas, Mr. Chairman, we are confronting a depression.

In New York State, for example, the unemployment rate for January 1983 stood at 9.6 percent, a full percentage point increase over the previous month. But in the Buffalo SMSA, which includes Erie and Niagara Counties unemployment stands at 14.7 percent. In Niagara County 17.4 percent of the work force, 17,800 workers, are "officially" unemployed, while 3,200 workers in Orleans County, 15.7 percent of the work force, are idle.

We are suffering a regional depression, and I believe that we must address the depression in western New York and in other areas throughout the country in the bill before us today.

Under the Edgar amendment, high-unemployment areas are defined as: First, areas where the average unemployment rate over the past 12 months is no less than 90 percent of the national average; second, labor surplus areas; or third, in the event of severe economic dislocation, areas so designated by the Department of Labor.

Mr. Chairman, I believe that our emergency jobs program should address unemployment at both the individual and community levels. We must put Americans back to work in productive jobs. But it is equally important to salvage entire communities that are literally on the edge of total economic collapse.

I am encouraged by the degree of cooperation exhibited by the White House and congressional leadership in putting together this package of jobs and unemployment assistance. I am heartened by the President's agreement to a package similar to one that he threatened to veto just 3 months ago. However, I am chagrined that the package does not target funds to high-unemployment communities. We can correct this oversight by adopting the Edgar amendment.

The bill before us is an emergency program, and I believe that the allocation of funds should reflect the emergency that affects individuals and families, as well as whole communities.

Mr. Chairman, I would like to take a few moments to highlight the CDBG program and how the amendment would effect implementation of the supplementary CDBG funds appropriated by the emergency jobs bill.

Most major cities, plus many urban counties are participating in the CDBG program. CDBG entitlement communities are prepared to take the supplementary funds appropriated by the bill and put them to work creating jobs immediately.

I think the very fact that almost 25 percent of the funds appropriated by title I of the emergency jobs bill are allocated through the CDBG program is ample evidence that we will get an immediate employment bang from our $1.2 billion. Use of the CDBG program insures that we will avoid the creation of make-work projects and that benefits will remain in the communities for years to come. The supplementary CDBG funds appropriated by title I are not only an investment in individuals, returning hope to lives that have been shattered by unemployment, but it is an investment in entire communities.

If we adopt the Edgar amendment, we can target this investment in individuals to communities where we will get the highest return on our investment.

In addition to stimulating the local economy with "new" money, targeted, supplemental CDBG aid will allow depressed communities to attract and keep new industry and stabilize and improve declining neighborhoods. These activities will create private sector jobs and improve local economies, without the need to set up new programs.

Using the existing block grant administrative structure to allocate targeted, supplementary CDBG funds practically eliminates startup costs and will result in funds being available immediately for the creation of jobs for our unemployed, and revitalization of depressed communities.

Mr. Chairman, unemployment is a national disgrace, but, as we in western New York know all too well, it is a regional tragedy. We have an opportunity to address ourselves to the depression that afflicts too many communities throughout the country today.

I urge my colleagues to support the Edgar amendment.●

Mrs. JOHNSON. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Pennsylvania. This amendment targets the spending authorized by this bill to areas of high unemployment and thereby corrects a major weakness of the legislation.

Before becoming a Member of this body and since as a member of the Republican jobs task force, I have supported and worked for legislation that would address the unemployment crisis that grips our Nation.

Our national unemployment statistics describe individuals, families, and communities that have been devastated by this recession, the impact of prolonged joblessness on people, and the discouragement of life without opportunity.

Out of deep concern for the unemployed people of our Nation, Congress has joined with the President to provide some remedy. I am very pleased with some parts of this funding package. I have advocated the use of community development block grants, since before I became a Member of this body, as a way of expeditiously turning Federal money into local jobs with a minimum of administrative cost. I therefore welcome the inclusion of the $1.25 billion contained in this bill for CDBG's. The $200 million for the Economic Development Administration and $75 million for displaced workers implement recommendations proposed by the Republican task force with which I strongly concurred.

In addition, the Appropriations Committee included $150 million for low-income weatherization. I and a number of my colleagues specifically requested such an investment as a means of both creating jobs and fuel savings at a time when both are badly needed.

Unfortunately the bill before us, while improved by adoption of the amendment of the gentleman from Pennsylvania, has a negative side. The commendable parts of the legislation are counterbalanced by other spending proposals that will not create jobs, but by increasing the deficit threaten the recovery that is the only real solution to unemployment. Appropriated are $1 million solely to fund the Administrative expenses of developing planning programs not in existence. This is supposed to be an emergency jobs bill to create immediate employment for those among us so personally devastated by this recession. These million dollars are wasted on bureaucrats being paid to create new bureaucracies for programs that Congress may never authorize.

"Pork barrel" is the only appropriate description of parts of this legislation. The committee report identifies

projects and towns with little resemblance to the high unemployment areas the bill is supposed to target. The distribution of money is also something short of reasonable; $404 million go to the Corps of Engineers, over one-half of these funds earmarked for Mississippi River programs. Since corps projects must yet undergo lengthy periods before work is actually commenced, we can only guess how much of this money will find its way to job creation in the near future. The bill provides $33 million to finance a highway demonstration project in Mississippi, the purpose of which is to demonstrate methods to accelerate the widening of existing highways.

I will support the motion to recommit which will be offered by the gentleman from Massachusetts (Mr. CONTE). His substitute funding proposal eliminates most of this pork barrel. It adds $250 million to CDBG's and doubles the amount in the bill for weatherization. His is a reasonable, intelligent, and targeted approach to immediate job creation. The Conte substitute includes the amendment offered here by Mr. EDGAR. I endorse both efforts, and urge my colleagues to do the same.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. EDGAR).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. EDGAR. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 335, noes 83, not voting 15, as follows:

[Roll No. 18]

□ 1620

Messrs. BARTLETT, HANSEN of Idaho, SHANNON, EARLY, and PASHAYAN changed their votes from "Aye" to "No."

Messrs. HUGHES, TALLON, LELAND, and HEFTEL of Hawaii changed their votes from "No" to "Aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

● Mr. HARKIN. Mr. Chairman, I support Mr. CONTE's substitute to the emergency jobs bill.

The Conte substitute would cut hundreds of millions of dollars in the bill for unspecified Army Corps of Engineers and Bureau of Reclamation projects.

We must make these cuts. In my view, much of this money will be wasted.

The substitute does reduce the funding for rural waste-water and sewer system construction. In my home State of Iowa, the chief of the department of environmental quality's sewer construction grant program, Joseph Obr, states that it is the rare exception, not the rule, for a city not to dump raw sewage into a ditch, lake, river, or creek during a rainstorm. In some Iowa towns, raw sewage is dumped into a creek because the treatment plant simply cannot handle the flow of water and waste during even moderate rain showers. The public health implications of a situation such as this are critical. In the future more money should be put toward this problem.

However, the Conte substitute keeps all of the funds that can be spent in this calendar year for rural, sewer, and waste-water grants. Hopefully, the budget we enact for fiscal year 1984 will increase these needed funds.

I agree with Mr. CONTE that long-term Army Corps of Engineers and Bureau of Reclamation programs should not have been included in the jobs bill. The programs involved are highly capital intensive rather than labor intensive. I would have gladly supported an amendment to delete some of these funds from the bill.

The other aspects of the Conte substitute are commendable, particularly the addition of $50 million for the Youth Conservation Corps, and the shifting of $150 million to provide matching grants for school and hospital energy conservation projects. These programs that combine a relatively quick startup time, employ a large number of people per dollar spent, and meet clear national needs in both the short- and long-term view are the types of priority projects that should be targeted in a jobs bill.

This is a jobs bill. It must be targeted where people can be put to work quickly, in 1983. The Conte substitute does that.●

● Mrs. SCHNEIDER. Mr. Chairman, I rise in support of the motion to recommit with instructions. The gentleman from Massachusetts has proposed a series of funding shifts that will target this jobs bill toward cost-effective programs aimed at putting the unemployed back to work. The motion singles out the schools and hospitals conservation program for a $150 million increase, which is an excellent example of the kind of Federal investment in employment that we should be encouraging.

Several facts about the schools and hospitals conservation program are worth noting. First, the program will put unskilled and semiskilled laborers back to work at a little over $10,000 per job, making the investment much more labor intensive than some of the initiatives provided for in the committee bill. Second, the nonprofit institutions participating in the program have to match the Federal contribution on a 50-50 basis. This insures that the Federal investment is targeted toward those projects that have active support at the local level.

Third, the program can actually cut down on the $3.4 billion in medicare payments used to reimburse hospitals for their energy costs. The conservation grants also help relieve the State and local tax base of the $7.6 billion that is paid out annually in energy costs for public schools and hospitals. Finally, of course, the program is part of our national commitment to an energy efficient economy. Our investment in the schools and hospitals program to date has saved our country 6 million barrels of oil per year. I think we all recognize that cutting energy costs is one way to free capital for the kinds of productive investments that create long-term employment opportunities.

We know this program has earned the enthusiastic support of State and local officials—for every applicant receiving a grant, there are five more that qualify but are turned away for lack of funds.

The motion to recommit contains a number of other employment initiatives as imaginative and cost effective as the schools and hospitals conservation program. It is the result of long hours of hard work on the part of the distinguished ranking minority member and his staff, and I believe it deserves our wholehearted support.●

● Mr. MAZZOLI. Mr. Speaker, my district—which includes Louisville and Jefferson County, Ky.—is in serious trouble.

In December of 1982, the latest official statistics available, unemployment in Louisville and Jefferson County was a staggering 12.4 percent. That translates into over 54,000 unemployed residents of the Third District. And, some have been unemployed for a long time making the pain of joblessness even more acute.

In the construction industry alone, 27.5 percent of the Kentucky work force is idle.

We have more homeless than there are shelters to accommodate them. We have the new phenomenon of whole families showing up at emergency shelters. Citizens are turning up in droves at soup kitchens.

It goes without saying that the bill before us today, emergency supplemental appropriations for fiscal year 1983, does not answer the long-term questions. But, it is a response. It is a beginning.

H.R. 1718 offers some immediate relief and it must be passed without delay so we can move quickly to phase II—additional substantive relief for the jobless and their families, solutions to the more structural problems which have produced unemployment.

You will recall, Mr. Speaker, that in one of our Steering and Policy Committee strategy meetings on jobs, I underscored my feelings on the need for quick action when I said that whatever we decided to do should "show up on the 6 o'clock news within a month." Well, we are within that timeframe if we pass H.R. 1718 today.

I approach phase II of our job creation efforts with that same sense of urgency. The human suffering in my district—nationwide—cannot be allowed to continue.●

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. BONIOR of Michigan, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1718) making appropriations to provide emergency expenditures to meet neglected urgent needs, to protect and add to the national wealth, resulting in not makework but productive jobs for women and men and to help provide for the indigent and homeless for the fiscal year 1983, and for other purposes, pursuant to House Resolution 113, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. CONTE

Mr. CONTE. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. CONTE. In its present form, I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. CONTE moves to recommit H.R. 1718 to the Committee on Appropriations, with instructions to that committee to report the bill back to the House forthwith, with the following amendment: Strike all after the enacting clause, and all that follows through the end of the bill, and insert in lieu thereof:

That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year 1983, and for other purposes, namely:

TITLE I

MAINTAINING AND PROTECTING PUBLIC INVESTMENT FEDERAL BUILDINGS

In order to assist in reducing the backlog of needed maintenance and repair of Federal buildings across the Nation, $150,000,000 for payment to the "Federal Buildings Fund", General Services Administration, which shall be available under the subactivity "Alterations and repairs" for projects which do not require prospectuses.

REBUILDING AMERICA'S HIGHWAYS

Nothing in this Act shall be construed to modify the policy for purchases set forth in Public Law 97-424: *Provided*, That, notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and Highway safety construction programs for fiscal year 1983 shall not exceed $12,600,000,000: *Provided further*, That this limitation shall be administered in accordance with section 104 of Public Law 97-424.

TO SPEED UP IMPROVEMENT OF MASS TRANSPORTATION

To accelerate the construction, modernization and improvement of urban mass transportation systems, to increase the mobility of the urban work force which will result in productive jobs, an additional amount of $171,000,000 for "Urban discretionary grants", to be obligated at the discretion of the Secretary of Transportation in accordance with section 3 of the Urban Mass Transportation Act of 1964.

The Congress disapproves the proposed deferral of budget authority in the amount of $229,000,000 for the Mass Transportation Capital Fund (deferral numbered D83-59), as set forth in the President's special message which was transmitted to the Congress on February 1, 1983. This disapproval shall be effective on the date of enactment of this

Act and the amount of the proposed deferral disapproved herein shall be made available for obligation.

REBUILDING RAILROAD INFRASTRUCTURE

To provide for the improvement of railroad rights-of-way and facilities, the Secretary of Transportation shall make capital grants to the National Railroad Passenger Corporation of $110,000,000 of which $90,000,000 shall be for improvements of railroad rights-of-way and $10,000,000 shall be made available only for the rehabilitation, renewal, replacement, and other improvements on the line between Attleboro, Massachusetts, and Hyannis, Massachusetts, to insure that such track will meet a minimum of class III standards as prescribed by applicable Federal Railroad Administration regulations.

FUNDS FOR AIRPORT DEVELOPMENT

SEC. 302 of the Department of Transportation and Related Agencies Appropriations Act, 1983 (P.L. 97-369) is amended by striking "$600,000,000" and substituting in lieu thereof "$650,000,000."

IMPROVING FACILITIES AND SERVICES PROVIDED TO VETERANS

For an additional amount for "Medical care", Veterans' Administration, $75,000,000, which will result in productive jobs to improve the facilities and care being provided to veterans throughout the country.

PROTECTION FROM FORECLOSURE—EMERGENCY MORTGAGE ASSISTANCE

For an additional amount for "Salaries and expenses", Department of Housing and Urban Development, for administrative expenses to expedite the implementation of a program of emergency mortgage assistance for homeowners pursuant to legislation to be enacted by the Ninety-eighth Congress in response to the growing number of foreclosures, defaults, and delinquencies attributable to continuing adverse economic conditions, $500,000, which shall become available only upon enactment of such legislation.

COMMUNITY DEVELOPMENT GRANTS

For an additional amount for "Community development grants", to be made available in accordance with the provisions of title I of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301), for worthwhile and necessary projects which will result in productive jobs in communities, including towns and villages, throughout the country through the funding of local community development programs, $1,000,000,000, to remain available until December 30, 1983; and an additional amount of $240,000,000, to remain available until expended for rehabilitation of single family residential properties in accordance with Section 312 of the Housing Act of 1964 as amended (Public Law 88-560), 78 stat. 769, 790; 42 U.S.C. 142b). The Secretary of the Department of Housing and Urban Development shall allocate these rehabilitation funds to local and private agencies within 60 days after enactment of this Act and shall report to the Congress on such allocation at that time.

An additional amount of $250,000,000 shall remain available until expended, for "Community development grants", to be made available to metropolitan cities and urban counties in accordance with the provisions of section 106(b) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301), to fund programs in areas of high unemployment: *Provided*, That the Department of Housing and Urban Development shall submit detailed quarterly reports to the appropriate committees of Congress on the use of these funds: *Provided further*, That the 10 per centum limitation on the amount of funds for public services activities contained in section 303(a)(1) of the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35, approved August 13, 1981) shall not apply to the funds provided under this heading in this Act.

URBAN DEVELOPMENT ACTION GRANTS (DISAPPROVAL OF DEFERRAL)

The Congress disapproves the proposed deferral D83-32A relating to the Department of Housing and Urban Development, Community Planning and Development, Urban development action grants, as set forth in the message of January 6, 1983, which was transmitted to the Congress by the President. This disapproval shall be effective upon the enactment into law of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation.

ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING (DISAPPROVAL OF DEFERRAL)

The Congress disapproves the proposed deferral D83-54 relating to the Department of Housing and Urban Development, Housing Programs, Annual contributions for assisted housing, as set forth in the message of February 1, 1983, which was transmitted to the Congress by the President. This disapproval shall be effective upon enactment into law of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation: *Provided*, That all contract authority and budget authority, including the amounts disapproved for deferral in this Act, which is available to make reservations to incur obligations in fiscal year 1983 shall be used in accordance with the provisions included in Public Law 97-377, approved December 21, 1982, under the heading "Annual contributions for assisted housing" to carry out the following budget program:

Provided further, That the limitation on the Department's fiscal year 1983 official reception and representation expenses contained in Public Law 97-272, approved September 30, 1982, under the heading "Salaries and expenses" is increased by $2,000: *Provided further*, That of the amount made available to the Department of Housing and Urban Development under the heading "Research and technology" in Public Law 97-272, no less than $950,000 shall be made available to the Housing Assistance Council

within 45 calendar days of enactment of this Act.

TO AID LOCAL ECONOMIC DEVELOPMENT TO OFFSET PRESENT BUSINESS AND PLANT CLOSURES

Toward the objective of restoring the prior level of Federal support for economic development purposes throughout a wide geographic area as provided for by the Public Works and Economic Development Act of 1965, as amended, and Public Law 91-304, and such laws that were in effect immediately before September 30, 1982, an additional amount of $200,000,000 is appropriated for "Economic development assistance programs", Economic Development Administration.

INCREASING SMALL BUSINESS ACTIVITIES

For additional capital for the "Business loan and investment fund", authorized by the Small Business Act, as amended, $2,000,000.

REPAIRING AND RESTORING PARKS AND RECREATIONAL FACILITIES

There is appropriated for expenses necessary for the "Urban Parks and Recreation Fund" for rehabilitation grants and repairs, under the provisions of the Urban Park and Recreation Recovery Act of 1978 (title 10 of Public Law 95-625), $50,000,000.

To accelerate programs of improvement and maintenance of National Park Service roads, trails, and other existing facilities which will receive an estimated three hundred and fifty-eight million visits in 1983, there is appropriated an additional $50,000,000 for "Operation of the National Park System", National Park Service, under the same conditions provided for under this appropriation in Public Law 97-394.

PRESERVING THE NATIONAL FOREST SYSTEM

To restore, repair, and provide forest roads, trails, and other existing facilities which are part of the real wealth of this country, there is appropriated an additional amount of $25,000,000, for the "National Forest System".

In order to provide jobs which will result in the construction of real assets for this country, an additional amount of $20,000,000 is appropriated for "Construction", Forest Service.

IMPROVING INDIAN HEALTH FACILITIES

In order to provide for construction, repair and improvements, and other services to Indians there is appropriated an additional amount of $39,000,000, for "Indian Health Facilities", Indian Health Service.

IMPROVING FISH AND WILDLIFE SERVICE FACILITIES

To accelerate programs for the rehabilitation and maintenance of wildlife refuges, fish hatcheries, and research facilities, of real benefit to people across the Nation under the jurisdiction of the United States Fish and Wildlife Service, Department of the Interior, there is appropriated an additional $25,000,000, for "Resource Management".

IMPROVING NATURAL RESOURCES ON INDIAN RESERVATIONS

To accelerate programs to improve natural resources on Indian reservations, including range and agricultural improvements, reforestation and timber stand improvement, there is appropriated an additional amount of $20,000,000 for "Operation of Indian Programs", Bureau of Indian Affairs.

ASSISTING IN RURAL DEVELOPMENT AND RESOURCE CONSERVATION

In order to provide assistance for basic human amenities, to alleviate health hazards, to promote stability of rural areas by meeting the need for new and improved rural water and waste disposal systems and to meet national safe drinking water and clean water standards, there is appropriated an additional amount of $80,000,000 under the 1981 formula and regulations for "Rural Water and Waste Disposal Grants", Farmers Home Administration, Department of Agriculture.

In order to assist eligible borrowers such as communities and others to provide assistance for basic human amenities, alleviate health hazards and promote the orderly growth of rural areas by meeting the need for the financing of new and improved rural water and waste disposal systems and meet the National Clean Water Standards and the Safe Drinking Water Act and to assist in achieving these objectives which create and conserve real wealth throughout the country, $600,000,000 for additional loans to be insured, or made to be sold and insured, under the "Rural Development Insurance Fund", Farmers Home Administration, Department of Agriculture in accordance with and subject to the provisions of 7 U.S.C. 1928 and 86 Stat. 661-664.

For an additional amount for "Salaries and Expenses", Farmers Home Administration, Department of Agriculture, $6,500,000 for 500 additional temporary full-time staff at the county office level for the purpose of handling and supervising loans in an effort to avoid foreclosures.

In order to assist States, local units of government, groups and individuals in developing area plans for resource conservation and development and to create jobs to increase and conserve the real wealth of this country, there is appropriated an additional amount for "Resource Conservation and Development", Soil Conservation Service, Department of Agriculture, $15,000,000.

YOUTH CONSERVATION CORPS

There is appropriated an additional amount of $50,000,000 for "Youth Conservation Corps", Forest Service, Department of Agriculture, of which $17,000,000 is hereby transferred to "National Forest System", $16,500,000 is hereby transferred to "Operation of the National Park System", National Park Service, and $16,500,000 is hereby transferred to "Resource Management", United States Fish and Wildlife Service, for high priority projects which shall be carried out as if authorized by Public Law 93-408.

INCREASING THE EFFECTIVENESS OF SOIL CONSERVATION ACTIVITIES

In order to assist in installing works of improvement and rehabilitation of existing works; reduce damage from floodwater sediment and erosion; for the conservation, development, utilization, and disposal of water; and for the conservation and proper utilization of land, there is appropriated an additional amount for "Watershed and Flood Prevention Operations", Soil Conservation Service, Department of Agriculture, and to assist in providing jobs which will increase and conserve the real wealth of this country, and to meet the needs for emergency work, including repairs to local roads and bridges, to remedy damages resulting from recent floods, $50,000,000: *Provided*, That an additional $25,000,000 in loans may be insured, or made to be sold and insured, under the Agricultural Credit Insurance Fund of the Farmers Home Administration (86 Stat. 663).

For an additional amount for emergency measures to repair flood damage as authorized by sections 403-405 of the Agricultural Credit Act of 1978 (16 U.S.C. 2203-2205), $10,000,000.

ENHANCEMENT OF WATER RESOURCE, HYDROELECTRIC POWER BENEFITS AND FOR EMERGENCY FOOD CONTROL WORK

To improve flood control, shore protection, and other measures as authorized by law, to provide water resource and hydroelectric power benefits, to meet emergency requirements and remedy damages resulting from disastrous rains and floods which will result in productive jobs, an additional amount of $75,000,000 is hereby appropriated for "Construction, general", Corps of Engineers—Civil, Department of the Army.

To maintain harbor channels and other navigable waterways essential to the conduct of commerce, to preserve and operate existing river and harbor and flood control measures which will protect the real wealth of the Nation, to meet emergency requirements and remedy damages resulting from disastrous rains and floods, which will result in productive jobs, an additional amount of $76,000,000 is hereby appropriate for "Operation and maintenance, general", Corps of Engineers—Civil, Department of the Army: *Provided*, That no appropriation or fund made available by this bill be used for the Stonewall Jackson Lake project, West Virginia.

To plan, construct, and maintain flood control measures for the river system which drains more than two-fifths of the Nation, to perform necessary rescue work, and repair and restoration of flood control projects including local roads and bridges; together with cooperative projects with the Soil Conservation Service authorized by law, to meet emergency requirements and remedy damages resulting from disastrous rains and floods, and to prevent future damages, an additional amount of $75,000,000 is hereby appropriated for "Flood control, Mississippi River and tributaries", Corps of Engineers—Civil, Department of the Army.

RECLAMATION AND IRRIGATION PROJECTS

To accelerate the completion of projects which will provide additional industrial and municipal water, irrigation water, and hydroelectric capability, an additional amount of $25,000,000 is hereby appropriated for "Construction program", Bureau of Reclamation, Department of the Interior.

To accelerate hydrogenerator uprating, soil and moisture conservation operations on reclamation projects, levee construction, repair and restoration, improvements of recreation areas, and to assist in creating new productive jobs, an additional $21,000,000 is hereby appropriated for "Operation and maintenance", Bureau of Reclamation, Department of the Interior.

To accelerate loans to irrigation districts and other public agencies for construction of distribution systems on authorized Federal reclamation projects, and for loans and grants to non-Federal agencies, an additional $30,000,000, is hereby appropriated for "Loan program", Bureau of Reclamation, Department of the Interior.

In order to provide for improved maintenance, renovation, construction, and repair of Tennessee Valley Authority facilities, there is appropriated an additional amount of $40,000,000, for the Tennessee Valley Authority Fund.

FEDERAL, STATE, AND LOCAL PRISON MODERNIZATION

For planning, acquisition of sites and remodeling, and equipping necessary buildings and facilities at existing penal and correc-

tional institutions, including all necessary expenses incident thereto, by contract or force account, for "Buildings and facilities", Federal Prison System, Department of Justice, $90,000,000: *Provided*, That of this amount, $30,000,000 shall be transferred to "Support of United States Prisoners", Legal Activities for the Cooperative Agreement Program for the purpose of renovating, constructing, and equipping State and local jail facilities that confine Federal prisoners.

CONSTRUCTION AND MODERNIZATION OF HOUSING UNITS FOR MILITARY FAMILIES

In order to accelerate the construction and maintenance of family housing, to increase the quality of life of military personnel and their families, which will result in jobs in the construction industry and its related trades, there is appropriated for expenses of family housing for the Army for maintenance, $100,600,000.

In order to accelerate the construction and maintenance of family housing, to increase the quality of life of military personnel and their families, which will result in jobs in the construction industry and its related trades, there is appropriated for expenses of family housing for the Navy and Marine Corps for construction, including addition, expansion, extension and alteration, and for maintenance, as follows: for construction, $16,230,000; for maintenance, $34,301,000; in all, $50,531,000.

In order to accelerate the construction and maintenance of family housing, to increase the quality of life of military personnel and their families, which will result in jobs in the construction industry and its related trades, there is appropriated for expenses of family housing for the Air Force for construction, including addition, expansion, extension and alteration, and for maintenance, as follows: for construction, $47,501,000; for maintenance, $44,368,000; in all, $91,869,000.

Notwithstanding the provisions of Sections 102, 202, 302, and 605 of the Military Construction Authorization Act, 1983, funds appropriated by the Military Construction Appropriation Act, 1983 may be used to carry out projects otherwise authorized.

LOW-INCOME ENERGY CONSERVATION

There is appropriated an additional amount for "Energy conservation," Department of Energy, $285,000,000: *Provided*, That of this amount, $150,000,000 shall be available for schools and hospitals weatherization assistance as authorized by the National Energy Conservation Policy Act (Public Law 95-619) (42 U.S.C. 6371-6372) and $150,000,000 shall be available for low-income weatherization: *Provided further*, That funds for low-income weatherization activities appropriated under this Act shall be expended according to the regulations pertaining to the maximum allowable expenditures per dwelling unit which were in effect on October 1, 1982, and to the regulations pertaining to priority in providing weatherization assistance which were in effect on October 1, 1982.

SCHEDULED MOTOR VEHICLE PROCUREMENT

In order to assure the timely replacement of planned Federal motor vehicle replacement by American plants in accordance with established practices, $75,000,000 for the General Services Administration to increase the capital of the General Supply Fund, established by section 109 of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 756), for the purchase of motor vehicles: *Provided*, That the funds made available by this appropriation may be used only to procure domestically manufactured vehicles.

INCREASING EMPLOYMENT AND TRAINING OPPORTUNITIES (EMPLOYMENT AND TRAINING ASSISTANCE)

To improve the opportunity for productive work through job training and job creation, an additional $222,400,000 for "Employment and Training Assistance", Department of Labor, of which $32,400,000 shall be for the Job Corps, $100,000,000 shall be for summer youth employment and $75,000,000 shall be for services to displaced workers under title III of the Job Training Partnership Act and $15,000,000 shall be for services to persons facing particular disadvantages in obtaining employment, including the handicapped and displaced homemakers, under Section 453 of the Job Training Partnership Act; *Provided*, That none of the amounts made available by this paragraph for summer youth employment shall be paid to any individual except upon written certification by the supervising official that the assigned job was performed.

INCREASING EMPLOYMENT OPPORTUNITIES FOR OLDER AMERICANS (COMMUNITY SERVICE EMPLOYMENT FOR OLDER AMERICANS)

For an additional amount to carry out the activities for national grants or contracts with public agencies and public or private nonprofit organizations under paragraph (1)(A) of section 506(a) of title V of the Older Americans Act of 1965, as amended, $19,500,000.

For an additional amount to carry out the activities for grants to States under paragraph (3) of section 506(a) of title V of the Older Americans Act of 1965, as amended, $5,500,000.

INCREASING ESSENTIAL COMMUNITY AND HOME HEALTH SERVICES

(HEALTH SERVICES)

To expand the availability of essential health care services for the disadvantaged and unemployed, including those in rural towns and villages, an additional $78,000,000 for "Health Services", Department of Health and Human Services, for carrying out titles III and XIX of the Public Health Service Act with respect to community and migrant health centers: *Provided*, That up to $10,000,000 of these funds shall to the extent practicable be for the provision of home health care services at such centers: *Provided further*, That each center may apply up to 20 percent of these funds provided to the center for the purchase (at rates not exceeding those prevailing under the applicable State plan approved under title XIX of the Social Security Act) of inpatient hospital services for delivery and postpartum care to pregnant women and infants who have no other source of payment for the care.

INCREASING MATERNAL AND CHILD HEALTH SERVICES

(HEALTH SERVICES)

To increase the availability of essential health services for disadvantaged children and mothers, an additional $110,000,000 for "Health Services", Department of Health and Human Services, for maternal and child health grants under title V of the Social Security Act: *Provided*, That such funds shall be available notwithstanding section 502 for special grants to title V agencies and shall be allotted among the States based on the product, for each State, of the number of children under six years of age in the State and the unemployment rate in that State: *Provided further*, That no grant shall be made to a State unless such State offers assurances satisfactory to the Secretary that it will use such amounts in addition to rather than in lieu of existing Federal or State funds currently available for these purposes.

INCREASING ASSISTANCE FOR PUBLIC HOSPITALS AND EMERGENCY ROOM SERVICES

(PREVENTIVE HEALTH SERVICES)

For an additional amount for allotments to States under part A of title XIX of the Public Health Service Act, $52,000,000, to be allotted among the States on the basis of the number of unemployed individuals in each of the States: *Provided*, That funds provided herein may only be used to provide financial assistance to public hospitals and to provide financial assistance to community hospitals to compensate for some portion of free emergency room services: *Provided further*, That funds provided herein may only be used to provide services to persons unable to pay for them: *Provided further*, That no grant shall be made to a hospital unless the hospital offers assurances that it will use such amounts in addition to rather than in lieu of existing Federal, State, or local funds currently available for these purposes.

INCREASING ALCOHOL, DRUG ABUSE AND MENTAL HEALTH SERVICES

(ALCOHOL, DRUG ABUSE AND MENTAL HEALTH)

To expand community care programs for the prevention and treatment of mental illness, alcoholism and drug abuse, especially to meet problems associated with extended unemployment, an additional $30,000,000 for "Alcohol, Drug Abuse, and Mental Health", Department of Health and Human Services, for carrying out the Alcohol, Drug Abuse and Mental Health Block Grant: *Provided*, That no grant shall be made to a State unless such State offers assurances satisfactory to the Secretary that it will use such amounts in addition to rather than in lieu of existing Federal or State funds currently available for these purposes.

INCREASING DAY CARE AND SOCIAL SERVICES

(SOCIAL SERVICES BLOCK GRANTS)

To expand the availability of day care and other social services available to unemployed and disadvantaged Americans, which also shall include Expanded Food and Nutrition Education (Nutrition Aides), an additional $150,000,000 for "Social Services Block Grants", Department of Health and Human Services, for carrying out title XX of the Social Security Act of which $50,000,000 shall be used only for child day care services: *Provided*, That no grant shall be awarded to a State under this paragraph unless such State offers assurances satisfactory to the Secretary that it will use these funds in addition to rather than in lieu of existing Federal or State funds currently available for these purposes.

INCREASING HEADSTART SERVICES

(HUMAN DEVELOPMENT SERVICES)

To expand the availability of essential early childhood education programs serving disadvantaged families, and additional $30,000,000 for "Human development services", Department of Health and Human Services for carrying out the Headstart Act of 1981.

INCREASING COMMUNITY AND HUMANITARIAN SERVICES

(COMMUNITY SERVICES BLOCK GRANT)

To expand the availability of essential humanitarian assistance to the unemployed

and disadvantaged including those in rural towns and villages, and additional $25,000,000 for "Community Services Block Grant", Department of Health and Human Services, for carrying out the Community Services Block Grant Act.

PROVIDING URGENTLY NEEDED SCHOOL FACILITIES

(SCHOOL ASSISTANCE IN FEDERALLY AFFECTED AREAS)

To construct or improve school facilities to assure adequate, safe, and barrier-free buildings in school districts demonstrating an immediate and urgent need, there is appropriated an additional $15,000,000 for "School Assistance in Federally Affected Areas", Department of Education for carrying out the Act of September 23, 1950, as amended (20 U.S.C., Ch. 19): *Provided*, That $5,000,000 shall be for sections 5 and 14(c), $5,000,000 shall be for section 10, and $5,000,000 shall be for sections 14)a) and (b).

MATH AND SCIENCE RETRAINING FOR UNEMPLOYED SCHOOLTEACHERS

To encourage the training of an adequate number of teachers of mathematics and sciences. $30,000,000 for scholarships under Part B of Title I of H.R. 1310, as passed by the House of Representatives on March 2, 1983: *Provided*, That preference for such scholarships shall be given to teachers who are unemployed and who hold no appointment to teach in the current or subsequent school years.

RELIEVING HUMAN SUFFERING OF INDIGENT PEOPLE

For an additional amount for "Food and Nutrition Service", Department of Agriculture, for administrative expenses to accelerate the implementation of programs to provide emergency feeding for the truly needy pursuant to legislation subsequently enacted by the Congress in response to the recognized and growing problem of individuals in the country suffering from malnutrition or undernutriton, $250,000, which shall become available only upon enactment into law of such legislation.

In carrying out the feeding programs provided for by this Act, participation in the programs shall be limited to those individuals certified by a local unit of government or charitable organization. Funds or commodities provided under this Act except for WIC shall be matched by a 25 per centum non-Federal contribution which may be monetary or represented by in-kind contributions such as volunteer labor and operating expenses including buildings, utilities, equipment, rent, and supplies.

DISTRIBUTION OF AGRICULTURAL COMMODITIES

For an additional amount to be added to and merged with the funds currently available to the Department of Agriculture for surplus removal operations in connection with perishable agricultural commodities (7 U.S.C. 612c), $75,000,000. Such funds shall be used to acquire and distribute surplus agricultural commodities in areas of high unemployment for use in cooperative emergency feeding facilities for indigent persons and shall be accounted for separately and in addition to existing funds held in reserve to support the price of perishable commodities as the need may arise. The Secretary's ability to support prices is contingent upon maintaining reserves adequate to announce large scale purchase. Prices tend to stabilize based on the announcement of intent to purchase, thereby reducing the need for actual purchase.

FEEDING PROGRAM FOR WOMEN, INFANTS, AND CHILDREN

(WIC)

In order to provide supplemental food to low-income pregnant, postpartum and breastfeeding women, their infants and young children up to five years of age who are at nutritional risk due to inadequate income resulting from the serious decline in the economy and the unacceptably high levels of unemployment, funds shall be made available to local health clinics through State departments of health and to Indian groups; and upon determination of nutritional risk by competent health care professionals supplemental food shall be provided to such needy individuals to prevent health problems and to improve the future status of their health, $100,000,000.

FOOD DISTRIBUTION AND EMERGENCY SHELTERS

There is hereby appropriated $50,000,000 to the Federal Emergency Management Agency to carry out an emergency food and shelter program. Notwithstanding any other provision of this or any other Act, such amount shall be made available under the terms and conditions of the following paragraphs:

The Director of the Federal Emergency Management Agency shall, as soon as practicable after enactment of this Act, constitute a national board for the purpose of determining how the program funds are to be distributed to individual localities. The national board shall consist of seven members. The United Way of America, the Salvation Army, the Council of Churches, the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., the American Red Cross, and the Federal Emergency Management Agency shall each designate a representative to sit on the national board. The representative of the Federal Emergency Management Agency shall chair the national board.

Each locality designated by the national board to receive funds shall constitute a local board for the purpose of determining how its funds will be distributed. The local board shall consist, to the extent practicable, of representatives of the same organizations as the national board except that the mayor or appropriate head of government will replace the Federal Emergency Management Agency member.

The Director of the Federal Emergency Management Agency shall award a grant for $50,000,000 to the national board within thirty days after enactment of this Act for the purpose of providing emergency food and shelter to needy individuals through private voluntary organizations.

Eligible private voluntary organizations should be nonprofit, have a voluntary board, have an accounting system, and practice nondiscrimination.

Participation in the program should be based upon a private voluntary organization's ability to deliver emergency food and shelter to needy individuals and such other factors as are determined by the local boards.

Total administrative costs shall not exceed 2 per centum of the total appropriation.

As authorized by the Charter of the Commodity Credit Corporation, the Corporation shall process and distribute surplus food owned or to be purchased by the Corporation under the food distribution and emergency shelter program in cooperation with the Federal Emergency Management Agency.

SEC. . Of the budget authority provided in this title, at least seventy-five percentum shall be made available only for projects and activities in civil jurisdictions with high unemployment, or in political units or in pockets of poverty that are currently or should meet the criteria to be eligible under the urban development action grant program administered by the Department of Housing and Urban Development.

For purposes of this section, a "civil jurisdiction" is:

(1) a city of 50,000 or more population on the basis of the most recently available Bureau of the Census estimates; or

(2) a town or township in the states of New Jersey, New York, Michigan or Pennsylvania of 50,000 or more population and which possesses powers and functions similar to those of cities; or

(3) a county, except those counties which contain any of the types of civil jurisdictions defined in paragraphs (1) or (2) of this section; or

(4) a "balance of county" consisting of a county less any component cities and townships identified in paragraphs (1) or (2) of this section; or

(5) a county equivalent which is a town in the states of Massachusetts, Rhode Island, and Connecticut; or

(6) a portion of a city or jurisdiction that meets the "pockets of poverty" criteria as defined by the Department of Housing and Urban Development.

* * * * *

The Assistant Secretary shall classify a civil jurisdiction as having high unemployment whenever, as determined by the Bureau of Labor Statistics, the civil jurisdiction has had an average unemployment rate over the previous twelve months no less than ninety percentum of the national average unemployment rate during the same period, or if the civil jurisdiction is currently or should become designated a labor surplus area by the Department of Labor.

The Assistant Secretary shall publish a list of civil jurisdictions with high unemployment, together with geographic descriptions thereof, within 30 days after enactment of this Act, and on a monthly basis thereafter.

The provisions of this section shall not apply to any program or portion of a program under which funds are allocated by formula, or for humanitarian aid and training programs, including emergency mortgage assistance; Indian health facilities; operation of Indian program; community and home health services; maternal and child health services; alcohol, drug abuse and mental health services; head start; math and science retaining; feeding programs for women, infants and children (WIC); and food distribution and emergency shelters.

SEC. . None of the funds appropriated by this title shall be used to discriminate against any individual on the basis of sex, or to deny equal opportunity according to the principles of the Equal Pay Act of 1963, title VII of the Civil Rights Act of 1965, Executive Order 11246, or any existing antidiscrimination provisions of programs for which funds are appropriated under this title.

SEC. . Notwithstanding any other provision of this title, no part of any appropriation or any other obligational authority contained in this title shall remain available for obligation beyond September 30, 1983, unless specifically so provided in this title.

SEC. . In administering the programs for which funds are provided by this title to provide productive employment, priority shall be given to providing employment for persons who are unemployed, 90 percent of whom shall be able to certify that they have been unemployed for at least six weeks prior to the date of their application for employment.

TITLE II—SUPPLEMENTAL UNEMPLOYMENT APPROPRIATIONS

DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

For an additional amount for "Advances to the Unemployment Trust Fund and Other Funds", $5,033,000,000, to remain available until September 30, 1984.

GRANTS TO STATES FOR UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICES

For an additional amount for "Grants to States for unemployment insurance and employment services", $326,100,000, which may be expended from the Employment Security Administration Account in the Unemployment Trust Fund of which $281,600,000 shall be available only to the extent necessary to meet increased costs of administration resulting from changes in a State law or increases in the number of unemployment insurance claims filed and claims paid or increased salary costs resulting from changes in State salary compensation plans embracing employees of the State generally over those upon which the State's basic grant was based, which cannot be provided for by normal budgetary adjustments: *Provided*, That any portion of the funds granted to a State in the current fiscal year and not obligated by the State in that year shall be returned to the Treasury and credited to the account from which derived.

TITLE III—EMERGENCY DISASTER RELIEF

FEDERAL EMERGENCY MANAGEMENT AGENCY

FUNDS APPROPRIATED TO THE PRESIDENT, DISASTER RELIEF

For necessary expenses in carrying out the functions of the Disaster Relief Act of 1970, as amended (42 U.S.C. 4401), and the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 et seq.), for disaster relief in the State of California, $100,000,000.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion to recommit be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER. The gentleman from Massachusetts (Mr. CONTE) is recognized for 15 minutes in support of his motion to recommit.

Mr. CONTE. Mr. Speaker, I rise in support of my motion to recommit, which would require the Appropriations Committee to report back forthwith a substitute bill.

I have already outlined my substitute and change from the committee bill. The real key here is that we propose to target this aid on those who can really use it. The effect of the substitute is reduced funding for programs where we have been assured that the additional money cannot be spent this year.

In addition, we have increased funds for those worthwhile programs to create jobs quickly and really produce something to show for the money that we are investing, both in terms of employment and lasting benefits to the American public.

And, furthermore, we have included language making these funds available only through the end of the current fiscal year. The last thing that we need as we turn the corner on economic recovery is to have this extra money dribbling over the next 6 years, as would occur in some of the programs in the committee bill.

This amendment does more for unemployed women than the committee bill. It does more for high unemployment. It does more for the American taxpayer who is, after all, picking up the bill.

Mr. Speaker, in addition, this substitute includes the other amendments that have been adopted earlier today, the Obey amendment and the Jim Howard amendment and the Edgar amendment. We have also included language—we worked with the gentleman from Pennsylvania (Mr. WALKER)—that would require hiring under this bill to give preference to the unemployed.

It seems to me that we have a fundamental choice here between the committee bill, which adopts a heavy construction, brick and mortar pork-barrel approach of the past, or this substitute which offers us something to look to the future. You do not find the schools and the hospital weatherization program in the committee bill, which is one of the most effective quick job programs today.

The committee bill does not have funds to retrain unemployed teachers to meet the need for math and science instructors. And the committee bill does not contain funds for displaced homemaker assistance or increased labor employment service, but it does contain a great deal of pork.

Strong language, as I said, prohibiting discrimination, language requiring all appropriations to be obligated by September 30, and also contains the four amendments.

The Conte substitute does contain $240 million for rehabilitation of single family properties to be allocated within 60 days; $135 million for schools and hospital weatherization over and above the bill; $30 million to retrain unemployed school teachers in the critical shortage of math and science instructors; $100 million for disaster relief for the California flood; $50 million for State employment service workers to find jobs for the unemployed; $50 million for airport construction and expansion; $50 million more for the Youth Conservation Corps; $15 million for dislocated homemaker training.

I wish everyone were here during the general debate of this bill. The committee bill was hastily put together.

Now, as I said earlier, if you were in the slaughterhouse when the pig was being slaughtered and you got a piece of the bacon, then you can go home and say, "I voted for a jobs bill." But if you got there and the door was locked, and you did not get in, you are going home with pretzels. This is a substitute bill that everybody goes home with a little bit of something. It puts people back to work, from Oregon to Oklahoma, from New York to Connecticut, and it does not favor a few.

As I said earlier, there is an old song, "You take the low road, I will take the high road, and I will get to Mississippi before you." Vote for the committee bill, that is what you are going to get.

□ 1630

Mr. WHITTEN. Mr. Speaker the gentleman who preceded me, Mr. CONTE, called attention to how serious the situation is. It just shows what happens to us by following our good friend's lead. We have been following the line of the gentleman from Texas (Mr. GRAMM) and his viewpoint for quite a while and my friend on the committee just described what a serious situation we face.

I would like for my colleagues to listen to me at this time. You had better follow our Democratic lead where we have a proven track record. I am proud to say that when some years ago we had the disastrous flood in Pennsylvania, we did not hesitate, we came in with $350,000,000 immediately.

May I say in the State of Washington, after we had gotten a supplemental appropriations bill through our committee, Mount St. Helens blew up. We killed the bill and went back to the committee with a new bill so that our friends in the House from the area could indicate aid and get some credit for it.

Now, our friend SILVIO, talked about his bill being gotten up in quick order. I am sure he was talking about his bill because we have been working on this bill since last December.

Incidentally, when I say a proven track record, some of my friends in the freshman class came here because of the jobs bill that we passed and my friend SILVIO CONTE from Massachusetts, voted against it. Here is the record.

I note that at the last minute he added $100 million in relief funds for California to his substitute. He did not tell you there is more than $600 million, in the disaster relief fund already, unobligated.

So his track record is not very strong on what he talks about now. But I want to tell my colleagues on the Democratic side, one of the reasons we got in this present terrible situation is that my Republican friend split us up last year. We were unable to accomplish many things because some of our friends went to that side. But goodness knows, with the picture that Mr. CONTE describes himself about unemployment, bankruptcies, and all of the rest, goodness knows why he wants to follow the same course as last year.

My friend from Massachusetts had a whole lot of ugly things to say about the bill in general terms in the committee. That it was rotten and all, but he adopts about nine-tenths of my bill in his motion to recommit. But is does not bother him to be on this side, then that side, then this side, then that. But I would hate to follow a leader like that all of the time. I could not keep up with the change.

You can enjoy him and I do too. He makes television on almost everything. In the public markup, he said if his district was taken care of in the bill he would not oppose it. Of course, he really did not mean it, but he made the news media because of what he said.

I will tell you again that I will match my record against anybody's here for trying to help us out of this depression. Listen, if you will, we are going to have a second supplemental and a third supplemental, based on the present budget request of the President.

I believe I can remind you that when we had the Chrysler loan, affecting Michigan, and many States, I supported the loan for Chrysler believing I was right, I went through the depression in my State of Mississippi. Believe me, we cannot stand another.

I agreed with the objectives of my friend, Mr. EDGAR, and I want to be sure that his amendment does what he believes it will, yet like my colleague NEAL SMITH says we must be sure the provision does not delay relief in providing productive jobs.

I will work closely with BOB, to see that aid reaches quickly the places where it is badly needed.

So I ask you to stay with us. Do not let our friend from Massachusetts again split our ranks. We paid for it last time. Let us do not do it now.

I assure you there is going to be a second supplemental. There has to be. There is going to be a third supplemental, too, based on the recommendations by the President.

Let us realize that wealth is different from paper money. We have some economists on my left who seems to think that to make the books look good, even though it is paper money, that that is wealth. Again real wealth is in material things our land, our buildings, our factories, our harbors, and our paper money is only a medium of exchange.

The bill we have before you, will provide jobs, and the Nation will be receiving value for what you spend. But you cannot get any money until you work and produce. May I say to my friends, we are trying our best to help and we have a good track record of helping. Do not split us up and go back like it was 2 years ago.

Insofar as our friend from Massachusetts is concerned, it did not bother him to accept most of my bill if he could split us up. But I will tell you, at heart he voted his conscience last year when he said no on the public works bill—here is the record.

You had better stay with us.

The SPEAKER. The question is on the motion to recommit.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. CONTE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 158, nays 256, not voting 19, as follows:

Jones (TN)	Neal	Weaver
Lowery (CA)	Rowland	

□ 1700

The Clerk announced the following pairs:

On this vote:

Mr. Rowland for, with Mr. Corcoran against.

Mr. Jones of Tennessee for, with Mr. Lowery of California against.

Mr. Hawkins for, with Mr. Moorhead against.

Mr. Morrison of Washington for, with Mr. Denny Smith against.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. AKAKA. Mr. Speaker, this Member was unavoidably detained on Wednesday, March 2, 1983, when the House acted on final passage of H.R. 1310, the Emergency Mathematics and Science Education Act.

Had I been here, I would have voted "aye."

I ask unanimous consent that my statement appear in the permanent record.

The SPEAKER pro tempore. (Mr. GLICKMAN). Is there objection to the request of the gentleman from Hawaii?

There was no objection.

□ 1710

OCEAN FREIGHT COMPETITION ACT OF 1983

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SMITH of Nebraska. Mr. Speaker, today I have introduced a bill entitled the "Ocean Freight Competition Act of 1983." The intent of this legislation is to exempt agricultural commodities from the provisions of the Merchant Marine Act of 1936 which established the practice of cargo preference in the United States.

I need not remind this body what shape of our agricultural sector, the single largest industry, is in. USDA economist tell my Agricultural Appropriations Subcommittee that farmers and ranchers will be facing their fourth straight year of depressed income. Exports are expected to decline for the second straight year.

Producers are being told that they have to tighten their belts, borrow less, spend less, produce less, hold the line on target price increases and lower loan rates—all so they can be more competitive on the world market. This world market has been hit by a recession, high interest rates, record harvests—but worst of all—highly subsidized exports from competitor countries.

As ranking minority member of the Agricultural Appropriations Subcommittee, I am well aware of the effects cargo preference provisions have on Government generated cargoes. In particular, cargoes generated by the USDA—food for peace—Public Law 480 program and now more recently,

the Egyptian wheat flour Export-PIK arrangement.

Last year our committee appropriated $109 million just to fund the difference in cost between shipping Public Law 480 title I commodities on U.S.-flag ships. The administration's budget for 1984 includes $104 million for this shipping rate differential. A 1981 GAO report indicates that the differential between U.S.-flag ship rates and other vessels was $57.14 per ton and in some cases was more than $100 higher.

This bill is especially timely because of the recent administration decision to subject the Egyptian wheat flour trade to cargo preference rules. The wheat flour deal was the first real indication that the administration was serious about stepping in to protect U.S. agricultural markets against unfair export practices.

This particular cargo preference action will not adversely affect the flour agreement because the additional subsidy required to offset higher shipping costs will be paid in the form of wheat. However, if any cargo preference rules are extended to the successful blended credit program, this new marketing tool will be effectively destroyed.

There are currently certain maritime supporters who believe that expanding cargo preference to commercial trade would be beneficial to the merchant marine. This is probably true, but the benefits would come at the expense of our country's exporters—namely farmers.

I support a strong merchant marine, but making it strong by guaranteeing business is not the way to make U.S.-flag ships competitive. Farmers are being told to get competitive by bringing down cost of production, but these efforts will be fruitless if transportation costs are not competitive, too.

LEGISLATION TO ESTABLISH A NATIONAL CEMETERY IN ARIZONA

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, today I, along with Arizona's four other House Members Mr. UDALL, Mr. STUMP, Mr. MCCAIN, and Mr. MCNULTY, am sponsoring a bill to establish a national cemetery in Arizona at the currently existing site of the Arizona Veterans Memorial Cemetery near Cave Creek.

Presently the closest national cemetery with available burial space near the Phoenix metropolitan area, populated by about a million and a half persons, is in Riverside, Calif. This is over 300 miles away, a long distance for families of those buried in a national cemetery to travel.

In 1976, the State of Arizona established the Arizona Veterans Memorial Cemetery in Maricopa County. This was accomplished through the diligent efforts of the American Legion, the Disabled American Veterans, and the Veterans of Foreign Wars, with the majority of funds being provided by the State of Arizona.

The site selected includes approximately 836 acres of raw desert land. The terrain suits the requirements of the national cemetery system and provides a beautiful setting for such a facility. With this acreage, the cemetery has burial space for about 500,000 internments, making it one of the largest in the national cemetery system if it is so designated. With diminishing space available in the present system, this in an important consideration.

Currently some 2,100 veterans and dependents are buried in the Arizona Veterans Memorial Cemetery. The State of Arizona has recently established the Arizona Veterans Service Commission which, among its other duties, has a primary goal of establishing and then supporting a national cemetery in Arizona at the above-mentioned site. On behalf of the Commission and all veterans in the State of Arizona, I urge my colleagues to recognize the need for a national cemetery of this size in the Southwest and to support the efforts of me and my Arizona colleagues in designating the Arizona Veterans Memorial Cemetery as a national shrine.

LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I take this time for the purpose of receiving the schedule for next week, and I would be happy to yield to the gentleman from Louisiana.

Mr. LONG of Louisiana. I thank the gentleman for yielding.

The schedule of the House for the remainder of the day and following this colloquy on the outline for the schedule for today and for next week, there will be three commemorative bills by unanimous consent.

H.J. Res. 502, H.J. Res. 22, and H.J. Res. 62 all handled by the gentleman from New York.

Then the House will adjourn until Monday, and we will meet on Monday, March 7, in pro forma session.

On Tuesday, the House will meet at noon. There are three bills under suspension. They are:

H.R. 1296, tax treatment of the payment-in-kind program of the Department of Agriculture.

H.R. 1213, Public Lands and National Parks Act of 1983.

H.R. 174, the Gladys Noon Spellman Parkway.

Recorded votes on these three suspensions will be postponed until later, after debate on all three of the suspensions.

On Wednesday and the balance of the week, March 9, 10, and 11, the House will meet at 3 p.m. on Wednesday, and 11 a.m. on Thursday and the balance of the week. The major item of business, the only item of business remaining for the week is the Social Security System Amendments of 1983, subject to a rule being granted.

For the information of the Members of the House, the matter will be considered, as I understand it, before the Committee on Rules on Tuesday.

Mr. LOTT. I would like to inquire of the gentleman, is it anticipated at this time that we may come in earlier than 3 o'clock on Wednesday?

Mr. LONG of Louisiana. It may be necessary that we would make the request to do that, depending upon the circumstances and what the outlook is for the amount of time that would be required in order to be able to perhaps complete the social security bill, we would hope, on Thursday, and that in turn means that if we could finish it on Thursday, if we can complete the business on Thursday, that we might not have to be in on Friday.

Mr. LOTT. So there is a strong likelihood we would not have a session on Friday.

Mr. LONG of Louisiana. A strong likelihood we would not. If the rule comes out with a rather modified and restricted provision and we can restrict the debate on it, we ought to be able to finish it certainly by the close of business on Thursday.

Mr. LOTT. I thank the gentleman.

ADJOURNMENT TO MONDAY, MARCH 7, 1983

Mr. LONG of Louisiana. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. LONG of Louisiana. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

NATIONAL EYE DONOR MONTH

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Commit-

tee on Post Office and Civil Service be discharged from further consideration of the Senate Joint Resolution (S.J. Res. 15) designating the month of March 1983 as "National Eye Donor Month," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. GUARINI. Mr. Speaker, reserving the right to object, and I will not object, I am privileged to be the sponsor of Senate Joint Resolution 15 to designate March 1983 as National Eye Donor Month. With this resolution, we will bring to the public's attention the urgent need for human eye donations. More importantly, we will contribute to the noble goal of bringing light to those whose world is dark.

Many thousands of Americans suffer from impaired vision caused by corneal disease or injury. For an estimated 30,000 each year, sight can be improved or restored by means of a corneal transplant operation. This surgery can only be done following the donation of a human eye at the time of death. Although cornea transplants are highly successful operations, an ever-growing demand exceeds the limited supply of donated corneal tissue available today.

In research programs throughout the country, tremendous advances into the causes and treatments of blinding diseases have been made using donated corneal tissue. Despite the encouraging progress in eye disease research, inadequate supplies of donated corneal tissue continue to delay possible cures for many blinding diseases.

To address this shortage, over 80 eye banks across the country encourage people to pledge and ultimately donate their eyes at death. The eye banks coordinate the nationwide distribution of donated human eye tissue for corneal transplants, research, and medical education.

We need to bring attention to this worthy cause and emphasize the need for more corneal tissue donations. By designating March 1983 as "National Eye Donor Month," we will further the humanitarian efforts to restore sight to the visually impaired.

I am gratified by the overwhelming interest and support my colleagues have shown for this measure, and urge them to join me in supporting passage of Senate Joint Resolution 15 today.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 15

Whereas eye banks in the United States have grown from a single institution in 1944 to eighty in 1982;

Whereas over fifteen thousand children and adults in the United States have benefited as a direct result of efforts made by eye banks;

Whereas eye banks have sought to encourage research into the prevention and treatment of eye disease and injury in the United States; and

Whereas increased national awareness of benefits rendered through eye donation may add impetus to efforts to expand research activities, and benefit those persons affected by blinding diseases: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of March 1983 is designated as "National Eye Donor Month", and the President is authorized and requested to issue a proclamation calling on all citizens to join in recognizing this humanitarian cause with appropriate activity.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WOMEN'S HISTORY WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate Joint Resolution (S.J. Res. 37) providing that the week containing March 8, 1983, shall be designated as "Women's History Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Ms. MIKULSKI. Mr. Speaker, reserving the right to object, and I shall not object, I do wish to comment just very briefly.

I would like to thank the gentleman from New York for advocating this legislation, and we appreciate his support.

Mr. Speaker, as the principal sponsor, I am pleased to address my colleagues today regarding House Joint Resolution 70, designating the week of March 6, 1983, as "Women's History Week." As you know, we celebrated Women's History Week last year with ceremonies and activities across the Nation that honored the enormous contribution women have made to this country.

This resolution is consponsored by more than 225 Members and has the backing of many national organizations ranging from the Girl Scouts to the National Federation of Business & Professional Women and the American Historical Association. I would like also to make special note of the efforts of the national Women's History Week project. Without their energy and leadership, we may not be celebrating this important event.

Just as women who are half of the population of this country have not yet been written into the Constitution, they have also not been written into our history. And yet, they were there beside their husbands, their fathers, their brothers, and their friends. They sailed the seas, tilled the soil, built the cities, and raised the families.

It is only in the last decade that women have begun to achieve the recognition that they have been earning for the past 20 decades. And that recognition has not been given freely. Women have had to fight for it. They have had to fight for their rights, just as they are now fighting for their values. Since the birth of this Nation, women have been fighting for the same basic values that they are fighting for today. They have been fighting for the right to a decent home and a decent education for their children. They have been fighting to make this planet safe from annihilation. They have been fighting for the assurance that their children will have a good life, and they have been fighting to be recognized as first-class citizens with a history and a future.

"Women's History Week" is one step forward in the evolving recognition of those values, and of those rights. "Women's History Week" says to people across this Nation, "Women are achievers, women are important, women are half of all that this country is."

For as we take that step, to honor those women who wrote the history of the United States by leading the lives that they did, we are making a conscious effort to think in new ways. We are making a conscious effort to support the values that women have and do represent. We are saying "Yes" to the traditional values of strong families, a secure future, and a safe world. I believe the time has come to say "Yes" and I welcome your enthusiastic support for this resolution.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Ms. OAKAR. Mr. Speaker, reserving the right to object, and I shall not object, I simply rise to join my colleague from Maryland and congratulate her on this very fine resolution, and I associate myself with her remarks.

I am delighted that at least in this Congress we could get this resolution passed. We had a little problem in the last Congress, but that is water over the dam, as they say, and we are very, very pleased with the chairman of the subcommittee for all of his fine work also.

Elizabeth Cady Stanton, Susan B. Anthony, Clara Barton, Harriet Tubmann, Louisa May Alcott, Emily Dickinson, Harriet Beecher Stowe, Bess Truman, Eleanor Roosevelt, Georgia O'Keffe, and Ella Fitzgerald are just a few of the women who have—in one way or another—shaped our Nation. They and many others have dedicated their time and energy to certain causes. Whether it be something as important as fighting for peace, staving poverty, educating our young, or something as lasting and beautiful as writing and painting, women have participated.

The passage of House Joint Resolution 70, proclaiming a "Women's History Week" gives us an opportunity to acknowledge the fine work that women have done in shaping our country's history. I urge all my colleagues to support this resolution and participate in the local activities that will be planned through the country.

It is important that this week be observed so that our youth will be inspired and encouraged to continue these leaders' fine work. I commend my colleague, BARBARA MIKULSKI for introducing this legislation and working so hard to insure its success.

Mrs. BOGGS. Mr. Speaker, will the gentlewoman from Ohio yield to me?

Ms. OAKAR. Further reserving the right to object, I yield to the gentlewoman from Louisiana.

□ 1720

Mrs. BOGGS. I thank the gentlewoman for yielding.

Mr. Speaker, I would like to say that, yes, there are 225 cosponsors of this legislation. But, with the gentlewoman from Ohio, I, too, would like to congratulate our colleague, the gentlewoman from Maryland, for her leadership in this regard for initiating the sponsorship of this resolution.

● Mr. ROTH. Mr. Speaker, I join with my colleagues in support of the resolution to designate the week of March 6, 1983, as "Women's History Week." Every Member can certainly point with pride to specific women active in our communities who do so much to enrich our lives. The historical records of this great country will detail the important role women continue to play.

The natural beauty and landscape called Wisconsin is highlighted by historic markers and monuments celebrating lasting impressions and vibrant lives of our women. In my hometown, Appleton, Edna Ferber worked as the first female reporter for the Daily Crescent. In love with her job, she covered the daily news by rushing between the jail and courthouse to Pettibone's dry goods store, all for $3 per week. Following a 4-year stint for a big city newspaper, she returned to Appleton with a battered typewriter to peck out the first of her 25 books. This dynamic Pulitzer Prize winner wrote of America's success fantasy, and offered it in the person of accomplished and ambitious women.

Many of today's residents of Appleton and readers of the Post Crescent recall the 45-year career of Mrs. Lillian Mackesy who followed in the footsteps of Ms. Ferber, cub reporter. As the historian in residence with the paper, she too served the press and public assiduously and accurately with news and views. Her love of history was expressed in work with the Outagamie County Historical Society. A Girl Scout leader for 61 years, she was awarded the Golden Eaglet by the founder of the Girl Scouts of America. Mrs. Mackesy's interest in the public sector is marked by her tireless efforts with the League of Women Voters. This great lady was both tutor and adviser to me during my tenure in the State legislature. Our mutual interest in local and State history resulted in many hours of animated discussion.

From an even earlier historical perspective, I comment on the Green Bay bride of the first lawyer admitted to the Wisconsin Bar back in the early 1800's. Mrs. Elizabeth Baird quickly found that her husband's desire to be a farmer and a lawyer meant that he would be the lawyer and she the farmer's wife. This talented and energetic young part-French, part-Indian writer penned the "Reminiscences of Early Life in Territorial Wisconsin," one of the most valuable historical accounts of our pioneer settlers.

Wisconsin's Mrs. Mary Arndt Cotton was one of the only five American women mustered into the Army as a nurse during the Civil War. This "angel of mercy" spent more than a year bandaging and treating the wounded in the Virginias. In the early years of this century, Dr. Kate Newcomb attended the medical needs of northeastern Wisconsin. With her special car outfitted with skis on the front wheels and tractor treads on the rear and often on snowshoes, she responded to calls for assistance signaled by red rags tied on branches and fence posts. She is aptly remembered as the "Angel on Snowshoes" and founder of a modern hospital in the area today.

The long list of women contributing to our nearly 200-year period of growth from territorial status to statehood is impressive as suggested by this small sampling. On every trip back home, I am proud to find women, who, today as in the past, contribute to our State's rich historic legacy. We Wisconsinites are eager to share our remembrances of these very active, interesting women. Thus, I enthusiastically support this legislation according overdue recognition to women in history.●

● Mr. MATSUI. Mr. Speaker, I join a majority of my colleagues today to express support for Senate Joint Resolution 37, designating March 6, 1983, as "Women's History Week." It is most appropriate that we recognize the substantial contributions that women have made in shaping our society.

Each Member of Congress is privileged to represent a host of talented and noteworthy individuals from the areas' historical past and its present. I feel particularly fortunate as the Sacramento area has produced countless persons who have dedicated their lives to community service.

It is fitting that the individual I profile this afternoon for his selfless gifts to Sacramento's citizens will herself be better appreciated by the renaissance in women's history. Margaret Eleanor Crocker influenced the cultural tastes of several generations of Californians by providing Sacramento with the first art gallery established on the west coast.

Margaret Crocker was born in 1822 and moved west to Sacramento with her husband Edwin in 1852. After many early trials and difficulties, the Croker family fortunes blossomed and Margaret assumed the role of lady bountiful—dispensing land, money, and moral support to those around her in need. The city of Sacramento in particular benefited from her generosity by receiving land for a school playground and an addition to the cemetery. She founded the Bell Conservatory, a nursery, and florist shop, where the poor could obtain free flowers to decorate the graves of their loved ones. Again she came to the aid of a distressed home for aged gentlewomen, the Marguerite Home, with ample housing and a generous endowment. When she finally moved to New York, she gave her Sacramento home as a shelter for unmarried mothers.

Without doubt, Margaret Crocker is remembered today for her art collection that is housed in the E. B. Crocker Museum. During her day, Mrs. Crocker entertained California's political and cultural leaders at her renowned gallery. Lilioukalani, deposed queen of Hawaii; Gen. Ulysses S. Grant, and Oscar Wilde traveled to Mrs. Crocker's gallery to review its treasures.

As indicated by her story, American history has been made by millions of courageous women, like Margaret Crocker, whose efforts have gone unsung for too long. The passage of the resolution before us provides the Nation an opportunity to reflect on the sacrifices and services of America's women pioneers.●

● Mr. REID. Mr. Speaker, I am pleased to see our country recognize the many contributions of women to our Nation's history which is why I am a cosponsor of Senate Joint Resolution 37 which designates the week of March 6, 1983, as "Women's History Week."

This resolution clearly recounts women's role in our history noting that American women of every race, class, and ethnic background helped found the Nation in countless ways as slaves, nurses, homemakers, industrial workers, teachers, reformers, soldiers, and pioneers. In addition, American women have played and continue to play a critical economic, cultural, and social role in every sphere of our Nation's life by constituting a significant portion of the labor force working in and outside of the home. They have also played a unique role throughout our history by providing the majority of the Nation's volunteer labor force, and have been particularly important in the establishment of early charitable philanthropic and cultural institutions in the country. American women also served as early leaders in the forefront of every major progressive social change movement, not only to secure their own right of suffrage and equal opportunity, but also in the abolitionist movement, the emancipation movement, the industrial labor movement, and the modern civil rights movement.

I would like to take this opportunity to share with my colleagues the outstanding contributions of Nevada women in the history of our country.

Helen Stewart was an example of the strong spirit of our early pioneer women. Having arrived in southern Nevada with her husband in 1882, she was the first non-Indian woman in this area. After her husband was murdered, she raised five children and managed her ranch alone, overcoming many obstacles and hardships.

Hannah Clapp of Carson City opened our State's first formal school and later became the first librarian at the University of Nevada, Reno. She is also known for winning the bid to construct the iron fence around the Nevada State Capitol, using her initials H. K. Clapp in the bidding process to disguise her sex. She used the profits from constructing the fence to add to her school.

Nevada's first newspaperwoman was Nellie Mighels Davis, who reported for the Carson City Appeal. Her byline was seen across the country when she covered a prize fight in Reno in 1877, which women seldom even attended at that time.

Sarah Winnemucca, the wife of an Army officer, received national recognition with her book "Life Among Paiutes" and traveled throughout the country to speak about the Indians. Of course, the town of Winnemucca in northern Nevada is named after her.

Ann Martin, a native Nevadan, was very active in the women's suffragette movement. In fact, she was the first woman in Nevada to run for the U.S. Senate, which she did in 1918.

Maude Frazier was an outstanding woman from southern Nevada. She was the first woman from Clark County to hold an elected position when she was voted into the Nevada State Assembly in 1951. She originally came to Las Vegas as a high school teacher and was later principal of Las Vegas High School. She also was the only woman to serve as Lieutenant Governor in Nevada, having been appointed to that post at the death of Rex Bell.

Eva Adams was another Las Vegas High School teacher who excelled. After working for three U.S. Senators, including Sen. Pat McCarran, she was appointed director of the U.S. Mint in 1961, a position she held for 8 years.

Flora Dungan, who had her own accounting firm in Las Vegas, served in the Nevada State Assembly with me and was a member of the board of regents of the University of Nevada system. She was the founder of Focus, a drug rehabilitation center for youth, as well as numerous other humanitarian projects.●

● Mr. FRANK. Mr. Speaker, I would like to take this opportunity to express my support of Ms. Mikulski's House Joint Resolution 70 making the week of March 6, 1983, as Women's History Week.

In my own State of Massachusetts, there have been numerous examples of women who have contributed to the history of our Nation. One outstanding example is Emily Green Balch. Born on January 8, 1867, Balch was educated as a sociologist. She worked extensively with juvenile delinquents and was a founder and first director of the Dennison Settlement House in Boston. A union activist, she joined the Federal Labor Union which was a part of the American Federation of Labor, she attended State labor meetings as a representative of the Cigar Maker's Union.

In 1897 she joined the faculty of Wellesley College as an assistant professor of economics and became a full professor in 1913. While teaching courses on the labor movement, socialism, and immigration, Balch remained active in social causes. In 1903, she helped found the Women's Trade Union League. She worked on drafting a Massachusetts minimum wage bill and was among the organizers of the first State conference of charities in Massachusetts.

Balch took a sabbatical from Wellesley College from 1904 to 1906 to study Austria-Hungary emigration. The resulting publication "Our Slavic Fellow Citizens" is one of the more frequently cited books on the history of immigration.

After the outbreak of World War I she began her career as a peace activist. In 1915 she attended the International Congress of Women at The Hague with Jane Adams and 42 other American women. With Jane Adams and Alice Hamilton she wrote "Women at the Hague." The following year she participated in an unofficial Neutral Conference for Continuous Mediation. She continued to participate in many peace conferences around the world.

In 1918, despite student and faculty protest, the Wellesley College trustees decided not to reappoint her because of her social and pacifist views. In that year her book "Approaches to the Great Settlement," regarding the impending peace negotiations was published. She spent a year on the editorial staff of the Nation and in 1919 she helped establish the Women's International League for Peace and Freedom, headquartered in Geneva.

World War II strained Balch's pacifism; her concern for the victims of fascism however was great and she reluctantly supported the war. She helped European refugees settle in the United States and worked to get the interned Japanese-Americans out of the relocation camps.

In 1946 the Nobel Peace Prize was jointly awarded to Balch and international YMCA leader John R. Mott. She donated her prize money to the Women's International League for Peace and Freedom and related causes. She remained active in the peace movement until her death on January 9, 1961.●

● Mr. WEISS. Mr. Speaker, I wish to join my colleagues in support of Senate Joint Resolution 37, designating the week of March 6, 1983, as "Women's History Week." I support this important designation even though 1 week is not enough to fully recognize the significant role of women in American history. The variety and volume of women's contributions require wide acknowledgment throughout the year.

We have consistently overlooked and undervalued women's role in the history of our Nation. History courses, as they have been taught in our schools and universities, have largely ignored the achievements of women. Instructors, for the most part, have neglected the female role in shaping history, and textbooks have portrayed women almost exclusively as tradition helpmates to men.

Yet women have played and continue to play a critical role in every sphere of our national life through their work both outside and inside the home. Women have served as early leaders in every major social change movement in this country. Individual American women who deserve our attention include Anne Hutchinson, a reformer and leader of women; Sojourner Truth, a courageous abolitionist; Susan B. Anthony, an international political leader; Elizabeth Blackwell, the first woman medical doctor in the United States and a pioneer in hygiene and medical education for women;

Margaret Sanger, a pioneer advocate of birth control; and many others.

Despite these contributions, the male role has been featured almost exclusively in our historical records. As a result, we have a lopsided view of the past in which women are relegated to an inferior position. Without more education about women in history, progress will be slow in advancing women toward equality in our society.

Today women are still the majority of our secretaries but few of the executives. They are still far more likely to be nurses than doctors. They comprise only small proportions of our political leadership—only 4.3 percent of the Members of Congress, and 13 percent of the State legislators.

While progress has been too slow, let us nevertheless acknowledge women's entry into nontraditional spheres and afford higher status to those professions dominated by women. With the passage of Senate Joint Resolution 37, Women's History Week will be celebrated across the country. We must spend this week and the entire year remembering the significant role of women in building our Nation and making it strong.●

● Mr. LELAND. Mr. Speaker, I believe no occasion so merits our attention and public recognition as does Women's History Week. It is not possible, however, to give the women of this Nation the accolades they are due. Their contributions have been too numerous, their impact, individually and collectively, of so vast a nature as to be beyond our ability to detail them. But what we can do is to note, publicly and emphatically, what we all recognize: The American woman—past, present, and future—is, simply put, the soul of her society and her Nation.

America's history is heavy with examples of the strength, the courage, the sacrifice, the unbending determination and the glorious spirit of the women who have nurtured us and inspired us and led us and held us together.

American women have stood fast, in peril, before our enemies and those who would subdue us. They have provided, spiritually and physically, the strength to cross our frontiers and endure their hardships. American women have fought for the rights of minorities, of the poor, of the downtrodden, and of those in need in spite of the prejudice and ignorance and intransigence of the society around them.

In many cases, they have fought—and bested—the men of America who would have bound them with our old-world notion of our preeminence and their weakness. They have forced us to confront not only our narrow-mindedness but the most difficult of social issues. They have done all this in spite of the obstacles men have placed in their way. We denied them the franchise, we relegated them to the home, we ignored their opinions, and with them their perceptiveness, and our Nation was the worse for it.

But while they were yielding up their sons to defend their country; while they were toiling in the fields and the factories; while they were holding families together despite poverty and sickness and ignorance, they were also giving us great art and music and literature and thought. They were enriching the cultural life of the Nation as they were its social and economic life.

It is shameful, in my opinion, that while we waited more than a century to allow women into the voting booth and we have yet to recognize their obvious equality in the Constitution, foreign observers saw their essential role in our society while America was still a fledgling Nation.

In 1840, Alexis de Tocqueville, who came from France to observe the young United States, wrote the following:

> If I were asked to what the singular prosperity and growing strength of the American people ought mainly to be attributed, I should reply: To the superiority of their women.

I have found, Mr. Speaker, that observation to be particularly true for black America. From the very day that we were brought to this continent in chains, black women have summoned courage from seemingly endless reservoirs to fight for their families, to uphold human rights and dignity against overwhelming odds and to teach and lead and inspire. They have paid for these countless acts of selfless courage with pain and lifetimes of struggle, and with their lives.

I am sure every one of us could recount the example of a woman who held a family together, despite the worst of circumstances. We have all benefited from the wisdom, born in pain, that they have imparted. We owe them so much.

Women's History Week affords us an opportunity not only to honor the women of America, but to express our gratitude and our regret at the delays and frustrations and impediments society has given them as the reward for their contributions and sacrifice. This week also yields us the opportunity to predict, with certainty, that their leadership holds the key to the Nation's future. We will need their gifts and their example.

A century from now, the words of Longfellow will be as true as they are today, and were when he wrote them:

> A lady with a lamp shall stand, in the great history of the land, a noble type of good—herioc womanhood.●

● Mr. GUARINI. Mr. Speaker, I am pleased to have the opportunity to lend my support to Senate Joint Resolution 37, designating the week beginning March 6, 1983 as Women's History Week.

Throughout our history, women have been active participants in the development of our distinctly American culture, institutions and national character. Women have been outspoken, courageous leaders in the movements for civil rights, universal suffrage, union representation, world peace and equal rights.

Despite women's varied and vital contributions, tales of very few women's lives and activities are included in textbooks or classroom discussions. As a result, both men and women grow up with a distorted understanding of women's important part in shaping our unique history and building contemporary American society.

Commemorating Women's History Week allows us to focus on some of the women whose work has been instrumental in our past. By encouraging special observances in universities, schools, communities, libraries, and museums, we can reclaim a missing part of our rich American heritage. When we identify and honor the countless women who helped build America, we fill in the gaps which have served to mislead and misinform us about women's role in our society.

I support the proposal for Women's History Week and the goal of providing role models from the past for young women of today. We have a responsibility to insure that our youth are prepared to assume the leadership roles that will be theirs.

Women's History Week provides a link between tomorrow's women, who are critical to the future of a vibrant America, and their foremothers, who were crucial to our dynamic past. I urge my colleagues to give the measure their hearty support.●

● Mr. STARK. Mr. Speaker, today I am proud to join my colleague the gentlewoman from Maryland, and 225 other Members of Congress in calling on the President to declare the week of March 6, 1983, "Women's History Week."

Senate Joint Resolution 37 will help to encourage appreciation for the achievements of all American women whose lives and work have made our heritage much richer.

The enactment of Women's History Week will serve several important functions. This special week will give recognition to the exceptional, outstanding women of the past. It will also help us to remember the contributions women have made in major historical events. But most of all, Women's History Week will encourage the reevaluation of the study of American history as it is presently taught.

This tribute by Congress and the President will reaffirm America's

strong support for the improved status of women.

I urge my colleagues to join me in enthusiastically endorsing Women's History Week.●

● Mr. COURTER. Mr. Chairman, I rise in support of Senate Joint Resolution 37 designating the week of March 6, 1983, as Women's History Week.

I would like to take this opportunity to acknowledge the many individuals and organizations who have worked to make this week possible. A week which provides a special occasion on which to note the civic, educational, and political contributions of our Nation's women.

Women's role in America spans race, class, and ethnic background. It includes every socioeconomic contribution and in many instances has been consistently overlooked and undervalued in American history.

As legislators, I feel it is our responsibility to future generations of women to recognize the significant contributions of women today and to distill the stereotype of the marginal woman.

We as Americans live in one of the most open and free societies in the world today. It is time for us all, both men and women to join together as one people, a people who can continue to work toward maintaining a free and just society.

I urge my colleagues to join me in supporting this resolution.●

● Mr. MARKEY. Mr. Speaker, I would like to take this opportunity to voice my support for House Joint Resolution 70, which was introduced by my colleague BARBARA MIKULSKI of Maryland.

This resolution calls on President Reagan to declare the week of March, 6, 1983, as "Women's History Week."

The history of this great Nation revolves around the history of American women. Indeed, American women of every race, class, and ethnic background helped found this Nation in countless ways in each and every capacity imaginable—teachers, reformers, homemakers, politicians, and so forth.

Despite these contributions, the role of the American woman has been consistently downplayed. Thus, I urge all my colleagues to join with BARBARA MIKULSKI and myself to declare the week of March 6, 1983, as "Women's History Week."●

● Ms. FERRARO. Mr. Speaker, as we observe Women's History Week I want to call particular attention to those generations of women who have made, and are making, history in my own home borough of Queens.

It is especially fitting that we honor these women, some of them famous, some lesser known, in this, the year Queens observes its tricentennial—its 300th birthday.

Queens is, in fact, the only county in the United States, as far as I know, which is named for a Queen—Queen Catherine of Braganza, a Portugese princess who married King Charles II of England.

Gertrude Ederle, the first woman to swim the English Channel in the 1920's, was from Queens. Achievement in sports continues into the present—star basketball player Nancy Lieberman also grew up in the borough.

In the early years of flight, famous women aviators, including Amelia Earhart, used the airfields of Queens, the predecessors of La Guardia and Kennedy airports, as home base.

The Queens movie studios attracted actresses such as Eva Tanguay, Dolores Costello, and Lillian Gish to work and live in the borough. I am happy to say that the Queens movie industry is currently undergoing a revival.

Women have been active in Queens politics. Our deputy borough president is Clare Shulman and there are many other women in important civic positions.

I hope, Mr. Speaker, to have opportunities through this tricentennial year to bring the great history of Queens to the attention of my colleagues. I am proud to have begun with the history of Queens women.●

● Mr. UDALL. Mr. Speaker, I am honored to have this opportunity to celebrate Women's History Week. One should never let this week go by without bragging about one of his or her State's local historical figures. We have many brave, strong pioneer women who lived in Arizona Territory worthy of remembering today. Perhaps the most difficult task in celebrating Women's History Week is choosing one woman to commemorate.

Today, I would like to tell the story of Nellie Cashman. Nellie can best be described as a prospector, businesswoman, philanthropist, adventurer, and pioneer. She was one of those rare individuals that did so many interesting things in her life we cannot pigeonhole her into one career category. She pursued the promise of gold and silver from Mexico to the Yukon. She traveled extensively around the United States, opened numerous businesses, and made mamy friends in her lifetime.

Nellie settled in Tucson in 1878. She was the first white single businesswoman in the area, and owned and operated the Delmonico Restaurant. But the call of silver came to Nellie in 1879 and she rushed off for Tombstone. By the spring of 1880, Nellie opened two stores in Tombstone—Nellie's Nevada Boot and Shoe Store and the Tombstone Cash Store. Tombstone was a pretty rough town in those days and Nellie felt the town needed a church. She struck a deal with the bishop of Arizona Territory—she would build the church if he would supply the priest. Nellie singlehandedly raised enough money to start the first Catholic Church in Tombstone. She also helped to organize the Miner's Hospital Association and the Tombstone branch of the Irish National League. Before she left Tombstone permanently in 1897, whe operated two hotels and another restaurant, traveled to Mexico in search of gold, and took on many charitable causes in the area.

In 1897, Nellie Cashman headed to the Yukon and formed the Midnight Sun Mining Co. At the age of 74, she earned the title of champion woman musher of all Alaska when she led a team of dogs over 750 miles in 17 days. Nellie died in Seattle on January 4, 1925.

I wouldn't be surprised in Members from California, Washington, Alaska, and Arizona chose to remember Nellie Cashman this week. She was a unique person and every State that has been honored by her residency must be proud of her.●

● Mr. HOYER. Mr. Speaker, my State of Maryland joins the rest of the country this week in recognizing the important roles women have played in the Nation's life and history. This is the second year our country has celebrated National Women's History Week. In so doing, we hope to begin to correct the glaring omission of the contribution of women in the record of American history.

Many historians have neglected the history of women's lives. For every woman mentioned in history, there are countless others whose stories ought to be told. In a nation such as ours, with strong strains of ethnic, cultural, and religious differences, the contributions of ethnic women in America also have been wrongly overlooked.

In the State of Maryland, women today represent about 100 different nationalities and cultures; nearly 30 percent of the State's women are black, Hispanic, Asian, or native American in descent. Countless others reflect European ethnic heritage. The two most populous cultural groups in the State are the black and European ethnic origins.

The Maryland Commission on Women has pointed to the great lack of printed history available on the multicultural history of the State's women. That organization has compiled an excellent collection of "personal reflections," recounting the life stories and experiences of accomplished women, past and present, throughout the State. The commission, in attempting to create a new awareness of the need to recognize all types of women who have enriched our country, has distributed this collection to educators at schools across the State. I will attempt to highlight

11-059 O-87-40 (Pt. 3)

several of these valuable recollections here.

In understanding the value of their contributions, we must realize that women, especially of ethnic minorities, have had great struggles to overcome in their search for opportunity and equality; they have faced social and economic discrimination; lower pay and higher unemployment, as well as fewer educational and occupational opportunities. They have had to live with blatant and subtle prejudice while trying to maintain a cultural identity.

During this period in which we have just celebrated Black History Month, it is important to recognize that not enough about the history of black Americans, and particularly black women, has been printed. Most information must be obtained through materials such as letters, diaries, and slave narratives. Maryland has been the birthplace and home of numerous outstanding black women, yet their role in shaping the State's cultural and history has been obscured.

Historically, the roots of black women go back as far as any in Maryland. The first records of black women—both free and slave—coming to Maryland are dated around 1650, when the slave trade grew rapidly because of Maryland's dependence on tobacco farming. Among many slave families, an older woman usually held the family together by maintaining contact with her children and grandchildren throughout plantations in the State.

Abolitionist Harriet Tabman, born a slave on a plantation in Dorchester County, was one of Maryland's most famous black women. She escaped to freedom at the age of 25, but returned to Maryland to establish the well-known underground railroad, through which she led more than 300 slaves to freedom. During the war, Tubman served as a nurse and a spy for the Union. Later, she worked to help many blacks, both children and adults, obtain schooling and equality.

Black women in the 19th century had few opportunities for formal education. In the early 1820's, Mary Elizabeth Lange, a black woman from Haiti, established a school for black girls in Baltimore. The first order of black nuns was also established in Maryland. Organized religion continued to provide a vehicle for black women to make social and civic contributions to Maryland, and is still a vital force in this way.

In the past century, minority women have broken through many barriers of discrimination based on race and sex and as a result have contributed greatly to our communities.

One such outstanding woman, Henrietta Szold, a Jewish immigrant and Baltimore resident, was a lifelong Zionist who gained worldwide fame as a writer, scholar, educator, and humanitarian. During the 1880's when Russian persecution of Jews worsened and refugees came streaming into Baltimore, she started the city's first night school to teach immigrants English. By the time the city took over the school, more than 5,000 people had studied there. In 1912, Szold started Hadassah, the well-known woman's service organization that sent modern medical science to Palestine, where Szold moved in the 1920's to supervise the building of hospitals, schools, and playgrounds. When Hitler rose to power, she was in her seventies, but she never slowed her efforts to evacuate Jewish children from Germany. She is credited with saving the lives of 13,000 German children who would have perished had they remained in Europe.

Dr. Louise Young, a native Marylander, worked as an obstetrician and gynecologist and in 1932 became the first black woman physician licensed to practice medicine in the State.

Marie Von Hatter Sheim Bavernschmidt, born in 1875 to a father who was a German immigrant and a mother who was a member of an established Maryland German family, was a well educated, wealthy woman in Baltimore. She became active in several public service activities, which included organizing a fund to support city-run clinics for young mothers and helping establish a prenatal clinic associated with Johns Hopkins Hospital. She became well known as the conscience of Baltimore and was a vocal activist, greatly influencing Baltimore civic, educational, and political affairs. Her positions on issues and political candidates were aired over radio stations and circulated throughout Maryland in columns in the Baltimore Sun. She continued her outspoken commentary on Maryland and national issues until her death at the age of 87.

A present day Marylander, Carmen Delgado Votaw, served as president of the Inter American Commission of Women of the Organization of American States from 1978 to 1980 and as the U.S. representative to the Commission from 1977 to 1981. As the elected president of the Commission, she traveled across the hemisphere, meeting with government officials to promote the advancement of all women. Votaw was a participant in two world conferences on women, at the United Nations, in 1975 and 1980 and was chosen to be cochair of the National Advisory Committee on Women. Of Puerto Rican descent, Votaw is listed in "Who's Who of American Women" and "International Who's Who."

Another outstanding present-day Marylander, Verda Welcome, was elected as a member of the Maryland Legislature in 1959. She served in the house of delegates for 4 years as one of the first two black women to hold such an office. In 1962, she was the first black woman elected to the State senate, where she served with distinction for 20 years. Her legislative activities have been many and varied—she served on the education, judicial proceedings and labor and public building committees. Welcome was invited by President Johnson to serve on the National Citizens Committee for Community Relations. Also listed in the "Who's Who of American Women," she has received many citations and awards for her civic and political work.

By studying the stories of such women as these, we can gain an appreciation of the contributions and strength of women, both the famous and the unsung, throughout our history. Not all women in our history are as well known as Harriet Tubman or as prominent as Verda Welcome, but many have contributed greatly to the benefit of our society. Women are an important component of our heritage; to truly understand the path of our country, we must study the history of women and their contributions to all facets of our culture.

The women of Maryland have given much to enrich our State; we must take the opportunity during National Women's History Week to examine their important roles in establishing our heritage.●

Ms. OAKAR. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 37

Whereas American women of every race, class, and ethnic background helped found the Nation in countless recorded and unrecorded ways as servants, slaves, nurses, nuns, homemakers, industrial workers, teachers, reformers, soldiers, pioneers; and in professions and occupations representative of all walks of life;

Whereas American women have played and continue to play a critical economic, cultural, and social role in every sphere of our Nation's life by constituting a significant portion of the labor force working in and outside of the home;

Whereas American women have played a unique role throughout our history by providing the majority of the Nation's volunteer labor force and have been particularly important in the establishment of early charitable philanthropic and cultural institutions in the country;

Whereas American women of every race, class, and ethnic background served as early leaders in the forefront of every major progressive social change movement, not only to secure their own right of suffrage and equal opportunity, but also in the abolitionist movement, the emancipation movement, the industrial labor union movement, and the modern civil rights movement; and

Whereas despite these contributions, the role of American women in history has been consistently overlooked and undervalued in

the body of American history: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week containing March 8, 1983, is designated as "Women's History Week", and the President is requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL CHILD ABUSE PREVENTION MONTH

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 21) to designate April 1983 as "National Child Abuse Prevention Month," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HILER. Mr. Speaker, reserving the right to object, and I will not object, I want to thank my colleagues who cosponsored and helped insure passage of this resolution, which authorizes the President to designate April as "National Child Abuse Prevention Month."

I especially want to thank the gentleman from New York (Mr. GARCIA) for the expeditious manner in which he brought this bill to the floor. I also want to extend a special thank you to the gentlewoman from Ohio (Ms. OAKAR) and the gentleman from California (Mr. BATES). Both were very helpful in the effort to obtain the necessary cosponsors to insure this bill's approval.

Child abuse continues to be a very serious problem, Mr. Speaker. Passage of this bill today will help largely volunteer organizations such as Parents Anonymous, the National Exchange Club for the Prevention of Child Abuse, and other members of the National Child Abuse Coalition. These organizations are perhaps our best hope of bringing this national tragedy to an end.

I would like to make special mention, Mr. Speaker, of a nationwide conference on child abuse awareness that will be held in South Bend, Ind. next month. I am very honored to be cohosting this conference with Parents Anonymous, the National Committee for Prevention of Child Abuse, Childhelp International, and the Swanson Center of LaPorte County, Ind.

● Mr. COURTER. Mr. Speaker, I rise in support of Senate Joint Resolution 21 designating April 1983 as "National Child Abuse Prevention Month."

I would like to take this opportunity to commend the gentleman from Indiana, my friend and colleague, Mr. HILER, for again bringing this resolution to the attention of the House.

By passing this resolution we are simply bringing to the attention of the American people one of the most disgusting realities which exist in our Nation today. Each year millions of our young children fall victims to child abuse and in many instances death by their parents or relatives. Organizations such as Parents Anonymous, National Exchange Club Foundation for the Prevention of Child Abuse, the National Committee for the Prevention of Child Abuse, the National Child Abuse Coalition, and the American Humane Association are volunteer organizations who work with parents and relatives to combat child abuse. It is for these people and their dedication that I strongly urge my colleagues to support this resolution.●

● Mr. GUARINI. Mr. Speaker, I am pleased to rise in support of Senate Joint Resolution 21, designating the month of April as "National Child Abuse Prevention Month." It is critical that we focus national attention on this tragic contemporary problem.

Across America every day, hundreds of children are abused, beaten, tortured, and sometimes killed at the hands of adults who are responsible for the children's well-being. These innocent children are often unable to speak up for their rights or defend themselves from the abuse, which sometimes spans years. And unfortunately, many of these children learn by example and become abusive parents when they are grown.

An important first step in breaking this cycle is the identification of the origins and scope of the problem. There can be little hope of curbing the widespread incidence of child abuse until this destructive behavior is recognized and understood.

Efforts toward increasing awareness of this painful problem and its remedies are being undertaken by a number of agencies and organizations, many of them staffed by volunteers. Designating April as "National Child Abuse Prevention Month" will contribute to the efforts to address this tragedy and stem its increase.

It has been said that children are this country's most precious natural resource, and I agree. We cannot afford to overlook any avenue which may enhance their healthy development and well-being. I strongly support Senate Joint Resolution 21 and urge my colleagues to join me in favor of its passage.●

● Mr. OLIN. Mr. Speaker, children are one of the most vulnerable groups in our society, and too many of them suffer abuses. Today, I join my colleagues in supporting Senate Joint Resolution 21, designating April as National Child Abuse Prevention, as a means to call attention to the tragedy of child abuse and focus public attention on solutions.

The Commonwealth of Virginia has shown admirable sensitivity to the problems of child abuse and has adopted far-reaching programs to come to the aid of these small victims and their families. Virginia provides child protective services in every locality throughout the State, and the Department of Social Services offers mini-grants to communities for child abuse prevention programs. Last year, the Virginia General Assembly approved an increase in the marriage license fee, with the revenues to be used for child and spouse abuse programs. This provides counseling, education, clinics, crisis assistance, and other programs to help victims of domestic violence.

Last year, Child Abuse Prevention Month was observed in Virginia with conferences, speeches, billboards, radio shows, and sermons. Many people gained a new awareness of the roots of family violence and ways to head it off. We cannot estimate how many troubled parents or concerned friends and relatives, discovered that they could get help in fighting this tragic violence. I am sure the Commonwealth will match this success this year during Child Abuse Prevention Month.

One of our Nation's great leaders once said that the moral test of a society is how it treats "those in the dawn of life, the children . . . those who are in the twilight of life, the elderly . . . and those in the shadows of life, the sick, the needy, and the unemployed."

Today we are calling on our society to help ease the suffering of the many Americans who become victims in the dawn of their lives.●

Mr. HILER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 21

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of April 1983 is designated as "National Child Abuse Prevention Month" and the President is authorized and requested to issue a proclamation calling upon all Government agencies and the people of the United States to observe such month with appropriate programs, ceremonies, and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous material on the Senate joint resolutions just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

GENERAL LEAVE

Mr. GUARINI. Mr. Speaker, I ask unanimous consent that all Members be permitted to extend their remarks and to include therein extraneous material on the subject of the special order speech today by the gentleman from Florida (Mr. FUQUA).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

NATIONAL ALZHEIMER'S DISEASE MONTH

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. LOWERY) is recognized for 5 minutes.

● Mr. LOWERY of California. Mr. Speaker, today I am introducing legislation declaring the month of November 1983 as National Alzheimer's Disease Month.

Alzheimer's disease is a surprisingly common disorder that destroys certain vital cells of the brain, producing intellectual disability or senile dementia, primarily in older Americans. This mind-ravaging disease accounts for more than 50 percent of all nursing home admissions, and affects more than 1.5 million Americans at an anticipated cost of up to $20 billion annually. The disease, which is not a normal consequence of aging, is the fourth most common cause of death among older Americans—behind heart disease, cancer, and stroke—accounting directly or indirectly for up to 120,000 deaths a year.

Surprisingly enough, however, considering the vast number of Americans who suffer from it, Alzheimer's disease is relatively unknown. It is, in fact, a silent epidemic.

The symptoms of Alzheimer's disease are slow and insidious, with the earliest impairment being that of recent memory. As the disease progresses, memory loss increases and reasoning deteriorates. Soon simple daily tasks become impossible chores: Balancing a checkbook, following a recipe, even putting together coherent sentences. Usually the victim becomes depressed, agitated, irritable, and restless. In come cases, the victim becomes violent, and, in others, placid and inert. In the final stages of the disease, the victim is totally unable to care for himself, and deteriorates to a vegetative state, requiring constant, round-the-clock care.

There is no known cure for Alzheimer's disease. No way to reverse or retard the unrelenting process of deterioration. It is one of the most ignored and uniquely tragic diseases of our time—not just for what it does to the victim, but for its devastating effect on families and friends. In the earliest stages of the diseases, the victim can be cared for at home by the spouse and family. However, as the disease progresses, he becomes increasingly combative, unreasonable, and finally, incontinent.

Ultimately, the vast majority are committed to nursing homes, placing a tremendous financial, as well as psychological burden on family members. An estimated average of $17,000 a patient will be spent on nursing home care for Alzheimer's victims this year—an expense virtually uncovered by private insurance or medicare until the family finances are depleted to public aid level. Thus, in their "golden years," husbands and wives must dip into their savings and pensions to provide private home or nursing home care for their loved ones, with no possible hope for improvement or recovery.

The Alzheimer's Disease and Related Disorders Association is comprised of family and friends of Alzheimer's victims who serve as a support group for one another. I am an honorary member of the board of directors of the San Diego Association, which recently opened the Alzheimer's Family Center, a day care center for Alzheimer's disease patients. For a nominal fee, the center provides professional care in a home-like setting, allowing family members who otherwise would be confined to the house with the patient, an opportunity to get out for a few hours to take care of business, or simply to relax. Services such as these help to delay the trauma and expense of institutionalization. They also help to alleviate the physical and emotional stress on the victim's family.

The cause of Alzheimer's disease is, as yet, unknown. Currently, doctors diagnose the disease by ruling out everything else: metabolic diseases, strokes, tumors, and psychiatric depression. However, a number of extremely committed individuals across the country are working to unravel the mystery. One of my constituents, Dr. George Glenner, has established the world's first brain bank for the exclusive study of Alzheimer's disease at the University of California San Diego's School of Medicine. Dr. Glenner is optimistic that his research project, sponsored jointly by the San Diego Alzheimer's Disease and Related Disorders Association and UCSD, will help to pinpoint the cause and thus find a way to prevent Alzheimer's disease.

Mr. Speaker, I feel that the declaration of the month of November as National Alzheimer's Disease Month will help to increase the national awareness of the problem of Alzheimer's disease, stimulating the interest and concern of the American people. This, in turn, will hopefully lead to increased research and eventually to the discovery of a cure for this mind-ravaging disease.●

EXTENDING THE RENEWABLE ENERGY BUSINESS TAX CREDITS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FUQUA) is recognized for 10 minutes.

● Mr. FUQUA. Mr. Speaker, last year, on July 13, 1982, Mr. FISH and I introduced H.R. 6735, the Business Energy Tax Credit Act of 1982, extending the termination date for existing business tax credits for solar, wind, geothermal, and ocean thermal energy equipment from 1985 to 1990.

At the time, I cited the success of those tax credits in promoting third-party financing of alternative energy systems, and the need to preserve those benefits for new technologies such as photovoltaics, large wind systems, OTEC, and solar thermal central receivers, which will not achieve commercial readiness until the late 1980's.

Since then, however, the situation for renewable energy business investments has deteriorated significantly. The "basis adjustment" provisions of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982 effectively reduce the value of the solar business tax credits from 25 percent to 20 percent. The softening of world oil prices and the recent decline in energy demand have decreased the value of the energy produced by renewable systems by as much as 30 percent. This double blow has placed in jeopardy many excellent renewable energy projects that seemed certain to proceed as recently as 6 months ago.

As a result of these development I am reintroducing the Business Energy Tax Credit Act with some important new provisions:

First, the tax credit would be raised to 25 percent to compensate for the effect of TEFRA and the soft world energy market.

Second, an affirmative commitments clause would be included which allows projects which are not completed by December 31, 1990, to be eligible for the tax credits if they have received

all necessary permits and completed engineering design by that date. This clause is needed to protect large solar projects such as wind farms and central receivers, which often take 3 or 4 years to complete.

With these changes in the solar business tax credits, I am convinced that the renewable energy technologies that have been developed at considerable taxpayer expense by the Department of Energy over the last few years can be turned over to the private sector in the late 1980's with reasonable prospect for commercial success.

This will not be a permanent subsidy from the U.S. Treasury for renewable energy equipment. The business tax credit simply serves to stimulate an early market to cover the expense of tooling up for mass production. Once volume production begins, there is strong evidence that the renewable technologies will be able to compete unassisted in the energy marketplace. At that time the tax credit will have served its purpose and will be terminated.

I was pleased to hear Secretary of Energy Hodel express his personal support for extension of the solar business tax credits at the DOE Posture Hearing, February 8, 1983. I hope he will work to persuade the administration to support this initiative.

I am convinced that the benefits of extending the tax credits—in terms of reducing our use of conventional fuels, opening up new business opportunities in a high technology area, and providing for jobs and economic growth—will more than compensate for the direct costs to the Treasury. One study I have seen indicates that the Treasury could even come out ahead after all secondary effects are considered. Therefore, I hope this initiative will receive widespread support from individuals and groups in both parties and both branches of the Government.●

● Mr. LUJAN. Mr. Speaker, today I am jointly introducing legislation with the distinguished chairman of the Science and Technology Committee, the honorable gentleman from Florida (Mr. FUQUA), to help our Nation tap the potential of our renewable energy resources. This legislation, the Renewable Energy Tax Credit Act of 1983, would extend the termination date for the business energy tax credits for solar, wind, geothermal, and ocean thermal energy systems until December 31, 1990. These tax incentives, originally enacted as part of the Crude Oil Windfall Profit Tax Act of 1980, are currently scheduled to expire at the end of 1985. In addition, this legislation would increase the amount of the tax credit from 15 to 25 percent, effective on January 1, 1984.

Our energy situation is certainly much brighter than it has been in the past. The recent trends in oil imports and energy conservation have indeed been quite encouraging. It is gratifying to see that we are now importing significantly less oil than we did during the high point of 1978.

But I hope that we will not be lulled into a false sense of complacency by our current situation. Future world conditions are difficult to predict. Recent developments in the Middle East, as well as projected oil market conditions, indicate that we must continue to reduce our current dependence on uncertain foreign oil supplies.

This situation makes it imperative that we press forward with the development of our domestic renewable energy resources. the need for solar and other forms of alternative energy is just as real today as it was in 1974, when the Federal Government embarked on the development of these promising resources. Numerous studies have indicated that these energy resources can play a significant role in meeting our Nation's future energy needs.

The Science and Technology Committee has spent a great deal of time in determining the appropriate means to help our Nation maintain its leadership in the energy area, and in particular, in the development of promising renewable energy technologies. Many energy experts have strongly recommended investment tax incentives as the most effective means to stimulate the development of these technologies. Without these incentives, these technologies will be unable to successfully compete in scarce capital markets.

The legislation we are introducing today would permit businesses to receive a 25-percent energy investment tax credit through the year 1990 for investments in solar, wind, geothermal, and ocean thermal energy equipment. This credit would be in addition to the regular 10-percent capital investment tax credit already available in many instances. It will help the infant alternative energy industry in the development of new energy technologies and in raising the venture capital or third-party financing necessary for initial commercial projects. The credit will also provide industry manufacturers with more predictable energy markets.

Even though the Congress had previously passed a tax incentive in 1980, many renewable technologies are still in their infancy stages. Various technical barriers must still be covercome before they can be commercialized. These new technologies include solar thermal, wind, solar photovoltaics, and ocean thermal energy systems, as well as advanced geothermal technologies.

Mr. Speaker, our Nation must prepare now for the day when petroleum will be a scarce resource. This legislation represents a significant step in this direction. We can ill afford to suffer another national energy crisis.

Our Nation has been a world leader in the development of new energy technologies. The legislation which we are introducing today will help us maintain this leadership. This proposal is consistent with the administration's approach that near-term technologies should be the responsibility of the private sector. It will encourage the private sector to move forward aggressively in the development of promising new energy technologies with minimal Federal involvement. For this reason, I encourage my fellow colleagues to support this legislation.●

THE ADMINISTRATION'S REQUEST FOR $11 BILLION INCREASE IN OUR COMMITMENT TO THE INTERNATIONAL MONETARY FUND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 30 minutes.

Mr. GONZALEZ. Mr. Speaker, today the House passed this jobs bill, and it is going to be under very serious consideration and revision and attack by those who, just 2 months ago in the administration, from the President on down, were saying, "Never, never, never this kind of expenditure for domestic purposes."

At the same time, what has been a little bit less reported is the emergency request on the part of the President, the administration, for an $11 billion increase in our commitment to the IMF, the International Monetary Fund. As a matter of fact, it was given such high priority that our committee—that is, the committee that I had the honor to serve on, or with, in the lameduck session in December—held the first series of hearings that were promptly picked up the moment we were organized in this new Congress, just as soon as the committee was organized.

The thing that seems to be so impossible to believe and accept is that we would have a request of this nature, of $11 billion, by the same President, the same administration, that is telling us that if we dare push out a housing emergency bill in the form of an emergency homestead—or Mortgage Assistance Act for those American families who are under the shadow and threat of losing their homes through no fault of their own, and with the foreclosure rate having exceeded the highest such point during the Depression, some of us who feel the responsibility of responsiveness to this acute need in this very substantial area of need in our own country cannot comprehend the constant opposition on the part of the

administration and its supporters in the House and on the committee level.

So when we met this opposition and then suddenly confronted this emergency request for an $11 billion increase in our contribution to the IMF, I asked a question of our chairman that went this way. I said: "Mr. Chairman, how is it that we are being asked to pass on an emergency basis a substantial $11 billion increase and not reconcile that with a budget busting request when the administration tells us that even a $250 million emergency housing program for the homeless would be budget-busting and apparently responsible for recurrence of inflation and every other bad thing that could happen to an economy?"

□ 1730

I said I have looked up the record and I find that when our committee has come out in the past years—and the last one being in 1980—with legislation to increase our commitment and our contribution to the IMF, it has been the minority party that has resisted.

As a matter of fact, the Director of the Office of Management and Budget, Mr. Stockman, in 1980 ferociously voted against that contribution, and on the basis that I find it hard to reconcile his joining in the request that we appropriate $11 billion on this occasion.

Either he was right then and wrong now or he was right now and wrong then.

Therefore, I am going to request that you invite Mr. Stockman to appear before the committee and reconcile this.

The first witness called happened to be the Chairman of the Federal Reserve Board. As I pointed out to him, I said, "This is very unusual, Mr. Chairman. I remember in 1978 and 1979 when we were having difficulty," because I was then chairman of the Subcommittee on International Finance, "in getting the legislation that would even satisfy the commitments already made by our country to such regional institutions as the Inter-American Development Bank and one or the other of the similar type of multinational financial institutions, you told me at the White House in the presence of President Jimmy Carter that you could not come before the Congress and that that would be unprecedented.

"Here we find you now insisting that if we do not appropriate this as quickly as it is possible, in fact if we could do it today you would have us do it today, questions to one side, because if we did not we would be responsible for international financial catastrophe."

Of course, being that I have introduced resolutions of impeachment toward the Chairman of the Federal Reserve Board, I did not expect to have too much of a serious reply to that and he brushed it off.

But I think there was a reason, and the reason was, as I have charged in one of my bill of particulars last year in what will turn out to be the resolution of impeachment in specific terms, the fact that what the law charges the Federal Reserve Board and its Chairman with being, which is the fiscal agent of the U.S. Treasury, has turned out to be that the Treasury and the Government and the people and the Congress are not only the agents but the servants of this master—not only the Chairman, but the whole apparatus known as the Federal Reserve Board.

I have pointed out ad infinitum that the Federal Reserve Board is not an entity of the Federal Government. Almost every American I know thinks it is and that it is a Federal Government agency. It is not.

What it has turned out to be now is a Frankenstein, created by the Congress of the United States in 1913, but which has since delegated to itself such a capacity, such a power, that was never visualized, but feared by the very founders of our Nation who had this as a central issue confronting them even before we had the adoption of the Constitution.

Here is a Chairman now saying what you might think, as a Representative of the people, is an emergency locally, is significant and inconsequential because my constituency and what that constituency has turned out to be for the Federal Reserve Board is not the 14,000 or so commercial banks but about 7 of the 14,000.

As a matter of fact, just as in the case of former Secretary of State Henry Kissinger, the moment he leaves this position he will go back on the payroll of the Chase Manhattan where he comes from, as Mr. Kissinger is now a paid consultant on the payroll of the Chase Manhattan.

So it is unbelievable that our country at this juncture, and with what this request on an emergency basis really symbolizes, and that is almost—it is not only ironic, it is shattering, almost a replication and a duplication, a repetition of exactly the way our country was duped and cheated after World War I, except that in this case, though it was the bankers, too, that sold us out, literally, and the countries involved were Germany, getting from underneath the Treaty of Versailles, and threatening the repudiation of their debts and reparations; and England and France were teaming up, sensing that they could contrive a ruse that would avoid their having to pay back the taxpayers of the United States at that time better than $10 billion in governmental debts, in governmental loans that our taxpayers had made at the time and before we entered into the war, and 2 years after the war had terminated.

These funds, incidentally, were used to recoup and to build housing projects, for example, not only in France and England but in Germany, of all things, and these nations orchestrated and sashayed so successfully, so successfully while our bankers in the meanwhile were eagerly going out and buying the bonds of the Government of Germany, of even Japan, for instance. All of our credit allocations that these bankers had from the American people were going into these speculative bonds and purchases thereof. Those payments being in default a few years later, it led finally to the international breakdown such as we are now on the threshold of witnessing for similar reasons.

For example, why do we need on an emergency basis the $11 billion bailout of these institutions? The Chairman of the Federal Reserve Board says "Do not call it a bailout; it is not a bailout," even though they admit that if these funds are not forthcoming to these debtor nations, where our nine principal banks have such an overhang and such a perilous dependence on the bad loans they have given out of their greed, that if they do not get even a rollover on the payment of the interest some of these principal banks are insolvent, are even broke.

In fact, if one of them were a small bank in my home State it would have already been declared broke.

□ 1740

But they are the ones that have been the power behind the decision-making on the Federal Reserve Board. They are the ones that are determining such things as interest rates. They are the ones that are determining even the matters—and this is what I think ought to concern us—war and peace.

How did it come about?

In effect, GEORGE BUSH was quoted in today's newspaper—Vice President GEORGE BUSH—and in yesterday's newspaper Secretary of State Shultz was quoted simply, that they could not understand how priests in the church could consort and work in these countries like El Salvador and Nicaragua with Marxist-Leninists.

I could not believe it. Where was my fellow Texan when Mr. David Rockefeller late last year was saying that there were some Communist countries that he could do business with; not all of them were bad and that he had just come back from one. Of course, what he did not say was that Chase Manhattan had a tremendous stake in those entities.

As a matter of fact, wittingly or unwittingly, the bankers such as Chase Manhattan, such as David Rockefeller and the oil and gas people of our Nation actually have given what would

be tantamount by any other definition foreign aid to Russia, itself, the master Communist country of all, this horrible demon. But let me read some statistics: The top nine U.S. banks, accounting for nearly two-thirds of the overseas activities of all of our U.S. banks, derived 50 percent of their earnings from overseas business in 1977. The Chase Manhattan, in 1976, earned 78 percent, which was a tremendous jump from 1972's 34 percent.

Now, all of this was done in the name of recycling petrodollars. But in effect, what it was, was very similiar to the shell game that the greed of these interests managed to perpetrate on our people, like the same greed in the twenties perpetrated on our people then.

Then, under the rubric, remember, of détente, interdependence, Richard Nixon toasting, cheek by jowl, with the Russian leaders and announcing détente, peace. But in effect what we did was give foreign aid to Russia.

The West entered upon a massive foreign aid program of Government credits and guarantees to the Soviet bloc. They got so massive that they exceeded the U.S. credits to Western Europe, even under the Marshall plan and even after allowing for inflation.

So, without the American people or this Congress, apparently, revealing any awareness, our bankers and big moguls, our lords of creation, themselves created and carried through a gigantic Marshall plan of aid for Comecon, or the Communist economy, including Russia. But now the day of reckoning is there, because it was apparent by 1977, at that time for the first time I spoke out in the well of this House, and pointed out, and said so in those terms, that I was very, very distressed, because for the first time since 1932, all of the factors were back in that equation called world depression equation. And that it was now possible to confront, naturally not the same but naturally a similar and perhaps far more devastating equivalent of what we remember as the Depression, because the factors, one or two of those variables having been absent for various reasons in that interregnum between 1932 and 1977, were now obviously present.

And that even by the standards of the official bankers who had not lost their sense of reality in Europe and in the United States, that what we called the 22-to-1 factor was now present. That is, all the aggregate substance of assets were a ratio of 1-to-22 of the outstanding liabilities.

And at that point the bankers very formula, 22-to-1, that they consider irreversible then. I spoke out then. I was ignored except for one thing: The next day I had a telephone call from the then-Chairman of the Federal Reserve Board, Arthur Burns. He wanted to know if I would have breakfast with him and I did, the next day, the next morning at the Federal Reserve in that real nice little office the Chairman has there. And he said the reason he was calling me was because he was aware of the remarks I had made and that he wanted me to know that he too was troubled, because I pointed out that in just less than a 3-year period, 1974 through 1977, the amount of overhang in these loans to these so-called developing nations had grown from an insignificant billion figure, three or four, to over $42 billion alone, from the U.S. principal banks.

He said, "I share your concern but I wanted you to know that there is nothing I can do. As a matter of fact I have been concerned about this for some time. And at the last convention in Hawaii I just a few weeks ago tried to address myself and to admonish the bankers but they got so angry at me they almost chased me out." I said, "Mr. Chairman, I am surprised. I am a student of the Federal Reserve Act and I think that you are charged with the responsibility. There is a specific section. In fact, you have implementation through statute that the Congress later passed which places a greater responsibility on the Federal Reserve with respect to the activities of the banks in the nature of the business that you could define as this, which causes your apprehension. What do you mean there is nothing you can do other than moral suasion and pressing the flesh?" He seemed to think that there was not. I know there is, and I know there was. But I say that for the record only to show that what I am saying here now is not an afterthought, is not because I did not offer solutions then, which I have.

There are some other statistics: Price increases of 1973, 1974, because of this same petrodollar crisis, you remember the boycott of our oil and all of that, was disastrous to our national economy.

□ 1750

As a matter of fact the downward trend now is very salutory from the standpoint because at the bottom of the so-called complex stagflation issue and the peculiar kind of inflation was that unprecedented political increase quadrupling the price of oil into our economy, devastating as it was. But while it was devastating to the average American and his economy, the banks made a bonanza.

It was a bonanza for the banks. Why? Their international earnings between 1970 and 1975 were $177 million, more or less. By 1975 they had gone to $836 million. And, of course, in 1977, as I said, their outlay and their commitments had grown exponentially to the point where in the case of finding that they could not keep on piling more investment in their Communist Marshall plan because they found out—and this they did not find out until about 1977—that the debt they were creating exceeded the annual supply of foreign currency being generated by the Comicon to service the debt. This is why we have had these prices in Poland, Romania, the other Eastern bloc nations, and now of course, Mexico, Argentina, Brazil, with our banks so perilously overcommitted that unless they get this bailout of the IMF; that is, taxpayers' bailout. And when they try to deny it by saying, "No, it is not a bailout; it is a bailin, because this is a jobs bill." This is why I am speaking today. The House passed the so-called jobs bill.

The witnesses we had from the Secretary of the Treasury to the Chairman of the Federal Reserve Board to some distinguished economists, who have served in past administrations, said it is not a bailout, it is a bailin because this will create jobs for Americans.

I cannot think of a more absurd and outlandish statement to make to us on the event of these decisions we must make. It will not create one job. As a matter of fact what it is going to do is the very opposite. It will do the same thing that was done, and incidentally, it was done under the same name—that the American economy and its products would suffer unless we desisted from making the demand of payment from England and France of the war debts, and Germany its reparations.

While that money, unbelievably, was being used to generate other than international payments and accountability, they were doing what in the meanwhile the economy in the United States was finding it impossible to do, and that was to build houses for Americans and of course jobs; there was the Depression where you had over 23 million unemployed Americans, with the size of a population then in relation to what it is now you can imagine what that was. I am old enough to remember and I am old enough to remember some of these details. And I am old enough to remember how successfully the ruse was perpetrated and so deceptively and almost in the identical words, with the identical terms, with the identical approaches that we are confronting today.

My question to my colleagues is: As much as we have a responsibility of confronting this issue, because the IMF is there and it is the only thing that is there, but the idea that we would give this additional $11 billion with no questions asked, no terms imposed, no record being established as to what really must be done to really correct the situation, while at the same time bludgeoned under as budget-busters because we are saying let us invest in America. Let us invest our resources, as meager as they may

be now, but for heaven's sakes let us invest them in our own permanent substance. What we ask for is not a waste of substance, it is an addition to the commonwealth. And above all, the priceless ingredient, which is the well-being of our human element, the only real value of a nation, and its only real genuine resource is its people—the young, the middle-aged, and the old.

And if we continue to fall victims to the masters who in turn are obedient to foreign and alien necessities and needs instead of giving priority to our own, then should we complain when this house of cards tumbles all around our ears?

So I am further communicating with the chairman of the committee and requesting that we not only summon Mr. Stockman to appear before us and tell us how he can say that there is no adverse budgetary impact with this $11 billion outlay.

VIETNAM VETERANS NATIONAL MEDAL ACT INTRODUCED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, today I am introducing legislation which calls for the U.S. Government to pay tribute to the veterans of the Vietnam war by striking a national medal in their honor.

For most Americans the war in Vietnam ended more than 7 years ago when the last U.S. troops pulled out of Southeast Asia. Politicians stopped talking about it. Musicians stopped singing about it. Students stopped marching about it. Television networks stopped bringing combat scenes into our living rooms via the evening news. Many were relieved that the long and unpopular war and the controversy surrounding it were finally over. And everyone wanted simply to forget.

But when America decided to forget the war it also forgot to remember the the veterans. It forgot the 2.7 million men and women who went overseas to serve their country. It forgot that close to 58,000 died in the attempt, and that another 300,000 suffered injuries. When the veterans of the Vietnam war came home, they returned not to welcoming parades but to silence.

Though America forgot to remember them, the Vietnam veterans have not forgotten each other. They still remember how they helped one another on the battlefield. They still remember enemy fire and injured comrades. They still remember fear and pain, and individual acts of courage. And they still remember those who could not come home.

I believe that it is time for America to remember the men and women who went to Vietnam—those loyal Americans who went to fight a foreign war because their Government asked them to. It is time to remember their suffering and their bravery; their dedication and their patriotism. It is time for America to stop trying to forget.

By enacting the Vietnam Veterans National Medal Act, the Congress would finally give our Vietnam war veterans the official recognition they deserve. The medal would become part of the Bureau of the Mint's medal series. Americans would be able to purchase these medals as they do any of the others sold by the mint. The price of the medals would be sufficient to cover the Government's production costs.

As you know, the rules of the Consumer Affairs and Coinage Subcommittee require that all medal bills have 218 cosponsors before they can be considered. I am therefore calling on all of my colleagues to join me in sponsoring this long-overdue salute to the courageous and honorable Americans who served this country in Vietnam. I think that it is time for us to express our thanks and gratitude to these fine Americans. And the Vietnam Veterans National Medal Act is certainly a suitable way to do it.●

THE INDIAN HOUSING ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona (Mr. UDALL) is recognized for 10 minutes.

● Mr. UDALL. Mr. Speaker, today I am introducing a bill entitled the "Indian Housing Act of 1983" which establishes a comprehensive Indian housing program within the Bureau of Indian Affairs. This bill is very similar to the bill, H.R. 5988, which I introduced in the last Congress and which was favorably reported by the Committee on Interior and Insular Affairs with amendments.

The service population of the Bureau of Indian Affairs is fast approaching 1,000,000 people. BIA has estimated that, as of 1981, this population comprised approximately 165,000 families. These families are living in approximately 136,400 housing units, 59,600 of which are in substandard condition. Many are two- or three-room houses of tar paper or like construction, housing 10 or more persons. In some cases, they are no more than car bodies. Thirty-six percent of all Indian families are now living in substandard housing. Over 43 percent of all Indian housing is in a substandard condition, as compared with only 12 percent for the rest of the Nation.

This deplorable, unacceptable state of Indian housing derives primarily from three causes. First, unemployment and poverty is the norm on most Indian reservations. The overwhelming majority of Indian families exist at or below the poverty level and unemployment rates of 50 percent or more are not uncommon. Indian people simply cannot afford housing.

Second, Indian reservations are remote and geographically isolated. The general lack of housing opportunities in rural America is magnified on Indian reservations and in Indian communities. The general unavailability of mortgage credit in rural areas is the inflexible rule on Indian reservations. In addition, the support facilities of water, sanitation, and roads are woefully inadequate.

Finally, Mr. Speaker, the trust or restricted status of Indian lands, both tribal and individual, make the extension of private credit, even with Federal subsidies or guarantees, unrealistic.

In 1937, Congress enacted national housing legislation which set as a goal the attainment of a safe, decent, and sanitary house for all Americans. Comprehensive Federal housing assistance programs were developed to achieve that goal, with a primary emphasis on the housing needs of urban areas. It was not until the mid-1960's that Indian tribes were deemed eligible to apply for this assistance and it was not until the early 1970's that the HUD Indian housing program began to be available to meet the critical housing needs of Indians.

Since then, Indian tribes and people have received most of their housing assistance from HUD public assisted housing programs. In some cases, the urban-oriented housing programs of HUD have had to be twisted to meet the special needs and conditions on Indian reservations, not always with complete success.

Through February 1981, nearly 39,000 units were made available for occupancy through the HUD Indian housing program. This primary source of housing assistance has been supplemented by funding from BIA's housing improvement program for housing repair and, in isolated cases, new construction; by minimal financing through BIA's credit program; and by a few houses financed through conventional financing. While serious problems have been identified in the implementation and administration of the HUD program on Indian reservations and in Indian communities, it has met the housing needs of Indians with some degree of success.

The HUD public assisted housing program, including the Indian program, has been targeted by the administration for termination. The administration has charged that this program, and in particular the Indian program, is excessively costly. This is based upon the deep principal and interest subsidy feature of the HUD program. For instance, the 4,000 units set aside for Indian housing in the fiscal year

1982 HUD budget requires the United States to obligate $703,000,000 over a 30-year period. This cost coupled with charges of waste and inefficiency in the program and the operating subsidies, including utilities and maintenance, has led the administration to target the program for elimination. In line with this decision, the administration requested no money for this program in fiscal year 1983 and, again in its fiscal year 1984 budget request.

Mr. Speaker, I continue to support the continuation of the HUD public assisted housing program as it has operated in the past. While, as I have already noted, it has problems of cost and administration, I am sure the Committee on Banking, Finance and Urban Affairs can amend the basic law to address those concerns. Nevertheless, Mr. Speaker, as chairman of the Interior Committee which has primary responsibility for the welfare of Indian people, I am greatly concerned about the prospect of reauthorization of that program as it serves Indian tribes. As noted, the administration for the past 2 fiscal years has targeted the HUD public assisted housing program for dismantlement and has done so again in its fiscal year 1984 budget request. They have vigorously pursued this aim and I cannot but believe that they will continue to do so in the future.

As the Members are aware, Congress failed to pass legislation reauthorizing the HUD program in the last Congress, although funds were included in the fiscal year 1983 HUD budget to support 2,000 units of Indian housing without this authorization. In the last Congress, Mr. Speaker, I agreed to withhold a request for floor action on my Indian housing bill until the HUD reauthorization bill had a fair chance to pass. As noted, it did not.

The administration has proposed an alternative Indian housing program in lieu of the existing HUD Indian program. This program would be funded at $76,000,000. In addition, the administration proposes to increase the amount of funds appropriate in fiscal year 1983 for the Indian community block grant program by $44,000,000 for a total of $75,000,000 and to amend the law to make housing construction an eligible activity under the CBG program. This totals $151,000,000. However, all the Indian reaction to this proposal that I have heard is negative on the grounds that the proposed program is unworkable.

Mr. Speaker, while I continue to hope for the reauthorization of the existing HUD program, I am not sanguine about the prospects of that occuring. Therefore, I feel obliged, as chairman of the Interior Committee, to take all reasonable steps to insure that the Indian people have a viable alternative to meet their critical housing needs. I am, therefore, reintroducing the Indian Housing Act legislation and will move expeditiously to report it to the House for action.●

BIPARTISAN NATIONAL COMMISSION ON INDUSTRIAL COMPETITIVENESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 5 minutes.

● Mr. LAFALCE. Mr. Speaker, I am today introducing legislation to create a Bipartisan National Commission on Industrial Competitiveness based on the model of the recent Social Security Commission.

The preeminence of the United States in international industrial competition and the insulation of U.S. domestic markets from competition ended during the past decade, but this Nation has been slow to adapt to the reality and ramifications of a highly competitive global marketplace. Helping to support the competitiveness of American industry is a proper and necessary role of Government, working in concert with the private sector. Indeed, if we fail to do this now, industrial competitors will continue to cut into our economic strength with disastrous long-term structural consequences to our economy, our workers, and our entire social fabric.

At present, industrial policy in the United States is composed of a myriad of Government programs, subsidies and regulatory oversight functions which are neither coordinated, cohesive, or consistent. I believe that it is imperative that Government, business, labor, and academia act together now to develop and coordinate long-range strategies for helping to assure the international competitiveness of U.S. industries.

Creation of a National Commission on National Competitiveness is a first step in this process. The type of Commission which I envision and support would not only study various aspects of the industrial competitiveness of U.S. industry but would also make specific recommendations regarding long-term strategies to promote our international competitiveness, and develop specific proposals for mechanisms to implement those strategies. While this Commission is meeting, the House Subcommittee on Economic Stabilization, which I chair, would also be holding comprehensive hearings into the issue of industrial policy with a view toward making legislative proposals during the course of this Congress. We would want, therefore, the Commission to make its recommendations no later than 1 year from the date of its creation.

At this time, it is my understanding that the administration is seriously considering creation of a National Commission on Industrial Competitiveness. If such is the case, I would hope that such a Commission would be bipartisan in nature and be action-oriented. The country does not need yet another study to confirm what it already knows, or even worse, an excuse to defer what must be done. If we allow the competitive position of American industry to erode further, we risk irreparable damage to many of our country's basic industries.

It is with this sense of importance and urgency that I introduce the legislation.●

INTRODUCTION OF ADMINISTRATION'S IMF LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 5 minutes.

● Mr. ST GERMAIN. Mr. Speaker, I am today—along with the Banking Committee's ranking minority member, Mr. WYLIE—introducing, by request, the administration's legislation providing for increased U.S. participation in the International Monetary Fund.●

THE PRESIDENT IS ATTEMPTING TO AVOID CONGRESSIONAL REVIEW OF MILITARY AID TO EL SALVADOR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. BARNES) is recognized for 5 minutes.

● Mr. BARNES. Mr. Speaker, along with 12 of my colleagues, I am today introducing legislation to repeal section 506 of the Foreign Assistance Act, an authority that the President is misusing to finance the war in El Salvador without congressional approval. There are very strong indications that the President intends to invoke this authority again to provide an additional $60 million in military assistance to El Salvador without our review.

Under the current law, section 506 of the Foreign Assistance Act, the President is authorized, in event of an unforeseen emergency which requires immediate military assistance to a foreign country, to direct the drawdown of defense articles, defense services and military education and training from the Department of Defense in an amount not to exceed $75 million each year. No congressional review is required.

The President has already invoked this authority three times in order to provide military aid to El Salvador. Since the resumption of military assistance to El Salvador in 1980, more than 65 percent has been provided through this authority. It is clear that section 506 is being used not for emergencies, but to provide unauthorized supplemental military aid.

I think that Congress must make clear that we will not stand for this. It is important to remember that the emergency in El Salvador is not unforeseen; on the contrary, it has been accurately predicted by the Members of and witnesses before the Subcommittee on Western Hemisphere Affairs on numerous occasions over the past 2 years. The administration has yet to devise a policy for dealing with it.

It is tragic and ironic that the President is undermining his own flexibility by once again attempting to end-run Congress on policy toward El Salvador. I believe that Congress should grant the President reasonable authority to act in emergency situations when there is not sufficient time to seek congressional authorization. However, we cannot close our eyes to the abuse of these authorities.

I hope it will not be necessary to move this bill. If the President submits his request to the normal congressional process, I will not do so.●

RESTORE ANTITERRORISM EXPORT CONTROLS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BERMAN) is recognized for 10 minutes.

● Mr. BERMAN. Mr. Speaker, I am introducing today a bill to reimpose controls that were lifted a year ago on two critical categories of exports: Those to countries which support international terrorism, and those to the South African Government and its military and police.

Until March of last year, Iraq was included in the U.S. Government's list of countries that have "repeatedly provided support for acts of international terrorism." The Departments of State and Commerce were required to notify Congress of sales which would contribute to Iraq's ability to support terrorist activities.

Until March of last year, advance congressional notification was required on sales of aircraft and helicopters to countries which support international terrorism.

Until March of last year, the U.S. Government maintained a rigorous arms embargo against South Africa, prohibiting all sales to that country's military and police.

Until March of last year, validated licenses were required on all sales of computers to the South African Government, which relies on computers to monitor and strictly control the lives of black citizens.

Rationales were similar for exempting from policy review sales of aircraft to countries supporting international terrorism and sales of computers to the South African Government. U.S. market shares have been declining in affected countries, it was argued, because America was regarded as an unreliable supplier.

Similar reasons were given for taking Iraq off the list of countries that support terrorism, and for relaxing the South African arms embargo. By improving ties with these two governments, it was believed, the United States could work more effectively with them to further peace in their regions and to curtail violence against civilians.

Today, a year after U.S. export restrictions were relaxed, it is clear that this policy has not had the intended effects. Terrorist factions based in Iraq have continued their attacks on innocent civilians—Israelis, European Jews, and moderate Arabs. South Africa's military has mounted major invasions of neighboring countries, and Pretoria's controls over black South Africans have grown more harsh.

Over the years, substantial evidence has been accumulated that Iraq provides funding as well as a haven for Palestinian terrorist factions. Since the United States took Iraq off the list of nations supporting international terrorism, Abu Nidal has returned to Iraq and established his headquarters there. Abu Nidal is the leader of an active terrorist Palestinian faction, Black June. In the past year, according to press reports, Nidal's followers have been convicted of the attack on a Vienna synagogue and the murder of a Vienna city counselor, have been charged with the shootings of Israel's Ambassador to London in June and a Kuwaiti diplomat in Madrid, and have provided guns for the assault on the Ankara airport. A team of investigators from five European countries believes that the Abu Nidal group also is responsible for recent attacks on a restaurant in Paris and a synagogue in Rome, and against Jews in Antwerp and Brussels. A Nidal follower arrested by Swiss police for possession of bombs claimed to be part of a Europewide terror campaign.

Iraq is the only Arab nation which will provide a haven for Abu Nidal and his followers. It also serves as headquarters for the terrorist organization known as May 15. May 15 has planted bombs on Pan American aircraft, one of which exploded last August, killing a Japanese youth.

The legislation I am introducing not only would put Iraq back on the list of countries that support international terrorism; it also would establish clear, concrete standards for a country being removed from the list in the future. Before rescinding a certification that a country supports terrorism, the President would be required to submit to Congress a report that the country in question has not provided support for terrorism, or for groups engaged in terrorism, for the previous 12 months.

Some may argue that despite the tragic terrorist attacks by Iraq-based factions in the past years, the United States still should refrain from placing Iraq back on the list of nations that support terrorism. To so criticize Iraq, some would argue, would jeopardize chances of gaining Iraqi support for the Middle East peace process.

Yet there is a fundamental contradiction in a policy that relaxes U.S. opposition to international terrorism in order to further peace in the Middle East. Following the PLO's military defeat in Lebanon, some Palestinian extremists advocate intensified terrorism, as opposed to acquiescence in efforts toward peace. It is now more important than ever that the United States take the firmest possible stand against such terrorism.

This legislation would not prohibit sales to Iraq, Syria, or the People's Democratic Republic of Yemen of aircraft of any other items that might enhance their ability to support international terrorism. The bill would simply require prior notification to Congress of such sales, allowing public debate and scrutiny of their possible impact on the struggle against terrorism.

Under its relaxed restrictions on sales to the South African police and military, the administration has licensed sales in the following areas:

Six aircraft for the South African Air Force, which would be used as air ambulances in South Africa's military campaigns in Namibia and against neighboring countries, and also would be useful for border patrols.

Two powerful computers, useful in nuclear weapons developments, which have been sold to the government-controlled Council for Scientific and Industrial Research, and other equipment which may be used to develop nuclear weapons.

Police shock batons, which are useful in torture as well as against protestors.

In addition, a wide variety of items, ranging from computers to chemicals, may now be sold to the South African military and police under general license, with no U.S. Government review required.

This easing of the arms embargo against South Africa has come at the worst possible time. In the past year, the South African military has escalated its attacks on Angola and has raided Lesotho's capital, killing 42 civilians in their homes. After 6 years of negotiations to resolve the Namibian problem, led by the United States and other Western countries, South Africa persists in its illegal military occupation of that territory.

South Africa also has stepped up its covert activities against neighboring countries. South African-supported insurgents have blown up Zimbabwe's oil pipeline to the sea at Beira and disrupted other economic activity in Mo-

zambique. White soliders from a training camp in South Africa were killed during a foray into Zimbabwe.

The United States should make clear its opposition both to South Africa's escalating external military aggression, and to its mounting internal police repression.

Relaxation of U.S. export controls against South African police were announced just days after labor leader Neil Aggett died in detention. This was the first death of a South African political prisoner since the international outcry at Steve Biko's murder in 1977, and the subsequent tightening of the arms embargo which the United States first imposed in 1963. Since the United States relaxed controls on sales to South African military and police, another political prisoner has died in South Africa, and many more have been detained without charge and tortured.

The South African Government is imposing harsher controls on average black citizens at the same time that repression is increasing against their political leaders. New measures have been introduced which tighten controls that prevent millions of blacks from seeking work outside of barren, overcrowded reserves, and prevent millions more from living together as families. Such controls would not be possible without the use of computers supplied by the outside world. This bill would restore the requirement that validated licenses be issued for all computers sold to the South African Government, in order to provide for a thorough investigation of whether the American technology would be used to enforce apartheid.

Mr. Speaker, I believe that the United States should follow the same basic principle in its relations with Iraq and other nations that support international terrorism, and in its relations with South Africa. America should not reward mounting violence and repression by easing restrictions on military and police sales to those responsible. If nations like Iraq and South Africa do contribute to the cause of peace and justices, then the United States should improve relations with them. Even then, however, the hand of friendship should be extended first in areas of nonmilitary and nonpolice trade and exchange.

H.R. 1877

A bill to amend the Export Administration Act of 1979 to reimpose certain foreign policy export controls which ceased to be effective on March 1, 1982, September 15, 1982, and January 20, 1983

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 6 of the Export Administration Act of 1979 (50 U.S.C. App. 2405) is amended by adding at the end thereof the following new subsection:

"(1) EXTENSION OF CERTAIN CONTROLS.—Those export controls imposed under this section which were in effect on February 28, 1982, and ceased to be effective on March 1, 1982, September 15, 1982, and January 20, 1983 (except those controls with respect to the 1980 summer olympic games), shall become effective on the date of the enactment of this subsection, and shall remain in effect until one year after such date of enactment. At the end of that one-year period, any of those controls made effective by this subsection may be extended by the President in accordance with subsections (b) and (e) of this section.".

(b) Subsection (i) of such section 6 is amended by adding at the end thereof the following new sentence: "Any such determination which has been made with respect to a country may not be rescinded unless the President first submits to the Congress a report justifying the rescission and certifying that the country concerned has not provided support for international terrorism, including support for groups engaged in such terrorism, for the preceding 12-month period.".

(c) The amendment made by subsection (b) shall apply with respect to any export control made effective by the amendment made by subsection (a).●

WILL EL SALVADOR BE OUR VIETNAM?

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Ms. OAKAR) is recognized for 5 minutes.

● Ms. OAKAR. Mr. Speaker, there are times when, as a nation, events present us with an opportunity for exercising extraordinary leadership and moral courage.

We are faced in the next few weeks with just such an opportunity in El Salvador. Over $400 million in American military and economic assistance has been ineffectual in bringing the civil violence there to an end. More than three times as much money has left El Salvador in capital flight than we have poured into that torn and bleeding land. Secretary Enders testified this week that the amount of military equipment and assistance being received by the insurgent forces from outside El Salvador does not begin to compare with the amount we have sent to the Government of El Salvador. Yet, by all accounts, the government forces are in danger of losing the war—in such danger that the American people are again asked to invest another $60 million in emergency aid. It seems as though nothing will insure failure more than more assistance from the United States of America.

But this week a sign of hope dawns in Central America. Pope John Paul II, a staunch adversary of repressive Marxism and a champion of the poor, visits the suffering peoples of mid-America. His presence, as well as his words, will call for dialog and negotiations to end the strife in El Salvador. It will be an unambiguous message, a mandate for reconciliation that the people will embrace. It is a moment when nations and armies can revise policy, can change their minds, without losing face. Will we continue to be the only major nation in our hemisphere that has not recognized that guerrillas do not lose their homegrown, democratic revolutions? They will go on for generations unless they are somehow incorporated into a new El Salvador.

We hear much from this administration and from the State Department about Soviet adventurism in our hemisphere. But we have a brand of our own right here on Capitol Hill. At least 65 to 70 percent of the military aid we have sent thus far to El Salvador has been sent without congressional approval—namely, under the 506A emergency drawdown provision. Let us, as elected representatives of the American people—who are overwhelmingly opposed to increasing military aid to El Salvador—let us put a stop to this covert action designed to evade Congress. In addition, I am appalled at the administration's desire for additional military aid.

Today we have an opportunity to be part of the solution in Central America instead of the problem. We have an opportunity to be a partner in influencing the reconciliation of factions, in building a coalition of interests that will be our best defense against the appeal of a Cuban solution. Let us open a window to peace and close the door on American adventurism. Will El Salvador be our Vietnam?●

LEGISLATION AMENDMENT INTERNAL REVENUE CODE DEALING WITH UNRELATED BUSINESS TAXABLE INCOME

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. JENKINS) is recognized for 5 minutes.

● Mr. JENKINS. Mr. Speaker, on January 25, 1983, my colleague, BILL FRENZEL, and I introduced H.R. 821 which seeks to remove a barrier to investment by pension plans and college endowments, while providing a new source of capital for domestic oil and gas production. We introduced similar legislation in the 97th Congress and an identical bill was introduced in the Senate last December by Senators ARMSTRONG, DURENBERGER, and LONG.

This legislation amends section 512 of the Internal Revenue Code dealing with unrelated business taxable income (UBTI). Current law provides for the taxation of all tax-exempt organizations on income unrelated to the purposes that entitle them to exemption. This is designed to eliminate competition to taxable businesses. Generally, interest and dividends earned on stocks and bonds and royalties are excluded in arriving at taxable income from an unrelated trade or business.

Currently, pensions and college endowments can receive tax free income from oil royalties but cannot receive tax free income from working interests in oil producing properties—that is, investments wherein the exempt organization pays a share of the development and operating costs.

H.R. 821 would allow pensions and endowments to invest in such working interests through limited partnerships without being subject to the unrelated business income tax. The bill permits these funds to only passively invest in oil and gas production, in a limited partnership, which prohibits them from involvement in business decisions.

A more technical explanation follows. I welcome my colleagues' comments and support of this legislation.

TECHNICAL EXPLANATION

H.R. 821 amends Section 512 of the Internal Revenue Code of 1954 (relating to the unrelated business taxable income of exempt organizations). The Bill would permit qualified pension funds and certain educational organizations to invest in working interests in oil and gas properties without incurring unrelated business taxable income, if such interests are held by such trust or organization as a passive investor (i.e., a limited partner) in a qualifying limited partnership. The amendment applies to pension funds that are qualified trusts under IRC Section 401 and exempt organizations ("qualified exempt organizations") described in Section 170(b)(1)(A)(ii) (generally, schools, colleges and universities) and in Section 170(b)(1)(A)(iv) (generally, exempt organizations created by public educational institutions with the purpose of holding an investment property for their benefit).

The definition of a working interest incorporates that which is contained in the regulations of the Internal Revenue Service, that is, an interest where the owner "is not relieved of its share of the development costs by the terms of any agreement with an operator." Treas. Reg. § 1.512(b)-1. The amendment is limited to investments in domestic oil and gas wells and is intended to employ the same description for those wells as is used in IRC § 613A, subject to application of IRC § 638.

To assure that partnership income is received by a qualified trust or qualified exempt organization as a passive investor, the Bill requires that the income must be allocated to such trust or organization in its capacity as a limited partner, which means a limited partner for tax purposes.

A limited partnership described in the amendment is one subject to a statute corresponding to the Uniform Limited Partnership Act, both as originally adopted in 1916 and as revised by the National Conference of Commissioners on Uniform State Laws in 1976 (and, in the case of Louisiana, to equivalent partnerships subject to the In Commendam law, as amended). A common aspect of the status of a limited partner under such laws is that such partner cannot take part in the control of the business of the partnership without becoming liable as a general partner. It is intended that the Bill will not apply to any pension fund or qualified exempt organization that fails to maintain its status under state law as a limited partner by virtue of having taken part in the control of the business of the partnership.

Income from a working interest held by a partnership may carry with it certain deductions—such as the partnership's administrative costs and the deduction for intangible drilling costs and the investment tax credit—that are allocated to all partners, including limited partners, under the partnership agreement. The amendment provides that all such deductions and credits, and any item thereof, will be excluded or disallowed in the case of any qualified trust or qualified exempt organization to which such item is allocated. Therefore, no such item would be available as a deduction or credit with respect to other taxable income of any such trust or organization.

The bill precludes potential abuse through use of certain special partnership allocations. Allocations of larger amounts of deductions, losses or credits, relative to allocations of income or gain, would not be permitted to be made to taxable partners instead of exempt limited partners. The Bill provides three conditions that must be met by the limited partnership with respect to the allocation of income, gain, losses, deductions and credits among partners. First, under the partnership agreement, the partnership cannot allocate a lesser share of any item of deduction, loss or credit to the limited partners than their share of each item of income or gain. This requirement is intended to prevent the partnership agreement from allocating larger deductions, losses, or credits in relation to income or gain from the limited partners as a whole (who may consist in part or entirely of qualified trusts or qualified exempt organizations) to a general parter or partners; however, it is not intended to prevent special allocations under Section 704(b) that may have substantial economic effect from being allocated from the general partner or partners to the limited partners as a whole or to prevent the allocation of revenues to a general partner for services rendered to the partnership. Also, the Bill is not intended to prohibit the shift of sharing arrangements between the general partner and the limited partners, as is customary in the oil and gas industry, within a taxable year, so long as before and after such shift the conditions of the Bill are met.

Second, the Bill requires that, as between limited partners, there can exist no different allocation of any item of deduction, loss or credit. This is to assure that it will not be possible to allocate deductions that are available to the limited partners as a whole to taxable instead of exempt limited partners. However, this limitation does not apply to disproportionate deductions between partners arising as a consequence of the partners having different bases in their partnership interests or in their partnership properties, as, for example, resulting from a Section 754 election.

Third, cash distributions must be made in no different manner from the allocation of income or gain.

The Bill further provides that disproportionately lesser allocations of deductions, losses or credits to exempt limited partners cannot, subject to regulations to be prescribed by the Secretary, be effectuated indirectly, by use of multi-tier partnerships or other entities such as trusts or Subchapter S corporations. This limitation is intended to apply only to situations in which a partnership or other entity is used as a purposeful device primarily to achieve a material misallocation of tax benefits from exempt to taxable investors. It is not, for example, intended to prevent a limited partnership that otherwise meets the conditions of the Bill from entering, directly or indirectly, into a general partnership, joint venture, operating agreement or "farm out" arrangement for the acquisition, exploration or development of oil and gas properties under the terms of which the other partner, venturer or operator bears the economic burden of paying all or part of the costs of such acquisition, exploration or development and is allocated or assigned the deductions or credits associated with the costs borne by it.

The Bill further provides that pension funds and qualified exempt organizations will not receive exempt income from working interests held by a limited partnership if either organization is related to any general partner. The purpose of the related party provision is to assure that a pension trust or qualified exempt organization (or a group of such trusts or organizations) cannot control, directly or indirectly, the activities of a limited partnership by means of a related entity without becoming subject to tax on income from such activities. Under the Bill, income from a limited partnership interest would not be excluded from unrelated business taxable income if the combined holdings of all such trusts and organizations in a general partner were to represent 35 percent or more of the total interest in the general partner. For purposes of making this determination, the holding of certain related persons are aggregated with the holdings of the exempt pension trusts and qualified exempt organizations.

Many limited partnership drilling programs often, for administrative reasons, employ more than one tier of partnerships to effect investment in operating properties. For example, the investors may invest in an upper tier parternship (which may be either a general or a limited partnership) which in turn invests all its assets as a limited partner in a lower-tier partnership. It is intended that the amendment will apply to investors in such "two tier" partnerships, if the income is distributed to them either as a limited partner or as a partner in a partnership that is itself a limited partner (subject to the limitations of the Bill on the disproportionate allocation of losses, deductions and credits).

The Bill also contains a conforming amendment to Section 514(c) (relating to unrelated debt-financed income) which provides that acquisition indebtedness in the case of a qualified trust or a qualified exempt organization includes neither indebtedness incurred by the limited partnership to acquire or improve oil and gas properties or that incurred by such trust or organization in acquiring its limited partnership interest. This amendment provides that the objectives of the Bill in exempting income from working interests, will not fail to be achieved because the partnership has incurred debt for purposes of acquiring or developing its properties, as is customary in the oil and gas industry, or in exempting gain in the sale of a partnership interest because the trust or organization has incurred debt which might be deemed attributable to the acquisition of such interest.

It is not believed that the Bill will result in any material revenue loss, since, to the extent qualified trusts or qualified exempt organizations choose to invest in oil and gas drilling programs as a consequence of it, they will forego other investments producing dividend, interest and other passive income that would also be exempt in their

hands. In addition, deductions, losses and credits allocated to an exempt limited partner will not be available to reduce the taxable income of that partner or any other partner. The Bill will take effect with respect to partnership taxable years beginning after December 31, 1982.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. FRANKLIN) to revise and extend their remarks and include extraneous material:)

Mr. LOWERY of California, for 5 minutes, today.

Mr. LEACH of Iowa, for 30 minutes, today.

Mr. FIELDS, for 5 minutes, today.

(The following Members (at the request of Mr. GUARINI) to revise and extend their remarks and include extraneous material:)

Mr. FUQUA, for 10 minutes, today.

Mr. LELAND, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. UDALL, for 10 minutes, today.

Mr. LAFALCE, for 5 minutes, today.

Mr. ST GERMAIN, for 5 minutes, today.

Mr. BARNES, for 5 minutes, today.

Mr. BERMAN, for 10 minutes, today.

Ms. OAKAR, for 5 minutes, today.

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. JENKINS, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DANNEMEYER, at the conclusion of general debate on H.R. 1718, in the Committee of the Whole today.

(The following Members (at the request of Mr. FRANKLIN) and to include extraneous matter:)

Mr. MCKERNAN in two instances.

Mr. PARRIS.

Mr. ROTH.

Mr. SCHULZE.

Mr. WHITEHURST.

Mr. CORCORAN in two instances.

Mr. WOLF in two instances.

Mr. KEMP in five instances.

Mr. ERLENBORN.

Mr. BROOMFIELD.

Mr. SUNDQUIST in two instances.

Mr. PHILIP M. CRANE.

Mr. EDWARDS of Oklahoma.

Mr. GUNDERSON.

Mr. DAUB.

Mr. BEREUTER.

Mr. PAUL.

(The following Members (at the request of Mr. GUARINI) and to include extraneous matter:)

Mr. SWIFT in two instances.

Mr. BONIOR of Michigan.

Mr. ADDABBO.

Mr. MCDONALD in 10 instances.

Mr. OTTINGER in five instances.

Mr. FLORIO.

Mr. ROYBAL.

Mr. UDALL.

Mr. STARK in two instances.

Mr. CORRADA in two instances.

Mr. APPLEGATE.

Mr. RALPH M. HALL in two instances.

Mr. MILLER of California in two instances.

Mr. MOAKLEY.

Mr. LEHMAN of Florida.

Mr. NOWAK in three instances.

Mr. SIMON in five instances.

Mr. LELAND.

Mr. MAZZOLI.

Mr. SIKORSKI.

Mr. TRAXLER.

Mr. HOYER in two instances.

Mr. DASCHLE in five instances.

Mr. GORE in two instances.

Ms. FERRARO.

Mr. JONES of North Carolina.

Mr. WEISS of New York.

Mr. PEASE.

Mr. HERTEL of Michigan.

Mr. MATSUI.

Mr. MARKEY.

Mr. FORD of Tennessee.

Mr. BOUCHER.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 37. Joint resolution providing that the week containing March 8, 1983, shall be designated as "Women's History Week"; to the Committee on Post Office and Civil Service.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 58 minutes p.m.), under its previous order, the House adjourned until Monday, March 7, 1983, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

469. A letter from the Secretary of State, transmitting certification by the International Atomic Energy Agency that Israel is allowed to participate as a member nation in the activities of that Agency, pursuant to section 159 of Public Law 97-377; to the Committee on Appropriations.

470. A letter from the Assistant Secretary of Defense, transmitting the defense manpower requirements report for fiscal year 1984, pursuant to 10 U.S.C. 138(c)(3); to the Committee on Armed Services.

471. A letter from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to amend title 10, United States Code, to provide for a Department of Defense military retirement and disability fund, and for other purposes; to the Committee on Armed Services.

472. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance of the grounds maintenance function at the Navy Public Works Center, Pearl Harbor, Hawaii, pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

473. A letter from the Secretary of Commerce, transmitting the Council's special report on the proposed increase in the resources of the International Monetary Fund; to the Committee on Banking, Finance and Urban Affairs.

474. A letter from the vice president, Chesapeake & Potomac Telephone Co., transmitting a statement of receipts and expenditures of the company for calendar year 1982, and a comparative general balance sheet for 1982, pursuant to chapter 1628, acts of Congress 1904, and paragraph 14 of the act of March 4, 1913, respectively; to the Committee on the District of Columbia.

475. A letter from the Secretary of Education, transmitting a proposal to make certain amendments to the act of September 30, 1950 (Public Law 874, 81st Congress) and the act of September 23, 1950 (Public Law 815, 81st Congress), and for other purposes; to the Committee on Education and Labor.

476. A letter from the Director ACTION, transmitting a draft of proposed legislation to authorize appropriations for programs under the Domestic Volunteer Service Act of 1973, and for other purposes; to the Committee on Education and Labor.

477. A letter from the President and Chief Executive Officer, Communications Satellite Corporation, transmitting the 18th annual report of the Corporation, pursuant to section 404(b) of the Communications Satellite Act of 1962, as amended; to the Committee on Energy and Commerce.

478. A letter from the Executive Secretary, National Mediation Board, transmitting a report of the Board's activities under the Freedom of Information Act during calendar year 1982, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

479. A letter from the Chairman, U.S. Merit Systems Protection Board, transmitting a report on the Board's activities under the Freedom of Information Act during calendar year 1982, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

480. A letter from the Chairman, National Endowment for the Arts, transmitting a report on the agency's activities under the Freedom of Information Act during calendar year 1982 pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

481. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend the Land and Water Conservation Fund Act of 1965, as amended, to dedicate certain fees to the protection and improvement of facilities and resources of the National Park System, and for other purposes; to the Committee on Interior and Insular Affairs.

482. A letter from the Chairman, Merit Systems Protection Board, transmitting a report on the number of appeals filed during the 1982 calendar year, pursuant to 5 U.S.C. 7701(i)(2); to the Committee on Post Office and Civil Service.

483. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend "An Act to provide for the reporting of weather modification activities to the Federal Government," as amended to authorize appropriations to carry out the provisions of such act for fiscal years 1983, 1984, and 1985; to the Committee on Science and Technology.

484. A letter from the Comptroller General of the United States, transmitting the third report on the status of two contracts awarded by the Navy to Litton Systems, Inc., Ingalls Shipbuilding Division, Pascagoula, Miss., (PLRD-83-26, March 3, 1983); jointly, to the Committees on Government Operations, Armed Services, and Appropriations.

485. A letter from the Chairman, U.S. Nuclear Regulatory Commission, transmitting of proposal to authorize appropriations, to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes; jointly, to the Committees on Interior and Insular Affairs and Energy and Commerce.

486. A letter from the Assistant Secretary, Department of the Interior, transmitting a proposal to amend section 7 of the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7706) to extend authorizations for appropriations, and for other purposes; jointly, to the Committees on Interior and Insular Affairs and Science and Technolgy.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BROOKS: Committee on Government Operations. Report on oversight plans of the committees of the U.S. House of Representatives (Rept. No. 98-17). Referred to the Committee on the Whole House on the State of the Union.

Mr. SMITH of Iowa: Committee on Appropriations. House Resolution 73. Resolution to disapprove the business loan and investment fund deferral (Rept. No. 98-18). Referred to the Committee of the Whole House on the State of the Union.

Mr. SMITH of Iowa: Committee on Appropriations. House Resolution 74. Resolution to disapprove the economic development assistance programs deferral (Rept. No. 98-19). Referred to the Committee of the Whole House on the State of the Union.

Mr. SMITH of Iowa: Committee on Appropriations. House Resolution 75. Resolution to disapprove the Operations and Administration, International Trade Administration deferral (Rept. No. 98-20). Referred to the Committee of the Whole House on the State of the Union.

Mr. SMITH of Iowa: Committee on Appropriations. House Resolution 76. Resolution to disapprove the pollution control equipment contract guarantees revolving fund deferral (Rept. No. 98-21). Referred to the Committee of the Whole House on the State of the Union.

Mr. SMITH of Iowa: Committee on Appropriations. House Resolution 77. Resolution to disapprove the surety bond guarantees revolving fund deferral (Rept. No. 98-22). Referred to the Committee of the Whole House on the State of the Union.

Mr. YATES: Committee on Appropriations. House Resolution 80. Resolution to disapprove the strategic petroleum reserve deferral (Rept. No. 98-23). Referred to the Committee of the Whole House on the State of the Union.

Mr. WHITTEN: Committee on Appropriations. House Resolution 90. Resolution disapproving the deferral of certain budget authority (D83-36) relating to the Department of Agriculture, Agricultural Stabilization and Conservation Service (Rept. No. 98-24). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALBOSTA (for himself and Mr. HYDE):

H.R. 1869. A bill to amend title 18 of the United States Code to provide additional penalties for certain criminal conduct; to the Committee on the Judiciary.

By Mr. ANNUNIZIO:

H.R. 1870. A bill to require the Secretary of the Treasury to coin and sell a national medal in honor of the members and former members of the Armed Forces of the United States who served in the Vietnam conflict; to the Committee on Banking, Finance and Urban Affairs.

By Mr. APPLEGATE (by request):

H.R. 1871. A bill to amend title 38, United States Code, with respect to the preservation of disability ratings: to the Committee on Veterans' Affairs.

H.R. 1872. A bill to amend title 38, United States Code, to provide that for purposes of veteran's benefits total deafness shall be rated as a 100-percent disability: to the Committee on Veterans' Affairs.

By Mr. BARNES:

H.R. 1873. A bill to amend the Foreign Assistance Act of 1961 to prohibit U.S. support for military or paramilitary operations in Nicaragua; jointly, to the Committees on Foreign Affairs and the Permanent Select Committee on Intelligence.

By Mr. BARNES (for himself, Mr. STUDDS, Mr. GEJDENSON, Ms. MIKULSKI, Ms. OAKAR, Mr. MILLER of California, Mr. FEIGHAN, Mr. TORRICELLI, Mr. HARKIN, Mr. OBERSTAR, Mr. EDGAR, Mr. AUCOIN, and Mr. SOLARZ):

H.R. 1874. A bill to repeal section 506 of the Foreign Assistance Act of 1961 which provides the President with a special drawdown authority for providing military assistance to foreign countries; to the Committee on Foreign Affairs.

By Mr. BENNETT:

H.R. 1875. A bill to amend the Agricultural Act of 1949 to modify the dairy price support program for the 1983 through 1985 fiscal years, and for other purposes; to the Committee on Agriculture.

By Mr. BEREUTER (for himself and Mr. HEFTEL of Hawaii):

H.R. 1876. A bill to amend the Internal Revenue Code of 1954 to provide for an energy tax credit for property used in producing methane-containing gas for fuel or electricity produced by anaerobic digestion from nonfossil waste materials; to the Committee on Ways and Means.

By Mr. BERMAN (for himself, Mr. WOLPE, Mr. GEJDENSON, and Mr. LEVINE of California):

H.R. 1877. A bill to amend the Export Administration Act of 1979 to reimpose certain foreign policy export controls which ceased to be effective on March 1, 1982, September 15, 1982, and January 20, 1983; to the Committee on Foreign Affairs.

By Mr. BIAGGI (for himself, Mr. JONES of North Carolina, Mr. SNYDER, and Mr. FORSYTHE):

H.R. 1878. A bill to improve the international ocean commerce transportation system of the United States; to the Committee on Merchant Marine and Fisheries.

By Mr. BONIOR of Michigan:

H.R. 1879. A bill to amend the Congressional Budget Act of 1974 to require that each congressional budget resolution fix the level of tax expenditures for the fiscal year involved as well as the recommended aggregate level of Federal revenues; to the Committee on Rules.

By Mr. MOAKLEY (for himself, Ms. MIKULSKI, Mr. WHITTAKER, Mrs. COLLINS, Mr. BEDELL, Mr. BROWN of California, Mr. BURTON of California, Mr. CORRADA, Mr. EDGAR, Mr. FAUNTROY, Mr. FRANK, Mr. HUGHES, Mr. HUTTO, Mr. JACOBS, Mr. LEHMAN of Florida, Mr. MILLER of California, Mr. MITCHELL, Mr. MURPHY, Mr. OBERSTAR, Mr. OWENS, Mr. PATTERSON, Mr. SCHUMER, Mr. SMITH of Florida, Mr. STARK, Mr. VENTO, Mr. WASHINGTON, Mr. WILSON, Mr. WISE, and Mr. WON PAT):

H.R. 1880. A bill to require persons who manufacture cigarettes or little cigars for sale or distribution in commerce to meet performance standards prescribed by the Consumer Product Safety Commission, and for other purposes; to the Committee on Energy and Commerce.

By Mr. DINGELL:

H.R. 1881. A bill to grant a Federal charter to the National Society, Daughters of the American Colonists; to the Committee on the Judiciary.

By Ms. FERRARO:

H.R. 1882. A bill to amend section 3109 of title 5, United States Code, to clarify the authority for appointment and compensation of experts and consultants, to provide statutory guidelines concerning the award of contracts for the procurement of consulting services, management and professional services, and special studies and analyses, and for other purposes; jointly, to the Committees on Post Office and Civil Service and Government Operations.

By Mr. FOWLER (for himself, Mr. HEFTEL of Hawaii, Mr. ADDABBO, Mr. BARNARD, Mr. BARNES, Mr. BOLAND, Mr. DASCHLE, Mr. D'AMOURS, Mr. DAUB, Mr. DICKINSON, Mr. DUNCAN, Mr. EDGAR, Mr. EDWARDS of California, Mr. FASCELL, Mr. FAZIO, Mr. FISH, Mr. FOGLIETTA, Mr. FRANK, Mr. FROST, Mr. GARCIA, Mr. GINGRICH, Mr. HATCHER, Mr. HOWARD, Mr. HUGHES, Mr. JEFFORDS, Mr. KILDEE, Mr. LEWIS of California, Mr. MARKEY, Mr. MARLENEE, Mr. MARRIOTT, Mr. MATSUI, Mr. MAVROULES, Mr. NEAL, Mr. NELSON of Florida, Mr. NOWAK, Mr. PICKLE, Mr. RATCHFORD, Mr. SCHEUER, Mrs. SCHNEIDER, Mr. STANGELAND, Mr. STOKES, Mr. STUDDS, Mr. WALGREN, Mr. WILLIAMS of Mon-

tana, Mr. WYDEN, Mr. WYLIE, Mr. YATES, Mr. YATRON, Mr. DE LUGO, and Mr. WON PAT):

H.R. 1883. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit to homebuilders for the construction of residences incorporating certain solar energy utilization characteristics; to the Committee on Ways and Means.

By Mr. FUQUA (for himself and Mr. LUJAN):

H.R. 1884. A bill to amend the Internal Revenue Code of 1954 to increase and extend the energy investment tax credit for solar, wind, geothermal, and ocean thermal property; to the Committee on Ways and Means.

By Mr. GEPHARDT (for himself, Mr. TAYLOR, Mr. EMERSON, Mr. WHEAT, Mr. YOUNG of Missouri, Mr. CLAY, and Mr. VOLKMER):

H.R. 1885. A bill to amend the National Flood Insurance Act of 1968 to allow individual property owners to receive flood insurance on a discretionary basis; to the Committee on Banking, Finance and Urban Affairs.

By Mr. HAMMERSCHMIDT:

H.R. 1886. A bill to require the Secretary of Agriculture to establish a program under which persons sustaining losses of grain as a result of warehouse insolvencies shall be entitled to receive surplus commodities owned by the Commodity Credit Corporation as compensation for such losses; to the Committee on Agriculture.

By Mr. HEFTEL of Hawaii (for himself, Mr. FRENZEL, Mr. SHANNON, Mr. SCHULZE, Mr. MOORE, Mr. MARTIN of North Carolina, Mr. THOMAS of California, Mr. MATSUI, Mr. HANCE, Mr. VANDER JAGT, Mr. STARK, Mr. ANTHONY, Mr. CONABLE, Mr. JENKINS, Mr. GEPHARDT, Mr. ARCHER, Mr. CAMPBELL, Mr. PICKLE, Mr. JACOBS, Mr. DUNCAN, and, Mr. PHILIP M. CRANE):

H.R. 1887. A bill to amend the Internal Revenue Code of 1954 to treat research and experimental expenses attributable to activities conducted in the United States as allocable to sources within the United States; to the Committee on Ways and Means.

By Mr. JENKINS:

H.R. 1888. A bill to extend for 5 years the existing suspension of duty on crude feathers and down; to the Committee on Ways and Means.

By Mr. HERTEL of Michigan:

H.R. 1889. A bill to provide for actions for declaratory and equitable relief for protection of the air, water, and other natural resources of public lands, and for other purposes; to the Committee on the Judiciary.

By Mr. HOWARD:

H.R. 1890. A bill to extend through June 30, 1987, the suspension of import duties on synthetic rutile; to the Committee on Ways and Means.

By Mr. HUNTER:

H.R. 1891. A bill to expand Japan's market for a U.S. agricultural products; to the Committee on Ways and Means.

H.R. 1892. A bill to impose parity fees on automobiles imported into the United States from Japan; to the Committee on Ways and Means

By Mr. JACOBS:

H.R. 1893. A bill to amend the Federal Election Compaign Act of 1971 to provide for public financing of advertising and related expenses in campaigns for the House of Representatives and to prohibit contributions by multicandidate political committees to candidates who accept such financing; to the Committee on House Administration.

H.R. 1894. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to require as a condition of receiving certain assistance under such act that law enforcement agencies have in effect a binding law enforcement officers' bill of rights; to the Committee on the Judiciary.

By Mr. JONES of North Carolina (for himself and Mr. FORSYTHE):

H.R. 1895. A bill to exempt certain fishing vessels from the Federal Unemployment Tax Act; to the Committee on Way and Means.

By Mr. LaFALCE:

H.R. 1896. A bill to amend the Defense Production Act of 1950 to create a Bipartisan National Commission on Industrial Competitiveness; to the Committee on Banking, Finance and Urban Affairs.

By Mr. LANTOS:

H.R. 1897. A bill to amend the Internal Revenue Code of 1954 by repealing certain provisions enacted by the Tax Equity and Fiscal Responsibility Act of 1982 relating to the reporting by employers of tips in the cases of certain food and beverage establishments; to the Committee on Way and Means.

By Mr. LATTA:

H.R. 1898. A bill to apply duty-free treatment to imported water chestnuts and bamboo shoots; to the Committee on Way and Means.

By Mr. LEACH of Iowa:

H.R. 1899. A bill to provide that, unless the Government of El Salvador actively participates in negotiations with all major parties to the conflict which are willing to participate unconditionally in negotiations for the purpose of achieving a cease fire and an equitable political solution to hostilities, U.S. military support for El Salvador shall be terminated, with military assistance funds to be transferred for use for development and humanitarian assistance; to the Committee on Foreign Affairs.

By Mr. ROSTENKOWSKI (for himself, Mr. PICKLE, and Mr. CONABLE):

H.R. 1900. A bill to assure the solvency of the social security trust funds, to reform the medicare reimbursement of hospitals, to extend the Federal supplemental compensation program, and for other purposes; to the Committee on Ways and Means.

By Mr. McKINNEY (by request):

H.R. 1901. A bill entitled: "the Housing and Community Development Act of 1983"; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MARRIOTT (for himself, Mr. NOWAK, Mr. McDADE, Mr. CONTE, Mr. WILLIAMS of Ohio, Mr. DAUB, Mr. DREIER of California, Mr. ROTH, Mr. BOEHLERT, Mr. BILIRAKIS, Mr. ECKART, Mr. WILSON, Mrs. SNOWE, Mr. GINGRICH, Mr. BADHAM, Mr. DANIEL B. CRANE, Mr. HANSEN of Utah, Mr. NIELSON of Utah, Mr. LEWIS of Florida, Mr. McEWEN, and Mr. LAGOMARSINO):

H.R. 1902. A bill to amend the Internal Revenue Code of 1954 to provide incentives for investments in small business through small business participating loans; to the Committee on Ways and Means.

By Mr. MRAZEK:

H.R. 1903. A bill to prohibit the importation into the United States of certain kangaroos and products made therefrom; to the Committee on Merchant Marine and Fisheries.

By Mr. MURPHY (for himself, Mr. ERLENBORN, Mr. BIAGGI, Mr. BARTLETT, Mr. SIMON, Mr. JEFFORDS, Mr. MILLER of California, Mr. GOODLING, Mr. CORRADA, Mr. GUNDERSON, Mr. GAYDOS, and Mr. WILLIAMS of Montana):

H.R. 1904. A bill to extend and improve the provisions of the Child Abuse Prevention and Treatment Act and the Child Abuse Prevention and Treatment and Adoption Reform Act of 1978; to the Committee on Education and Labor.

By Mr. PARRIS:

H.R. 1905. A bill to amend the Internal Revenue Code of 1954 with respect to deductions for the payment of certain expenses by ministers who receive housing allowances; to the Committee on Ways and Means.

By Mr. RUDD (for himself, Mr. McCAIN, Mr. UDALL, Mr. McNULTY, and Mr. STUMP):

H.R. 1906. A bill to provide for the establishment of a national cemetery in Maricopa County, Ariz.; to the Committee on Veterans' Affairs.

By Mr. ST GERMAIN (for himself and Mr. WYLIE) (by request):

H.R. 1907. A bill to amend the Bretton Woods Agreements Act to authorize consent to and authorize appropriations for an increase in the U.S. quota in the International Monetary Fund and to authorize appropriations for increased U.S. participation in the General Arrangements To Borrow; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SCHULZE:

H.R. 1908. A bill relating to the marking of containers of imported mushrooms; to the Committee on Ways and Means.

H.R. 1909. A bill to amend the Federal Food, Drug, and Cosmetic Act to require foods containing imported mushrooms to bear labeling stating the country of origin of the mushrooms; to the Committee on Energy and Commerce.

By Mr. SHANNON (for himself, Mr. MARTIN of North Carolina, Mr. CAMPBELL, and Mr. JENKINS):

H.R. 1910. A bill to correct any misinterpretation in the classification of textile fabrics, articles, and materials, coated, filled, or laminated with rubber or plastics; to the Committee on Ways and Means.

By Mr. SIMON:

H.R. 1911. A bill to require the Secretary of Commerce or his designee to study the feasibility of operating a computerized foreign language business and job referral service and to submit a report to the President and the Congress with respect to such a study; to the Committee on Education and Labor.

H.R. 1912. A bill to require the Secretary of Labor to conduct a study regarding the establishment and use of a consumer price index for older persons; to the Committee on Education and Labor.

H.R. 1913. A bill to amend title 5, United States Code, to provide that three extra points be awarded on the civil service examination to individuals demonstrating foreign language proficiency; to the Committee on Post Office and Civil Service.

H.R. 1914. A bill to amend title 38, United States Code, to provide for service-connected compensation to be paid to veterans—and their families—who were exposed to nuclear radiation or to toxic chemicals and who are suffering from radiological or chemical disabilities, and for other purposes; to the Committee on Veterans' Affairs.

By Mrs. SMITH of Nebraska:

H.R. 1915. A bill to exclude agricultural commodities obtained or financed by the

United States from certain requirements that such agricultural commodities be transported on privately owned U.S.-flag commercial vessels and vessels of the United States; to the Committee on Merchant Marine and Fisheries.

By Mr. SOLOMON:

H.R. 1916. A bill to amend title VII of the Civil Rights Act of 1964 relating to nondiscrimination in employment by the House of Representatives; to the Committee on Education and Labor.

H.R. 1917. A bill to amend the Occupational Safety and Health Act of 1970 to require the House of Representatives to establish and maintain an effective and comprehensive occupational safety and health program; to the Committee on Education and Labor.

By Mr. ANDERSON (for himself, Mr. HOYER, Mr. QUILLEN, Mr. JEFFORDS, Mr. STANGELAND, Mr. MARLENEE, Mr. YATRON, Mr. MCEWEN, Mr. SUNIA, Mr. DAVIS, Mr. COYNE, Mr. DASCHLE, Mr. HUGHES, Mr. SMITH of New Jersey, Mr. DICKS, Mr. DWYER of New Jersey, Mr. LANTOS, Mr. BOLAND, Mr. DYMALLY, Mr. FISH, Mr. MOLINARI, Mrs. SCHROEDER, Mr. ROE, Mr. HORTON, Mr. MOAKLEY, Mr. PRICE, Mr. TAYLOR, Mrs. SCHNEIDER, Mr. MCGRATH, Mr. FLIPPO, Mr. FORD of Michigan, Mr. MARTIN of New York, Mr. HARTNETT, Mr. YOUNG of Florida, Mr. HUTTO, Mr. WOLF, Mr. KILDEE, Mr. WYDEN, Mr. EMERSON, Ms. FIEDLER, Mr. MILLER of Ohio, Mr. DOWDY of Mississippi, Mr. LEHMAN of Florida, Mr. PERKINS, Mr. FRANK, Mr. HERTEL of Michigan, Mr. SABO, Mr. CONTE, Mr. RUDD, Mr. OTTINGER, Mr. JONES of North Carolina, Mr. WAXMAN, Mr. TAUKE, Mr. TRAXLER, Mr. FAUNTROY, Mr. RATCHFORD, Mr. WALGREN, Mr. BEVILL, Mr. EDGAR, Mr. ADDABBO, Mr. MATSUI, Mr. BONIOR of Michigan, Mr. FIELDS, Mr. FAZIO, Mr. FROST, Mr. PANETTA, Mr. LOTT, Mr. WON PAT, Mr. CORRADA, Mr. PORTER, Mr. DUNCAN, Mr. GUNDERSON, Mr. SKEEN, Mr. STOKES, Mr. WILLIAMS of Ohio, Mr. COELHO, Mr. WHITEHURST, Mr. IRELAND, Mr. GAYDOS, Mr. ALBOSTA, Mr. MINISH, Mr. RAHALL, Mr. FORSYTHE, Mrs. BYRON, Mr. YOUNG of Alaska, Mr. WINN, Mr. SOLARZ, Mr. BONER of Tennessee, Mr. BEDELL, Mr. ROBERTS, Mr. LEWIS of California, Mr. MITCHELL, Mr. MOORHEAD, Mr. GINGRICH, Mr. MARRIOTT, Mr. GILMAN, Mr. SHELBY, Mr. ENGLISH, Mr. FORD of Tennessee, Mr. ZABLOCKI, Mr. HUCKABY, Mr. CLINGER, Mr. SMITH of Iowa, Mrs. ROUKEMA, Mr. WILLIAMS of Montana, Mrs. COLLINS, Mr. BIAGGI, Mr. FOGLIETTA, Mr. DERRICK, Mr. WEAVER, Mr. WHITTAKER, Mr. MAVROULES, Mr. SYNAR, Mr. CROCKETT, Mr. MARKEY, Mr. EVANS of Iowa, Mr. MCKINNEY, Mrs. KENNELLY, Mr. SHUSTER, Mr. BARNARD, Mr. MCCOLLUM, Mr. SHARP, Mr. WORTLEY, Mr. DIXON, Mr. NELSON of Florida, Mr. PETRI, Mr. LONG of Louisiana, Ms. OAKAR, Mr. WEBER, Mr. ROYBAL, Mr. HOWARD, Mr. MICA, Mr. WASHINGTON, Mr. LEACH of Iowa, and Mr. PEPPER):

H.R. 1918. A bill to amend title 38, United States Code, to authorize a service pension of $150 per month for veterans of World War I and for certain surviving spouses of such veterans; to the Committee on Veterans' Affairs.

By Mr. SOLOMON:

H.R. 1919. A bill to amend the Fair Labor Standards Act of 1938 relating to employees of the House of Representatives; to the Committee on Education and Labor.

H.R. 1920. A bill to impose mandatory sentences for violent felonies committed against individuals of age 65 or over, and for other purposes; to the Committee on the Judiciary.

H.R. 1921. A bill to provide that increases in the rate of compensation for Members of the House of Representatives and the Senate shall not take effect until the start of the Congress following the Congress in which such increases are approved; to the Committee on Post Office and Civil Service.

H.R. 1922. A bill to amend the Impoundment Control Act of 1974 respecting the rescissions of budget authority; to the Committee on Rules.

H.R. 1923. A bill to amend title II of the Social Security Act to eliminate the earnings test for individuals age 65 and over; to the Committee on Ways and Means.

H.R. 1924. A bill to provide mandatory social security coverage for Members of Congress and certain congressional employees; to the Committee on Ways and Means.

H.R. 1925. A bill to amend the Internal Revenue Code of 1954 to allow certain married individuals who file separate returns to be taxed as unmarried individuals; to the Committee on Ways and Means.

H.R. 1926. A bill to amend the Age Discrimination in Employment Act of 1967 to provide that individuals who are 40 years of age or older shall be protected by the provisions of such act, and for other purposes; jointly, to the Committees on Education and Labor and Post Office and Civil Service.

By Mr. STRATTON (for himself and Mrs. HOLT):

H.R. 1927. A bill to authorize appropriations for the Department of Energy for national security programs for fiscal year 1983, and for other purposes; to the Committee on Armed Services.

By Mr. UDALL (for himself, Mr. BURTON of California, Mr. CORRADA, Mr. DASCHLE, Mr. KILDEE, Mr. KOGOVSEK, Mr. LOWRY of Washington, Mr. MCNULTY, Mr. MARKEY, Mr. MOLLOHAN, Mr. OBERSTAR, Mr. SWIFT, Mr. SYNAR, Mr. WATKINS, Mr. WILLIAMS of Montana, and Mr. WON PAT):

H.R. 1928. A bill to provide for an Indian housing program for construction and financing of housing for Indians and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. UDALL (for himself, Mr. COLEMAN of Texas, Mr. EDWARDS of California, Mr. FROST, Mr. KAZEN, Mr. LOEFFLER, Mr. MCNULTY, Mr. ORTIZ, and Mr. SKEEN):

H.R. 1929. A bill to amend the Small Business Act to restore the authority to make loans for economic dislocation and to clarify that such dislocations include foreign currency devaluations; to the Committee on Small Business.

By Mr. WEISS (for himself, Mr. HORTON, Mr. CONYERS, Mr. TOWNS, and Mrs. BOXER):

H.R. 1930. A bill to extend and amend the provisions of title 31, United States Code, relating to the general revenue sharing program; to the Committee on Government Operations.

By Mr. WOLF:

H.R. 1931. A bill to direct the Secretary of the Interior to construct, between Spout Run Parkway and the approaches to the Theodore Roosevelt Bridge, additional lanes on the George Washington Memorial Parkway, Va., for the purposes of alleviating traffic congestion and improving safety; to the Committee on Interior and Insular Affairs.

By Mr. BIAGGI (for himself, Mr. JONES of North Carolina, Mr. HOWARD, Mr. ROE, Mr. BATEMAN, Mr. BONKER, Mr. BORSKI, Mrs. BOXER, Mr. BREAUX, Mr. BROOKS, Mr. CARNEY, Mr. CARPER, Mr. D'AMOURS, Mr. DAVIS, Mr. DONNELLY, Mr. DYSON, Mr. FIELDS, Mr. FOGLIETTA, Mr. FRANKLIN, Mr. GILMAN, Mr. HUGHES, Mr. HUTTO, Mr. LENT, Mr. LIPINSKI, Mr. MCKERNAN, Ms. MIKULSKI, Mr. OBERSTAR, Mr. ORTIZ, Mr. PRITCHARD, Mr. SUNIA, Mr. SAWYER, Mr. SHUMWAY, Mr. TALLON, Mr. TAUZIN, Mr. THOMAS of Georgia, and Mr. YOUNG of Alaska):

H.J. Res. 173. Joint resolution to authorize and request the President of the United States to issue a proclamation designating the 7-day period commencing October 2, 1983 as National Port Week; to the Committee on Post Office and Civil Service.

By Mr. ERDREICH:

H.J. Res. 174. Joint resolution to authorize and request the President to designate February 27, 1986, as "Hugo LaFayette Black Day"; to the Committee on Post Office and Civil Service.

By Mr. GARCIA:

H.J. Res. 175. Joint resolution to authorize and request the President to proclaim May 1983 as "National Amateur Baseball Month"; to the Committee on Post Office and Civil Service.

By Mr. GONZALEZ:

H.J. Res. 176. Joint resolution designating the week beginning May 8, 1983, as "Municipal Clerk's Week"; to the Committee on Post Office and Civil Service.

By Mr. GORE:

H.J. Res. 177. Joint resolution recognizing the year of international scientific inquiry which is being conducted into the environmental consequences of nuclear war and urging wide dissemination of the conclusions reached during this international year of research; to the Committee on Foreign Affairs.

By Mr. KEMP (for himself and Mr. SOLARZ):

H.J. Res. 178. Joint resolution to authorize and request the President to issue a proclamation designating May 21, 1983, as "National Sakharov Day"; jointly, to the Committees on Post Office and Civil Service and Foreign Affairs.

By Mr. LOWERY of California (for himself and Mr. HEFTEL of Hawaii):

H.J. Res. 179. Joint resolution designating November 1983 as "National Alzheimer's Disease Month;" to the Committee on Post Office and Civil Service.

By Mr. RITTER:

H.J. Res. 180. Joint resolution designating March 21, 1983, as "Afghanistan Day"; to the Committee on Post Office and Civil Service.

By Mr. ST GERMAIN:

H.J. Res. 181. Joint resolution designating May 1983 as "Fraternal Insurance Counselor Month"; to the Committee on Post Office and Civil Service.

By Mr. SOLOMON:

H.J. Res. 182. Joint resolution to oppose efforts by the United Nations Educational, Scientific, and Cultural Organization to attempt to regulate news content and to formulate rules and regulations for the operation of the world press; to the Committee on Foreign Affairs.

By Mr. ZABLOCKI (for himself, Mr. BROOMFIELD, Mr. FASCELL, Mr. HAMILTON, Mr. YATRON, Mr. SOLARZ, Mr. BONKER, Mr. STUDDS, Mr. MICA, Mr. BARNES, Mr. WOLPE, Mr. CROCKETT, Mr. GEJDENSON, Mr. DYMALLY, Mr. LANTOS, Mr. KOSTMAYER, Mr. TORRICELLI, Mr. SMITH of Florida, Mr. BERMAN, Mr. REID, Mr. LEVINE of California, Mr. FEIGHAN, Mr. WEISS, Mr. GARCIA, Mr. WINN, Mr. GILMAN, Mr. LAGOMARSINO, Mr. PRITCHARD, Mr. LEACH of Iowa, Mr. ROTH, Mrs. SNOWE, Mr. HYDE, Mr. SOLOMON, Mr. BEREUTER, Mr. SILJANDER, and Mr. ZSCHAU):

H.J. Res. 183. Joint resolution to authorize and request the President to proclaim the week of April 10 to 16, 1983, as "A Week of Remembrance for the 40th Anniversary of the Warsaw Ghetto Uprising"; to the Committee on Post Office and Civil Service.

By Mr. JACOBS:

H. Con. Res. 76. Concurrent resolution declaring the sense of Congress regarding periods of silence in the public schools; jointly, to the Committees on Education and Labor and the Judiciary.

By Mr. WHITEHURST:

H. Con. Res. 77. Concurrent resolution calling for a regional conservation treaty to protect Northern Hemisphere pinnipeds; to the Committee on Foreign Affairs.

By Mr. SOLOMON:

H. Con. Res. 78. Concurrent resolution expressing the sense of Congress that the executive branch will recognize the traditional commitment of the United States to the right of all people to independence and autonomy as it applies to the situation in Afghanistan; to the Committee on Foreign Affairs.

H. Con. Res. 79. Concurrent resolution expressing the sense of the Congress concerning the compliance by the Soviet Union with certain international agreements on human rights; to the Committee on Foreign Affairs.

H. Con. Res. 80. Concurrent resolution expressing the sense of the Congress with respect to the United States making full use of its potential to improve the effectiveness of the Voice of America, Radio Free Europe, and Radio Liberty; to the Committee on Foreign Affairs.

By Mr. JACOBS:

H. Res. 121. Resolution establishing a Commission to recommend an appropriate memorial to former U.S. Representative Allard K. Lowenstein: to the Committee on Rules.

By Mr. MILLER of California:

H. Res. 122. Resolution providing amounts from the contingent fund of the House for expenses of investigations and studies by the Select Committee on Children, Youth, and Families in the 1st session of the 98th Congress; to the Committee on House Administration.

By Mr. RANGEL (for himself and Mr. GILMAN):

H. Res. 123. Resolution providing amounts from the contingent fund of the House for expenses of investigations and studies by the Select Committee on Narcotics Abuse and Control in the 1st session of the 98th Congress; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII,

23. The SPEAKER presented a memorial of the Legislature of the State of South Dakota, relative to veterans that may have been exposed to atomic radiation; to the Committee on Veterans' Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CORRADA:

H.R. 1932. A bill for the relief of Mireille Laffite; to the Committee on the Judiciary.

By Mr. GEPHARDT:

H.R. 1933. A bill relating to the duty-free entry of certain scientific equipment imported for the use of the Ellis Fischel State Cancer Hospital, Columbia, Mo.; to the Committee on Ways and Means.

By Mr. HARTNETT:

H.R. 1934. A bill for the relief of Siu Kee Tong and Yuan Kiang Chou; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 82: Mr. FAZIO.

H.R. 171: Mr. CLINGER, Mr. BILIRAKIS, Mr. ARCHER, Mr. CHAPPIE, and Mr. HOPKINS.

H.R. 388: Mr. LOEFFLER, Mr. GINGRICH, Mr. FRENZEL, and Mr. CORCORAN.

H.R. 705: Mr. MAZZOLI.

H.R. 777: Mr. WON PAT, Mr. BEILENSON, Mr. MARKEY, Mr. STARK, Mr. SCHUMER, Mr. LELAND, Mr. MATSUI, Mr. MCNULTY, Mr. FAUNTROY, Mrs. BOXER, Mr. FRANK, Mr. RAHALL, and Mr. BONIOR of Michigan.

H.R. 785: Mr. SKEEN and Mr. CORCORAN.

H.R. 786: Mr. OXLEY.

H.R. 800: Mr. STRATTON.

H.R. 918: Mr. DAUB and Mr. MARRIOTT.

H.R. 1067: Mr. SHELBY, Mr. LUKEN, Mr. DANIEL, Mr. WEBER, Mr. SMITH of New Jersey, Mr. HARTNETT, Mr. HORTON, Mr. SENSENBRENNER, Mr. DAUB, Mr. BOSCO, Mr. GINGRICH, Mr. MCEWEN, Mr. MURPHY, Mr. HAMMERSCHMIDT, and Mr. CLINGER.

H.R. 1097: Mr. FORSYTHE, Mr. BEVILL, Mr. FAUNTROY, Mr. HANCE, Mr. VANDERGRIFF, Mr. DWYER of New Jersey, Mr. CHAPPELL, Mr. HIGHTOWER, Mr. OWENS, Ms. MIKULSKI, Mr. MARTIN of North Carolina, Mr. STOKES, Mr. HANSEN of Idaho, Mr. MILLER of California, Mr. MITCHELL, Mr. ANDREWS of Texas, Mr. MONTGOMERY, Mr. SPRATT, Mrs. COLLINS, Mr. PENNY, Mr. RICHARDSON, Mr. FORD of Tennessee, Mr. MRAZEK, Mrs. HALL of Indiana, Mr. WHITLEY, Mr. BATEMAN, Mr. STAGGERS, Mr. SHELBY, Mr. PATMAN, Mr. MOLLOHAN, and Mr. WASHINGTON.

H.R. 1131: Mr. DAUB and Mr. BATEMAN.

H.R. 1180: Mr. CLINGER, Mr. MITCHELL, Mr. HATCHER, Mr. BARNARD, Mr. MURPHY, Mr. SIMON, and Mr. DE LUGO.

H.R. 1199: Mr. CONTE, Mr. LONG of Maryland, Mr. WON PAT, and Mr. WALGREN.

H.R. 1206: Mr. OWENS and Mr. YOUNG of Alaska.

H.R. 1222: Mr. BROWN of California, Mr. EDGAR, Mr. FORD of Tennessee, Mrs. HALL of Indiana, Mr. HARRISON, Mr. HUBBARD, Mr. KOSTMAYER, Mr. MAZZOLI, Mr. MITCHELL, Mr. MOLLOHAN, Mr. MURPHY, Mr. OBERSTAR, Mr. ROE, Mr. STOKES, Mr. SUNIA, and Mr. YATRON.

H.R. 1234: Mr. FEIGHAN, Mr. MAVROULES, Mrs. JOHNSON, and Mr. MATSUI.

H.R. 1249: Mr. BEILENSON, Mr. MCEWEN, and Mr. ANDREWS of North Carolina.

H.R. 1287: Mr. GRADISON, Mr. FORSYTHE, Mr. MCNULTY, Mr. SPRATT, Mr. PURSELL, Mr. FRENZEL, Mr. COATS, and Mr. CORCORAN.

H.R. 1340: Mr. ADDABBO, Mr. NOWAK, Mr. SCHUMER, Mr. OTTINGER, Mr. KEMP, Mr. GARCIA, Mr. HORTON, Mr. SCHEUER, Mr. LUNDINE, Mr. BIAGGI, Mr. STRATTON, and Mr. OWENS.

H.R. 1544: Mr. FORSYTHE, Mr. DAUB, Mr. VANDER JAGT, Mr. WINN, Mr. DERRICK, Mr. SAM B. HALL, JR., Mr. WILSON, Mr. DANIEL, Mr. LAGOMARSINO, Mr. WYLIE, Mr. ROGERS, Mr. SUNIA, and Mr. TALLON.

H.R. 1555: Ms. MIKULSKI.

H.R. 1599: Mr. LOWRY of Washington.

H.R. 1694: Mr. WEISS, Mr. MATSUI, Mr. WIRTH, Mr. MARKEY, and Mr. WINN.

H.J. Res. 22: Mr. GREGG and Mr. BOEHLERT.

H.J. Res. 113: Mr. SHELBY.

H.J. Res. 126: Mr. ADDABBO, Mr. ALEXANDER, Mr. BATEMAN, Mr. BOLAND, Mr. BONER of Tennessee, Mrs. BOUQUARD, Mr. BREAUX, Mr. BROWN of California, Mr. BROYHILL, Mr. BURTON of California, Mr. CHANDLER, Mr. CHAPPIE, Mr. CROCKETT, Mr. DAVIS, Mr. EVANS of Illinois, Mr. FAZIO, Mr. FEIGHAN, Mr. FISH, Mr. FRENZEL, Mr. GRAY, Mr. GUARINI, Mr. HOWARD, Mr. JEFFORDS, Ms. KAPTUR, Mr. LEACH of Iowa, Mr. MCCOLLUM, Ms. MIKULSKI, Mr. MURPHY, Mr. PATTERSON, Mr. RANGEL, Mr. RITTER, Mr. SCHEUER, Mr. STAGGERS, Mr. WASHINGTON, Mr. WIRTH, Mr. WON PAT, Mr. WYDEN, Mr. YATRON, Mr. YOUNG of Alaska, Mr. BILIRAKIS, Mr. ERDREICH, and Mrs. SCHNEIDER.

H.J. Res. 139: Mr. LEVIN of Michigan, Mr. BROWN of California, Mr. SKEEN, Mr. YATRON, Mr. LOWERY of California, Mr. MARKEY, Mr. WEAVER, Mr. KOGOVSEK, Mr. FROST, Mr. HORTON, Mr. LONG of Louisiana, Mr. MURPHY, Mr. BERMAN, Mr. FRENZEL, Ms. KAPTUR, Mr. WASHINGTON, Mr. TALLON, Mr. HANSEN of Idaho, Mrs. BOXER, and Mrs. HALL of Indiana.

H. Con. Res. 11: Mr. MCCURDY.

H. Con. Res. 12: Mr. SMITH of New Jersey, Mrs. SCHROEDER, Mr. OBERSTAR, and Mr. WEAVER.

H. Con. Res. 20: Ms. MIKULSKI, Mr. CLAY, and Mr. FEIGHAN.

H. Con. Res. 43: Mr. HATCHER, Mr. KOGOVSEK, Mr. YATRON, Ms. OAKAR, Mr. DELLUMS, Mr. MAVROULES, Mr. CLAY, Mr. DOWDY of Mississippi, Mr. JEFFORDS, Mr. WEISS, Mr. DASCHLE, Mr. CROCKETT, Mr. YOUNG of Missouri, Mr. SAVAGE, Mrs. SCHROEDER, Mr. SCHEUER, Mr. COUGHLIN, Mr. BORSKI, Mr. MRAZEK, Mr. HUBBARD, Mr. HUGHES, Mr. LUJAN, Mr. ROE, Ms. MIKULSKI, Mr. COELHO, Mr. GUARINI, Mr. LAFALCE, and Mr. SABO.

H. Con. Res. 45: Mr. MCKINNEY, Mr. REID, Mr. ALBOSTA, and Mr. SAWYER.

H. Con. Res. 47: Ms. KAPTUR, Mr. SAM B. HALL, JR., Mr. BURTON of Indiana, Mr. DOWDY of Mississippi, and Mr. SOLOMON.

H. Res. 34: Mr. MCCAIN, Mr. LOEFFLER, Mr. GINGRICH, Mr. MURTHA, Mr. MCDONALD, Mr. MONTGOMERY, Mr. BURTON of Indiana, Mr. MARTIN of New York, Mr. SUNDQUIST, Mr. WILSON, Mrs. BYRON, Mr. DANIEL, Mr. SISISKY, Mr. DANNEMEYER, Mr. CARNEY, Mr.

SUNIA, Mr. WINN, Mr. ROBINSON, Mr. RUDD, and Mr. SHELBY.

H. Res. 37: Mr. LEVINE of California, Mrs. SCHNEIDER, Mr. HUCKABY, Mrs. HALL of Indiana, and Mr. SIMON.

H. Res. 70: Mr. OBERSTAR.

H. Res. 78: Mr. KILDEE, Mrs. JOHNSON, Mr. BARNARD, Mr. STUDDS, Mr. RATCHFORD, Mr. GEJDENSON, Mr. HORTON, Mr. DOWNEY of New York, Mr. SEIBERLING, Mr. DE LUGO, Mr. SHANNON, Mr. LUNDINE, Mr. MARKEY, Mr. MCKINNEY, and Mr. SAVAGE.

H. Res. 97: Mr. CLINGER, Mr. MOODY, Mr. RAHALL, Mr. SUNDQUIST, and Mr. YOUNG of Missouri.

PETITIONS, ETC.

Under clause 1 of rule XXII,

37. The SPEAKER presented a petition of St. Charles Parish, Hahnville, La., relative to general revenue sharing, which was referred to the Committee on Government Operations.

EXTENSIONS OF REMARKS

SPEECH BY HON. CARLOS ROMERO-BARCELÓ, GOVERNOR OF PUERTO RICO, ON PUERTO RICO'S ROLE IN THE CARIBBEAN BASIN

HON. BALTASAR CORRADA

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. CORRADA. Mr. Speaker, one of the issues left over from the 97th Congress is President Reagan's Caribbean Basin Initiative (CBI).

The proposal was approved by the House of Representatives on December 17, 1982, but was not considered by the Senate. President Reagan has repeatedly stated that passage of the CBI remains of top priority and I look forward to its consideration by the House of Representatives.

President Reagan proposed the initiative in early 1982 and it represents our Nation's first major effort in over 20 years to help spur the economic development of countries in the Caribbean Basin region.

As one of the two U.S. domestic areas in the region, Puerto Rico is very interested in this proposal. Both Governor Romero-Barceló and I have participated at many levels in the development of the Caribbean Basin Initiative.

On September 28, 1982, Governor Romero-Barceló delivered an address on "Puerto Rico's Role in the Caribbean Basin" before the Yale Political Union at Yale University. Because of the timeliness and importance of his topic as we begin the 98th Congress, I include his speech in the RECORD and urge my colleagues to read it. The speech follows;

PUERTO RICO'S ROLE IN THE CARIBBEAN BASIN

(An address by the Honorable Carlos Romero-Barceló, Governor of Puerto Rico)

Europe, Asia, the Middle East: these are the regions which have traditionally attracted most of the attention of American scholars and government officials concerned with foreign affairs. Africa has now been added to the list during the past couple of decades.

Of course, it was from these areas that most immigrant Americans originally came, so in that sense it is hardly surprising that these parts of the world have continued to generate substantial interest.

Then too, down through the years, the Eastern Hemisphere has provided the United States with many of its most important trading partners, as well as its most formidable military adversaries.

Given these circumstances, therefore, it is perhaps entirely understandable that people in the United States have rarely displayed very much interest in the other nations of our own hemisphere. And perhaps this also explains why the United States, as the overwhelmingly dominant economic and military power in this half of the world, has so often seemed to view its immediate neighbors with patronizing condescension, and to treat them all too frequently as junior partners on the international scene.

This pervasive attitude brings to mind a remark made several years ago by a prominent journalist, when he was asked why it was that the American media reported so few stories from south of the border. His answer was this: "Americans will do almost anything for Latin America except read about it."

Latin America, he continued, is one of those topics which news people describe as a "MEGO." That is an acronym for "My Eyes Glaze Over." What he was trying to say, in other words, was that Latin American news tended to put North American readers to sleep.

Times do change, however. And one current change involves public awareness of the significance of events occurring in the Western Hemisphere.

Canada is now in the news much more frequently than it used to be, and of course the conflict in the Falkland Islands was in the headlines for weeks, earlier this year.

Day in and day out, though, the principal foreign story from the Americas has without question become the economic, social, and political evolution of the Caribbean Basin.

Why? Because the Caribbean Basin is finally being recognized as one of the several world arenas in which the Soviet Union and the United States are intensely engaged in head-to-head competition. Moreover, this particular point of confrontation happens to be located on the very doorstep of the continental United States.

The largest Caribbean island is Cuba. And it is no secret that Cuba's communist regime has been extremely aggressive in seeking to undermine pro-American governments throughout the region; most notably in Central America, where the Soviet Union's long-term goal is to acquire a reliable base of operations from which to pursue influence—and possibly outright control—over the huge petroleum reserves of Mexico, as well as the vital sea lanes which pass through the Panama Canal.

The fourth largest Caribbean island is Puerto Rico, the home of 3.2 million American citizens.

As a Caribbean people ourselves, we in Puerto Rico have for many years been conscious of regional realities that, until recently, had escaped the attention of most mainland Americans. In response to these realities, we have been working energetically, for some time now, to assist our neighbors in achieving the twin goals of democratic stability and economic progress.

We have undertaken this task because we believe it is the right thing to do, as a matter of principle. But, as I shall explain in a moment, we have also undertaken it because a freer, more prosperous Caribbean Basin will directly benefit both Puerto Rico and the United States as a whole.

Although the political status of Puerto Rico is not my main topic this evening, a few words are in order at this point about how Puerto Rico's political status affects our role in the Caribbean.

As I have already indicated, the widespread perception throughout Latin America is that the United States views the area with patronizing condescension. In other words, that North Americans feel superior, and that they usually behave with arrogance and insensitivity toward their neighbors to the south.

Puerto Rico's current political status reinforces these perceptions.

Racially, culturally, linguistically, and geographically, Puerto Rico is a Latin society. But it is a Latin society whose inhabitants are natural-born citizens of the United States.

The peoples and governments of the Caribbean, and of Central and South America, are acutely conscious of the fact that residents of Puerto Rico are, by law, second class U.S. citizens. They know that Puerto Ricans on the island lack political rights at the federal level: that we cannot vote for President, and that we have no voting representation in Congress, even though the President can send our sons to fight in time of war, and even though Congress enacts the laws which govern many aspects of our daily lives.

Despite the individual liberties which Puerto Ricans enjoy as American citizens, the political status of Puerto Rico nonetheless retains definite vestiges of colonialism, due to our lack of participation in the decision-making processes of the federal government. Puerto Rico's political inferiority is recognized by our neighbors, and is frequently cited in international forums as a clear manifestation of a so-called "Yankee imperialist" mentality toward Latin American peoples.

Entirely apart from its many other virtues, therefore, the admission of Puerto Rico as America's 51st state will remove one of the major barriers to better relations between our nation and its southern neighbors.

When Puerto Rico becomes a state, Latin Americans will be obliged to re-examine their attitudes toward the U.S., because they will have seen the United States accept the people of Puerto Rico as equals, with full respect for our Spanish language and our Hispanic Afro-Caribbean culture.

This will constitute tangible action by the United States; it will speak far louder and far more convincingly than all the rhetoric of diplomats or politicians. Moreover, by removing the label of "colonial lackeys" from the international image of the Puerto Rican people, statehood will simultaneously increase Puerto Rico's ability to win new friends, and new dignity, for ourselves and for the United States, throughout the hemisphere.

In this connection, I should mention that Moscow and Havana fully appreciate how valuable Puerto Rico can be as a U.S. state. This explains why, year after year, they have consistently advocated Puerto Rico independence, both by applauding terrorist acts perpetrated by fanatics, and by campaigning openly for independence in a whole host of international organizations, even though they realize that independence

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

is the preference of only one out of every twenty voters within Puerto Rico itself.

Now let me get back to the role which Puerto Rico has been, and will be, playing in the Caribbean Basin.

Prior to World War Two, Puerto Rico was actually worse off, economically, than even the poorest of our island neighbors.

Like most of them, we depended almost entirely on a one-crop agricultural economy. In our case, that meant sugar cane.

During the years immediately following Puerto Rico's annexation by the United States in 1898, federal health-care programs drastically reduced infant mortality, with the result that by 1940 our population had increased tremendously. With so many mouths to feed, and so few resources, Puerto Rico—which had never been wealthy—sunk to an unprecedented level of poverty.

Following World War Two, however, the Government of Puerto Rico, with federal backing, launched a drive for industrialization, which proved to be successful beyond anyone's most optimistic expectations. Manufacturing replaced agriculture as the backbone of the economy, and gradually the island moved into the mainstream of modern society.

When you take into account our population density—fifteen times the U.S. national average—plus our total lack of income from mineral resources, you can begin to appreciate that our economic development has been an achievement of incredible magnitude. And it has all come about within the space of just a few decades.

What this means, in regional terms, is that Puerto Rico has set an example for its neighbors. Faced initially with circumstances even more challenging than theirs, we have acquired a vast amount of economic development experience. Others can learn from our many remarkable successes; and there are valuable lessons to be learned, too, from the mistakes we made along the way.

I am pleased to report that the Department of State, and other federal departments and agencies, have recognized Puerto Rico's potential. Thus, as we have begun to launch programs of cooperation with other Caribbean peoples, we have consistently had the support and encouragement of Washington. But the initiative has been ours, and the men and women engaged in carrying out these programs have, for the most part, been government and private sector officials from Puerto Rico.

Following President Reagan's inauguration in January 1981, the first foreign head of government to visit him at the White House was Prime Minister Edward Seaga of Jamaica. Just three months earlier, Mr. Seaga had scored a smashing electoral victory over a socialist regime which for eight years had systematically ruined the Jamaican economy, while openly flirting with the Castro government in Cuba.

In October 1981, on the first anniversary of his election, Prime Minister Seaga conferred with me in San Juan, during a visit which he himself described at a press conference as "historic."

On that occasion, the Prime Minister and I laid the groundwork for a wide-ranging program of mutual cooperation. Since then, Puerto Ricans and Jamaicans have been working together on a regular basis.

Experts from the University of Puerto Rico have assisted the Jamaican Ministry of Education in establishing a new curriculum for its agricultural college, and will provide temporary personnel for its faculty. A similar program has been put in place to upgrade the research and teaching capability of Jamaica's Institute of Science and Development.

Six agencies of the Puerto Rican government, working through our Economic Development Administration, have collaborated with their Jamaican counterparts, to draw up a joint agreement which will be signed formally next month. With the backing of the U.S. Agency for International Development, this agreement will provide for Puerto Rican technical assistance to Jamaica in such fields as construction, agriculture, industrial promotion, and the establishment of joint ventures in manufacturing.

These joint manufacturing projects illustrate perfectly one of the ways in which Puerto Rico can benefit directly from Caribbean cooperation.

When Puerto Rico first began to industrialize, we sought to attract low-wage, low-skill industries. But later on, as our educational facilities improved, and as the island acquired an outstanding reputation for its reliable, easily trained, and highly productive work force, we were able to move ahead from there, and begin to promote investment by firms manufacturing much more sophisticated products. So it is that today, our hundreds of corporate citizens include many of the world's biggest names in pharmaceuticals, precision instruments, medical equipment, and electronics. These enterprises pay better wages because they require more highly skilled workers.

By contrast, most of our neighbor islands remain at about the stage where we were thirty years ago. And this has created an opportunity: the opportunity to develop what is known as the "twin plant concept."

In essence, the twin plant concept works as follows: a corporation manufacturing complicated products can carry out simple, preliminary assembly operations in a country where wages and skill levels are low, and then ship the semi-finished goods to Puerto Rico to complete the more sophisticated final steps in the process.

Puerto Rico is already participating in twin-plant projects with Intel Corporation in Barbados, and with GTE/Sylvania in Trinidad/Tobago. And we expect soon to inaugurate such projects with the Dominican Republic and Jamaica—and on a bigger scale, since they are much larger countries.

Through these joint ventures, both Puerto Rico and our developing neighbors can benefit from investments which might otherwise not have been made in the Caribbean at all.

At an executive seminar in Puerto Rico earlier this month, the U.S. Assistant Secretary of Commerce for International Economic Policy, Raymond Waldmann, praised the twin-plant concept. Referring to our island neighbors, Secretary Waldmann said, and I quote, "This is ideal, because their lower wage costs will be complementary to your mature infrastructure, management, and marketing expertise." Mr. Waldmann also noted that Puerto Rico's economy has in the past been, in his words, "almost exclusively tied to the U.S. mainland, while ignoring the rest of the Caribbean." He applauded our determination to concentrate more on the growing market of 40-million people in the Caribbean.

That constitutes one more reason why Puerto Rico's effort to aid our neighbors is a mutually beneficial proposition. As the economies of the Caribbean grow stronger, and as their democratic political institutions become more firmly established, Puerto Rico stands to gain a whole array of new and expanding markets for the products and services we produce.

And this brings me to another observation about our political status situation.

Almost invariably, one manifestation of a colonial mentality is an inferiority complex with respect to the outside world. And the Puerto Rican politicians who oppose de-colonization have clearly reflected this character trait, in connection with our drive to increase Puerto Rico's contacts with our Caribbean neighbors.

These perennial adversaries of Puerto Rican political equality have expressed great concern that helping our neighbors will have the effect of making these other Caribbean localities more attractive to investors, and that this in turn will damage our own economy by making Puerto Rico relatively less attractive to new industry.

The Puerto Ricans who take this position are totally mistaken. Not only is their outlook exceedingly shortsighted, but it fails completely to take into account the level of progress we have achieved in Puerto Rico.

I have already mentioned several of the ways in which Puerto Rico will benefit directly from Caribbean cooperation. And as to the alleged competitive hardships that it supposedly could bring about, I need say only this: Puerto Rico is decades ahead of the average Caribbean country, in terms of economic development, and social and physical infrastructure: by the time our neighbors begin to approach Puerto Rico's current level of progress, we shall unquestionably have advanced much further forward. For example, through the expansion of our relatively recently established complex of service industries: within a few years, Puerto Rico can and should become the data-processing, financial, warehousing, and distribution center for much of the entire region.

When an economically disadvantaged community grows more prosperous, the people who were ahead at the beginning are invariably among the principal beneficiaries. I have no doubt that the same principle will apply to Puerto Rico within the Caribbean community. We are far ahead of our neighbors today, and as they grow more prosperous, Puerto Rico will leap ahead by an even greater margin.

Now, before closing, let me add a few more details on our programs of Caribbean outreach.

In addition to the countries I have already mentioned, Puerto Rico has had direct bilateral contacts with the governments of Panama, Dominica, Saint Lucia, and Curacao.

Puerto Rico has played host to major inter-American conferences on topics ranging from development financing and tropical agriculture, to energy conservation, environmental protection, and even the recovery of archeological treasures from the floor of the sea.

In these and several other ventures, our government has collaborated when appropriate with the federal government, the United Nations, and the Organization of American States. Our island's location, as the crossroads of the Caribbean, combined with our extensive facilities for accommodating visitors and providing technical support—including such essential services as simultaneous translation—make Puerto Rico the ideal site for regional meetings, and we are taking maximum advantage of these opportunities.

Elsewhere, Puerto Rican officials have begun to participate frequently as members of United States delegations at high-level international conferences on topics affecting our region. Earlier this year, I was invited to New York City for a five-nation meeting of foreign ministers, hosted by the United States, at which the topic was Caribbean Basin Economic Development. And our Secretary of State, Carlos Quirós, traveled to Paris in March with the U.S. delegation to a World Bank meeting that concerned the Caribbean. Likewise, Puerto Rican specialists have accompanied federal officials on technical assistance missions to a variety of nations throughout the Caribbean Basin during the past two years.

In summary, one of my greatest sources of satisfaction as Governor has been the progress we've made in establishing closer and more constructive ties with our neighbors.

Yet we have barely scratched the surface, in terms of our potential. In this regard, the coming years should be very exciting, and extremely productive.

Cuba is twelve times the size of Puerto Rico, has substantial mineral resources and yet has only three times as many people. In theory, Cuba should be able to exercise far more constructive influence than Puerto Rico.

Cuba has had the misfortune, however, to be ruled for generations by nearly dictatorial or dictatorial regimes like the present one, while Puerto Ricans have been practicing democracy and private enterprise.

So it is that a totalitarian Cuba exercises international influence through military power and subversion, while Puerto Rico is able to do so through education, training, commerce, and friendship.

As the U.S. Ambassador to the crucially important Caribbean Basin country stated last year, and I quote, "In dealing with the problems of the Caribbean, Puerto Ricans enjoy two advantages over other United States citizens: credibility, and a greater ability to relate to the countries of the area."

The Ambassador's point was that people always feel more comfortable in familiar surroundings; common experience improves communication, and mutual comprehension facilitates constructive interchange.

For too long, and with too many disappointing results, the United States has been awkwardly trying to win friends in Latin America. For example, Uncle Sam has done things like generously sending fancy tractors and award-winning midwestern agronomists into underdeveloped tropical countries, in a sincere effort to aid local farmers. Farmers who may never have even seen a tractor before; farmers whose crops and climate and soil conditions are completely different from those of Kansas or Iowa; farmers whose lifestyle and language may be completely foreign to a mainland American. All too often, such an aid program accomplishes little, at a very high cost.

But from now on, if all goes well, more and more of the nation's professional expertise in Caribbean countries will be provided by American citizens from Puerto Rico. Men and women who will know in advance what machinery is useful; who can relate easily to the people they meet; and who can speak, in Spanish or English, on the basis of past experiences which will closely approximate those of the people being assisted.

We in Puerto Rico are very proud of our own progress, and we look forward with enthusiasm to the increasingly important regional contributions which we expect to be making in the future.●

WHY DISARM UNILATERALLY?

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. McDONALD. Mr. Speaker, the strange rush to cut the Defense budget just does not make sense. Has a great breakthrough in the disarmament negotiations been achieved? Are there indications that the Soviet arms production lines have slowed? Has the Central Committee of the Soviet Union declared that from now on there will be no more subversion, propaganda, or espionage directed from Moscow? The answer to all the above questions is obviously no. Therefore, it is incredulous to see how many persons now advocate cutting our Defense budget when modernization of our Armed Forces is just becoming a reality.

Mr. Herbert Stein discussed this topic in the Wall Street Journal on February 11, 1983, in a very able manner. My hope is that many of my colleagues will read this column and come to their senses.

WHY DISARM UNILATERALLY?

(By Herbert Stein)

I cannot understand the mad rush for unilateral disarmament on the part of usually sensible, cautious and responsible people. I refer, if you didn't immediately recognize the description, to a large number of members of the Congress—probably a majority.

Two years ago the president, on the advice of the secretary of defense and the Joint Chiefs, recommended an increase of defense expenditures for the succeeding five years. Congress approved this. According to polls it had overwhelming support in the country. The authorized defense expansion was a response to a common observation that a decade of very low defense expenditures in the U.S. and very high outlays in the U.S.S.R. had left the U.S. in a seriously weakened relative position. Moreover, Soviet behavior, notably in Afghanistan, and the behavior of Soviet accomplices in many parts of the world, left little doubt that Soviet military power was intended to be used whenever it would be effective. The increase in U.S. defense spending was an answer to the threat posed by the relative strength and the intentions of the Soviet Union.

Now there seems to be wide demand for a substantial cut in this program. Polls show that a majority of the public thinks the defense program is too large. Businessmen, editorialists and other leaders call for cuts. And there is hardly any congressman or senator too conscious of his own ignorance to assert that the program should be cut.

What is going on here? I suppose that there is very wide support for agreed reductions or limitations of arms on both sides. But that isn't what we are talking about. We are talking about unilateral disarmament by us. We are talking about actions which would make the U.S. defense forces in 1986 or 1987 or in any other year weaker than they would otherwise be, and we are talking about doing that without asking or expecting any reciprocal reductions from the Soviets. Why are we in effect telling Mr. Andropov that the reason he doesn't have to negotiate mutual arms reduction in Geneva is that Congress will reduce U.S. arms for him?

FOUR PROPOSITIONS

Congressmen and others who assert the need for cutting the defense program hardly make any argument about the Soviet threat. The assertion is almost always based on one or more of the four following propositions, which must surely constitute as flimsy a basis as has ever been offered for a major national decision.

1. *There is waste in the defense program.* By some ideal standard that is certainly true, but it is also irrelevant. The relevant question is whether, if the defense program is cut, the cut will come entirely or almost entirely out of the waste. The cuts will be made by the same people whose decisions led to the waste. It is pitiful to hear congressmen plead with defense officials to tell them where the waste is.

There is and always will be waste in the Defense Department, just as there is in General Motors and in my household and yours. If we cut the defense program there will be some cut in waste and some cut in muscle. The notion of the defense spending cut that doesn't impair security is simply another illustration of the free-lunch fallacy.

The waste argument often casts doubt on specific weapons. MX in dense pack is the leading example. I do not myself find the dense-pack idea reassuring. But the conclusion that dense pack doesn't work wouldn't mean that the defense budget could be cut. We would still need a survivable land-based missile, and the superior alternative might be more expensive. There isn't any reason to think that correcting the mistakes of the Pentagon will save money.

2. *Increasing defense expenditures while non-defense expenditures are being cut is "unfair."* This is the typical reaction of a congressman who regards the whole function of government as the passing out of goodies among special interest groups in accordance with the principle of greasing the wheel that squeaks loudest. They think of the defense program as a handout to a special class—like our handouts to peanut farmers. But defense is a program for the benefit of the nation and for everyone now in it and yet to be born into it. To cut defense isn't "fair" to anyone.

There is a fairness issue about defense. That is the issue of how to pay for it. That is certainly debatable, but it isn't an issue about the size of the program.

3. *The survival of the free democratic system depends not only on military defense against aggressors but also on internal support for the system.*

That is probably true but surely irrelevant to our present situation. It implies that we are on the verge of great general disaffection with the system because of government's failure to provide some social benefits. The picture conjured up is of mobs rioting in the streets of Moscow on the eve of the Russian Revolution because there wasn't enough to eat. The whole idea is absurd. To suggest that the danger to our system comes not from Soviet missiles but from internal disaffection—in a country which in its last four presidential elections chose Richard Nixon twice, Jimmy Carter

and Ronald Reagan, where the whole active political spectrum runs from Alan Cranston to Jesse Helms, where poverty even by generous American standards afflicts less than 10 percent of the population, where real per capita consumption is at an all-time high—is sheer fantasy. We may need to spend more on school lunches, food stamps or fixing potholes. But they are not alternatives to defense.

The increase in the defense program will weaken the economy upon which our security ultimately depends. This is the favorite argument of "hard-headed" people—businessmen, budget-conscious congressmen and such. It sounds like an argument should be expressible in numbers. How much will the increase of defense spending reduce real output, investment, consumption or whatever else is supposed to be the content of the weakening of the economy? I have never heard any critic of the defense program attempt an answer to such questions. All we get is adjectives—"disastrous," "horrendous," "frightening," etc.

I would like to make a stab at quantifying the economic consequences of cutting or not cutting the defense program. The program included in the president's budget would raise defense spending from about 6.2% of GNP in fiscal 1982 to about 7.9% in fiscal 1988. What would be the effect on real GNP if the defense program were cut by 1% of GNP—meaning a cut of about $30 billion this year rising to about $50 billion in 1988? The answer depends on how much of the cut in defense goes into increased investment and how much goes into increased consumption. I will assume that all of the cut in defense goes into increased investment, because that is the assumption which makes the effect on real GNP greatest.

DEFENSE PROGRAM IS IMPORTANT

So the question is how much difference it would make if investment were 1% higher as a fraction of GNP than it would otherwise have been. This is a question on which economists are divided, but from the standpoint of the defense issue the division isn't very great. One of our leading students of the sources of economic growth is Edward F. Denison. The conclusion of his work, as I simplify it, is that if net investment were increased permanently by 1% of GNP, the annual rate of increase of real output would be raised by one-tenth of one percentage point. That is, if the growth rate would otherwise have been 4%, it would be raised to 4.1%. Many economists think that is too low an estimate. But at the other extreme, if all economic growth that doesn't result from an increase of hours of work is attributed to capital investment—which means that none is attributed to research, education, increases of scale, etc.—increasing net investment by 1% of GNP might raise the growth rate from 4% to 4.33%.

The Council of Economic Advisers estimates that real output will rise by 4% a year from 1983 to 1988, reaching a total of $1.819 trillion in 1972 dollars in 1988. By my estimates in the preceding paragraph, cutting the defense program by 1% of GNP and devoting the savings to private investment, starting right now, would raise 1988 real GNP by between 0.5% and 2%. That is, it would give us between $9 billion and $36 billion of real output in 1972 dollars in 1988. I can hardly believe that is what people mean when they say that cutting the defense program is needed to keep the economy strong.

I do not claim any great precision for these estimates, though I would be extremely surprised if the truth were different enough to alter the conclusion that spending 1%, 2%, or 3% more or less of GNP on defense would have little effect on the economy. But the main point is that those who see disastrous effects have an obligation to spell out the size and nature of these effects. The size of the defense program is too important to be decided by frightening but fuzzy adjectives.

[Mr. Stein is the A. Willis Robertson professor of economics at the University of Virginia, a senior fellow at the American Enterprise Institute, former chairman of the Council of Economic Advisers under Presidents Nixon and Ford and a member of the Journal's Board of Contributors.]●

SHIPPING ACT OF 1983

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. BIAGGI. Mr. Speaker, I am today introducing the proposed Shipping Act of 1983. This bill is identical in substance to H.R. 4374—which I introduced and which was passed by the House by a vote of 350 to 33 in the last Congress. A companion bill failed to come to a vote in the Senate in the last days of the session. The Senate, however, has now passed a modified version of that bill.

It is my intention and that of the distinguished chairman of the Merchant Marine and Fisheries Committee to try to match the fast action by the other body with equally quick action in this House. In view of the extensive study this legislation received in the 96th and 97th Congresses, it is appropriate that we give it early consideration now and move it as quickly as possible. The reforms proposed by the bill are long overdue.

The underlying purpose of this bill is to facilitate the revitalization of the ocean liner segment of our maritme industry. It is designed to enable our ocean common carriers to compete on a more equitable basis with foreign carriers. It will remove those constraints in our laws that render our merchant marine less efficient and less competitive.

The bill will accomplish these purposes by reinstating the exemption of the ocean liner industry from the antitrust laws. This exemption was originally provided by the Shipping Act of 1916.

Second, the bill will provide shippers with the ability to negotiate flexible terms of carriage while retaining the common carrier concept in ocean liner transportation.

A third feature of the bill is the streamlining of the processes of the Federal Maritime Commission—the regulatory agency that is charged with the enforcement of the laws governing ocean liner shipping.

It is clear to me that a healthy merchant marine is essential to our economic security and to our national defense. The bill I am introducing today is only a step—but a significant one—in achieving those objectives. It deserves the support of all Members of the House.●

AN INTERNATIONAL PERSPECTIVE ON BREEDER REACTORS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. OTTINGER. Mr. Speaker, we are often told by the supporters of the Clinch River breeder reactor about the development efforts being undertaken in other countries on breeder reactors. Proponents often claim that these efforts alone are ample justification for the expenditure of roughly $8 billion of the Clinch River breeder project. The argument for supporting breeder development seems to be one of "technological development for the sake of technological development."

A recent editorial in the highly regarded journal Nuclear Engineering International posits a frank reappraisal of the need for these programs in light of high costs and the nonexistent need for alternatives to light water reactors. Entitled "Facing Facts on East Breeders," the editorial asks: "Is this continuing level of expenditure appropriate if one takes a rational view of future trends in energy demand and fuel supply?" It quotes Sir Walter Marshall, the former head of the breeder program in the United Kingdom, as accepting that "in view of the demand for electricity and the fall in the price of uranium there is a strong a priori reason for saying that the right economic decision is to slow up."

The editorial asserts that caution is evident in all other Western countries with fast breeder reactor programs including France, "* * * where the utility Electricite de France is showing no enthusiasm for a commercial programme of fast breeder reactors to follow Super Phenix." The editorial could have added that the French originally planned to complete six Super Phenix breeders, not the single breeder they now have under construction.

The editorial also points out that although the United States is the country with the least need for the breeder, we are spending more on it than any other country. The journal states "it is difficult to see any economic or technical justification now for proceeding with Clinch River."

Last December, by more than 20 votes, a majority of Members of the House of Representatives voted to delete funds for the Clinch River breeder reactor. I predict that the House will do so again by an even

wider margin in the 98th Congress. We would do well this time to see to it that our decision is upheld.

The editorial even suggests an alternative to fast breeder reactor development; one which I have advocated for years as a more sensible, economic approach to nuclear energy use. That alternative is simply to improve the uranium fuel utilization of existing reactors. It is clear that uranium supplies will not be suddenly exhausted or become excessively expensive until the next century, if then. Moreover, world uranium supplies can be stretched by improving uranium fuel utilization in existing light water reactors and by the introduction of advanced, more fuel efficient light water reactors in the future if they are needed.

In spite of these possibilities the Department of Energy has called for a fiscal year 1984 nuclear fission R&D budget that would allocate 76 percent of the funds to the breeder program. Moreover, it has requested zero funds for the extended burnup program, a jointly funded, Federal/private sector effort aimed at improving the uranium utilization in existing light water reactors by 15 percent. Nor has DOE requested any funds to study advanced designs of light water reactors that could cut uranium consumption by 30 percent at a fraction of the cost of a breeder reactor.

By daring to say that "the Emperor has no clothes," the Nuclear Engineering International editorial provides an educated international perspective for those of us in the Congress who must decide the pace and scale of fast breeder reactor development. I commend the article to my colleagues:

FACING FACTS ON FAST REACTORS

(By Richard Masters)

The large amounts of money being spent world-wide by the nuclear industry on the development of fast breeder reactors is becoming increasingly difficult to justify.

Is this continuing level of expenditure appropriate if one takes a rational view of future trends in energy demand and fuel supply? Will it ever be possible to recoup the vast sums that have been spent and the much greater sums that will need to be spent before the fast reactor can become a commercial option for electricity utilities?

The present nationalistic and quasi-commercial approach to the development of the fast reactor in many countries is premature and can damage the prospects for the acceptance of nuclear technology. Serious reappraisal is needed of national expenditures on fast reactor r and d, and measures are urgent to bring about effective savings and improved results through international cooperation.

It is not enough to compare the production costs of one kilowatthour from an FBR with those from an LWR. This ignores all the other factors, including the time scale, involved in bringing FBRs into commercial operation. There should in each country be a systematic quantification of the costs of introducing FBRs and comparison with expected benefits, all discounted to an appropriate date with due allowance for the risks. Similar studies are also needed on an international scale. An international project does not automatically justify what does not make sense nationally.

For the past 30 years the conventional wisdom in the nuclear industry has been that fast breeder reactors will eventually take over the base load generation of electricity, at least in industrialized countries.

More generally the fast reactor has been seen as offering energy independence and a more than transitory existence to the nuclear industry.

The need to press ahead with the development and application of FBRs has been seen as urgent. In 1967 the IAEA predicted that "if only the current types of nuclear reactor continue to be built, then by 1980 all known reserves of low cost uranium would be committed". And some 10 years later the UK Atomic Energy Authority was confidently predicting an installed capacity of 33GWe of breeder capacity in Britain by 2000, with a huge expansion to follow.

Even at that time serious independent observers of the industry in Britain were questioning whether the FBR could ever be economic and there has been growing acceptance that Britain cannot justify going it alone. How many countries can?

TIMESCALE

Every year the timescale gets longer and the economics more uncertain. The British Central Electricity Generating Board in its evidence to the Sizewell inquiry says it might need to order fast reactors in 25 years from now, but adds: "There is considerable uncertainty about this date; it could be somewhat earlier or perhaps considerably later." The Board's new chairman, Sir Walter Marshall, who as chairman of the UKAEA was until recently in charge of Britains' fast reactor programme, has said that the first truly commercial fast reactor with its fuel cycle could not possibly be operating in Britain until 2013 and in practice it was more likely to be commissioned a decade later.

Sir Walter believes it would be "irresponsible" to abandon a fast reactor programme but accepts that "in view of the demand for electricity and the fall in the price of uranium there is a strong *a priori* reason for saying that the right economic decision is to slow up".

Similar caution is evident in all other western countries with fast reactor programmes including France, where the utility Electricité de France is showing no enthusiasm for a "commercial" programme of fast reactors to follow Superphenix.

The United States has the least "need" for fast reactors (and is spending the most on them) and it is difficult to see any economic or technical justification now for proceeding with Clinch River. Unfortunately here as elsewhere arguments based on national prestige are brought to bear on what should be economic decisions. The utilities and vendors in the United States, as elsewere, are putting little or none of their own money into the fast reactor. The push is coming from the scientists in the national research establishments, the existence of which is at stake.

The recent statement on fast reactors by the British government has the merit of recognizing the real position. The UKAEA, under its new chairman Sir Peter Hirsch, has been asked to draw up a development programme that is geared to the longer timescale for the likely introduction of FBRs and which takes account of the potential for securing the maximum benefits from international collaboration.

The timing is good. The Authority has an opportunity for taking a lead in specifying with a realistic r and d programme for keeping the fast reactor option open should consist of in present circumstances and how effective international co-operation might be achieved. Britain could, for example, buy into Superphenix for operating experience and offer PFR at Downreay as a test bed for components. It has unrivalled expertise on the FBR fuel cycle and also plutonium to contribute to an FBR club. In this way Britain's current r and d expenditure on fast reactors of £100 million a year could be reduced considerably. There is a precedent here in the approach by the AEA to expenditure on fusion which lead to the setting up of Jet.

Uranium will not be suddenly exhausted or become excessively expensive in the early years of the next century. There will be plenty of time to identify the trend and decide when it is worth ordering FBRs instead of thermal reactors. In any case there is scope for stretching out supplies by improving uranium utilisation in light water reactors and the introduction of reactors with better neutron economies.

But perhaps of greater significance to fast reactor economics than the availability of uranium is the fact that with advances in techniques for the storage of irradiated fuel from light water reactors utilities can avoid reprocessing. The uncertain and growing costs of reprocessing are then properly loaded on the fast reactor and with limited reprocessing there will be doubts about the availability of plutonium to fuel a large programme of fast reactors. In these circumstances the fast reactor may never be economic.

There still remains the strategic argument but the benefits must still be properly quantified and balanced against the premium it is worth paying for an insurance policy of fast reactors. At present it seems excessive. If the nuclear industry is to win support and acceptance for the fast reactor it will have to provide effective answers nationally and internationally. Evangelical fervour is not a substitute for sound technical and economic argument.●

HIGH-TECH IS NOT THE ANSWER

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. APPLEGATE. Mr. Speaker, as we all well know, American basic industries such as steel, auto and truck and appliance manufacturers, just to name a few, have been devastated by the ongoing recession. These conditions have brought about many statements indicating that we as a nation should not fight the inevitable and should, therefore, rely on the so-called high-tech field to supply jobs for the millions of workers currently unemployed. This suggestion might be considered worthwhile if there was some solid indication that high-tech would be our saving grace. However, as is indicated by an article that appeared in

the Wednesday, February 23, 1983, edition of the Wall Street Journal, there is strong evidence that we cannot rely on high-tech to supply these jobs. It was announced that Atari, Inc., a division of Warner Communications, Inc., is in the process of eliminating 1,700 jobs in California and moving them to Hong Kong and Taiwan.

This shift has not come about as a result of the elimination of a particular product, but rather is an attempt by the company to cut costs in order to remain competitive in the home computer and video game industry. Regardless of these reasons or situations that have brought them about, it is clear that having reliance on high-tech is not the answer and that we must continue to maintain our standard basic industries, though obviously not in the exact same fashion as up to this point.

The United States needs a strong manufacturing base as well as continued leadership in the high-tech areas. There needs to be a combination of the two and I believe it is incumbent upon Congress to adopt whatever policies are necessary that will allow for these types of industries to continue. Whether it be in the area of trade laws, environmental regulations, or methods of capital foundation, we must move in a direction that will benefit industry to grow and prosper. It will be up to these basic industries to also diversify, such was the case with Japan's second largest steel producer who will soon begin to manufacture volleyball shoes—you can well imagine the reaction by our steel producers if such a suggestion were made to them, but it will take this type of action to restore financial solvency to many manufacturing firms.●

LETTER TO PRESIDENT D'AUBISSON OF EL SALVADOR

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. McDONALD. Mr. Speaker, on January 21, 1983, a number of groups sent a letter of support to President Robert D'Aubisson of El Salvador in response to the interview conducted with him by the Washington Times on January 12, 1983. In the letter sent to D'Aubisson, it is stressed that our foreign policy needs to be changed to really assist those nations fighting communism with the aim of defeating communism, not merely to strive for some sort of nebulous coalition.

The letter follows for the attention of my colleagues:

COALITIONS FOR AMERICA,
January 21, 1983.

President ROBERT D'AUBISSON,
San Salvador, El Salvador.

DEAR PRESIDENT D'AUBISSON: We note with great approval your comments in an interview on the current situation in El Salvador published in the Washington Times for January 12, 1983.

The situation in El Salvador today is a repetition of a pattern developed by the totalitarian communists for the subversion of free societies and the establishment of their inhuman regimes, a pattern applied with increasing effectiveness in the last decade in such places as Vietnam, Cambodia, Rhodesia, and Nicaragua.

A central element of this pattern in its recent variants is the role of the United States—acting through the carrot of military and economic aid to a government besieged by communist-armed terrorists usually incapable of taking power by themselves—in undermining the confidence and prestige of our true friends in such countries, in applying pressure for "negotiations" with the communists, for the establishment of "coalition" governments which serve as a stepping-stone for the installation of a totally communist government and the fall of yet another country to the enemies of humanity. In the case of your country, the despicable role of underminer has been played by such men as the former American Ambassador, Robert White.

The hypocrisy of the foreign policy establishment in our country has been nowhere more starkly exposed than in its reactions to free elections in Rhodesia and your country; since the results of those elections did not suit our "experts" on foreign policy, they have done their best to undo them. You have been the victim of unjustified calumny in this area, but you defend yourself ably.

Recently, however, a small ray of hope has appeared in Central America. Both the leader of the Nicaraguan freedom fighters and you yourself have evidently realized you must act as you believe best to defeat communism in your country, with American aid if possible, but without it if accepting American aid means that you must bow to the dictates of the American foreign policy establishment, dictates which have in the past led to catastrophe for a whole series of our friends and allies across the world.

It is difficult for the political leaders of small countries to believe that the government of the United States—even under a Reagan Administration—could actively assist in the overthrow of friendly governments through political pressure and the manipulation of economic and military aid. But that, unfortunately, is the case.

Under these conditions, you are absolutely correct in your intention to pursue the objective of a free and democratic El Salvador, without regard to the wishes of the United States, and if necessary without aid from our country. We applaud your courage, and extend to you our wholehearted support.

For our part, we pledge to work untiringly to alter the catastrophic foreign policy of the United States which constantly seeks accommodation with an implacable enemy, one with whom accommodation is impossible. When that occurs, the United States will actively support, with arms and supplies, the freedom fighters in Afghanistan, Angola, Vietnam, Cambodia, Nicaragua, and elsewhere, as well as governments under siege like yours, with the single objective of the destruction of communist tyranny throughout the world.

With respect and best wishes,

Paul M. Weyrich, Coalitions for America; Amy Moritz, National Center for Public Policy Research; Dr. Ronald S. Godwin, Moral Majority; Joan Hueter, National Association of Pro-America; Karen McKay, Committee for a Free Afghanistan; Geheral Albion Knight, Conservative Caucus; L. SAVE THE KANGAROO

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. MRAZEK. Mr. Speaker, recently we received the welcome news that international pressure forced a ban on the slaughter of baby harp seals in Canada. The incident provided proof that economic pressure on those responsible for animal slaughter can be effective in preserving endangered species of wildlife.

Now, with the harp seals at least granted a temporary reprieve, it is time that we turned our attention to the plight of another endangered animal species—the Australian kangaroo. A ban on the importation of kangaroo hides and other products gleaned from the slaughter of kangaroo resulted from the Endangered Species Act of 1973. In fact, the kangaroo and the grizzly bear were the first two species to be covered by this landmark legislation. But the ban was lifted in 1981, and world demand for the hides of kangaroos has precipitated the often-brutal slaughter of approximately 6 million kangaroos annually.

Granted, Mr. Speaker, there are lots and lots of kangaroos in Australia. Estimates range up to 30 million. But when 6 million of the animals are sacrificed for American footwear and other products every year, and when the current drought conditions in Australia are the worst in the nation's history, it is easy to see that 30 million kangaroos can disappear in a hurry.

An Australian documentary entitled "Goodbye Joey" illustrates another facet of this issue. The film is a horrifying exposé of the methods employed by kangaroo hunters in Australia. These methods include throwing young kangaroos against trees to kill them, and allowing seriously wounded animals to suffer overnight before

being killed in the morning, apparently to keep the meat fresher.

Today, Mr. Speaker, I am introducing legislation to reimpose the ban in this country on the importation of certain species of kangaroos. As James Cairns, a former Minister for Trade and Environment in Australia has said, "The truth is that we probably won't do anything to save the kangaroo until America does." Let us do it.●

A HOUSE JOINT RESOLUTION PROCLAIMING NATIONAL PORT WEEK THE FIRST WEEK IN OCTOBER 1983

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. BIAGGI. Mr. Speaker, today, I, along with the leadership of the Congressional Port Caucus—Mr. JONES, Mr. HOWARD, and Mr. ROE—introduce a House joint resolution authorizing and requesting the President to proclaim the first week of October 1983 as National Port Week. Since 1978, the Congress has recognized the major contributions of commercial ports to our domestic and international trade—economic well-being—and national defense through the passage of a joint resolution declaring the first week in October as National Port Week. For all those men and women who work in and around our four seacoasts, National Port Week is an expression of appreciation—and a recognition of a job well done.

The significance of our ports to the vitality of our Nation is demonstrated by the fact that 20 percent of all our goods are produced for export. Ninety-five percent of those exports go through our national ports. From 1970 to 1980, exports increased from 4 percent of our gross national product to 8 percent. Similarly, imports increased from 4 percent of our GNP to 9 percent. These figures amount to $35 billion of our GNP and over $1.5 billion to our balance of payment accounts.

The commitment of our ports to intermodal movements has facilitated this enormous jump in trade over the last decade and a half. These figures attest not only to the viability of American goods in international markets, but also to the ability of American port facilities to handle this increase in traffic. National Port Week reminds Americans how important ports are to our economic well-being.

The port industry is responsible for more than 1 million jobs in the national economy. As well as paying more than $10 billion in Federal taxes and $5 billion in State taxes, the $6 billion they collect annually in customs receipts represents the fourth largest source of revenue to the Federal Treasury.

In these times of economic distress it is important that the United States continues to expand its foreign trade and develop new markets for our goods. Our ports are crucial if we are going to increase the overseas sale of U.S. goods. Even in the midst of these poor economic times, the ports of our country are true examples of American ingenuity—perseverance—and dedication. National Port Week recognizes their fine accomplishments and the major role ports play in our national goal of economic recovery.

We should further recognize the ports for the role they play in our Nation's security. The strength and efficiency of American ports during sustained international crisis has assured peace through strength. The diversity—depth—and efficiency of our ports contributes to our Nation's defense. Our ports enable quick movement of troops and cargo from a wide range of areas.

In these times of high military spending, we should rejoice in the existence of our posts—a vital defense resource, costing the Federal Government practically nothing. National Port Week also recognizes the importance of our ports to our Nation's deterrence strategy.

I call upon my colleagues in the Congress to cosponsor National Port Week and enact this resolution, which recognizes the importance of our ports to the Nation's economy and security.●

HALSTEAD SCHOOL

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. OTTINGER. Mr. Speaker, I would like to take this opportunity to commend the directors of the Halstead School in Yonkers, N.Y., on their efforts to raise funds for scholarships and building improvements, as well as on their record of providing top-quality education.

The Halstead School was founded in 1874 under guidance of Maria Dana Halstead, the school's first headmistress. From that time on, Halstead's reputation as a high-quality college preparatory school for women grew, as did its enrollment. In 1916 it moved from a small frame house to a modern facility. The school has had a succession of able administrators since Miss Halstead retired, including Mary Sicard Jenkins, Ruth Smith Leonard, Henry G. Krumwiede, and its present headmistress, Kathleen S. Ermini.

Halstead now provides an excellent education to both girls and boys from kindergarten through 12th grade. To broaden access to this education, the school offers academic, athletic, and special assistance scholarships. In addition to scholastics, athletics, student government, and arts are encouraged. Just this year, the Joan and Constance Bennett Theatre Arts Workshop was added and will expand to support community participation.

The school will hold a fundraiser on March 12, 1983, to raise urgently needed money to keep the facilities in good condition and to continue its scholarship program. I wish Halstead the best of luck in achieving its worthy goals.●

A GOOD DEFENSE PROGRAM

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. SIMON. Mr. Speaker, as most of you know I am not a supporter of the excesses in the defense budget and I have often taken the floor to question the waste and gold plating in some defense programs. For that reason, I am particularly pleased to be able to report a visit to a military installation where I found funds well spent and resources directed to programs I can enthusiastically support as essential to our national security.

Mr. Speaker, I recently visited the U.S. Army Russian Language Institute and had the opportunity to meet with the Commander of the Institute, Lt. Col. Jeff Kleb, his staff, and the students. I am pleased to report that I was favorably impressed with the operation of the Institute and with the obvious dedication of the commander, the faculty, and the students.

In addition, Mr. Speaker, I was pleased to see that the Army recognizes the importance of acquiring a pool of language-qualified officers in Russian, and other languages. I only wish this need were as well understood throughout the Nation.●

SOVIETS INFLUENCING GERMAN ELECTIONS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. McDONALD. Mr. Speaker, the March 6 elections in West Germany may become the most crucial political occurrence in that country since World War II.

The events leading directly to these premature elections started on October 1, 1982, when small Free Democratic Party (FDP) abandoned its 13-year-old government coalition with the Social Democratic Party (SPD) headed by Chancellor Helmut

Schmidt and entered into a new coalition with the Christian Democrats (CDU/CSU). Helmut Kohl, Chairman of the CDU, became the new Chancellor.

The new coalition could remain in power until the next regular elections in October 1984, but Helmut Kohl wanted to have a clear mandate from the electorate. He arranged for an artificial "vote of no confidence" in the Bundestag on December 17, and, consequently, the new elections are scheduled for March 6.

The Soviet post-World War II policies toward Western Europe were always dominated by one principal purpose of destabilizing and disuniting the countries of Western Europe and "decoupling" them from the United States. This basic goal of the Soviet Union had been promoted by a two-tier policy. On the first level, the Soviet Union conducts direct bilateral negotiations with separate West European nations arranging for short- and long-term collaboration and series of understandings and treaties with the country in question. The resulting economic and political bond with the Soviet Union helps to detach the target country from its natural West European-United States alliance. This policy produced very positive results for the Soviet Union in France in 1966. General de Gaulle was reelected for a second term as President of France in December 1965. The intensive Franco-Soviet negotiations produced a series of agreements and a prolonged visit of General de Gaulle in the Soviet Union. The Franco-Soviet Friendship Society propagated the idea that political independence of France suffered from her NATO membership. Finally, on March 11, 1966, de Gaulle announced the withdrawal of France from NATO. When this decision took effect in 1967, it was a major turning point in the post-World War II history, a setback for the free-world and an achievement for the Soviet policymakers.

On the second level, the Soviet Union uses the so-called active measures in order to subvert, weaken, and disrupt the West European countries from within. This is the area of direct and indirect infiltration, peace movements, terrorism (Red Brigades, Bader-Meinhof gangs and others), protest marches, demonstrations, et cetera. Sometimes the overzealous efforts on one level interfere with the other, causing delays and reverses.

After the 1969 elections in West Germany, the SPD-FDP coalition was headed by SPD Chairman, Chancellor Willy Brandt. The new era of Soviet-German relations was launched under the name of an "Ostpolitik" policy. A treaty with the U.S.S.R. signed in Moscow in August 1970 was followed by similar understandings with Poland and Czechoslovakia 3 months later. Both German states, East and West, were admitted to the Union Nations in 1973 and Willy Brandt was a winner of a Nobel Peace Prize for his foreign policies. But then a KGB spy scandal exploded when one of the closest associates of Chancellor Brandt, Gunter Guillaume, was accused and proven to be an espionage agent of the East German MFS (Ministry for Security) which is an extension agency of the Soviet KGB. Brandt was forced to resign in May 1974. He was succeeded by a moderate Social Democrat, Helmut Schmidt, who did not continue Brandt's pro-Soviet policies as vigorously as his predecessor. The relative lack of cooperation from Schmidt annoyed Soviet decisionmakers and they started using active measures against him. That was the origin of the terrorist activity in West Germany in 1975 and 1976 which became especially severe in 1977. This led to the passage of a new law increasing the authority of the policy in 1978, and that in turn evoked a controversy in Schmidt's party, the SPD.

The Soviet Union exploited effectively the leftist groups within the SPD and in particular among the Jusos, the Young Socialist League. They demanded reforms within the party and the change of leadership. Protest marches and massive demonstrations previously unknown in West Germany became a constantly growing phenomenon. By 1978 the national tension reached its peak. This was the time when the Soviet operatives discovered Petra Kelly as she wrote her famous letter of resignation from membership in the SPD to Chancellor Schmidt.

Petra Karin Kelly is not a person; she is a special occurrence of the post-World War II Germany. A free spirit and free soul, she is greatly offended if accused or suspected of being manipulated or influenced by an outside force. When Petra was 7, her father abandoned the family, and her mother married an American officer, John Kelly, stationed in Germany. Several years later, Kelly was transferred back to the United States. Petra graduated from American high school and with honors from the School of International Service of American University. A talented and inquisitive young woman, Petra was involved in the Vietnam war debates of that time, participated in Bobby Kennedy's Presidential campaign, and, after graduation obtained a scholarship to study in Amsterdam where she secured her master's degree. In 1973, Petra Kelly returned to Germany and joined the Social Democratic Party, becoming very active in the Jusos. Like many young left-wing Social Democrats, she was unhappy with the moderate policies of Helmut Schmidt, and, in December 1978, wrote her letter of resignation from the SPD. This is how the Greens were born.

The new pacifist, antinuclear, clean environment, nonconformist group, which called itself the Green Party and was started in 1979 by Petra Kelly and a bunch of former Jusos and Marxists, rapidly became a political force. The Marxist and Communist elements in the Greens are better organized and more talented than the rest of the naive and good-natured environmentalists. The tone of the movement was pro-Soviet from the very beginning and became more pronounced with time, when the main line of the attacks has been directed toward the stationing of American missiles in Germany, against pro-United States orientation of West Germany's governments. Says Petra Kelly "I'm very tolerant of Communists" and "There is a great sympathy toward Russians in Europe—they suffered 20 million casualites in World War II."

The main theme of the Soviet diplomacy for the March 6 elections revolves around the concept of "We Europeans," in which the Soviets on one hand attempt to intimidate the West Europeans by their overwhelming military presence in close proximity to their borders, and, on the other, invite the program of close economic cooperation if corresponding political arrangements are made. The Soviet push is direct and persistent. They invited SPD candidate for chancellorship, Hans-Jochen Vogel, for a long, 2½-hour conference with Yuri V. Andropov, the new Soviet leader, and transmitted through him a new disarmament proposal, thus boosting his standing in West Germany.

Soviet Foreign Minister A. A. Gromyko visited Bonn in February to speak about the inadvisability of stationing U.S. missiles (Pershing II) in Europe, and on February 24 gave an interview with the Soviet newspaper Pravda urging the West Europeans to "show the signs of political maturity" by resisting by their voting the deployment of the U.S. missiles. This interview and an article in the next day's Pravda entitled "Sanity Must Prevail" were massively distributed in West Germany in German translation last Sunday preceding the election by only 1 week.

Chancellor Helmut Kohl accused the Soviet Union of blatant interference in the internal political processes in West Germany, but this response and the presence of Vice President GEORGE BUSH for a short visit in West Germany seems not to have changed the minds of many West Germans.

But some other problems created a turn toward the Christian Democrats in the last 2 weeks. The February un-

employment figure reached 2,500,000 a level which was considered for some time to be the watershed for the SPD's irresponsible economic policies of the last 13 years. Helmut Kohl's appeal of returning to the market economy as opposed to 13 years of social market economy has a strong attractiveness to practical minded Germans.

The other SPD problem is the recent Franke scandal which revived the old case of Gunter Guillaume which forced the resignation of Willy Brandt in 1969. Last September, a Soviet spy, Aleskey M. Kozlov, was brought to West Germany from South Africa under heavy escort by South African commandos for a swap for West German inmates in East Germany arranged as previously by an East German lawyer, Wolfgang Vogel (no relation to SPD chancellor-candidate). It was later established, after the Ministry of Inter-German Affairs headed by Egon Franke was transferred to the new CDU minister, Hans Barzell, that during this transfer of prisoners, 460,000 German marks were paid (and not officially reported) to the East German or Soviet recipient known only as Boris. An investigation of several weeks established that these uncontrolled money transfers took place in many instances of the prisoner swaps (including Gunter Guillaume) and that the overall missing account funds amount to not less than 5.6 million marks. This issue revived all previous dark shadows over the SPD; and Willy Brandt's, Helmut Schmidt's and other assurances of former Minister Franke's integrity notwithstanding, the affair will take many votes from the SPD.

In general, Helmut Kohl, who is not very charismatic, conducts a very positive campaign, appealing to traditional German values of diligence, thrift and a strong family. He seems to have increased considerably the vote-getting power of the CDU. The reckless accusations by the left-wing SPD who call Kohl the Raketenkanzler, the missile chancellor, may have added to his popularity instead of detracting from it.

The polls of February 25, show the CDU/CSU at about 47-49 percent of the total and the SPD about 42-43 percent. It is still not clear if either the Green or the FDP will make the 5 percent hurdle to be represented in the Bundestag, both now being below this figure.

If the Greens and not the FDP achieve 5 percent, then the "red-Green" government will prevent the deployment of American missiles, and, in the long run, can completely decouple West Germany from the United States.●

THREE CRITICAL ISSUES

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. PHILIP M. CRANE. Mr. Speaker, one of my constituents, Mr. Richard B. Clark, of McHenry, Ill., has written to me expressing his views on three topical issues currently under consideration by the Congress.

While I recognize that each Member of this body receives numerous letters, I would urge them, as parents and as legislators, to take a few moments to consider this brief and perceptive missive from Mr. Clark:

McHENRY, ILL.,
February 16, 1983.

Hon. PHILIP M. CRANE,
Representative in Congress, Longworth House Office Building, Washington, D.C.

DEAR MR. CRANE: Several pieces of legislation have been in the headlines recently that are apparently very controversial. I, therefore, would like to express my opinions on those issues.

Regarding the disclosure to parents of the use of contraceptives by teenagers, I believe that the parents have a right, even a responsibility to know, if their minor child is using these medications or devices. Since parents are held morally, legally, and financially responsible for their children until they reach maturity how can anyone support the withholding of information from parents without also absolving them of the other responsibilities? However, to remove this responsibility from the parents is totally against the family structure upon which this country was founded and would make children responsible for their own behavior when they are not yet mature enough to make their own decisions.

The withholding of 10 percent of any interest earned on savings accounts will be an additional expense incurred by the Government that we, the taxpayers, can ill afford. It will generate no new revenues, although revenues will be collected during the year instead of at the end, but expenses, which will add to the existing huge deficit, will be incurred. I, therefore, favor the repeal of this existing tax law.

Finally, in regard to the jobs program currently being addressed by the Congress, I am not in favor of this program, as it will only become another welfare program under a different name, which will prolong the existence of the huge federal deficit, keep interest rates high, and ultimately prolong the stagnation of our economy. As pointed out in the "Wall Street Journal", the jobs program implemented by the Carter administration was held partly responsible for the high inflationary period we were in as well as leading us into this current economic downturn.

Sincerely,

RICHARD B. CLARK.●

USIA YOUTH EXCHANGE

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. KEMP. Mr. Speaker, President Reagan and Charles Wick, the Director of the U.S. Information Agency (USIA), have begun the President's International Youth Exchange Initiative (PIYEI) which is an important program designed to promote understanding between American youth and young people from foreign countries.

This program is an ideal combination of education and diplomacy. And now, the local PIYEI in Boston, Mass., has added a new dimension—focusing its activities on inner-city youth exchanges.

I want to recommend to my colleagues the following article from the Christian Science Monitor which outlines the excellent headway President Reagan and USIA Director Wick are making on this program.

[From the Christian Science Monitor, Feb. 28, 1983]

SPINOFF OF '82 VERSAILLES SUMMIT: STUDENT EXCHANGES

REAGAN'S ENTHUSIASTIC BACKING FOR PROJECT SURPRISES SKEPTICS

(By Rushworth M. Kidder)

Can American teen-agers ease the strains in the Atlantic alliance?

Twenty million dollars say, "Yes."

That's the amount of money President Reagan has called for in his President's International Youth Exchange Initiative (PIYEI)—a public/private partnership designed to increase the number of exchanges of 15- to 19-year-olds between the United States and the other six nations that met at the Versailles summit in June of 1982.

And if the local PIYEI coordinating group in Boston has its way, some of that money will be steered toward inner-city students—a group that traditional youth-exchange programs have left almost untapped.

When he kicked off the program last May, the President noted that "one of the best ways to develop more accurate perspectives on other nations and on ourselves is for more Americans to join, for a time, a family and a community in another land."

The initiative, now headed by Charles Z. Wick, director of the United Staes Information Agency (USIA), caught many youth-exchange officials by surprise. Coming from a President not noted for international concerns—and whose conservative constituency seems to some observers to be oriented more toward protectionism than overseas interests—it was greeted with some skepticism.

But the Versailles summit partners joined in the initiative, and last October the US Senate passed a resolution supporting it. Now, after months of planning, it is moving ahead on three fronts:

Local. Committees in 19 "pilot project" communities around the country, from Charlotte, N.C., to Salem, Ore., are researching ways to promote international exchanges within their communities. The local committees work through such established programs as AFS, Youth for Understanding, and the Experiment in International

Living—tying the project closely to international support groups already in place in the communities. The pilot projects were established through grants from the USIA and the Kettering Foundation.

National

A national Council for International Youth Exchange has been formed to coordinate private-sector fund raising. Composed of some 100 top US leaders in business, industry, and education, it met in January and established the goal of raising $10 million. It already has some $2.4 million on hand: $1 million in private funds originally contributed to but never needed for President Reagan's 1981 inaugural, and $1.4 million from corporate and foundation donors. The money will be used to double (from 5,000 to 10,000 a year) the numbers of US exchange students travelling abroad over the next three years.

International

Representatives from the summit countries—Canada, France, Germany, Italy, Japan, Britain, and the US—held a three-day meeting in Williamsburg, Va., late last month to plan the exchanges. "Every country has the complete freedom to define its collection of activities which it wants to call youth activities," says USIA official Molly Raymond. She says the meeting produced "a real sense of commitment" from the member nations.

There are still some rough patches to be ironed out, however. One close observer, full of praise for the community-level approach, expressed concern that the USIA was turning the project into a "top down" effort orchestrated from Washington.

Some youth-exchange organizations initially felt excluded from the planning process. The plans named a consortium of eight groups as potential recipients for the money—and left out others, such as the YMCA. But Alice Mairs, the YMCA's director of international program services, says she's now been assured consortium members will not be the only ones to receive funding.

Some exchange officials also worry that the program is too narrowly conceived. Ms. Mairs notes that German officials, with whom she met in December, hope to expand their exchanges beyond the teen-age, home-hosted, full-term academic programs encouraged by the PIYEI. They would like to include nonstudent farm youth, for example, or sports teams. AFS official Susan Steel says her program, in order to remain nonideological and apolitical, must spread its funding across all 60 countries it serves. Any proposal it makes for PIYEI funding, she says, will be designed to "expand international exchanges with all our countries"—and not just those in the Western alliance.

But Mr. Wick says he is "very satisfied" with the progress—adding that "In taking soundings, we are encouraged that we are on a sturdy, sound course."

At this point, much of the planning remains in flux. The local community group in Boston, for example, is apparently unique among the 19 in focusing on inner-city exchanges.

The problems, say those close to the process, are formidable. Inner-city students sometimes lack adequate preparation in a second language. City schools often have no traditions of accepting foreign students, and the communities frequently lack suitable host homes. "It is too often considered by many of our students a broadening cultural experience to go from one neighborhood to another," says Boston School Committee president Kevin McCluskey.

But exchanges do occur. Kitty Flynn, a mother in the inner-city Boston neighborhood of Dorchester, has hosted students from Colombia, Finland, Norway, Belgium, and Germany through Youth for Understanding. "This exchange business really does work," she says.

EUROPEAN TOUR FOR AN INNER-CITY GIRL

Designer jeans, red belt, pearl-buttoned blouse—Sharon Brown fits right in with the rest of the predominantly black student body at the once-elegant Jeremiah E. Burke High School in a run-down section of Roxbury.

Except for one thing. Sharon, a junior who lives just around the corner from the school, spent five weeks last summer in Europe. By her own admission, it changed her life.

Sitting in a cramped basement office set aside for an interview, she recalled her trip to London, Paris, and Spain—including the three weeks of living in a dormitory at the University of Salamanca and studying Spanish. "It made me respect other people's cultures more—to learn how they act and see how they do," she says.

"I didn't think I was going to be speaking as much Spanish," she added with a smile. But she says that while "there's not that many black people in Spain," she "didn't feel any prejudice."

Sharon is one of very few American inner-city students who have had such an opportunity. When a Roxbury community-based agency, Freedom House, announced plans to send two students abroad on a trip organized by the American Institute for Foreign Study of Greenwich, Conn., she was recommended by her Spanish teacher. Funds for her trip—about $3,300, all expenses paid—came from a local chapter of National Links Inc., a nationwide organization of black women. Muriel Snowdon of Freedom House says that while her group has helped organize exchanges for 15 years, "funding these programs is not an easy job." Her organization has no plans to send Burke students abroad this summer.

Part of the problem: finding students prepared to go. Spanish classes at Burke, for example, stop after sophomore year—and typically focus much more on reading and writing than on speaking.

So, for all she has learned, Sharon will have to wait until college to pursue her Spanish. Does she speak Spanish at all now? she was asked. "Nope," she said. Does she wish she could? "Yep," she grinned.●

VOTING RECORD

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. UDALL. Mr. Speaker, it has become my practice from time to time to list my votes in the House of Representatives here in the CONGRESSIONAL RECORD. I strongly believe that the people of Arizona have a right to know where I stand on the issues decided by the House, and I have found that printing my record here is the best way to provide that information.

This is not an all-inclusive list. I have omitted noncontroversial votes such as quorum calls, motions to resolve into the Committee of the Whole House, and motions to approve the Journal of the previous day.

The descriptions are necessarily somewhat short, and I am sure that some of my constituents will have additional questions about the issues described here. So I invite them to write me for specifics, or to visit my district office at 300 North Main in Tucson or 1419 North 3d Street, suite 103, in Phoenix.

The list is arranged as follows:

KEY

1. Official rollcall number;
2. Number of the bill or resolution;
3. Title of the bill or resolution;
4. A description of issue being voted on;
5. The date of the action;
6. My vote, in the form Y=yes, N=No, and NV=not voting;
7. The vote of the entire Arizona delegation, in the form (Yes-No-Not voting);
8. An indication whether the motion or amendment was passed or rejected; and
9. The total vote.

140. H.R. 5922. Urgent Supplemental Appropriations, Fiscal 1982. Adoption of the rule, (H. Res. 502) waiving points of order against the conference report on the bill to provide supplemental appropriations of $8,924,835,000 for fiscal 1982 and to rescind previous appropriations of $5,678,120,000. Adopted 257-155: Y (1-3-0), June 16.

141. H.R. 5922. Urgent Supplemental Appropriations, Fiscal 1982. Motion that the House concur in a Senate amendment, with an amendment, to rescind fiscal 1982 budget authority of $4,098,640,000 for annual contributions for assisted housing and $1,579,480,000 for the rent supplement program. Motion agreed to 312-96: Y (4-0-0), June 16.

142. H.R. 5922. Urgent Supplemental Appropriations, Fiscal 1982. Motion that the House concur in a Senate amendment to rescind $3,340,000 of fiscal 1982 contract authority in the rent supplement program. Motion agreed to 299-104: Y (4-0-0), June 16.

143. H.R. 5922. Urgent Supplemental Appropriations, Fiscal 1982. Motion that the House concur in a Senate amendment to establish a $3,000 annual limit on business related tax deductions for Washington, D.C., living expenses claimed by individual members of Congress, with an amendment to limit annual outside income earned by members of Congress to 30 percent of their annual congressional salaries. Motion agreed to 381-29: Y(4-0-0), June 16.

144. H.R. 6094. International Trade Commission Authorization. Ways and Means Committee amendment to remove the $25,000 cap on overtime pay for U.S. Customs Service employees. Adopted 220-178: Y(1-3-0), June 16.

145. H.R. 6094. International Trade Commission Authorization. Passage of the bill to authorize appropriations for fiscal year 1983 of $19,737,000 for the U.S. International Trade Commission, $568,801,000 for the U.S. Customs Service and $10,100,000 for the Office of the U.S. Trade Representative. Passed 337-67: Y(2-2-0), June 16.

147. H.R. 5879. Refugee Assistance Act Amendments. Adoption of the rule (H. Res. 499) providing for House floor consideration of the bill to reauthorize programs that reimburse states for cash, social services and medical assistance to refugees. Adopted 388-3: Y(4-0-0), June 17.

148. H.R. 4326. Small Business Innovation Development Act. Adoption of the rule (H. Res. 501) providing for House floor consideration of the bill to strengthen the role of small firms in federally funded research and development. Adopted 388-6: Y(4-0-0), June 17.

149. H.R. 4326. Small Business Innovation Development Act. Motion that the House resolve itself into the Committee of the Whole for consideration of the bill to strengthen the role of small firms in federally funded research and development. Motion agreed to 383-5: NV(3-0-1), June 17.

150. H.R. 4326. Small Business Innovation Development Act. Amendments to exempt the Department of Defense and the Department of Energy's atomic energy defense programs from the provisions of the bill. Rejected 90-295: N(2-1-1), June 17.

151. H.R. 4326. Small Business Innovation Development Act. Amendment to exempt all health-related research conducted under the Department of Health and Human Services from the scope of the bill. Rejected 164-193: Y(2-1-1), June 17.

153. S. Con. Res. 92. First Budget Resolution, Fiscal 1983. Motion to approve the substitute resolution, agreed to by Senate-House conferees but reported in technical disagreement, to set budget authority, $822.39 billion; outlays, $769.8 billion; revenues, $665.9 billion; deficit, $103.9 billion. the resolution also set preliminary goals for fiscal 1984-85, revised budget levels for fiscal 1982 and included reconciliation instructions requiring House and Senate committees to recommend legislative savings to meet the budget targets. Motion agreed to 210-208: N(2-1-1), June 22.

154. H.R. 5879. Refugee Assistance Act Reauthorization. Passage of the bill to reauthorize for one year refugee assistance programs established in 1980 and to place new conditions on refugee eligibility for public assistance. Passed 357-58: Y(2-1-1), June 22.

155. H.R. 4326. Small Business Innovation Development Act. Amendment to eliminate the mandatory set-asides and require certain federal agencies to reserve a portion of their research and development budgets for small firms, while allowing Congress to decide through the authorization and appropriations process the actual amount spent on small businesses. Rejected 118-290: Y(2-1-1), June 22.

156. H.R. 4326. Small Business Innovation Development Act. Amendment to exempt the National Institutes of Health from the set-aside provisions of the bill. Rejected 169-228: NV(1-1-2), June 22.

158. H.R. 4326. Small Business Innovation Development Act. Motion that the House resolve itself into the Committee of the Whole for consideration of the bill to strengthen the role of small, innovative firms in federally funded research and development. Motion agreed to 389-2: Y(3-0-1), June 23.

159. H.R. 4326. Small Business Innovation Development Act. Passage of the bill to strengthen the role of small, innovative firms in federally funded research and development. Passed 353-57: Y(1-2-1), June 23.

160. H.R. 6631. Relief for Lebanon. Passage of the bill to authorize $50 million in emergency aid to relieve suffering in Lebanon resulting from the June 6 invasion by Israel. Passed 334-70: Y(1-2-1), June 23.

161. S. Con. Res. 98. Thailand's Bicentennial. Adoption of the resolution to congratulate Thailand on the Rattanakosin Bicentennia, the 200th Year of the Charki Dynasty. Adopted 398-1: Y(3-0-1), June 23.

162. H.R. 6337. Energy Emergency Preparedness. Amendment to require the president to fill the Strategic Petroleum Reserve at the rate of 200,000 barrels of petroleum products per day until the reserve has reached the level of 750 million barrels, and to require that at least 140 million barrels be stored in new steel tanks. Rejected 110-282: N(0-3-1), June 23.

163. H.R. 6337. Energy Emergency Preparedness. Passage of the bill to set a minimum fill rate for the Strategic Petroleum Reserve of 200,000 barrels of petroleum products per day until the reserve has reached the level of 500 million barrels of oil, to extend until June 30, 1985, the immunity from antitrust laws granted oil companies that share information with the International Energy Agency, and to require the president to report to Congress on various aspects of the administration's plans for dealing with an energy emergency. Passed 396-3: Y(3-0-1), June 23.

165. H.R. 5922. Urgent Supplement Appropriations, Fiscal 1982. Passage, over President Reagan's June 24 veto, of the bill to provide supplemental appropriations of $8,924,835,000 and to rescind previous appropriations of $5,678,120,000. Rejected 253-151: Y(1-1-2), June 24.

166. H.R. 6682. Urgent Supplemental Appropriations, Fiscal 1982. Passage of the bill to provide supplemental appropriations of $5,924,835,000 and to rescind previous appropriations of $5,678,120,000. Passed 267-106: Y(1-1-2), June 24.

167. H.R. 6685. Urgent Supplemental Appropriations, Fiscal 1982. Passage of the bill to provide supplemental appropriations of $4,524,123,000 and to rescind previous appropriations of $4,098,640,000. Passed 342-25: Y(2-0-2), June 24.

169. H.R. 6198. Copyright Manufacturing Clause Protection Act. Passage, over President Reagan's July 8 veto, of the bill to extend for four years the "manufacturing clause" in U.S. copyright law, which requires that English language books and periodicals by U.S. authors be printed and bound in the United States or Canada to receive full copyright protection. Passed 324-86: Y(2-2-0), July 13.

170. H.R. 6682. Urgent Supplemental Appropriations, Fiscal 1982. Passage, over President Reagan's June 25 veto, of the bill to provide supplemental appropriations of $5,924,835,000 and to rescind previous appropriations of $5,678,120,000. Rejected 242-169: Y(1-3-0), July 13.

171. H. Res. 518. House Ethics Investigation. Motion to suspend the rules and adopt the resolution to authorize the House Committee on Standards of Official Conduct to investigate allegations of improper sexual conduct or illegal drug use by members, House officers or employees, particularly House pages. Motion agreed to 407-1: Y(4-0-0), July 13.

172. H.J. Res. 494. El Salvador Aid Conditions. Motion to suspend the rules and pass the joint resolution conditioning further U.S. aid to El Salvador on the president's certification to Congress that El Salvador was making "good faith efforts" to investigate and to bring to justice those responsible for the murders of six U.S. citizens in 1980 and 1981. The president also would have to certify that El Salvador was taking "all reasonable steps" to investigate the disappearance of journalist John Sullivan in 1981. Motion agreed to 399-1: Y(4-0-0), July 13.

173. H.J. Res. 400. Roosevelt Memorial. Amendment to prohibit expenditure of funds authorized under the bill except in the context of a balanced federal budget. Rejected 158-247: N(2-2-0), July 14.

174. H.J. Res. 400. Roosevelt Memorial. Passage of the joint resolution to authorize the expenditure of such sums as may be necessary to construct a memorial to the late President Franklin Delano Roosevelt in West Potomac Park in Washington, D.C. Passed 254-151: Y(2-2-0), July 14.

176. H.R. 6685. Urgent Supplemental Appropriations, Fiscal 1982. Motion that the House agree to the Senate amendment, with an amendment, embodying the conference report on the bill, to provide $5,448,452,000 in new budget authority and $5,849,120,000 in rescissions. Motion agreed to 389-13: NV(2-0-2), July 15.

177. H.R. 5617. Coast Guard Authorization. Adoption of the rule (H. Res. 520) providing for House floor consideration of the bill to authorize appropriations for Coast Guard activities in fiscal 1983 and 1984. Adopted 394-1: NV(2-0-2), July 15.

178. H.R. 5617. Coast Guard Authorization. Passage of the bill to authorize $2.55 billion in fiscal 1983 and $2.759 billion in fiscal 1984 for Coast Guard activities. Passed 348-25: Y(3-0-1), July 15.

179. H. Con. Res. 278. Older Americans Employment. Motion to suspend the rules and adopt the concurrent resolution to express the sense of Congress in support of maintaining current employment levels in the community service employment for older Americans program. Motion agreed to 407-4: Y(4-0-0), July 20.

180. H.R. 5228. Physical Protection of Nuclear Materials. Motion to suspend the rules and pass the bill to make it a federal crime to unlawfully obtain nuclear materials and use them to terrorize or harm individuals. Motion agreed to 396-9: Y(4-0-0), July 20.

181. H.R. 6258. International Travel Act Authorization. Motion to suspend the rules and pass the bill to authorize $10 million in fiscal 1983 for the U.S. Travel and Tourism Administration. Motion rejected 241-167: N(1-3-0), July 20.

182. H. Con. Res. 310. Cyprus Dispute. Motion to suspend the rules and adopt the concurrent resolution stating the sense of Congress that the president should consider appointing a personal representative to seek an end to the dispute over Cyprus between Greece and Turkey, should urge Turkey to take steps to withdraw its forces from Cyprus and should support United Nations efforts to end the dispute. Motion agreed to 405-6: Y(4-0-0), July 20.

183. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Amendment to delete from the bill $699 million for one Trident missile-firing submarine. Adopted 344-65: Y(3-1-0), July 20.

184. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Amendment to delete from the bill $2.07 billion for various Army, Navy and Air Force procurement programs. Adopted 406-6: Y(4-0-0), July 20.

185. H.R. 6030. Defense Department Authorization, Fiscal 1983. Amendment to delete from the bill $398.5 million for various operations and maintenance programs. Adopted 386-19: Y(4-0-0), July 20.

186. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Amendment to reduce the bill by $50.9 billion and prohibit procurement of MX, Pershing II or cruise missiles, B-1 bombers and nuclear-powered aircraft carriers. Rejected 55-348: N(0-4-0), July 20.

188. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Substitute for the

Mavroules, D-Mass., amendment, to authorize $1,141,900,000 for the MX intercontinental missile; the $259,900,000 of the amount for MX basing and deployment could not be obligated until the 30 days after the president notified the Congress that a basing mode had been selected. The Mavroules amendment would have deleted all money for the MX missile. Adopted 212-209: N(3-1-0), July 21.

189. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Substitute for the Dicks, D-Wash., amendment, to prohibit use of any funds in the bill for purchase of new strategic airlift aircraft for the Air Force, except for the KC-10 aircraft. The Dicks amendment prohibited use of funds in the bill to purchase additional C-5 aircraft and authorized $350,000,000 for procurement instead of the "most cost-effective" commercial wide body aircraft. Rejected 74-344: N(0-4-0), July 21.

190. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Amendment to prohibit use of funds in the bill to purchase additional C-5 aircraft and to authorize $350,000,000 for procurement instead of the "most cost effective" commercial wide-body aircraft. The intent of the amendment was to require the Air Force to buy Boeing 747 aircraft. Rejected 127-289:Y (3-1-0). July 21.

191. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Amendment to delete from the bill $508,600,000 for procurement of Pershing II ballistic missiles. Rejected 74-311: N(0-3-1). July 21.

192. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Motion that the House resolve itself into the Committee of the Whole for further consideration of the bill to authorize fiscal 1983 appropriations for the Defense Department. Motion agreed to 388-1: Y(2-0-2). July 22.

193. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Amendment to prohibit the use of any authorized funds for procurement of binary chemical munitions of production equipment for such weapons. Adopted 232-181: Y(1-2-1). July 22.

194. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Amendment to ban the production of binary munitions unless once existing chemical weapon were destroyed for each new binary weapon built. Rejected 192-225: N(2-1-1). July 22.

195. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Amendment to delete $54 million earmarked for procurement of binary chemical munitions and barring the use of any authorized funds for that program. Adopted 251-159: Y(1-2-1). July 22.

196. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Amendment to delete $4.03 billion for procurement of the B-1 bomber. Rejected 142-257: Y(1-2-1). July 22.

197. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Amendment to delete $6.87 billion for two nuclear-powered aircraft carriers. Rejected 83-303: N(0-3-1). July 22.

198. H.R. 6030. Defense Department Authorizations, Fiscal 1983. Amendment to delete $10.5 billion for nuclear weapons authorizations. Rejected 21-355: N(0-3-1). July 22.

199. H.R. 2329. Cherokee Indian Claims. Passage of the bill to waive the statute of limitations and grant jurisdiction to the Court of Claims or U.S. District Court for the Eastern District of Oklahoma to resolve two longstanding compensation claims of the Cherokee, Choctaw and Chickasaw Indian Nations of Oklahoma. Passed 293-26: Y(1-0-3). July 23.

200. H.R. 2643. Airport and Airway System. Motion to order the previous question (thus ending debate and the possibility of amendment) on the rule (H. Res. 489) providing for the House floor consideration of the bill. Motion rejected 135-178: Y(1-0-3). July 23.●

THE POVERTY TRAP

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. SIMON. Mr. Speaker, Don Wycliff and Alan P. Henry had an article in the Chicago Sun-Times recently, and had some conclusions about what they call the poverty trap.

It is a substantial article that I urge my colleagues in the House and Senate to read.

At one point, they have this key statement:

Jobs are the key to solving not just the financial problems of the poor, but many of the other problems that grow out of poverty, such as crime and family dissolution. However, some people see the Reagan program as an effort to condition the country to accept more unemployment, not less.

It may well be, as the article asserts, that we are getting accustomed to high unemployment and do not see its evil as we once did.

I hope that is not the case.

I urge my colleagues in the House and Senate to read this article.

[From the Chicago Sun-Times, Nov. 21, 1982]

FINDING HOPE FOR THE POOR

(By Don Wycliff and Alan P. Henry)

By any yardstick—the dollars it costs, the people it envelops, the scars it leaves on whole cities—poverty remains a deep and intractable problem.

But the tragedy of it may have been expressed best by a West Side girl who, at 19, should be on the threshold of young womanhood, looking ahead to career and family.

Instead, she is an unmarried mother of two and a high school dropout, and her words are those of a person much older and tragically careworn:

"Seems like all the excitement is leaving out of my life instead of coming in."

George Gilder, the reigning conservative economic guru, observes that poverty is less a matter of finances than of prospects. If that is so, then the young woman's prospects, her life chances, would seem to have been very nearly extinguished.

And merely by being born to someone of her demographic description—teenager, black, unmarried, dropout, on welfare—her two young sons have entered life with severely diminished prospects for anything except to become members of what urbanologists now called the permanent underclass.

After burrowing for weeks among the statistics, the literature and the people of the so-called underclass, certain conclusions seem inescapable.

Before anything can be changed, attitudes must change.

Initially, mainstream America must come to more realistic terms with its own perception of the problem. The very term "underclass," so casually and universally accepted now by the public, politicians, academics and the media, suggests the first step toward understanding of poverty has still not been taken.

Why? The term is a convenient label. A quick and easy compartmentalization. A means to make it easier for most of us to say, "OK, these people are underclass and there is nothing that can be done for them."

If poverty is less a matter of finances than of prospects, then prospects are largely a matter of finances. According to Sar A. Levitan, director of George Washington University's Center for Policy Research, during the first year of Ronald Reagan's economic recovery program, the 5 percent of the population with the highest annual incomes received a net gain of $9 billion in overall wealth, while those with incomes below the national median had a net loss of $18 billion. So far, the promised payoff in greater capital investment and more jobs hasn't materialized.

Jobs are the key to solving not just the financial problems of the poor, but many of the other problems that grow out of poverty, such as crime and family dissolution. However, some people see the Reagan program as an effort to condition to accept more unemployment, not less.

"It's like highway accidents," says John Connelly of Jobs for Youth Inc. "You'll have 65,000 people killed in automobile accidents in this country this year and no one will say anything about it because social tolerance has set that level as acceptable. Reagan is setting those limits now for unemployment."

There must be an awareness that few welfare recipients want to be on welfare, but as the system is presently set up, many can't afford not to be.

If a poor woman works, her monthly assistance grant will be cut by whatever amount she earns. If she manages to save more than $1,500, she will be cut off aid. Government does not provide enough subsidized day care to make it worth her while to look for a job. The child-support enforcement system that could help her pay the freight is overloaded and generally ineffective.

In a very real sense, then, welfare has become a sort of fiscal methadone for the nation's poor, a cure very nearly as degrading and every bit as habit-forming as the pain it was supposed to alleviate.

And, in the process, the welfare bureaucracy has become an insidious multilevel monitoring device, keeping tabs on—and ultimately controlling the movement of—the part of the population that society has no room for.

Mainstream America must also rid itself of the perception that "poor people programs" are bankrupting the country. In fact, as a percentage of total government payments to individuals, money laid out for welfare has remained constant over the past decade while expenditures for the twin sacred cows of Social Security and Medicare have grown.

In fiscal 1982, spending for public assistance, food, housing and Medicaid totaled an estimated $64 billion and amounted to 18 percent of the U.S. government's payments to individuals, the same percentage as in 1975. Spending for Social Security and Medicare, by contrast, came to roughly $209 bil-

lion, or 57 percent of total payments, as compared to 53 percent in 1975.

Nor do welfare recipients "have it easy" on their monthly allotments. Unlike Social Security recipients, who year in and year out have seen their checks outpace inflation, AFDC recipients have seen their monthly payments increase on average by only $11.34 in the last seven years. As a result, their buying power has been nearly halved. The same is true for general assistance recipients, whose grants have gone up an average of $2.04, to $141.10 in the last seven years.

Among blacks of the underclass, the family has been devastated by a variety of factors, including joblessness, the welfare system and the growth of a "victim" mentality among many poor blacks. As a result, one of the most important family functions—child-rearing—has suffered.

In 1980, 35 percent of the nation's black population were children 18 and under. Forty-two percent lived in intact families, but 46 percent lived in families with only one parent present, most often the mother, who must make her way in the world under the dual disadvantages of racial and sexual bias. (The remainder were in institutions or in some other non-family setting.)

Bruce R. Hare, an assistant professor of sociology at the State University of New York, described the devastating consequences to the current generation of black youth in a paper written last summer for the National Urban League:

"The soaring rates of 'illegitimacy,' 'babies having babies' among increasingly young black girls, the rising crime and drug-abuse rates, and the *increasing violence committed* by our youth against each other and our elders . . . speak to a rising despair and declining discipline among our black youth."

While it has been estimated that as many as one-third of blacks nationwide are members of the underclass, at least two-thirds are not. And one of the most encouraging developments is the growing involvement of middle-class blacks in addressing problems of the black underclass.

One of those pressing hardest for such involvement is Dr. Effie Ellis, a Chicago physician and a recognized authority on maternal and child health. Black people as a group must address themselves to the quality of their lives, she says, and not simply "live and breathe our time away and call it life."

The program of Alpha Phi Alpha fraternity to curb teenage pregnancy by discouraging teenage fatherhood is an example of what is needed, says Dr. Ellis. "The men can break the problem down if they want to."

And while money is important, attitudinal changes are more important, she says. "A lot that must be accomplished can't be without a change of attitude, no matter how much money you have."

Racism remains alive and strong throughout this society and accounts in large measure for the fact that a disproportionate number of blacks remain in poverty, that black men with some college still are more often unemployed than white high school dropouts, that a whole range of economic and social deficits seems to follow a color line.

In Chicago especially, the close correspondence between the geography of the black population and the geography of the poor seems a direct result of individual and institutional racism.

What the Kerner Commission said in 1968 remains true today:

"What white Americans have never fully understood—but what the Negro can never forget—is that white society is deeply implicated in the ghetto. White institutions created it, white institutions maintain it and white society condones it."●

STAYING AFLOAT IN THE TIDE OF RUIN

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. DASCHLE. Mr. Speaker, it now appears likely that some type of jobs program will soon be approved by the Congress, although the scope and nature of it is as yet undetermined. However, running throughout the more than 2-year debate on this issue, there has been one consistent theme. That is that the administration has adamantly refused to fund any make-work jobs.

What exactly a make-work job is usually escapes definition, but normally the ghosts of the Roosevelt-era WPA are called up as specters of what this awful beast is. Perhaps the passage of time has made us all much more sophisticated than people living through the 1930's were, but I still could not help but be touched by a brief article that appeared in the 50th anniversary issue of Newsweek magazine. This article briefly tells the story of Jerry Bacon, a man who lived through the thirties, and what the make-work jobs of the WPA meant to him.

As I said, perhaps we are all much more sophisticated now, and perhaps the experiences of a Jerry Bacon have no relevance in the high-tech 1980's. But I would ask my colleagues to read the following article, and then simply ask themselves one question. Jerry Bacon's job may seem make-work to us, but what did it mean to him and his family?

THE BACONS—STAYING AFLOAT IN THE TIDE OF RUIN

When Jerry Bacon was growing up in back-country Tennessee, the old folks used to sit around nodding sagely at one another and prophesying that times were going to get hard for the people one day. Yeah, his own grandmother would say, real hard. They were just being old, Bacon had thought then with a boy's impatience, but now, looking at the devastation of black Springfield all around him, he was beginning to think they had been right. The Depression had laid waste to the stores and businesses that once lined Washington and Center streets, leaving behind a ghost town of padlocked doors and empty shop windows. Nothing much more was left on Center than a doctor's office, a Methodist church and Patterson's funeral home; even the old Center Street Y, long the hub of the black community, had closed up. Bacon's own livelihood had gone under with Joe Mitchell's laundry; he was pushing 30 with a wife and two kids at home, and until old Delano Roosevelt's WPA came along, he didn't know how he was going to feed them. The old folks knew what they were talking about all right, he told himself at low ebb. They knew and I didn't.

In his boyhood, he had preferred the word of an uncle who had been North and come home laden with little gifts for all the children in the family. "Money grows on trees up there," he had said, and Jerry Bacon had believed him. He had lived his young life then in the tiny east Tennessee hamlet of Rockwood, the grandson of slaves and the son of a Holiness church preacher named Martin Bacon, and even as a boy he had begun chafing at its segregated way of life. His Grandpa Bacon had taught him the story of slavery, all about how black men and women had been torn out of Africa and flogged into submission like children. "Don't ever forget it, son," the old man said, his eyes smoldering in the firelight, and Jerry did not. The white clerks at the general store initiated him in the etiquette of Jim Crow, regularly ignoring him till all the whites had been served and only then demanding, "What you want, nigger?" Jerry never forgot that, either, or the flush of suppressed anger it brought to his cheeks.

The problem in Springfield in the bleak middle '30s was that there was no one to get mad at—only the blind economic tides of ruin and despair washing over the city. Bacon had been elated when the bishop down home had sent his father north to open a little church in a black neighborhood on the southwest side of town. But the Reverend Bacon had had to take factory work to support himself, and now his son, Jerry, had come into his own inheritance of hard times. His Dorothy had borne him two fine boys, Jerome Jr. in 1929 and Charles in 1932. It would be 11 years before they had their third child; there was no work in town and no money coming in to support the family they already had.

For a time after Joe Mitchell's cleaning shop closed, Bacon scratched out a living for them by taking in washing at home—they were living with Dorothy's grandmother—and pressing it himself with a hand iron. But laundries had beome an insupportable luxury in neighborhoods reduced nearly to rags by the Depression. The business withered and died, and Bacon, in despair, moved Dorothy and the boys to Columbus, settled them in a little house on Ontario Street and started pounding the pavement in search of something to do. He got a job pressing clothes at $6 a week in a white-owned laundry, until it foundered and sank. He drifted to another laundry, and another; they went under, too. He washed dishes at Mills Restaurant for 75 cents a day, as long as it lasted. Then he was back on the streets again, with only a night gig playing trumpet and sometimes trombone in a dance band called Archie Hall's Safarians between him and desperation.

He was on relief when the WPA opened an office in Columbus in 1935; it was instantly besieged by a long queue of the dispossessed. Bacon showed up early that morning and found scores of the hungry already there. He took his place in line and shuffled along in its inchmeal progress; it was mid-afternoon before he got far enough even to see the registration window, and the queue behind him stretched out of sight down the street. I'm one of the lucky ones, he thought, and for a time he was. The WPA took him on and put him to work sweeping streets on a road gang.

He hadn't been at it very long when he showed up at the house on Ontario Street well before quitting time one afternoon, looking beaten.

Dorothy was surprised. "What're you doing home?" she asked.

"I got it," he answered glumly. "They laid me off."

"But you're a married man," she protested. "They're not supposed to lay off the married men."

"I don't care what the rules say," Jerry said. "I got it."

Dorothy Bacon brooded for a while, then sat down with a pen and a sheet of paper and started writing, "Dear Mr. President." It won't do any good, Jerry muttered to himself, watching her pen fly. She'll never get an answer. But Stanford Woodford Anderson's great-granddaughter was not built for silent suffering; she filled the page with what had happened to her husband and reminded the president that he himself had said on the radio that married men were not to be laid off by the WPA.

A few days later Dorothy Bacon opened her mailbox and found an official-looking envelope from The White House, Washington, D.C. She tore it open, her hands trembling, and glanced at the signature first. It said "Franklin D. Roosevelt." Then she read the letter. She had been right, it said; her husband had been wrongly laid off from his job and should be reinstated.

Jerry Bacon went back to the WPA office the next morning, bearing the president's note like some magic talisman. He had to wait in line all day again, but when he got to the hiring window, he presented the letter as Roosevelt had instructed and announced, with an air of great authority, "This is from the president's desk."

The lady behind the counter read it once, looked quizzically up at Bacon, then read it again. "You weren't supposed to be laid off," she said at length.

"I couldn't tell you people that," he answered, hitching up his pants.

The woman stepped away from her desk. Bacon could see her conferring with her supervisor. Then both of them came back to the window, effusively apologetic. It had all been a mistake; Jerry could have his old job back.

Bacon smiled then, and, savoring the memory years later, smiled again. The president was getting upward of 3,000 letters a day in those years, many from petitioners in distress as the Bacons had been, and saw that all of them were answered. It was good politics to do so, old-fashioned precinct politics raised to a continental scale; it served its pragamatic purpose with Jerry Bacon, who became a willing integer in the new and powerful coalition of need Roosevelt was building for himself and his party. But the letter and the happy ending it brought about made the bond between the two men—between the president and the black WPA street sweeper—seem warm, real and personal. Delano Roosevelt come along and got us out of a mess, Bacon thought. I'm never going to forget it, he thought, and he never did.●

THE MAKING OF A COMMUNIST

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. McDONALD. Mr. Speaker, the case of Michael Straight who has recently revealed that he was a deep cover Soviet agent for many years is one that should concern everyone interested in the security of America. How did an American, with all the right background and with everything going for him become a Communist? The column by M. Stanton Evans that appeared in Human Events for February 26, 1983, is very instructive in that regard, and I commend it to the attention of my colleagues.

The article follows:

MICHAEL STRAIGHT'S CONFESSION: THE MAKING OF THE COMMUNIST

(By M. Stanton Evans)

If you wonder why the United States and the Western world at large are in such perilous condition, consider the sad, instructive case of Michael Straight.

Scion of a wealthy American family, Straight was chiefy raised in England and in the 1930s attended Cambridge, where he was recruited into the Communist party. He subsequently came back to America where he obtained jobs in the State Department and as a Roosevelt speech writer, before moving on to the liberal New Republic magazine, which his parents had founded.

While working for the government, Straight had numerous meetings with a Soviet agent, to whom he turned over copies of documents he was preparing. Most of the attention now accorded Straight—stirred by the appearance of his autobiography—has focused on his actions while he was a Communist, and his failure to come forward on these matters for better than two decades after he says he parted company with his former comrades.

These are indeed important topics worth exploring. But there are other issues involved as well, of potentially greater moment. For the authobiography Straight has given us tells us not only what he did (usually in sketchy, episodic fashion), but why he did it.

His explanation shows us a representative sample of the liberal mind at work—how it is formed, the way it operates, and the qualities which make it prey to Marxist dogma. Since this is the mind that has shaped our era, the lesson is worth learning.

First, the facts as Straight provides them. He was recruited into Communist ranks by Cambridge art historian Anthony Blunt. In these circles, he met a number of other youthful Communists, notable among them the traitor and spy-to-be, Guy Burgess. In 1937, Blunt told the author that Communist higher-ups wanted him to return to America to act as a "mole" in behalf of the Kremlin.

Straight balked at some of the original particulars, but felt "trapped" into accepting the over-all assignment. Back in America, while working for the State Department, he gave copies of documents he was writing to a Soviet agent. In the late '40s and early '50s, he had several encounters with Burgess, who had wormed his way into the British Foreign Office and was spying on America for the Soviets.

Straight says he broke with the Communists in 1941, that the papers he gave the Soviet agent were worthless, and that he told Burgess to get out of the Foreign Office or face exposure. Yet knowing what he did of Burgess, and what his treachery would cost America during the Korean War, Straight did not speak out. Only in 1963, when he was up for an appointment by the Kennedy Administration, did he tell his story to the FBI—a step which led to the downfall of Blunt, among others.

Most of Straight's discussion—interspersed with personal and family reminiscences—is an effort to explain this long delay. What it boils down to is that he felt hopelessly divided between his obligation to oppose the Soviets and his friendship for the individual Communists he would be required to expose. The resulting ambivalence of feeling is apparent in his handling of other matters—such as the Communist-controlled campaign of Henry Wallace in 1948.

Such ambiguity, be it said, is seldom evident in Straight's treatment of anti-Communists such as the late Sen. Joe McCarthy. Back in the 1950s, while Straight was still keeping mum about his own past and the likes of Burgess, he bitterly denounced McCarthy and other anti-Communist investigators. There is a fair amount of this in the present book—although Straight does tell us he "sensed" that Whittaker Chambers was telling the truth about Alger Hiss.

All of this is presented in a self-justifying way that puts Straight's performance in the most plausible and innocent light, with a number of details one would like to know conspicuously omitted. (For instance, Straight's knowledge of, and relationship to, the people at the Institute of Pacific Relations, mentioned only in passing). Even so, the resulting picture is not too flattering for Straight.

How an intelligent man could get in this kind of fix is suggested by Straight's discussion of his upbringing: deprived of his father at an early age, raised without strong feelings of national identity, guilty about his inherited wealth, educated on "progressive" principles by a mother who sounds much like Eleanor Roosevelt, he was sent off to the London School of Economics and then to Cambridge—where he was immersed in a witch's brew of intellectual moonshine, collectivist hogwash, and revolutionary agitation.

The Cambridge atmosphere, as Straight portrays it, was fetid to the point of suffocation. It seems that every other person he refers to (including Burgess, Blunt, John Maynard Keynes and numerous others) was, or had been, a homosexual (Straight himself was an exception). The place was also full of self-righteous dolts imagining themselves as an elite that would create some kind of secular utopia through revolution. Straight, the rootless cosmopolitan awed by their sense of "brotherhood," fell for it.

The story is a sad one, not merely for what it says of Michael Straight, but for its description of the forces that produced him. They are the same forces, after all, that have corrupted the counsels and palsied the will of Western powers for upwards of two generations.●

TRIBUTE TO DORES RICHARD (D. R.) MILLER, OWNER AND OPERATOR OF THE CARSON & BARNES CIRCUS

HON. WES WATKINS

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. WATKINS. Mr. Speaker, today I call upon my colleagues to join me in paying tribute to Dores Richard (D. R.) Miller, long-time owner and operator of the world's largest tent show, the Carson & Barnes Circus. The general offices and winter quarters of the Carson & Barnes Circus are located in my congressional district at Hugo, Okla., where D. R. enjoys wide renown and respect. He has dedicated his life to the circus, and is well deserving of our recognition and tribute. His dedication is best expressed in his own words:

I want to leave a lifelong impression on each child who comes to visit my circus. The warm memories of the day spent with mom and dad watching the mammoth tent being pulled up by the elephants; the sensation of having a baby giraffe eat out of a young child's hand; the excitement he feels when watching the lion tamer work with the big cats; the kaleidoscope of unique smells, sounds, and images of the tent circus that greets each youngster when he visits the showgrounds. When a young person comes to the circus he is greeted by so much activity and excitement that he will never forget the experience. I remember the special wonder and joy that I felt when I saw my first circus as a child, and I want to multiply that joy. I want to be the man who brings the circus to town. It's like playing Santa Claus every day of the year, and I will keep bringing that special joy to the kids until the day the good Lord decides that its time for me to stop."—Dores R. Miller.

This season marks the 47th consecutive year that Dores Richard (D. R.) Miller has owned and operated the circus. No individual in all of circus history has had the drive, determination, and luck necessary to maintain a tent circus on the road for this record number of years.

D. R. started working for his father, Obert Miller, in 1924, at the ripe old age of 8. Although he only rode a trick pony and worked on the sideshow bally platform, the responsibilities he was given at that time helped to shape his life. This was the golden age of the monster tent circus, when huge tent shows crisscrossed the continent. This is when he decided to, someday, own one of these outdoor giants.

After taking Isla Beach as his wife in 1934, the Millers joined the Seils-Sterling Circus as performers. D. R. was a wire-walker and trick rider. Isla performed in a five-girl aerial display and swinging ladder act. They received the grand salary of $10 per week with a $15 bonus for their troubles.

In 1937, D. R. joined with his father and brother, Kelly, to start a two-monkey, 4-pony, 6-person wagon show. During good times and bad, the Miller family worked and built that show into what is now the world's largest tent circus. D. R. Miller is the only surviving founder, and he has continued to bring this 80-vehicle show, complete with 25 elephants, 2 giraffes, rhino, hippo, 75 horses and ponies, and various other animals, 200 employees and a big top bigger than a football field to millions of Americans in all parts of the United States. The show, being based in Hugo, Okla., has brought millions of dollars into the local economy, and has helped to support several local businesses.

Retirement is out of the question. D. R. will continue to push, pull, and guide his circus into the dreams of children—of all ages—until its no longer possible. In the process he is sparking joy and imagination, and keeping an American tradition alive.●

REMEMBRANCE OF WAR

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. WHITEHURST. Mr. Speaker, the "Thinking Things Over" column by Vermont Royster which appeared in the Wall Street Journal on Wednesday, March 2, was a particularly good one, and I am taking this opportunity to share it with my colleagues.

I know that millions of Americans watched and enjoyed "The Winds of War," on television, and many more have read both that book and its sequel, "War and Remembrance." I commend the two books to anyone who may have not yet read them; Herman Wouk has combined a fascinating story with scholarly research and produced memorable works of historical fiction.

But Vermont Royster's commentary goes deeper than just a review of "The Winds of War." It serves as a reminder to all of us, whether we remember World War II or not, that, to paraphrase another author, "It can happen here."

THINKING THINGS OVER

(By Vermont Royster)

REMEMBRANCE OF WAR

For those who survive a great war, be they soldiers or civilians, the experience is unforgettable. All else is anticlimax.

If you think not so, listen to old soldiers gather talk of Dunkirk, Anzio, Okinawa or more lately even of Vietnam. Or to civilians who lived through the terror of London or Coventry.

So when the television recently brought us that 18-hour marathon account of the coming of World War II, there were two separate audiences among the millions who watched. Those who remember. And those who can't.

I can speak only for those who remember. And as I watched Herman Wouk's tale, with all the contrivances and coincidences of story the critics harped upon, I couldn't help wondering if those too young to remember drew from it the lessons those times have to offer.

Some of the lessons may have been obscured in the television telling. Hitler's Mein Kampf, for example, is mentioned in passing. Was it clear to the young that Hitler told the world then exactly what he planned to do—and no one believed him?

The destruction of Poland, the fall of France, the plight of beleaguered Britain, all this was vividly told. Was it clear to the young that none of this need have happened if Poland, France, Britain had not ignored the gathering storm?

To many younger viewers Mr. Wouk's fictionalized Jewish Scholar, Aaron Jastrow, seemed merely a naive, even foolish, old man in his refusal to flee the menace of Nazism. Did they understand he was symbolic of many who said what was true, that there were good Germans as well as bad ones, and so were long blind to the evil that engulfed them all?

Through the figure of President Roosevelt, our own effort to rearm at the last minute was recounted. Do the young know that even after Hitler came to power in 1932 we left our arms in disrepair? that on the very eve of being engulfed by the war our soldiers were drilling with brooms as make-believe rifles, driving trucks as make-believe tanks, because we had none other?

Thus when my own time came to be wrenched from a happy civilian home, I was put aboard a destroyer that had no radar, no sound-searching gear, no modern guns to defend the convoys we were supposed to shepherd against marauding submarines. Those called to man land armies were no better served.

Yet that is the way it was. With Europe already conquered by Nazi legions, with Great Britain upon the edge of defeat, with Pearl Harbor but a few weeks away, our country preferred to think the war would not come our way. Were there not, after all, two great oceans that lay like moats to keep us safe? to politicians in Congress were not alone in asking what need we had of calling our young to arms, of spending our treasure on the arms for them, when there were so many other needs here at home in a nation still suffering from the Great Depression.

I hope the young will not suppose that this myopia, from Munich to Pearl Harbor, sprang from selfish or immoral motives. It was rooted in one of the deepest desires of the human spirit, to live in peace. It was expressed clearly in a slogan heard everywhere in those days, "Peace, it's wonderful!" It was said in prayers, sung where good people gathered, chanted in street parades to protest the horrors of war.

That war came anyway despite the prayers, and brought with it horrors up to then unimagined, was not the fault of those of good will and one cannot fault them for those prayers. War came anyway because not all men are men of good will, because evil has not been banished from the earth.

Nor can one fault those men of good will, either, when the trial came. Once it became clear the choice was war or surrender to evil, men of good will went off and died by the millions lest evil triumph unopposed.

The truth is that peace is easy to achieve. The Poles, the French, the Belgians, the British, could have easily had their peace. All they had to do was say "better to be Nazi than dead," lay down their arms, fight no more, and they would have had their

peace. The question is whether the world would have been better for such a peace.

That is why those of us who remember, watching the unfolding story on a television screen, have a sense of deja vu the young cannot know, seeing the parades today of those who once more cry, "Peace, it's wonderful!" and seek it by laying down arms while, across the world, others build arms and more arms.

We find it strangest when this cry is heard in Europe. In that last war our country was spared the worst largely because people far away bore the brunt of war before us. Our own country has never been invaded and occupied. But the peoples of Europe, from the coast of Norway to the Mediterranean Sea, lived under a brutal heel until at long last, and after much dying, it was removed.

Can they really have forgotten how it was? Have those who remember nothing to say to the young who cannot? Can the young, looking eastward to neighbors already under a brutal heel, think peace so wonderful as to be bought at such a price?

For now, as before, it can be bought at a price. Western Europe can easily have its peace, as can we. All that is required is to lay down arms, to think it better to be red than dead, and all danger of another war will vanish. Conquerors have no need of war when there are neither arms nor will to resist them.

As one who remembers how it was before, I wonder if the voices of surrender speak today for the peoples of Europe. Perhaps I can find out if I go back again—and listen.●

TARGET AID PROJECTS

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. SIMON. Mr. Speaker, recently, the House adopted an amendment I proposed calling for 50 percent of AID money to help those in absolute poverty in the various nations in which we have AID projects.

The continuing resolution finally compromised at 40 percent. Let me express my appreciation to my colleagues CLARENCE LONG, TONY HALL, and BEN GILMAN particularly for their help. In the conference committee CLARENCE LONG's work was particularly critical.

Someone has called my attention to an article written by Herman J. Cohen, Deputy Assistant Secretary for Intelligence and Research with the Department of State and former Ambassador to Senegal and Gambia.

His article also suggests that we should be targeting our AID projects for more immediate specific results.

The only point in the article that I would question at all is that he wants to get coal to Africa from Hampton Roads, Va.

Being slightly provincial from southern Illinois, I would prefer that it be southern Illinois coal which goes through the port of New Orleans, but I confess a provincial bias on that.

[From the Open Forum Journal, Issue No. 25, 1980, Department of State]

IS AID'S BASIC HUMAN NEEDS APPROACH WORKING? A VIEW FROM AFRICA

(By Ambassador Herman J. Cohen)

I have just completed a 3-year assignment as Ambassador to Senegal and The Gambia. Since our economic assistance programs constitute the most significant activity of the U.S. Government in these two countries, I have come to know well the programs of AID and the Peace Corps, as well as those of private voluntary and international organizations.

When I arrived to take up my new assignment, I found that the congressional mandate to address basic human needs was at the top of the list of priorities for both AID and the Peace Corps. The mandate was defined as having the objective of bringing maximum quantifiable benefits to the most disdavantaged populations of the developing countries. In carrying out this mandate, AID was faced with the problem of fulfilling another objective simultaneously, namely the requirement to foster development.

AID has resolved this problem essentially by designing its projects to have an impact on the populations living in the rural areas. The theoretical payoff in most of the projects includes greater cash incomes and better living conditions for the rural farmers. The main vehicle for attaining these objectives is technical assistance to indigenous institutions, almost always government agencies or government parastatal organizations, that exist to provide technical services to rural communities. Most of the aid, therefore, consists of the training of trainers—the extension workers, managers, and technical personnel who will be responsible for guiding the rural farmers into new and more productive practices. Whenever the indigenous institutions are themselves just getting started, AID's assistance might include the construction of offices, laboratories and even staff housing.

After 3 years of observing this process unfold, I ask myself if AID's current approach is addressing basic human needs in a more effective manner than previous approaches which included a certain amount of infrastructure development (i.e., road building, dam construction, communications systems). It is difficult to answer this question because institution-building and stengthening are long-term propositions. We can't really expect to see a payoff in less than 7 to 10 years. On the basis of my observations, however, I cannot suppress a certain amount of skepticism about AID's current approach. My feeling is that the rural farmer would probably benefit more from investment in infrastructure that has a relatively early impact, than from long-range institution-building. On the basis of my experience, I would advocate the construction of rural farm-to-market roads, village water systems, small dams and irrigation systems.

I have strong doubts about the capability of government agencies and government-controlled development organizations to translate their acquired expertise into benefits for the rural farmers. My experience to date indicates that government bodies exist mainly as an end in themselves—to provide jobs, salaries, perquisites, and partronage to the people lucky enough to obtain employment. There is virtually no accountability in terms of quantifiable results in the rural areas. The whole purpose of education in the minds of parents is to help young people escape from the rural areas to urban centers. Extension workers, therefore, often prefer to stay in their air-conditioned offices doing paperwork rather than going out and working with villagers. This is a general conclusion that obviously does not cover every case. There are some dedicated people in rural development agencies. But I have traveled extensively in the interior of Senegal and The Gambia, and the people I usually see working at the village level are Peace Corps volunteers, employees of private voluntary organizations, missionaries, and an occasional AID contract technician. Ironically, the one Senegalese Government-owned entity that I have seen that appears to be closer to the rural farmer than any other is the only one not receiving any foreign assistance. Representatives of this agency, which is seeking to develop irrigated rice production, took me around to visit the villages they are working in, and I discerned a certain confidence among the villagers in that organization.

When I ask Senegalese villagers what their greatest needs are, they invariably say water and market roads. Senegal is in the Sahel semi-drought area, and water is scarce, just as it is in southern California. The villagers want wells, deep bore holes, and pumps. Many of the isolated villages, which are in the majority, need adequate farm-to-market roads to transport the produce they grow, or could grow if they had water. There is potential for a lot more production among the rural peasantry if they could have water and roads, and this could be accomplished with minimal or no extension work from government agencies.

My overall instinct is to favor the independence of the farmer who should have maximum incentives to produce more and earn more on his own without government interference. The building of government-controlled institutions which are supposed to help farmers could have the opposite effect of stultifying farmer motivation to produce more. These institutions will probably serve as a drain on rural resources rather than as a stimulus to their growth. Not only will these institutions fail to help the farmer, but they will also buy his crops at questionable prices, sell him fertilizer and give him credit, with none of these procedures working to the farmer's advantage.

The Government of Senegal has recognized the phenomenon of the negative impact of government organizations on rural farmers, and is actually working to return much of the marketing and other services to private enterprise. There is a new emphasis on cooperatives and local power structure.

In view of the foregoing, how should we proceed from here? First, I would fulfill all commitments to institution-building already on the books. These projects should be completed. I hope that my skepticism is all misplaced, and that by the year 1990 we will have something to show for our aid. But the payoff has to be evaluated in terms of increased production and standards of living in the specific rural areas targeted by these projects. We cannot evaluate it by listing numbers of people trained and numbers of technical assistance hours worked. I would, however, place a halt to all new institution-building projects. There is a sufficient number on the books right now, in my view, to make a positive impact if everything goes according to plan.

For new money that becomes available, I would divide our efforts into two categories. First, I would engage in quick impact rural infrastructure projects. In Senegal, we could make a commitment to construct 200 wells

per year with simple pumps that could be maintained by villagers themselves. The private voluntary organizations are already doing this on a much smaller scale, and generally the experience has been positive. I would also upgrade and construct rural farm-to-market roads, working with indigenous construction entities. In Senegal, for instance, the Army is using American Foreign Military Sales (FMS) engineering equipment to undertake this type of work under contract to the Ministry of Public Works. Again, there is some irony in the fact that some of the most effective development work in Senegal is being done with U.S. military assistance. This whole effort could serve as a controlled experiment to determine which is more effective—institution-building which trains the trainers, or rural infrastructure which brings direct benefits to the rural farmers and gives them some tools to develop themselves.

Secondly, I would allocate as much new money as possible to the search for alternative energy possibilities. The 1978-80 oil price increases are just killing the non-oil producing African countries. There may be nothing left of these economies to develop if something isn't done in this area. And I am not talking about the installation of experimental solar electric water heaters in village maternity centers. What Africa needs is innovative thinking about big projects to convert major installations away from oil-fired energy production. For example, why shouldn't municipal power plants in African coastal cities like Dakar be converted to coal? Coal energy imported from Hampton Roads, Virginia would be cheaper for Dakar than imported oil right now, and the disparity will undoubtedly grow. American planners, designers, and soft loans (yes, it is time for AID to get back into the loan business for certain types of projects in Africa) could help achieve these conversions, and help U.S. exports to boot.

Hydroelectric power is another area that deserves considerable emphasis. When I was on the Zaire desk in 1970, people said Zaire was crazy to borrow all that money for the Inga hydroelectric power complex. But that vast amount of energy is going to save Zaire and several neighboring countries much money on oil imports in the next few decades. There are other potential hydroelectric energy sources in Africa which need our help, and the help of donor consortia such as the recently established Association for the Coordination of Development in Africa (ACDA), to which the U.S. belongs.

In summation, we need innovative thinking to address basic human needs in both the micro- and macroeconomic contexts. What AID is doing now looks very good on paper, and should have a favorable impact if everything works out according to design. But after 3 years of closer observation, I do not see that basic human needs are being addressed any more now than under previous policies. And, I am highly skeptical about the capability of public institutions to transmit developmental skills, or to motivate farmers to produce more. The farmer needs help to function independently, and he needs it in a shorter time frame. I also fear that congressional appropriations committees may become impatient and disillusioned before the results of institution-building can demonstrate a developmental payoff.●

NUCLEAR RADIATION

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. DASCHLE. Mr. Speaker, I would like to bring to the attention of my colleagues the following article which appeared in the January 15, 1983, Economist news magazine:

NUCLEAR RADIATION—DEADLY TESTS

British servicemen who were exposed to the nuclear weapons tests in the South Pacific in the 1950s are contracting leukaemia at an astonishing rate, and there seems little doubt that the radiation from the explosions is the cause. The problem was highlighted by a BBC television programme (Nationwide) in December. After this broadcast, more reports came in from servicemen who took part in the tests. The results were analysed by an independent medical statistician, Dr. Alice Stewart, of Birmingham University, and formed the basis of a second programme this week.

Dr. Stewart calculated that there were about 6,000 men under 25 involved in the 1957-58 tests at Christmas Island and at Malden Island, 400 miles to the south. In round figures, 75 of these men would normally have been expected to have died, from all causes, between 1976 and 1982; of the 75 four would have been expected to have died from leukaemia. So far, although reports of only 10 deaths during this period have been received, eight of them were caused by leukaemia.

At least six more leukaemia victims are still alive. Many other men still living have reported recurring rashes and cataracts: both are typical of radiation victims. Dr. Stewart is convinced that the radiation from the nuclear tests caused most of the trouble.

The ministry of defence, which ran the tests, did not want to know. It is, by tradition, starkly unsympathetic to exservicemen who ask for special consideration because of problems related to their active duty. It has received six claims from cancer victims over the past 10 years and turned down all of them. It has not yet received any claims as a result of the BBC's investigations, but it probably will. The official line was that the statistics that the defence ministry had seen so far did not indicate that the men who were in the tests are getting leukaemia at a greater rate than would be expected.

Faced with similar claims, the Australian government is doing the decent thing. Alarmed by an increasing number of reports of cancer-related diseases among the 9,000 Australians who worked with Britain on the atomic tests, it has sent questionnaires to all the survivors. The American administration has behaved as badly as the British government in the face of claims from those who say they suffered from nuclear tests in Nevada. It is embroiled in a case where 1,192 people are claiming damages.

As a result of all the television publicity (Channel 4 also screened a documentary on the subject this week) the British defence ministry has been spurred, at last, into action. It plans to contact the 12,000 who took part in the tests and examine them to see if they are suffering from radiation diseases. Its next step should be to make arrangements to compensate those who are, along with the relatives of those who have died.●

PARRIS URGES SUPPORT FOR CIVIL SERVICE RETIREMENT

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. PARRIS. Mr. Speaker, two House committees are meeting this morning to discuss the impact the proposed Federal budget will have on civil service retirement. The proposed changes would have a disastrous effect on the Federal work force and if implemented, could jeopardize the quality of services that the Federal Government is currently providing your constituents. Although you may not have a great number of Federal workers in your congressional districts, the proposals contained in the budget will mean less services for more tax dollars unless we act swiftly to make some reasonable modifications.

During the past few years, Federal workers have been required to bear an unfair burden in attempts to reduce Federal spending. Cost-of-living increases have been inadequate, falling far behind the rate of compensation recommended by the President's own pay advisers. Health benefits under the Federal employees health benefits program have been reduced substantially while the insurance premiums have increased. In addition, Government employees have been subjected to an insensitive and demening reduction-in-force process with the new threat of eliminating seniority as an element to be considered when implementing new RIF's.

The combination of these items and other factors have had a disastrous affect on the Federal work force. Morale is at an alltime low and each week seems to produce new attacks on our work force.

The civil service retirement proposals contained in the fiscal year 1984 budget add insult to injury. The new budget would increase the contribution rate to the retirement from the current 7 percent to 11 percent. In order to retire at full benefits, an employee would be forced to work until age 65 instead of the current age of 55. In addition, the new budget changes the basis for computing future annuities from an employee's average high 3 years salary to a high 5 formula.

I am adamantly opposed to the proposed pay freeze and the budget proposals. If the Congress approves this package, it will be destroying a retirement system that works well and it will be breaking a commitment to every Government employee by changing the rules in the middle of the game.

The civil service retirement system has proven itself over the years. In 1981, the system paid annuities to 1.5 million retirees or their spouses and dependents, providing an average yearly benefit of $11,000. The system is funded through matching employee-employer contributions totaling 14 percent of payroll. It is my understanding that the Government has been contributing for more than its 7-percent share to make up for the nearly 40 years, 1920-56, it failed to match employee contributions.

Unfortunately, the size of the CSRS makes it an easy target for budget cutters in Congress. I have heard Members say that the civil service retirement program is too generous when compared to private sector plans. These types of comparisons are inaccurate and unfair. Private plans are supplemented by social security and 95 percent of the employees participating in private plans do not contribute to their own plans.

Since 1976, Federal Government retirees were subjected to taxes on disability pensions, reductions in benefits for spousal benefits, the COLA was reduced for new retirees, the biannual COLA was eliminated, and COLA's were reduced by one-half for retirees who are under the age of 62.

Any other reductions in retirement benefits are totally unacceptable. The retirement program is one of the major reasons people decide to pursue a career in Government service. Employees should be able to rely on the idea that when they retire, the retirement benefits will be provided to them that were promised when they took their jobs. These benefits are just as much a part of the employment contract as are salary and job responsibilities. We have a moral and contractual obligation to see that these benefits are not reduced or delayed.

These retirement proposals, the RIF regulations being promoted by OPM, and the proposal to bring new Federal workers into social security will ruin the Federal work force. For some time now, I have been hearing from managers and supervisors who complain that they are unable to keep their most skilled, dependable workers. These new proposals will make it even more difficult to attract and retain qualified people to serve in Government.

While I agree with the idea that we must reduce Federal spending and restore some vitality to our economy, destroying the Federal work force is not the way to achieve cost savings. There are many other more desirable alternatives which should be pursued.

One other point I would like to make in closing. When we talk about Federal workers as a group, it is easy to forget the types of services and duties these people provide. Government employees work on finding cures for diseases at NIH, they serve as drug enforcement agents working to keep drugs out of our children's schools, they are FBI agents, they are the people that provide health care services, and get the social security checks out on time.

If we do not preserve the retirement system, we will undoubtedly lose our best workers to join in the private sector which provides better benefits and more security. Rather than achieve cost savings, we will end up spending more tax dollars for few services because we will have a work force comprised of individuals who cannot find employment any place except with the Federal Government.

I urge my colleagues to join me in preserving the integrity of the Federal work force by honoring the commitment we have made to our employees. We must act now to remove these disastrous proposals from the budget.●

RUSSIA—THE SICK MIND OF EUROPE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. McDONALD. Mr. Speaker, the Soviets recently withdrew from the World Psychiatric Association rather than face the debate and possible expulsion over the routine commitment by the KGB of Soviet dissidents to mental institutions for special treatment. Many Soviet dissidents have survived and lived to tell about these cruel confinements so that they have become common knowledge in the Western World. It is yet another manifestation of a society without morals that permits such practices. The editorial on this subject written by Mr. Ian Ball that appeared in the London Daily Telegraph for February 12, 1983, follows for the benefit of my colleagues.

[From the Daily Telegraph, Feb. 12, 1983]

RUSSIA—THE SICK MIND OF EUROPE

(In a nation where the normal are sent to psychiatric hospitals because of their political stand, doctors who sent them there may not be party tools but members of a warped profession in a warped society.)

In the city where Sigmund Freud first tried to diagnose and calm troubled minds through talk, an entire medical profession—supposedly sick, in ways unsuspected by Freud—was to have come under full international analysis later this year.

At its seventh congress in Vienna, the World Psychiatric Association had been planning to resume its debate on whether psychiatry in the Soviet Union has become a political tool of the KGB in its dealings with dissidents. With the meeting still five months away, quiet but intensive lobbying was already being conducted by all parties involved.

Then came yesterday's startling announcement: to pre-empt Western efforts to suspend or expel the Soviet psychiatrists for collectively tearing up the Hippocratic oath, the 22,000-member Soviet national organisation, the All-Union Society of Psychiatrists and Neuropathologists, was quitting the 78-nation world body forthwith.

It is political with a capital P, of course. And it is among the most fascinating examples we have had since Brezhnev's death in November of how the Kremlin under Andropov intends to play the global game.

The Brezhnev Kremlin, according to Western doctors who have had contact recently with influential figures in the Soviet psychiatric profession, would probably have decided to tough it out, let the West prove that sane dissidents are being held in Soviet asylums.

Where Brezhnev was ready to use a cleaver in approaching potential trouble abroad, Andropov's choice seems to be a scapel. Why risk a propaganda reverse in Vienna when things are going so well, image-wise, in Europe and elsewhere on the peace front?

The background here is the roughing-up the Soviet psychiatric profession received when the international body last met, in Honolulu in 1977, and adopted a resolution condemning "the systematic abuse of psychiatry for political purposes in the USSR."

Ever since there has been a growing but quietly conducted debate among psychiatrists the world over on the most effective way of applying pressure on what the majority still seems to regard as a thoroughly corrupted brother institution. To their credit, British and American psychiatrists have been in the forefront.

Now, however, whatever disciplinary or supervisory powers the world body might have hoped to exercise have been snatched away. Andropov's doctors are not about to stand in anybody's dock.

The debate in Vienna—and what irony that a congress which meets every six years happens to be assembling for this political row in the birthplace of psychoanalysis—had been expected to revolve around two resolutions.

The Royal College of Psychiatrists, having seen the horror stories multiplying since the condemnatory resolution was adopted in Honolulu, had formally proposed the expulsion of the Soviet organisation. The American Psychiatric Association had decided on a less drastic course of action—suspension pending proof that the present cloud over Soviet psychiatry has been removed.

With the Russians no longer in the club, all this is shunted on to the theoretical plane. Yet the cream of the world's mind doctors might still want to consider adapting an idea which has intriguing possibilities and universal application. It has been advanced by an American whose special field of studies is the use and misuse of psychiatry in the Soviet Union—Dr. Walter Reich, a psychiatrist by training who is a fellow at the Kennan Institute for Advanced Russian Studies in Washington. He is proposing, in effect, the psychiatric equivalent of on-site inspection.

His idea is that the world body could be empowered to send representatives to any country to examine individuals reported to have been dispatched to mental institutions for political reasons. If permission were denied, the association would hold that country's psychiatric establishment in international contempt.

"This would give us a mechanism for continuing to press for re-examination of Soviet dissidents seen as victims of "misdiagnoses," he argues. "The Russians either would have to allow such re-examination by outside psy-

chiatrists or acknowledge they have something to hide."

Dr. Reich spent some time last year examining Soviet psychiatry on its home couch (in truth, the metaphor hardly applies since there is very little talk therapy practiced in the country which two generations ago declared Freud's ideas to be inconsistent with Marxist science) and had a rare sitdown talk with the two men who control Soviet psychiatry, Dr. Andrei Snezhnevsky, 78, and Dr. Marat Vartanyan, in his early 50s.

He returned from that meeting convinced that the Russians were still smarting from the scolding they got in Honolulu and determined that nothing like this would occur in Vienna. If necessary, even though they put great importance in being seen as civilized men of medicine by their international colleagues, the Russians, he judged would walk out of the world body rather than face another vote of censure.

Reports of Soviet psychiatric abuse began reaching the West in the late 1960s. Not even during the darkest years of Stalinism had Soviet psychiatrists been accused of distorting their knowledge in the service of political masters. That this all began when it did may have special relevance in our dealings today with the man who sits in the seat of supreme power in the Kremlin: the charges were first carried out of Russia by dissidents soon after Mr. Andropov was officially named head of the KGB in 1967 and non-conforming citizens found themselves being diagnosed as "sluggish" schizophrenics—a unique theory developed by Dr. Snezhnevsky—and bundled off to institutes for the criminally insane.

Was the theory concocted to serve a political need? Many Western psychiatrists are convinced now the answer is yes.

They point out that once a dissident has been declared cuckoo and in need of hospital treatment, his or her trial is much less demanding on the authorities.

Yet there possibly is an even more sombre interpretation to be placed on all this! Could a sick profession have developed almost unconsciously within a sick society, without any sinister direction from above?

Dr. Reich, who has examined dissidents declared psychotic by the Soviet doctors and found them eminently sane when they reached the United States, suspects this may be the case. After all, he says, both the KGB agent who rounds up the dissident and the psychiatrist who examines him have grown up within the same ideological environment, their minds shaped by similar ideas of what is usual and expected in Soviet society.

Dissenting behaviour in this atmosphere may genuinely strike everyone on the Government's side as evidence of a warped mind. The true horror, then, is that "sluggish schizophrenic" now is being stamped on the dossiers of hundreds of mentally sound individuals by Soviet doctors with no conscious intent to please Andropov and Co. with a misdiagnosis.●

ISRAEL'S WEIZMANN INSTITUTE OF SCIENCE—SLOAN KETTERING CANCER CENTER OFFER NEW HOPE TO PATIENTS

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. ANNUNZIO. Mr. Speaker, a new technique for separating marrow cells has been developed by researchers at Israel's Weizmann Institute of Science and the Memorial Sloan-Kettering Cancer Center in New York, and offers new hope for victims of life-threatening blood disorders because bone-marrow transplants can now be administered with greater safety and to larger numbers of patients.

I invite the attention of my colleagues to a press release on this subject from the Weizmann Institute of Science, which follows:

A bone-marrow transplant, often the last ray of hope for many victims of life-threatening blood disorders, can now be administered with greater safety and to larger numbers of patients thanks to a new technique for separating marrow cells developed by researchers at Israel's Weizmann Institute of Science and the Memorial Sloan-Kettering Cancer Center in New York.

In initial clinical testing at Sloan-Kettering and later at five other major medical centers in the U.S. and West Germany, marrow subjected to the new cell-separation procedure has been grafted successfully into over 20 infants suffering from severe combined immunodeficiency disease and for whom compatible donor marrow was unavailable. Prior to this advance, these children could not have received transplants, currently the only proven cure for their condition, since noncompatible marrow would surely have induced fatal graft-vs-host disease (GVHD).

However in the toddlers recently treated with the specially processed marrow, no GVHD was evident, and some of these former "bubble children"—now possessing functioning immune defenses against infection—have already left their prison-like plastic isolation chambers to play for the first time with other youngsters. Because it often requires over six months before a patient can be permitted to leave his protective enclosure, it is still too early to predict how many of the treated children will eventually be considered as cured, early evidence, however, is encouraging: the first three patients given the improved marrow transplants more than a year ago now live at home like other children of their age.

The cell-sorting technique, an outgrowth of bone marrow studies in mice carried out by Prof. Nathan Sharon and Dr. Yair Reisner, at the Weizman Institute's Department of Biophysics, has enabled the safe use of bone marrow from noncompliance donors. Application of the animal work to human therapy was carried out by Dr. Reisner at Sloan-Kettering in collaboration with Drs. Richard J. O'Reilly, Neena Kapoor, and Robert Am. Good, and appears in the leading biomedical journal Blood.

Explains Dr. Reisner: Today, a broad spectrum of major blood disorders, involving massive malfunction of the blood-forming tissue, is still among the most difficult-to-treat medical conditions. However, the use of donor marrow to replace the entire blood-forming system in these patients has provided a valuable new approach to handling these often hopeless situations. Till now, the use of marrow transplants has been largely limited to the 30 to 40 percent of patients having a brother or sister with HLA (human leukocyte antigen) markers on their blood cells identical to those of the recipient. Use of noncompatible marrow would invariably lead to a lethal form of GVHD. Moreover, even when grafting marrow from matched donors, GVHD develops in as many as 50 to 70 percent of recipients. Fortunately, these cases tend to be comparatively mild and controllable by chemo- or immuno-therapies. Nevertheless, 15 percent of these GVHD victims will also die from its effects.

Numerous studies over the last 15 years with animals revealed the cause of GVHD: Marrow, even from a compatible donor, contains sufficient numbers of mature lymphatic cells capable of recognizing the recipient's tissues as foreign and destroying them. When these mature, thymus-derived T lymphocytes are removed, the remaining stem marrow cells, which cannot yet recognize antigenic material, provide no danger. The grafted immature cells act much like children adopted at a very early age who, when they mature, have no memories of their natural parents and accept their new home as their own.

The problem, however, was that previous attempts to separate out the damage-causing T lymphocytes in order to obtain the cells needed for human transplant all failed.

The basic studies leading to the new cell-sorting process to eliminate GVHD-causing marrow cells is an outgrowth of 20 years of research carried out by Prof. Nathan Sharon at the Weizmann Institute on lectins, plant proteins with the useful ability of specifically recognizing and binding to sugar entities on cells. Mice engrafted with the processed marrow did not develop GVHD.

In proceeding from mouse to monkey to human transplants, Dr. Reisner and colleagues at Sloan-Kettering had to make some major changes in the original cell-sorting procedure. They had discovered that the sugar entities appearing on monkey or human lymphocytes differ from those found in mice. However, by using a revised agglutination protocol, involving, TH the first stage, the soybean lectin followed by treatment with red blood cells of sheep, non detectable levels of mature T cells were obtained in the final preparation. The procedure is simple, and large volumes of bone marrow cells can be readily separated.

"We're really just at the beginning of the road with the new technique," Dr. Reisner notes. "We made our initial trials on bubble children because these patients, with no immune systems of their own, are more likely to accept grafts from noncompatible donors than patients with functioning immune defenses. We hope that our lectin separation technique will also permit the use of mismatched marrow for treatment of other diseases. Additionally, it is possible that—if this procedure were applied routinely to clear GVHD-causing lymphocytes from donor-compatible marrows—the number of successful transplants in patients with HLA-matched relatives might also be significantly increased."●

SUPPORT LANGUAGE STUDY

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. SIMON. Mr. Speaker, recently a group of Americans from all over our Nation met in Chicago for the purpose of conducting a U.S. Language Policy Conference. This is an issue about which I have addressed the House many times during the 8 years I have been privileged to represent the people of southern Illinois. It is an issue that grows in importance each day. We simply must improve our knowledge and understanding of other languages and cultures if we expect to communicate effectively with the rest of the world. And as our language minority groups continue to grow in the United States, we may find ourselves unable to even understand each other if we continue our let-them-learn-English attitude.

I urge my colleagues to read the following report from the U.S. Language Policy Conference and to seriously consider their proposal for Federal support of language study.

POTEET & LANDRY,
Lafayette, La., January 25, 1983.

To all interested persons: Chairman's Report, U.S. Language Policy Conference, Chicago, Ill., January 8-10, 1983:

The U.S. Language Policy Conference held at the Holiday Inn, Rosemont (Chicago), Illinois, Jan. 8-10, 1983, had delegates in attendance representing the following Ethnic Language groups in the United States:

1. Armenian (Armenian Benevolent Union),
2. French (Association of Franco-Americans),
3. Hungarian (Hungarian School Care Club),
4. Italian (Joint Civic Committee of Italian Americans),
5. Polish (Polish American National Congress),
6. Spanish (League of United Latin American Citizens),
7. Ukrainian (Ukrainian National Association),
8. German (German-American National Congress).

While many of the smaller Ethnic Language groups did not send delegates, it is noteworthy that the five largest Ethnic Language groups, namely the German, Hispanic, Italian, Franch, and Polish Americans were represented.

In addition, the following organizations or institutions sent representatives:

1. Illinois Consultation on Ethnicity and Education,
2. State of Illinois, Governor's Special Assistant on Ethnic Affairs,
3. University of Pennsylvania, Dept. of Educational Linguistics,
4. University of Wisconsin-Madison, Center for Demography & Ecology.

The following persons were elected Officers of the Conference:

Walter J. Landry, Association of Franco-Americans, Chairman;

Werner I. Juretzko, German-American National Congress, Vice-Chairman;

Susan Papp, Hungarian School Care Club, Secretary;

Jill Kincaid, League of United Latin American Citizens, Treasurer.

After extensive deliberations, the Proposed U.S. Language Policy Statement, which is attached, was adopted by the Conference. It is to be circulated to all known U.S. Ethnic Language Organizations for their respective endorsements which are requested by October 1, 1983. Raymond Pelletier, Executive Director of the Association of Franco-Americans will seek and collect the endorsements.

A National Caucus of U.S. Ethnic Language Organizations that have endorsed the Statement will gather in Manchester, New Hampshire in the fall to seek the support of U.S. Presidential Candidates running in the New Hampshire Primary for our Policy position. Mr. Robert Raiche of Manchester is Coordinator for the National Caucus which will be held in conjunction with Franco-American activities designed to attract the Presidential Candidates. (New Hampshire is 35% Franco-American).

A liaison committee consisting of the following persons:

1. Myron B. Kuropas, Chairman, (Ukrainian National Association),
2. Edwin Cudecki, (Polish American National Congress),
3. Jill Kincaid, (League of United Latin American Citizens),
4. Emile J. Lagrandeur, (Association of Franco-Americans),
5. Artemis Nazerian, (Armenian General Benevolent Union),
6. Dr. Gabor Papp, (Hungarian School Care Club),
7. Elsbeth M. Seewald, (German American National Congress),
8. Anthony Sorrentino, (Joint Civic Committee of Italian Americans),
9. Nessa Wolfson, (Academic Community),

will seek to spread the word and encourage a large number of endorsements and a large attendance at the National Caucus.

For further information on future events, contact one or more of the following persons: Raymond Pelletier, Executive Director, Association of Franco-Americans, 114 Shibles Hall UMO, Oronto, ME 04469, Tel. (207) 581-2492 or 581-2476; Myron B. Kuropas, Chairman, Liaison Committee for the National Caucus, 107 Ilehamwood, DeKalb, Illinois 60225; Robert Raiche, Coordinator for the National Caucus, 814 Elms Street, Suite 200, Manchester, New Hampshire 03101.

Respectfully submitted,

WALTER J. LANDRY,
Chairman, 1983 U.S. Language Policy Conference.

P.S.—Send endorsements by your organization directly to Mr. Pelletier.

P.P.S. The attached letter from Senator Cranston arrived too late for reading at the Conference.

PROPOSED U.S. LANGUAGE POLICY STATEMENT [1]

PREAMBLE

The United States is a nation of nations. We have always prided ourselves on our ability to accommodate and incorporate the contributions of all peoples. Our multicultural and multilingual heritage is a national resource and strength.

As we review our recent past and realize that the United States faces increasing domestic and international pressures, it becomes apparent that our diversity can be instrumental in resolving many of our problems. In our pluralistic society, it is imperative that we understand, accept and appreciate each other. This requires culturally sensitive and meaningful communication in more than one language. Cross-cultural sensitivity and multilingual competency is even more critical in an increasingly interdependent world.

Therefore, it is in the best interest of the United States to adopt a public policy which preserves, protects and promotes our vast wealth of languages and cultures.

PLATFORM

A significant problem with regard to utilizing the vast wealth of languages and cultures in our country is the serious lack of linguistic census data. The federal census should enumerate the population in the basis of each person's lenguistic heritage.

Federal and state laws requiring English as the only medium of instruction in public schools should be relaxed in favor of local communities deciding such questions.

Government funding should be allocated:

*for the establishment of community-based public elementary and secondary schools in ethnic languages.

*to create and/or support university departments devoted to teaching and research in ethnic languages and cultures.

*for the development and publication of curriculum materials in ethnic languages and for instructional staff development.

*to disseminate information about ethnicity in the United States.

[1] Adopted at the U.S. Language Policy Conference, Chicago, Ill. Jan. 8-10, (January 8-10, 1983).

APPENDIX I.—THE LINGUISTIC HERITAGES OF THE INHABITANTS OF THE UNITED STATES AND ITS OUTLINE AREAS

	Estimated 1983 (in millions)	Principal Languages of persons worldwide estimated 1983 (in millions)
Total population	236	4,500
German	36	120
English	29	360
Spanish	23	265
Gaelic	20	1 —
Italian	13	56
French	10	121
Polish	9	38
Swedish	8	10
Dutch	7	20
Sicilian	6	6
Yiddish	4	3
Greek	3	10
Norwegian	3	5
Russian	3	154
Finnish	2	5
Portuguese	2	156
Arab	2	159
Danish	2	5
Hungarian	2	13
Czech	2	10
Welsh	2	1 —
Ukrainian	1	43
Lithuanian	1	3
Bantu languages [1]	30	
(Swahili)		35
Subtotal	220	

[1] The linguistic heritages of blacks in the United States include dozens of Bantu languages that are difficult to correlate in terms of the present U.S. black population. Swahili is now the most widespread Bantu language with 35 million speakers. ●

HAZARDOUS WASTE CREATES PUBLIC ANGER

HON. DON SUNDQUIST

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. SUNDQUIST. Mr. Speaker, there have been literally thousands of media reports in recent months about hazardous waste, but the one I include here, written by Carroll Brumfield of Mid-South Business, particularly shores up public sentiment on this subject. To me, this article illustrates clearly that the harsh public focus on hazardous waste landfills will prohibit construction of new dumps. The public is demanding alternatives to dumping chemical waste, and it is up to Congress to seek out positive solutions to this nationwide dilemma. H.R. 1671 is a piece of legislation I introduced recently as a move in that direction. It will provide a tax incentive for companies that choose to recycle their hazardous waste as opposed to dumping it. In addition to alleviating the public's concern about the health and safety aspects of landfilling, recycling incentives would develop an entire new industry, thus creating jobs and offsetting any revenue losses to the Treasury.

I urge all Members to closely examine this balanced, insightful piece of journalism on the hazardous waste problem.

[From Mid-South Business, Feb. 14, 1983]

PUBLIC BACKLASH ERECTS BARRIER TO WASTE SITES

(By Carroll Brumfield)

Jim Scarbrough has been read to out of the Bible, called everything under the sun, and even invited outside to the parking lot.

Scarbrough doesn't look for fights. But as Southeastern regional administrator for the Environmental Protection Agency's hazardous waste program, he finds them. It's part of his job to conduct public hearings when companies want to create commercial landfills for potentially dangerous industrial garbage.

The treatment he gets at such events is symptomatic of growing public resistance to new landfills. And, so far it's been pretty effective in keeping any from being developed in Mississippi, Arkansas or Tennessee. None of the Mid-South states has an approved hazardous waste dumping ground.

That makes some folks worry about economic growth. The lack of approved landfills, they say, eventually could discourage new industries, increase illegal "midnight dumping," and create such hefty disposal costs that Mid-South products could be priced out of the market.

Mid-South industries must ship their hazardous wastes at least 500 miles away to secure landfills in Alabama, Louisiana or South Carolina at price tags ranging from $5,000 to $10,000 a truckload.

Some, like Memphis' United Paint Co., have managed to pass on these costs in the price of their products. Others, like Buckman Laboratories, Inc., simply eat some of those bills.

"Have you tried to sell anything lately?," says James Grannen, Buckman vice president. "In today's market, people are seriously resisting any kind of price increase."

Tennessee's latest victim of the harsh public focus is Browning-Ferris Industries, a company with Memphis roots now headquartered in Houston, Texas. BFI's proposal for a hazardous waste landfill in sparsely populated Henderson County, Tenn., just about 100 miles from Memphis, drew such angry protests that the company scotched its plans last month. In the aftermath, the county grudgingly adopted zoning usually resisted in rural communities.

BFI WAITING IN THE WINGS

"On the one hand we have no specific plans to investigate any particular sites in that area (the Mid-South)," say BFI's Jack Lurcott, vice president for hazardous waste operations. "However, we are actively interested in investigating sites in market areas that have a need."

BFI operates hazardous waste sites in several states and just acquired a New York company that added more. However, all those sites were established in the mid-1970s—before the current tide of public concern.

Another big name in waste management, SCA Services, Inc., still is struggling after two years to win permission for its proposed 240-acre landfill in north Shelby County. Responding to wary constituents in the Lucy-Woodstock community, where the dump would be installed, county officials blocked SCA's plan. In the process, they sent SCA to court, where the issue remains.

Tennessee—until recently ranked No. 8 on the nation's list of hazardous waste generators—has caught the eye of companies like BFI and SCA because there's gold in burying such industrial byproducts. Proximity to Memphis is important to them, too, because of the city's high concentration of chemical, paint, and related industries that keep Tennessee near the top of the list.

STATE TOTALS NOW FUZZY

State officials responsible for regulating hazardous waste disposal say they're no longer certain how much of the stuff is being created by Tennessee industries, however.

"Any kind of information I could give you would be based on a faulty data base and it might be very misleading," says Dwight Hinch of the state health department's solid waste management division. He explains the statistics were generated by surveys that preceded industrial closings and cutbacks. According to earlier data, Tennessee factories were producing an estimated 4.5 million metric tons of potentially harmful wastes each year.

Today, Hinch guesses that figure has dropped to somewhere between 1.5 to 2 million metric tons annually. The department is conducting a new survey, but won't have data from it for several months.

Mississippi industries, meanwhile, end up with about 2 million metric tons of hazardous wastes each year. Unlike those in Tennessee, which ship wastes elsewhere, most manufacturers in the Magnolia state handle their own byproducts through approved means, says Jack McMillan, director of the Mississippi solid waste management program.

SELF CONTROL IN MISSISSIPPI

Filtrol Corp. in Jackson, DuPont on the Gulf Coast and a Pascagoula chemical firm account for a large percentage of the state's hazardous waste, most of which is disposed of through deep-well injection, McMillan says.

Across the Mississippi River, Arkansas' hazardous waste problem seems like small potatoes. Industries there generate only about 117,000 metric tons of such byproducts annually, according to Sandra Perry, hazardous waste ccordinator for the state's Department of Pollution Control.

Arkansas hasn't managed to score any hazardous waste sites, either, although a court case is pending with a firm from Houston that wants to put one in the southwestern corner of the state near Hope. The story is much the same in Mississippi, where several landfill plans have been torpedoed, says McMillan.

"This is getting to be so emotional in the public mind that it's a real problem. I'm not being critical, but they're not accepting the fact that lack of a facility presents a greater danger," says McMillan, arguing that the risks have been shifted to the highways as industries were forced to ship wastes away.

TRANSPORTATION WORST OF ALL

"More environmental degradation occurs in transportation than anywhere else," he adds.

While few North Mississippi industries generate volumes of hazardous wastes, companies there still must comply with complicated disposal regulations.

The Conoco Chemicals Co. plant in Aberdeen is one of them. Another is Formby's Olive Branch plant, which produces furniture refinishing and care products. For Formby's, getting rid of small volumes of such wastes is "expensive." But John Friend, Conoco's plant manager, doesn't think he has much of a problem.

"We generate such a small amount that I would really characterize it as a non-problem," says Friend.

The company's out-of-state shipments include only two to three drums of officially classified hazardous wastes each year. But Conoco also sends about 200 drums of technically nonhazardous wastes to an out-of-state facility as well. Like many industries, Conoco uses recycling to hold down its byproduct volume.

For Mid-South firms with significant amounts of environmentally threatening waste, however, compliance can be a big expense.

COSTS FOR DISPOSAL NOT CHEAP

"I don't know that I have a breakdown, but it's very costly," says Stan Harshfield, technical director for United Paint in Memphis, which ships its wastes to Alabama. For example, United spends $5,000 a year just for permits required by the state of Tennessee, and that "sticks in my craw," he says.

The high cost is due to the way the state's "manifest" system is structured, Harshfield argues. Manifesting means tracking hazardous waste from the cradle to the grave. In Tennessee, companies like United must have separate permits to generate, store and transport such wastes.

Harshfield complains, too, about the ever-changing regulatory environment that began six or seven years ago.

"There have been a succession of regulations, and every time we've thought, 'That's that and we can start making arrangements.' Then it would be back to the drawing boards, and now everybody in the industry is doubtful and fearful that these are the last ones," Harshfield says.

REGULATORS ALSO GET THE BLAME

Buckman's Grannen believes some of the regulators have been overreacting as much as the public, though he gives Hinch and his fellows in the Tennessee health department high marks for balancing the need to protect the environment with industry's concerns.

However, he thinks EPA generated irrational fear in Shelby County three years ago when its investigators wore protective suits while surveying the Frayser area for forgotten wastes. Despite a number of investigations, no chemical dumping grounds were found there, but some residents continue to believe buried chemicals were making them ill.

Because of the high costs they face in shipping their byproducts elsewhere, managers like Grannen and Harshfield share BFI's concern over public distrust.

"If someone were able to establish a facility in our area, it would reduce our cost very substantially," says Grannen, noting that Buckman must fork out big payments in shipping wastes to Louisiana.

PUBLIC POSITION HAS SYMPATHY

Still, many industrial executives are quite sympathetic to the folks who show up at public meetings to grill folks like EPA's Scarbrough.

"It's very definitely a serious problem," says Harshfield. "Nobody wants it in their back yard, including the people in Henderson County. I don't blame them—I'd like to have one in Henderson County but not in Shelby County."

The Tennessee Manufacturers Association had hoped for a bill in the legislature this year that would provide financial incentives to communities accepting hazardous waste landfills nearby. Via fees charged to industry, counties could sweeten their own coffers while holding down taxes imposed against their residents.

But the outfall from the BFI episode in Henderson County means any legislation along those lines probably won't get off the ground, says Rep. Ray Johnson of Murfreesboro, chairman of a special legislative committee studying the issue.

"I think it's questionable that we, as a committee, can come up with a compromise," says Johnson, who has been working toward a pact between industry and environmentalists. In exchange for financial incentives to site landfills, industry would accept fees toward building a state "superfund" to clean up existing, unsafe dumps.

Johnson had no role in the Henderson County-BFI dispute, but he has felt the blast nonetheless.

"Just because I am chairman of the study committee, they would run me out of the county right now. I've gotten phone calls and letters from people who didn't understand what the situation was," Johnson says.

And, while a number of bills may be put forward this year, he thinks it's unlikely any will pass.

While Tennessee looks at incentives, Mississippi legisators just killed two bills the state manufacturers association feared would stop hazardous waste landfill development altogether. One bill would have required public hearings and approval from local elected officials before a dump could be built. Another would have required approval from local voters in the landfill's county.

"I don't know who the author is, but I can tell you where those bills are coming from—public resistance," says Hugh Ketchum, executive director of the Mississippi Manufacturers Association.

PANIC AT FEAR OF UNKNOWN

"Everybody panics," Ketchum says. "It's just like an airplane. When planes first started flying, everybody was scared of an airplane falling out of the sky, and you saw a lot of attempts to legislate where they could fly."

Last year, Mississippi adopted a financial incentives program to make hazardous waste sites more attractive to its communities. Today Ketchum worries the public backlash, should it be ensconced in state law, would be a deterrent to industrial development.

Down the road, for example, public resentment may make it too expensive to haul wastes to Alabama, Louisiana or South Carolina. In those states and others, fear is leading to constituent pressure for higher taxes on out-of-state wastes, and state officials can bog them down in mountains of red tape.

"Our current concern is in those states prohibiting shipments from out of state," says Tennessee's Hinch. "Federal law restrictions on interstate commerce won't let them do it outright, but there's nothing to prevent them from setting up fee structures that make it very expensive. As they perceive themselves as being the dumping grounds for the country, we expect to see more of that."

GOVERNMENT TO HELP?

In Washington and state capitals, there has been talk of using government authority to override public objections by applying the same principles of eminent domain that built the nation's highways. So far, only a few states, like Georgia, have established state authorities to help mitigate site problems.

Frequently, however, the state officials who should be able to rationally weigh a site end up being "thrown into the hoop with the bad guys," says BFI's Lurcott.

EPA's Scarbrough can attest to that statement, even though he has no role in choosing sites or determining need. Under current law, EPA's only role is to assess the technical aspects of a landfill proposal to ensure it meets safety specifications.

"We don't make any sort of judgments like that," says Scarbrough. "But we are not so naive as to not see that it's a problem."

Today's site-finding problems are the legacy of past disposal practices, which involved both industry intransigence and ignorance.

Carbon-tetrachloride, an organic compound suspected as causing cancer, "used to be the standard industrial solvent. I used to wash my hands in it. Now you wouldn't get within 20 feet of it. We just know so much more about it," says Buckman's Grannen.

West Tennesseans are particularly leery of proposals like BFI's as publicity continues over abandoned chemical dumps. Just as BFI backed off, Velsicol Chemical Corp. was preparing its defense of a $2.5-billion lawsuit stemming from water pollution from its site in Hardeman County, Tenn.

Genuine problems like that one have been "exploited rather heavily," says Lurcott. "Being on the positive side hasn't helped anybody get elected, and exploitation was seen as necessary to get legislation passed to deal with these problems."

But, he says "once Frankenstein is loose, it's difficult to control him."

Mississippi's McMillan thinks the U.S. should begin following Europe's example in coping with hazardous wastes. There, approved landfills are incorporated as another utility in industrial parks. Wastes are treated before being placed in them, and industries rely heavily on recycling.

PROBLEM BEING ATTACKED HERE

Meanwhile, alternatives are beginning to emerge. The Tennessee Manufacturers Association has a year-old program called the Waste Exchange to help link industries who can use one another's byproducts. Its success has been limited so far.

A number of Mid-South industries rely on treatment at facilities like the North Shelby County plant operated by Earth Industrial Waste Management, Inc. Still, many industrial wastes must be buried instead.

Even so, it may be years before any secure landfills are carved out in the Mid-South states.

Says BFI's Lurcott: "It will be a lengthy period of time. It sure isn't going to happen quickly."●

TAX EXPENDITURE STATEMENT

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. BONIOR of Michigan. Mr. Speaker, today I am reintroducing legislation which I first introduced in the 97th Congress to amend the Congressional Budget Act of 1974. This bill would mandate the inclusion of ceilings for tax expenditures in the first and second budget resolutions and the reconciliation process.

Tax expenditures, as defined by the Budget Act, are those "revenue losses attributable to provisions of the Federal tax laws which allow a special exclusion, exemption, or deduction from gross income or which provide a special credit, a preferential rate of tax, or a deferral of tax liability." They are designed to reduce a tax burden or encourage particular economic behavior for a targeted segment of the population.

In practice, they are realized in the form of tax deductions for the elderly and the blind as well as the expensing of exploration and development costs for oil companies. They are the deductability of mortgage interest and special tax treatment of royalties on coal.

For fiscal year 1983, the Congressional Budget Office has identified 104 tax expenditure programs affecting corporations and individuals and although a cost estimate must be accompanied by a strong caveat—about which, more later—the CBO has estimated it at greater than $273 billion. When tax expenditures are added to direct expenditures, the former constitute one-fourth of the Federal budget.

The Congress has, in the past 2 years, been through a tortuous budget process which, assuming the best in all of us, was designed to bring the Federal budget under control. Leaving aside any discussion on the manner in which

it was done, one can only wonder that the Congress implicitly consented to allow $1 of every $4 in expenditures to remain outside the parameters of its deliberations.

When the first tax expenditure budget was produced in 1968, there were some 40 different programs accounting for $44 billion in foregone revenues. The figure for 1983, as mentioned earlier, now stands at $273 billion and 5 years hence is expected to reach $439 billion.

Further, the CBO has predicted that by 1987, tax expenditure costs will have grown by 1,102 percent over 1967 costs while the corresponding figure for direct outlays will be 532 percent.

Despite the enormity of the tax expenditure budget, the budget resolutions must include only ceilings on direct expenditures and floors on revenues and tax expenditures properly fall into neither category.

They are revenues foregone, not raised, and thus do not constitute a tax and yet are not distinctly an expenditure because they are not subject to the regular authorization and appropriations process. As in entitlement programs, any individual or corporation which can meet the criteria established for the program in the IRS Code can use the benefit by simply indicating thusly on their tax return. The individual or corporation in essence gets money that would otherwise accrue to the treasury. It has the same effect as a direct expenditure but is not subject to an appropriation and, in most cases, is not subject to reauthorization, Federal review, or congressional oversight. $273 billion.

The Budget Act itself only requires that a tax expenditure budget be included in the report accompanying the first budget resolution but does not require that any ceilings for tax expenditures be included therein. It may be argued that tax expenditures are controlled through the establishment of revenue floors in the second resolution and that any tax expenditure which would lower the floors of the binding resolution would be subject to a point of order. Such control is oblique at best.

Most existing tax expenditures are not sunsetted or zero budgeted, and, therefore the revenue floors communicated in the resolutions assume their continuance. Therefore, only new or revised tax expenditures subsequently considered on the floor are subject to a point of order if they reduce revenue floors.

Alice Rivlin, Director of the Congressional Budget Office, testified before the House Rules Committee in 1980 that more than 70 percent of the Federal budget was outside of congressional control because of entitlements, defense contracts, and various other uncontrolled spending programs. When tax expenditures are added to this list of uncontrollables, it is no wonder that direct expenditure cuts have been so difficult. The burden of reduction must be borne by the less than 30 percent of the Federal budget which goes through the regular authorization and appropriation process.

Several factors, it seems to me, will accelerate the use of tax expenditures in the future.

First, the limits placed on direct expenditures by the budget resolutions will beg for creative circumvention for those seeking to establish new programs without creating new expenditures or bumping up against expenditure ceilings.

Second, tax expenditures are not subject to appropriations and rarely to the authorization process. Sole jurisdiction for their creation and continuation rests with Ways and Means Committee in the House and the Finance Committee in the Senate although the authorizing committees have been provided authority to review tax expenditures within their areas of jurisdiction. The usually cumbersome route to program creation or reauthorization is thus truncated.

Third, these programs create no new or extensive bureaucracy. There is no process of application, review, and approval—and the paperwork that entails—of a Government agency. The cost of administration, unlike spending programs, is negligible. The taxpayer merely assumes the deduction or credit in his tax return subject only to the possibility of an IRS audit.

While each of these points may be seen to have positive aspects, the damage sustained to the congressional institution far outweighs the benefits derived.

Increasing use of tax expenditures to avoid spending ceilings will further diminish that portion of the budget "controllable" by the Congress. More responsibility for reaching fiscal goals will be shifted away from the authorizing committees with a commensurate enhancement of authority for the Ways and Means Committee, sought or unsought. That committee cannot possibly conduct regular oversight and reauthorization for 104 or more tax expenditure programs.

To illustrate the uncontrolled nature of this fiscal tool one need not delve very far into the research material available to realize that there is only a lowest common-denominator approach to exactly what items constitute tax expenditures. We have a difinition in the Budget Act but there is no certainty with regards to which specific items constitute a deviation from the normal tax structure—the operational effect of tax expenditures—because differences exist as to the definition of the normal tax structure. For example, a deduction for investment in capital equipment is considered a tax expenditure while business entertainment deductions are not.

There is also no agreement on the cost of tax expenditures other than the agreement that any estimate produced to this point is tenuous at best. "A lot" might be the most accurate response to an inquiry concerning costs.

The GAO, in 1979, stated:

> The cost of all tax expenditures is the difference between the revenue raised by the normal tax structure and that raised by the existing structure. In the real world, these costs cannot be determined directly. No one knows what revenue the normal tax structure would raise. The present system creates incentives for people to alter their behavior and so presumably influences the way they act. They would probably act differently under another system, with consequent effects on revenue, but there are too many unknowns to estimate the differences * * * Although it is common to make such a summation, the figure is of limited usefulness.

Additionally, the cost of a tax expenditure cannot simply be derived by summing the amounts claimed on a tax return. For instance, a tax credit for businessmen hiring Vietnam veterans does not depict the true costs if we consider the income taxes lost if that program were ended plus the costs of unemployment benefits that would have to be provided. Secondary or spinoff effects, however, are difficult to estimate even in direct spending programs.

Nevertheless, the point remains valid that we have a fiscal tool of formidable effect and increasing use, of imprecise dimensions, of imprecise costs, under negligible control.

The budget process as it now exists is a one-armed wheelbarrow. It is self-deception for this body to pretend to be a partner in the budget process when it allows itself access to only one-third of that budget.

In proposing this legislation, I am not arguing for the elimination or diminution of any particular tax expenditure or class of tax expenditures—although like everyone else in the Congress I would have my candidates for revision. Some tax expenditures, like deductions for charitable contributions and interest paid on home mortgages, have proven their worth in increasing the general welfare and propagating societal values.

However, the Congress might want to consider a sliding scale for the investment tax credit instead of the flat 10 percent or it might want to lower the deductions for mortgage interest on second homes or very expensive homes. It may want to eliminate the expensing of exploration and development costs to large oil companies and have expenses deducted from income as it is produced as is the normal procedure. Perhaps, the Congress may want to change the mix of tax expenditures and increase or decrease the 23 percent that currently goes to corpora-

tions or alter the regressive nature of a sizable proportion of individual tax expenditures. The point is not that we should pursue any of these particular actions but that we should be able to.

The bottom line is that Congress, in its yearly budget deliberations, should be able to place ceilings on tax expenditures and consequently make some tough but well-considered decisions about the mix of those tax expenditures. In doing so, it would be providing itself access to revenues which could relieve pressure on the 30 percent of the budget we now use as the tail to wag the dog.

I am aware that ceilings for tax expenditures have been considered in the past and for one reason or another were not implemented. Unlike some proposals in the past, however, my legislation does not seek to set any type of fixed limit on tax expenditures that would be imposed upon future Congresses. Quite the contrary, by requiring yearly deliberations and ceilings, Congress will be newly allowed to work its will on tax expenditures as part of the Federal budget.

In adopting this approach, the Congress would merely be following the central purpose of the Budget Act of 1974 which sought to provide order to fiscal decisionmaking.

Whatever the problems in the past, times and circumstances change and create new dicta for response. Paraphrasing Thomas Jefferson:

To ask institutions to live by unchanging guidelines is like asking a man to wear the same coat he did as a child.

Anyone who feels the Budget Act, as now constituted, is adequate, need only examine the record of recent attempts at fiscal management. I hope that this legislation will become the first of several needed reforms.●

PERSONAL EXPLANATION

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. CORCORAN. Mr. Speaker, on Tuesday, March 1, I was unavoidably absent from the floor of the House of Representatives. Had I been present, I would have voted "aye" to suspend the rules and pass H.R. 999, a bill to establish the American Conservation Corps program. As a cosponsor of this legislation, I regret I was unable to record a positive vote on this important bill.●

SAVING FACE FOR MOSCOW

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. McDONALD. Mr. Speaker, in spite of repeated denials from highly placed persons in the Reagan administration that it is trying to discourage investigation of KGB links to the attempted assassination of the Pope, the evidence to the contrary continues to accumulate and methinks they protest too much. One of the first persons to call attention to the KGB links to the attempted assassination was Hilaire Du Berrier, who recently wrote a followup item on this subject for the Review of the News of February 23, 1983. The item follows for the benefit of my colleagues.

SAVING FACE FOR MOSCOW

In early April of 1981 the then-director of French foreign intelligence, Alexandre de Marenches, learned through reliable contacts in Hungary and Romania that Moscow had made the decision to murder Pope John Paul II, who was seen as the catalyst animating the Solidarity workers movement that was threatening Communist rule in Poland. The code name for the plot was "Rasputin." By mid-April the reports had been solidly confirmed and, around April 20, de Marenches sent two emissaries to warn the Pope that an attempt might be made within a month. Finding the warning both explosive and nearly incredible, the Vatican decided not to make it public.

After the attempt on the Pope's life took place on May 13th, Paris and Bonn were joined by top C.I.A. officials in pressuring the Vatican to keep the Soviet involvement under wraps on the astonishing ground that disclosure would only worsen international tensions. Fortunately, chief Italian investigator Ilario Martello refused to go along with the coverup and pursued the case doggedly until the major pieces fell into place. Thanks to Judge Martello's courageous work the Soviet origin of the conspiracy is now admitted by everyone except Moscow and (outrageously) our Establishment-controlled media.—H. du. B.●

TOWN OF LANCASTER, N.Y. MARKS SESQUICENTENNIAL

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. NOWAK. The new 33d Congressional District of New York, which I am privileged to represent, includes the town of Lancaster, a suburban community of Erie County, N.Y., near the city of Buffalo.

Residents of the town of Lancaster this week are launching the observance of its 150th anniversary, the sesquicentennial.

As the town commemorates the achievement of this milestone in its history, I would like to bring to my colleagues' attention a thumbnail sketch of this community prepared by the Erie County Industrial Development Agency. I believe it concisely describes some of the community assets that make for a high quality of life in Lancaster and the Greater Buffalo, New York area.

WELCOME TO LANCASTER

The Town of Lancaster, New York is a rural-suburban community located just 9 miles east of the City of Buffalo. Founded in 1833, the Town offers all the advantages of a smaller community lifestyle with immediate access to a major metropolitan area.

Including its two Villages, Depew and Lancaster, the Town of Lancaster has a population of just over 30 thousand residents and is 35.6 square miles in size. The area's diverse ethnic make-up provides for a strong work ethic and an abundance of available labor at every skill level.

Residents of Lancaster are afforded a multitude of cultural and recreational activities. Golf courses, tennis courts, swimming pools, and four municipal parks provide for a host of outdoor activities, and Lancaster International Speedway offers the finest in auto racing to be found anywhere in New York State. Within less than a half an hour drive, Lancaster residents have the opportunity to explore the treasures of Buffalo's Albright-Knox Art Gallery, attend performances of the Buffalo Philharmonic Orchestra and the City's major theaters, hear the thunder of Niagara Falls, and experience the thrill of professional baseball, football, hockey, and soccer.

Religious and educational opportunities are readily available in the Town of Lancaster. The Lancaster Central School District is the major public educational system serving over 5,000 of the area's youth. One Catholic high school and six religiously-sponsored elementary schools offer private-parochial educational programs. Seventeen area community colleges, colleges and universities located throughout Western New York offer Lancaster residents a variety of undergraduate and graduate curriculi at every level from vocational trades to professional practice. Two public libraries serve the Lancaster community and nineteen churches, six Catholic and thirteen Protestant, offer religious services.

Lancaster Town government consists of a Town Supervisor and a four-member Town Council. The Town's 21-officer police force provide protective services and over 150 volunteers from four companies serve the Town's fire and emergency rescue needs. The Town also sponsors a free volunteer, emergency ambulance service.

Single housing units in the Town of Lancaster have a median housing value of $42,100. Most residences are served by municipal water and sewer systems, and have access to cable television programing.

Lancaster is home for such nationally known firms as Figgy International's Scott Aviation, Dresser Industries, Sealing Devices, PCB Piezotronics, Hercules Products, Mohawk Containers, United Silicone, Young Fire Equipment, Henry & Henry and Lancaster Machine Knife.

Companies locating or expanding in Lancaster have long recognized the benefits of Erie County's many resources. A central location in the heart of the Northeastern North American marketplace. Plenty of water and energy. A skilled labor force. And, access to a multitude of financial and indus-

trial development incentives through the Erie County Industrial Development Agency (ECIDA).●

H.R. 555: A GOOD START

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. OTTINGER. Mr. Speaker, I want to state my strong support for H.R. 555. This legislation, introduced by my colleague from Iowa, Mr. HARKIN, would amend the Federal Power Act to limit certain costs of construction work in progress (CWIP) from being recovered through utility rate increases.

Congressman HARKIN has developed a sensible solution to dealing with the issue of CWIP in wholesale electric rate bases regulated by the Federal Energy Regulatory Commission. The issue, like many electric regulatory issues, has been the focus of controversy and ratepayer anger for many years. No wonder; CWIP in the rate base has a very simple effect: It transfers the risk of powerplant cancellation away from utility shareholders to utility customers during construction. It also creates strong incentives like conservation, cogeneration, and better interutility coordination are often much less costly means to meet demand. Nonetheless, there may be certain very limited instances in which, as a last resort for a financially strapped utility, inclusion of CWIP In wholesale rate bases is appropriate.

Congressman HARKIN's bill is an excellent start toward the objective of limiting CWIP to only those relatively rare situtations in which the remedy is appropriate. That is why I am a cosponsof. However, I do think that the bill needs to be clarified in certain areas. Congressman HARKIN assures me that he agrees with my concerns and supports the largely technical changes which I believe necessary.

I am pleased with our joint approach to the CWIP issue at this point in time, because it is likely that the Subcommittee on Energy Conservation and Power, which I chair, will consider H.R. 555 in the near future.●

ARGONNE NATIONAL LABORATORY ACCOMPLISHMENTS CITED

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. ERLENBORN. Mr. Speaker, Argonne National Laboratory, a Department of Energy's multipurpose laboratory in my district, was recently cited by the Department of Energy for scientific accomplishments in research that will have national importance in the development of safe storage for nuclear wastes.

The bulletin from the Department of Energy's Office of Energy Research lists 36 outstanding energy research projects conducted at laboratories all over the country in 1982. Six of the projects were credited to Argonne Lab, more than any other facility mentioned.

The storage of radioactive materials is complicated by their tendency to contaminate surrounding areas. For example, through a process called leaching, small amounts of radioactive substances can be dissolved out of glass or ceramic containers and carried to other locations where they are deposited. In one experiment dealing with this problem, it was found that when the glass-enclosed plutonium was surrounded by water and exposed to high radiation, leaching increased significantly.

Three other studies dealing with the nature and properties of radioactive elements are commended in the bulletin.

One series of experiments showed that plutonium dissolved in natural bodies of water will change in form and settle at the bottom of the water when iron deposits are added.

In other tests it was found that contact with basalt, a rock rich in magnesium and iron, immobilizes the nuclear waste product neptinium. These experiments support the placement of deep nuclear waste repositories in basalt or other materials containing iron.

The first detection of near-infrared light (fluorescence) from a plutonium compound (plutonium hexafluoride) was achieved in another study. This knowledge will help in the development of methods to separate plutonium isotopes and, again, increases basic knowledge of this element and its characteristics.

In research that will help to design safe and efficient nuclear powerplant systems, computer programs were developed that actually assist human reasoning. Using symbolic logic equations, computers can reduce the time and effort required to analyze proposed systems, and work out problems before they occur.

Finally, Argonne was cited for preparing the first materials for experiments to exhibit the coexistence of magnetism and superconductivity. The two supposedly competing properties were both found to be present in a special class of materials containing erbium, rhodium, and boron, at temperatures near absolute zero.

The people at Argonne Laboratory can be proud of these accomplishments. They are working toward solving problems that could eventually affect all of us, demonstrating their unique scientific talents at a very special place.

A complete listing of the 36 projects follows:

ACCOMPLISHMENTS UNDER THE BASIC ENERGY SCIENCE PROGRAM DURING 1982

1. Coexistence of Ferromagnetism and Superconductivity Observed for the First Time Using Neutron Scattering Techniques (Argonne National Laboratory, Brookhaven National Laboratory, Oak Ridge National Laboratory, University of Maryland).
2. Method for Inhibition of Intergranular Stress Corrosion Cracking Provided by Mechanistic Study (Brookhaven National Laboratory).
3. Improvement in Sulfur Isotope Ratio Measurements Significant for Identifying Acid Rain Sources (Idaho National Engineering Laboratory).
4. Experimental Observation of "Hot Carriers" Could Lead to Doubling Efficiency of Photoelectrochemical Solar Devices (Solar Energy Research Institute).
5. General Purpose Computer Program to Assist Human Reasoning Processes Used to Evaluate Nuclear Power Plant Systems Designs (Argonne National Laboratory).
6. Scientific Feasibility Demonstrated for Producing Batteries with Electrodes Made of Polyacetylene Sheet (University of Pennsylvania).
7. Progress Attained in Determining How Plants "Sense" Temperature (Michigan State University).
8. Low Temperature Neutron Irradiation Facility Provides Data Critical for Fusion Magnet Shielding Design (Oak Ridge National Laboratory).
9. Ion Implanation Production of Amorphous Layer on Iron Surfaces Greatly Reduces Friction (Sandia National Laboratories—Albuquerque).
10. Detailed Measurement of Charged Particle Production by 14 NeV Neutrons Made Possible by a Specially Designed Spectrometer System (Lawrence Livermore National Laboratory, Ohio University).
11. Columbia River Basalts Found to Have Chemical Properties that Significantly Assist in Immobilization of Long Lived Radioactive Elements (Argonne National Laboratory).
12. Accelerated Radiation Damage Study Shows Bulk Swelling of Proposed Nuclear Waste Storage Medium Larger than Previously Projected (Los Alamos National Laboratory, Pacific Northwest Laboratory).
13. Leaching of Plutonium from Glass Host Materials into Water Increased by High Radiation Fields (Argonne National Laboratory).
14. Clarified Picture of the Chemistry of Plutonium in Environmentally Important Aqueous Media (Argonne National Laboratory).
15. Natural Soil Substances Shown Likely to Retard Migration of Plutonium and Other Actinides (Florida State University).
16. Chemical Vapor Deposition Used to Produce Zirconium Diboride with Superior Solar Energy Absorption Properties (Sandia National Laboratories—Albuquerque).
17. One-Step Route for Direct Gasification of Carbon to Methane at Relatively Low Temperature (Lawrence Berkeley Laboratory).
18. New, Organometallic Chemistry May Help Coal Conversion and Industrial Chemicals (Lawrence Berkeley Laboratory, Brookhaven National Laboratory).
19. Experiments Impact Widely Held Theory by Showing Reaction of Oxygen

Atoms with Unsaturated Hydrocarbons Does Not Involve Carbon-Carbon Bond Breakage (Lawrence Berkeley Laboratory).

20. Improved Understanding of Hydrogen Embrittlement Phenomonon and Methods to Prevent it Result from Ion Implantation Research (Sandia National Laboratories—Albuquergue).

21. Synchrotron radiation Used to Obtain for First Time Both Surface Structure and Temperature Distribution for Silicon on Laser Heating (Oak Ridge National Laboratory).

22. Molecular Clusters Generated Having Hundreds to Thousands of Molecules Bearing a Single Unit of Electric Charge (Brookhaven National Laboratory).

23. Major Advance in Atomic Physics Permits Spectroscopic Study of X-rays Produced at Instant of Collision of an Ion and an Atom (Brookhaven National Laboratory).

24. Mathematical Theory Shows Onset of Chaotic Phenomena Follows a Precise Law Independent of Size, Boundaries, or Other System Details (Los Alamos National Laboratory).

25. First Detection of Fluorescence Emission from Electronically Excited Plutonium Hexafluoride Has Been Achieved (Argonne National Laboratory).

26. New Process to Recover Silver from Waste Developed Which Meets Stringent Environmental Standards (Oak Ridge National Laboratory).

27. Mathematical Description Developed of the Transition of One Stable State of a System to Two Others Has Been Applied to Combustion Processes (Northwestern University).

28. Computer Modeling Studies Support Concept of Using Heat Derived from Magma Bodies to Convert Water—Biomass Mixtures to Gaseous Fuels (Sandia National Laboratories—Albuquerque).

29. Electrical Conductivity in Oil Shale During Retorting is Orders of Magnitude Different from that of Pre- or Post-retorted Material (Lawrence Livermore National Laboratory).

30. New Pathway of Energy Conversion Using Inorganic Phosphorous as a Substrate Has Been Discovered (University of Georgia).

31. Adaptation of Plants to Water Submersion Stress (Michigan State University).

32. Water Soluble Product from Fungal Degradation Not Previously Observed Has Been Isolated (University of Idaho).

33. Extension of Vibrational Control Theory to Operation of Catalytic Reactors (Illinois Institute of Technology).

34. Instrumentation Developed and Demonstrated for Detection of Internal Cracks in Large Structures (Ames Laboratory).

35. Have We Seen a CO2 Warming? (Lawrence Livermore National Laboratory).

36. Capabilities, Limitations and Prospects—Simulating CO2-Induced Climate Change (Oregon State University).●

THE BULGARIAN SECRET POLICE DO NOT REPRESENT THE BULGARIAN PEOPLE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. McDONALD. Mr. Speaker, the Bulgarian National Front, Inc., an organization of Bulgarian-Americans, which has been in existence since 1958, sent a memorandum on the subject of the attempted assassination of the Pope to President Reagan, Vice President Bush, the U.S. Senate and House. In this memorandum, they pointed out the sufferings of the Bulgarian people under communism and how Bulgarian Secret Police complicity in the attempted assassination of the Pope is just one more sad chapter in Bulgaria's history under Communist domination. As the memorandum points out, the trail of the Bulgarian Secret Police is becoming clear for all to see and footprints are very bloody. The memorandum follows:

Memorandum to Hon. Ronald Reagan, President of the United States of America, Hon. George Bush, Vice President of the United States of America, Hon. Members of the Senate of the United States of America, Hon. Members of the Congress of the United States of America:

DEAR SIR: In the past months the international press and television brought out a series of reports in connection with the assassination attempt on the life of His Holiness Pope John Paul II. The "Bulgarian connection" mentioned in the reports refers to the oppressive government of Bulgaria but it also presents the Bulgarian people in false and unfavorable light. We, American citizens of Bulgarian descent, feel it is our obligation to introduce some clarification in defense of the people of Bulgaria, who are now unable to express freely their feelings about crimes such as the attempt on His Holiness' life, a terrorist act most probably done with the knowledge of the Bulgarian communist government.

In fact crimes such as this one are nothing new for the Bulgarian communists. The first victims of their terror were Bulgarian citizens. Here are some illustrations of their terrorist activities in recent history:

1. The detonation of the St. Nedelya Cathedral in Sofia, on April 20, 1925, where over 700 worshippers were killed or seriously wounded;

2. The assassinations of distinguished Bulgarian citizens, such as General Hristo Lukov, on February 13, 1943, Member of Parliament Sotir Yanev, on April 10, 1943, and the Chairman of the Appellate Court Atanas Pantev, on May 2, 1943;

3. On September 9, 1944 the communists seized power in Bulgaria and subjected the country to an unheard of regime of terror. The members of three successive administrations including three Regents, 22 Cabinet Ministers, 86 Members of Parliament and 12 State Counselors were executed on February 2, 1945. Additionally, more than 3,200 persons were summarily executed in the countryside by orders of the so called "People's Tribunals";

4. In the period after September, 1944 brutal terror swept the country and in less than a year over 100,000 Bulgarians—including a large part of the nation's intelligentsia, clergy, army and administration—were murdered without being formally charged, prosecuted, or sentenced.

5. Over 250,000 Bulgarian citizens, out of a total population of six and a half million at that time, were imprisoned, or, sent to concentration camps, such as Rossitsa, Belene, Bogdanov Dol, Kutsian, Lovech etc.

6. A striking example of atheistic violence was the murder of the Bishop of Nevrokop, H. H. Boris, who was shot in front of His church on November 8, 1948. Hundreds and hundreds more priests and Bishops belonging to various religious denominations were also murdered, or sent to vanish to concentration camps.

After the transformation of Bulgaria from "The Land of Roses" to the Land of Blood and Tears, the communist rulers expanded their infamous activity beyond the borders of the country. Following are few examples of Bulgarian communist terrorist activities abroad:

1. The well known Bulgarian patriot Boris Arsov was kidnapped from Denmark in September, 1978. Two months later he was found dead in the Central Prison in Sofia, Bulgaria;

2. The Bulgarian emigrant-writer George Markov was assassinated with a poisoned unbrella in London, England, on September 11, 1978;

3. The BBC announcer and commentator in Bulgarian language Mr. Vl. Simeonov was killed at about the same time, also in London, England;

4. In May, 1979 a communist terrorist made an unsuccessful attempt on the life of the emigrant-publisher Vladimir Kostov in the manner that killed George Markov. Quick medical intervention, however, saved his life. Keeping in mind the endless list of terrorist activities of the Bulgarian communists, one should not be surprised that their "expertise" was utilized by their Soviet masters in organizing the monstrous crime against His Holiness Pope John Paul II.

Communist violence and terror most probably will not stop in Rome. We have all the reasons to believe in the existence of well organized groups also in this country. Most of the members of cultural, business, or, religious delegations sent to this country by the Bulgarian government are their communist agents.

We strongly recommend the imposition of a very strict control over such groups, and, particularly those who under the pretense of religious activities organize pro-communist centers.

United States grants should not be given to students who are selected and sent to this country by the Bulgarian communist government. Legal action should be taken against communist who come to visit, or live in the United States of America, and who conceal their party affiliation. The safety of all Americans of Bulgarian descent should be assured against eventual terrorist actions attempted by communists or their agents.

Dear Sir, we present this Memorandum to your attention believing that we are fulfilling our citizen obligations towards our country, as well as towards our old country. Bulgaria is now enslaved, suffering and denied rights and freedoms of any kind; her people is without any possibility to raise a voice of protest against the terrorist rule of communism imposed on it by a foreign power. As loyal American citizens we are deeply concerned about the principles of liberty and democracy, and hope that our concerns will be considered.

Sincerely yours,

GEORGE PETROFF,
Secretary.
DR. GEORGE PAPRIKOFF,
President.●

THE NATIONAL KIDNEY FOUNDATION "GIFT OF LIFE WEEK"

HON. JACK KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. KEMP. Mr. Speaker, the National Kidney Foundation, an organization dedicated to helping millions of Americans, is conducting a nationwide drive aimed at educating the public on the need for organ donations. The funding which has made this drive possible is the Charity of the Year Grant from the American Contract Bridge League. This league is selective in their choice for recipients of the Charity of the Year Grant and they stipulate that the funds are to be used for research as well as for education of the organ donor program.

In view of the fact that the National Kidney Foundation is able to fill only one-third of the need for kidney transplants, it is indeed time to lend support to this effort in improving the quality of life for thousands of Americans. Much has been achieved through the efforts of the National Kidney Foundation and they hope to achieve even more through their national drive. They would like March 1-4 to be recognized as the "Gift of Life Week" in honor of their national campaign. In light of the benefits that the National Kidney Foundation has given to many, it can be said that they do give a gift of life.●

NICARAGUA LOAN REQUEST OPPOSED

HON. MICKEY EDWARDS

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. EDWARDS of Oklahoma. Mr. Speaker, I strongly oppose the $30 million loan request by the Government of Nicaragua which is currently under consideration by the Inter-American Development Bank and call on my colleagues in Congress to also express their vigorous opposition.

While I well recognize that the United States has global responsibilities and cannot refrain from relationships with govenments not identical to ours, there comes a time when we must oppose the continuation of policies adverse to our own national interest. Support of the Sandinista regime in Managua is not in the interest of the United States.

In April of 1981, the President determined that Nicaragua was in violation of the Foreign Assistance Act as a result of its support for the Salvadoran guerrillas. Nicaraguan support for the guerrillas continues. No United States assistance to Nicaragua should be considered for that Government until it halts its attempts at creating unrest in the region.

The American people and the U.S. Congress have a right to object to the Inter-American Development Bank granting this loan request. The fiscal year 1983 budget called for more than $1.1 billion to be provided to the bank as a part of our growing contributions and the fiscal year 1984 budget request is more than $1.4 billion.

Two previous requests by the Nicaraguan Government for this loan have failed. This one should also.●

PUBLICIZED FELINE LEAVES LOVING FANS

HON. DON SUNDQUIST

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. SUNDQUIST. Mr. Speaker, the following article appeared in the Memphis Tennessee Press-Scimitar on Friday, February 4, 1983:

PUBLICIZED FELINE LEAVES LOVING FANS

(By Bill E. Burk)

If there is such a thing as cat heaven, Harold Streibich and his daughter Margaret are convinced the Black Witch of Endor is there today.

"Blackie," as she was known, used up the ninth of her lives last weekend on a veterinarian's operating table. She was 19 years old when she died.

Streibich is a stout man, a music-oriented lawyer who has tackled many a tough case in courts, but when he called to report that "Mama Cat is dead," his voice shook.

"Blackie had quite a history and, of course, after 19 years, she was as much a part of the family as our children," he said.

The saga actually began 20 years ago. A tom cat hung around the house and the Streibiches fed it but the tom, which they called "Satan," never woud dare venture one paw inside the house.

Not, that is, until the great snow of 1963, Satan made an exception and stayed inside and slept and ate to his heart's content.

Until the snow melted. Then it was back outside.

The following spring, Satan brought what the Streibiches believe was one of his offspring to the house.

"We wanted an unusual name so we named her Black Witch of Endor," said Streibich. "Endor was where King Saul would go to consult with the witches. We called her Blackie."

Margaret was a lass of 6 at the time. She dressed Blackie in doll clothes and trimmed her hair, once clipping a portion of Blackie's ear.

But Blackie was destined for greater things.

"In 1965 we had Becky Publishing Co. operating, and it was publishing all the Sam the Sham tunes," said Streibich, a director of the National Academy of Recording Arts & Sciences. "We wanted to open a new publishing company, so we came up with II Gatto Music Publishing Co. *II Gatto* is Italian for 'the cat.' It was named for Blackie. Our logo was a black cat.

"In 1969, Billboard magazine ran a story featuring Memphis music. Blackie was pictured with singer Dickey Lee."

Blackie was musical herself.

"She used to run across the keyboard of our piano, making all kinds of tinkling sounds," said Streibich.

Margaret married Dan Hovel, a TV newsman, last year and they moved to Cincinnati, leaving Blackie behind. Her age, they decided, made the move impossible.

The Streibiches decided not to bury the Black Witch of Endor in an animal cemetery.

"We buried her in the back yard," he said. "We wanted her near us, just like she has been the last 19 years."

Blackie's song has ended, but the melody of her memories linger on.

PLAQUE INSTALLED

A permanent plaque has been installed at Memphis State University to record in bronze the names of recipients of MSU's Distinguished Achievement Award.

The award is presented annually at "Salute to Memphis Music" ceremonies to honor the memory of Elvis Presley and to recognize outstanding contributions in the performing arts.

The plaque in the foyer of the Communication and Fine Arts building already bears the names of B. B. King, Charlie Rich, Jerry Lee Lewis and Sam Phillips. Efforts to honor Johnny Cash have been bogged down through most of the past two years. The planning committee must soon get an affirmation from Cash that he will be available to receive the honor in August, or another recipient must be chosen.●

STILL MORE MOLES IN BRITAIN

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. McDONALD. Mr. Speaker, there has been a great deal of discussion in the press, both here, and in England, over the disclosures of Mr. Michael Straight—who recently confessed to being a Soviet spy—over the extent of Soviet intelligence recruitment among Britain's best and brightest people. Once one of these moles confesses all, the question naturally arises as to how many others are running around undetected. Mr. Straight gave the estimate of 150 moles he knew of in Britain. Mr. Nigel West gives a further estimate of a possible 200. Would anyone care to hazard a guess as to the number running around the United States under false colors? I commend the article on this matter that appeared in the London Daily Telegraph on February 4, 1983, to the attention of my colleagues.

[From the Daily Telegraph, Feb. 4, 1983]

STILL MORE MOLES IN BRITAIN

(By Richard Beeston)

Mr. Michael Straight, the American who exposed Anthony Blunt, says there are to his knowledge still 30 to 40 people in Britain who have held important public office and had lived the lives of "moles."

In an interview with the Canadian Broadcasting Corporation Mr. Straight said that when he denounced Mr. Blunt as a KGB recruiter to M15 in Britain in 1963 he also gave British intelligence the names of at least 150 other people.

"Of those 150 I would guess that 30 to 40 have been living the lives of moles in England, that is to say, as members of the Labour party in Parliament, as barristers and judges, various other people in public life, one or two in the Foreign Office, the Home Office and the Treasury who have been allowed to retire," he said.

"I don't know what happened to them," he added, "I am sure British intelligence does know."

Mr. Straight, who last week published his autobiography "After Long Silence" which recounts his dealing with Blunt and Guy Burgess, said there were "plenty of other people in England" with similar knowledge to his own "who have chosen not to speak."

Questioned whether there were a "fifth, sixth and seventh man" and whether "big shots" were still protected he replied: "I think so."

TWENTY-SIX YEAR SECRET

Mr. Straight comes from a prominent American family and his book, in which he acknowledges that he kept his secrets about the working of a powerful KGB network for 26 years before informing Western intelligence, has aroused much criticism against him.

Among the reaction to the book has been a letter to the Washington Post from his English former wife Mrs. Belinda Straight declaring: "I in no way participated in Michael's activities, nor do I condone them."

Mrs. Straight said that she was 20 years old and just married when her husband told her he had been recruited in England by the Communists to work in America through a Soviet agent codenamed Michael Green.

"I extracted from him a promise that he would stop all further secret activity but failed to understand how hard it became for him to extricate himself," she added.

SPIES AND TRAITORS

A recent article in the Washington Times said that if Mr. Straight had informed American intelligence he could have crippled "the most damaging ring of spies and traitors in the history of British intelligence, saved the lives of scores of Russian patriots, Communist defectors and British agents betrayed to the Soviets by the comrades of Burgess and Blunt during the Cold War."

Mr. Straight, who admits he was "morally wrong" says he has written his book to explain his behaviour to his grandchildren.

OXBRIDGE STUDY, 200 SUSPECTS

Mr. Nigel West, author of "A Matter of Trust," which gives a account of M15 between 1945–72, said that after the Burgess and Maclean spy scandal, British security services, began a comprehensive review of the British Communist party's infiltration at both Oxford and Cambridge universities.

It resulted in the preparation of a special report dealing with Communist influence among undergraduates and gave a list of some 200 suspected of being either active or secretly supporting the party.

The list as passed to Mr. Straight who finally identified four or five as being very strongly implicated in spying, including Blunt and Leo Long, a former British intelligence officer who confessed in November 1981 that he spied for the Russians after being recruited by Blunt.

As a result of information gathered at the two universities, many undergraduates were interviewed by M15 officers. Those who were covert members of the Communist party were offered immunity from prosecution if they were prepared to reveal their contacts.●

THE REAGAN IMPACT ON THE FEDERAL WORK FORCE

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. STARK. Mr. Speaker, from national defense to ocean research, from operating our Nation's parks to inspecting food, from promoting American exports to delivering the mail, the Federal employee performs tasks essential to this Nation. The Federal employee affects almost every aspect of the lives of our citizens. Without the Federal employee, our Nation could not function.

When President Reagan submitted the Federal budget to Congress, he called for many sacrifices to help balance the budget. Federal employees have been making more than their share of these sacrifices. I would like to quote from the recent testimony of Kenneth T. Blaylock, president of the Public Employee Department, AFL–CIO, before the Ways and Means Subcommittee on Social Security.

But let us examine ways in which the pocketbooks of Federal employees and retirees have been hit over the past two years:

Elimination of the twice-a-year COLA: Average cost, $500 per retiree.

Required payment of 1.3 percent Medicare tax: Average cost per employee, $250 per year.

Limitations on retiree COLA by granting 50 percent of COLA to retirees under age 62 and delaying the COLA by one month in fiscal years 1983–85: Average cost per retiree under 62, $70 per year.

Increase in employee health premiums of an average 31 percent.

Since 1981, nearly 22,600 Federal employees have been adversely affected through reduction in force movements including: RIF's (11,400), lateral job assignments, downgrading, and early retirement.

Furloughs of 2 days per month, or a loss of 1/10th of salary.

Limitations on pay increases well below comparability:

[In percent]

	Actual	Comparability
Fiscal year 1981	4.8	15.1
Fiscal year 1982	4.0	18.5

But the Reagan administration is not content with these sacrifices. They have launched into a full-scale blitzkrieg against Federal workers and retirees. The attack is on all fronts and includes raising the retirement age, eliminating cost-of-living adjustments for both current workers and retirees, putting a pay freeze on current workers, calculating retirement benefits on a high-5 average annual salary rate as opposed to the current high-3, and raising the amount of gross salary that an employee must contribute into the retirement fund. Many Federal workers' jobs are in jeopardy by proposed changes in the reduction-in-force rules and proposed changes in contracting out.

If there is any doubt that the Reagan administration wants this package of destruction for the Federal worker, one can look at both their rhetoric and their actions. While Reagan has not used the old phrase "pointy-headed bureaucrats," he might as well have. It summarizes his attitude toward Federal employees. The wiping out of the air traffic controllers' union shows that Reagan has no sympathy for the plight or problems of the Federal employee and he fully demonstrated it with this deed.

It is time that these attacks on Federal workers are stopped. It is time the Reagan administration and OPM Director Donald Devine stop abusing the Federal worker. Devine says that he wants to make working for the Government more like working for the private sector. Yet, no quality private sector employer would deal with their work force in such a publicly derisive fashion.

Reagan demands a quality, hard-working, efficient Federal work force, yet proposes virtually everything humanly possible to prevent top-notch people from working for the National Government. Private companies do not attract workers with insults and reductions in every form of compensation that a person takes a job for. Federal workers and retirees are faced with the same economic conditions as everyone else. Yet, in the face of continuing inflation, which reduces real wages, the Office of Personnel Management pursues policies that further erode the pay position of the Federal employee.

In fact, rather than attacking the Federal worker, the Reagan administration should be thinking in terms of what it can do to make employment in the Federal Government more attractive, so that talented people are enlisted, making Government more effective and efficient in the years to come.

But if Reagan and Devine continue their current assault on the Federal worker, what they will do is create a generation of ineffective Government. They will destroy worker morale and stop good, qualified people from working in the Federal Government. The Federal Government will become the employer of last resort. Nobody wants that, Mr. Speaker.

I urge my colleagues to resist administration attempts to put the burden of the huge Reagan deficits squarely on the already bent backs of the Federal employee and retiree.●

SO-CALLED CONSUMPTION TAX

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. DASCHLE. Mr. Speaker, there have been many press reports recently about trial balloons that the administration has been floating in the area of tax reform. Along with standby taxes, not to take effect until some distant date, and abolition of the corporate income tax, one of the most persistent of these trial balloons has been that of the so-called consumption tax.

My own perception of this proposal is that it is but another ploy on the part of some members of the administration to continue the path they have begun in shifting more and more of this country's tax burden away from the wealthy, and unto the backs, and into the pockets, of the poor and middle-class.

That perception notwithstanding, it does appear that, like it or not, the discussion will probably be with us for some time. As a contribution to this dialog, I find an article in the February 1983 issue of Financier to be particularly timely. While recognizing the surface attractiveness of the consumption tax, the article points our several of the weaknesses in the proposal in a balanced, nonpartisan manner. I recommend this article to my colleagues, and ask permission that it be printed in its entirety.

The article follows:

TAX CONSUMPTION—NOT INCOME? THE LONG CONSIDERATIONS BEGIN

(By John M. Berry)

The Reagan Administration, hoping to capitalize on public unhappiness with the personal income tax, has launched a tax-reform effort centered on turning the income tax into a consumption tax. The point, of course, is to eliminate taxation of the returns paid on invested savings so as to encourage more saving and investment. That in turn, Administration economists say, would increase the long-term growth of productivity and thus the nation's standard of living.

Such a massive reorientation of the Federal Government's largest source of revenue won't come easy or soon, officials candidly acknowledge. In the short run, neither the Administration nor its Congressional allies actually expect to make much headway in reducing taxation of capital. But for the long run, they have now made a start.

During the next two years, some modest expansion of the Individual Retirement Account made available last year for the first time to everyone with earned income is about all that will be seriously considered on Capitol Hill, according to W. Henson Moore (R., La.), an influential member of the House Ways and Means Committee. And even that will encounter serious opposition in a new Congress far less hospitable than the last to such ideas.

As for more comprehensive changes, Mr. Moore told a tax seminar last month in Washington, "I don't see this Congress doing anything along that line. A shift to a consumption tax is attractive to conservatives," he said, because "the graduated income tax is counterproductive."

But Mr. Moore, who played a significant role in shaping the big 1981 tax bill, cautioned that it will "take an immense amount of education before Congress will react" to the consumption tax idea.

NOTHING CONSERVATIVE

Meanwhile, with the Democratic gains in the last election, "we don't have the votes to do anything that can be considered conservative or helping rich people or hurting poor people," he declared.

Such political realities, however, have done nothing to dampen the ardor of many economists and politicians for reducing the taxation of capital. That ardor was bright at last month's seminar, which was organized by the American Council for Capital Formation and underwritten by such companies as IBM, Citibank, Mobil, Weyerhaeuser and Arthur Andersen.

Martin Feldstein, Chairman of the Council of Economic Advisers, declared in one speech: "Increasing the rate of capital accumulation must remain one of the central and continuing long-run goals of economic policy. A higher rate of capital formation is the dependable way to increase productivity and to raise our nation's rate of economic growth."

And after a nod to what has been accomplished in the last several years—lowering the maximum tax rate on capital gains, lowering the personal income tax's top marginal rate from 70 percent to 50 percent, greatly increasing depreciation allowances for many types of business investment, and so on—Mr. Feldstein said: "There is no reason for complacency. More can be done and should be done to strengthen the incentives to save and to invest in business plant and equipment."

What Mr. Feldstein would like, as he made clear in a seven-page portion of his text, is a consumption tax to replace the income tax. The CEA Chairman did not deliver that part of his speech, however, because furious Treasury officials complained that he had failed to clear it with that Department, which, after all, is in charge of tax policy.

By the time the flap arose, however, copies of the text had already been distributed and there was no way to get them back. In a bow to Treasury, Mr. Feldstein agreed he would not deliver that part of his text.

Mr. Feldstein had lots of company favoring a consumption tax of one form or another. But there was also significant support for outright tax reduction, particularly by reducing the progressivity of the personal income tax and by eliminating the corporate income tax.

DELIBERATE FLAGELLATION

Former Treasury Secretary John B. Connally opened the three-day seminar by attacking the personal income tax as so complex that it "borders on national disgrace" and "unfair" in the way it treats people at different income levels. "The progressivity of the existing system goes too far," he argued. "It could be justified only as a socially-oriented goal of income redistribution. It borders on deliberate flagellation of the American middle class."

Whatever one's view of the tax system's progressivity, Mr. Connally's supporting figures seem to border on deliberate flagellation of any attempt at rational analysis. His examples are worth a detailed look because they repeat a common misunderstanding about the true levels of income in the U.S. and use a comparison of tax burdens that exaggerates the progressivity of the personal income tax.

"Consider, if you will," Mr. Connally said, "how our individual income tax system treats two middle-income families—one at the lower end of the range, with annual income of $15,000, and one at the higher end, with annual income of $60,000. [This year] the annual tax bills of these two families will be $952 and $9,706, respectively.

"With four times the income, the higher-earning middle-income family will pay 10 times the taxes of the lower-earning family! That is manifestly unfair," he asserted.

STARTLINGLY DIFFERENT

Most tax analysts, however, believe the important comparison is not in terms of tax paid but in terms of after-tax income. The results are startlingly different.

The $15,000 family has $14,048 left after taxes, and the $60,000 family has $50,294. Looked at that way, the $60,000 family has four times the pre-tax income and 3.6 times the after-tax income of the $15,000 family.

Or take another comparison. The lower-income family pays 6.3% of its income in tax while the higher-income family pays 16.2%, or only 2.6 times as much. That's just as valid as saying the actual tax bill is 10 times as high.

The true distortion in Mr. Connally's figures, however, was his characterization of a family with $60,000 as "upper-middle income." No income distribution numbers are available for 1983, of course, but it is possible to deflate the $15,000 and $60,000 and restate them in equivalent 1979 dollars, a year for which income distribution figures are available both from the Census Bureau and the Internal Revenue Service.

According to the Census data, about one-third of all families had incomes below that year's equivalent of today's $15,000 worth of income. On the basis of IRS figures for 1979, 48% of all returns showed income of less than that equivalent.

Certainly Mr. Connally's $15,000 family could reasonably be called lower-middle income. But what about the $60,000 family? That is not a middle-income family at all. The Census data and the IRS give nearly the same answer: Only about 4 to 6% of all families have incomes higher than that.

In short, this nation is not nearly as wealthy as some people seem to think it is. Individuals in the top 5 or 10% in terms of income think of themselves as "middle income" and wonder why their taxes seem so high.

PANDER TO MISUNDERSTANDING

Politicians like Mr. Connally pander to that misunderstanding as they issue statements and make speeches about the "unfairness" of taxes.

But distortions and misunderstandings aside, many respected economists believe that the nation's economic future will suffer if the taxes levied on income from capital are not reduced.

Michael Boskin, a Stanford University economist, is one of that group. "There is substantial reason to believe that we have

been, and continue to be, saving a substantially smaller fraction of our national income than is socially desirable," he told the seminar. "Policies designed to increase investment will only succeed in increasing investment demand" and the rise in interest rates accompanying it.

Mr. Boskin believes that lowering taxes on the return on invested savings is the way to go, with elimination of the corporate income tax and a shift to a consumption tax over a period of 10 years or so.

Increasingly, economists addressing these issues are taking cognizance of the fact that the U.S. economy is far more open to the rest of the world than it used to be. They are raising such questions as whether it is possible for one nation to take steps to raise its saving rate without running the risk that the added capital will flow to other nations for investment.

Mr. Feldstein, in work done before he came to Washington, concluded that added savings would lead to added investment in the same country—but other economists are challenging his results.

International complications also arise affecting the corporate income tax. Commonly the tax is regarded as a form of double taxation of capital, since the ultimate owners of the corporation, the shareholders, also are taxed on its income.

NEEDED SAFEGUARD

Joseph Pechman, a tax expert from the Brookings Institution, defended the corporate tax on the grounds that it "is needed to safeguard the individual income tax. Without it, individuals could amass huge amounts of wealth in corporations which would never be subject to tax or would be taxed at preferential rates."

Arnold C. Harberger, another noted tax economist from the University of Chicago, attacked the corporate tax. But he also defended it on the practical grounds that in a world in which most nations levy such a tax, a country dropping it would find itself at a substantial disadvantage in coping with taxation of multinational corporations.

Mr. Pechman scored a telling point in the discussion about tax burdens on income from capital when he noted that last year's legislation that reduced some of the depreciation breaks provided in the 1981 bill was intended to make sure that no companies ended up with what amounted to a negative tax rate—that is, a subsidy—on the income flow generated by new investments.

But Mr. Pechman also pointed out that it makes no difference in figuring depreciation on an investment whether it was bought with borrowed funds.

With depreciation allowances approaching the equivalent of expensing of investments, or writing them off in the year purchased, permitting deduction of interest on money borrowed to finance the investment constitutes a major subsidy. If the allowed write-off plus the investment-tax credit is exactly equal to expensing, then the corporate tax has been neutralized, Mr. Pechman noted.

In these circumstances, "given a 46% corporate tax rate, if you can borrow $100 million for an investment that will yield 15%, the Government will give you a tax break of $6.9 million on top of the $15 million the lender will earn net of corporate tax on his investment," he pointed out.

"Not a bad deal," he concluded.

LATEST AND HOTTEST

There were also discussions about the flat tax, the Value Added Tax and other elements of the tax system. But the latest and hottest item is the consumption tax applauded by Messrs. Feldstein, Boskin and others.

In the undelivered portion of his text, Mr. Feldstein called it "a very attractive approach to tax reform" and said it would work this way:

"Each individual would add up all of his cash receipts for the year and then subtract all of his savings, including additions to bank accounts, purchases of stocks or other assets, and repayments of loans. The difference between total receipts and total savings-investment outlays would be the amount on which he paid tax.

"Capital gains as such are not taxed. Instead, the individual would pay tax on the entire value of the sale if those funds were used to finance consumption but would pay no tax at all if those funds were reinvested.

"Funds obtained by borrowing are included in total receipts subject to taxation. However, to the extent that such funds are used for investment in financial or real assets, those outlays are subtracted from the taxable amount."

ANY DESIRED PROGRESSIVITY

Mr. Feldstein stressed that this form of consumption tax is not a VAT or a national sales tax, and that any desired degree of progressivity could be used in setting up the rate schedule. And some major deductions now allowed could be kept, if desired, while still keeping the tax base consumption-oriented.

For instance, state and local taxes could be deducted on the grounds that those payments certainly do not represent personal consumption on the part of the taxpayer.

Similarly, charitable contributions could be thought of as transferring the power to consumer from the taxpayer to the charity.

Stolen property and casualty losses might be deducted as constituting a capital loss that reduces wealth and therefore should reduce total receipts in a given year.

Even personal health-care costs conceivably could be deducted on the theory that they "offset personal losses in a way that is analogous to losses or property," he noted.

Mr. Feldstein also argued—as must anyone seeking these days to change the tax system—that a consumption tax "would significantly simplify personal tax reporting by emphasizing cash receipts and outlays instead of complex accounting definitions."

NOT ALL THAT SIMPLE

Well, on close examination, the consumption tax is not really all that simple.

One particularly thorny point involves the treatment of consumer purchases of housing and other durables such as automobiles.

Strictly speaking, the theory requires that a taxpayer buying, say, a $10,000 automobile or a $100,000 house, with any combination of down payments and borrowed money, would have to treat the entire purchase price as consumption in the year such items were bought—and would see his tax rise accordingly.

Treasury tax analysts working on the matter have realized that that approach would not fly, at least for housing. Thus, they are considering not counting the borrowed money as income used for consumption, except as the loan is repaid. Such an approach would encourage buyers to put down as little as possible on any such purchase, so as to postpone payment of taxes as long as possible.

That is just one of many difficult areas. The transition problems are enormous.

For instance, people who now own assets of whatever type have generally acquired them with after-tax dollars—pension plan rights, IRAs and Keogh Plan assets are exceptions. How can a shift to a consumption based tax that would tax those assets again as they are consumed, say, in retirement?

As Mr. Moore put it, sadly in his view: "It's time has not yet come."

Finally, there was another point that came through again and again at the seminar, a point that the Reagan Administration and Congress ignored in 1981: The first thing to do in devising a tax system is to figure out how much revenue you need to raise.

For all the concern about the impact of taxes on saving and investment, it may just be that the enormous Budget deficits flowing from the 1981 decision to change the tax system and then worry about how much revenue is needed will do more to damage the level of investment than all of the tax burdens put together.●

U.S. ARMS CONTROL POLICY: OUR QUEST FOR PEACE

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. BROOMFIELD. Mr. Speaker, all too often, I hear comments that the administration is not serious about the concept of arms reductions of any type. with equal frequency, I see foreign-generated stories accusing the United States of duplicity in our public statements about reducing tension between East and West.

I want to take this opportunity to set the record straight on the issue of America's present and past seriousness about arms control. Since the end of World War II, our Government has been the world leader in serious disarmament and arms control proposals. Many of America's initiatives have focused on controlling the spread of nuclear weapons. Our efforts in this direction began in 1946 with the Baruch plan for the international control of nuclear weapons and nuclear energy. In 1955, President Eisenhower presented his "Open Skies" proposal. Under this agreement, the United States and the Soviet Union would have exchanged blueprints of military establishments and provided for aerial reconnaissance. True to form, the Kremlin rejected both plans.

The United States initiated and is an active party to many treaties. These are just a few of them: The Limited Test Ban Treaty (1963), which prohibits nuclear weapons tests in the atmosphere, in outer space, and under water; the Outer Space Treaty (1967), which bans placing nuclear weapons in outer space; the Non-Proliferation Treaty (1968), which is intended to prevent the further spread of nuclear weapons; the Seabed Arms Control Treaty (1971), which prohibits the emplacement of nuclear weapons on the ocean floor; the ABM Treaty (1972),

which imposes limitations on defense against ballistic missile weapons; and the Interim Agreement on Strategic Offensive Arms (1972), which froze the quantity of strategic ballistic missile launchers on either side. I believe that America has complied with the spirit and the letter of these agreements.

In addition, the United States is party to two international arms control agreements affecting chemical and biological weapons. It is unfortunate that both agreements contain a fundamental flaw. Neither incorporates adequate means to verify compliance. Soviet involvement in using chemical weapons in both Afghanistan and Southwest Asia is testimony to the fact that effective verification provisions are essential to future agreements of this nature.

Since 1973, the United States has also been actively participating in the MBFR talks between NATO and the Warsaw Pact. Very little progress has been made because of the pact's refusal to accept permanent inspection teams and the disagreement over Warsaw Pact troop levels.

In continuing the efforts of past administrations, President Reagan is equally committed to the quest for peace. In order to achieve more lasting progress in future negotiations, the President ordered an intense review of our Government's arms control policy. We seek arms control agreements which reduce the arsenals on both sides, and result in equal levels of arms on both sides. In addition, our Government wants accords which are verifiable and are designed to reduce the risk of war.

With these guidelines in mind, the administration pursued with the Soviets the ongoing INF talks. Our Government offered to cancel deployments of the Pershing II and ground-launched cruise missiles if the U.S.S.R. would remove its SS-20, SS-4, and SS-5 missiles. It is significant to note that it was the Soviet Union which destabilized the previous rough parity of missiles in Europe by introducing new and more powerful missiles into the equation. Only after America's intentions to counter the Soviet buildup were announced, did the Kremlin decide to go to the negotiating table in Geneva.

More recently, the President announced his zero option plan which basically offers to cancel America's planned deployment of Pershing and cruise missiles in Europe, if the Soviets are willing to remove their newly emplaced missiles.

In the current START negotiations, our Government is proposing reductions in the number of ballistic missile warheads on each side by one-third. We are also seeking further reductions in the overall destructive power of each side's arsenal.

Mr. Andropov's counterproposal to our zero option offer was a weak one, at best. I now realize that the Soviets know that their SS-20's in Europe give them a decided strategic advantage over the West in that area. They are willing to do just about anything to maintain that advantage. An additional critical factor is verification. Arms control agreements with a highly secretive adversary like the Soviet Union cannot be based on trust alone.

Our Government must have effective means of verification that enable us to know with confidence whether agreements are being honored. We must be able to assure Soviet compliance and take steps to offset the effects of any noncompliance. This administration has quite properly made clear that the United States will insist on verification procedures.

Even though our Nation has shown not only interest but integrity in complying with arms control agreements, we cannot overlook the fact that there are nations in the world whose views on international agreements may be very different from our own. In the past, the Soviets have used agreements to befuddle and mislead Western nations and will undoubtedly use this ploy in the future.

I believe that we should look long and hard before signing agreements which involve the basic survival of our Nation. America should avoid putting its signature on accords with a party which refuses to accept verification procedures and insists on maintaining its advantage over the West in Europe. Let us not forget the Helsinki accords and proceed ahead with caution.●

MAINE BOY SCOUTS HONORED

HON. JOHN R. McKERNAN, JR.

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. McKERNAN. Mr. Speaker, I join my colleagues today in honoring four Boy Scouts from the State of Maine who have recently received the highest Scouting award—the coveted Eagle Scout Award.

Three of the four Scouts are members of troop 428 in Pittsfield, Maine, and attend Maine Central Institute. They are Dale Rowley, 16, son of Mr. and Mrs. David Rowley; Robert Speed, 15, son of Mr. and Mrs. Richard Speed, Jr.; and Scott Hallett, 15, son of Mr. and Mrs. Richard Hallett.

The fourth Scout is William R. Savage, a member of troop 342 in West Buxton. He is the 15-year-old son of Mr. and Mrs. David Savage, and is a freshman at Bonny Eagle High School in West Buxton.

I commend their Scout leaders, parents, friends, and members of their respective communities for assisting and encouraging these young men in their pursuit of excellence. I would like to wish the new Eagle Scouts equal success in all their future endeavors.●

DEFICITS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, March 2, 1983, into the CONGRESSIONAL RECORD:

DEFICITS

No one can be blamed for being confused about deficits in the federal budget. For many years in this country, policy makers wanted a balanced budget every year. That view passed away, only to be replaced by the view that the budget did not need to be balanced every year, but only over the course of the business cycle. That view soon disappeared, too, as deficits continued even in prosperity. A new rule emerged: budgets should be figured so as to promote high employment, and deficits occurring in a period of less than full prosperity should be regarded as desirable stimulants to the economy. In 1983, we are told that deficits will be essential in the months ahead to stimulate the economy and to pull it out of the recession, but we are also told that the same deficits will make economic recovery slow and uncertain. We apparently cannot cure the recession without deficits, but as long as they persist we apparently will get no sustained economic growth. One wonders whether the huge deficit is a cause of or a cure for the ailing economy.

The rationale for our present gigantic deficits escapes me. No one seems to want them, but we do not seem to be able to get rid of them.

Our deficit for 1983 ($111 billion) was the first in history to exceed $100 billion, and it was by far the largest in our history. It was twice as large as the peak wartime deficit of 1943, and it almost equalled the combined deficits of 1942, 1943, and 1944.

The future looks darker still. The experts tell us that our deficits have only begun to mount. The deficit for 1983 is expected to reach an astounding $208 billion. The Congressional Budget Office is projecting deficits of $150 billion or more in 1984 and 1985. According to the Reagan Administration, we face such deficits for the balance of the decade, with as much as $300 billion in red ink in 1988 unless major changes are made in economic policy. Yet the national debt already exceeds $1,100 billion. It costs every American family nearly $1,500 per year just to pay the interest on that debt. If trends continue, the interest payment will be closer to $2,000 this year.

Many of us believe that deficits were controllable, and some of us thought that economic growth would generate enough revenue to wipe deficits out. We know differently now. In fact, the Reagan Administration has confirmed that even a 3.5% rate of economic growth will not bring future deficits below $150 billion. The real cause for alarm is that strong economic growth will not cure the deficits. So, a major objective of economic policy must be to cure them directly without relying solely on economic growth.

Deficits must be reduced so that interest rates can come down. If they do not come down, we will not see much of a recovery.

The deficits make it clear that the federal budget, if not out of control, is close to it. It is producing deficits of enormous proportions year after year. That surely is not a sensible course for us to follow. Deficits generate inflation by boosting demand; they crowd the private sector out of credit markets as the government borrows a large portion of the available savings; they put pressure on the Federal Reserve to increase the money supply and thus add to inflation in order to ease the strain on the credit markets. The importance of each of the consequences of deficits varies depending on what else is happening in the economy—whether it is growing or stagnating, for example—but all the consequences are important to some degree.

An economy with a high deficit and a restrictive monetary policy, which we have had in recent years, tends to be an economy with high consumption, low growth, and a high government share of total economic activity. The massive deficits projected for the next several years will absorb savings which are urgently needed for investment in plant and equipment, infrastructure, research and development, training, and education. Without such investment, productivity will sag, inflation will resurface, and interest-sensitive industries, such as housing and automobiles, will decline, as will exports.

We must confront the question of the appropriate size of the deficit. We must decide what difference the size of the deficit really makes. There are arguments against deficits, but balancing the budget each year is not a moral imperative. It is also true that deficits do not always cause inflation, nor do they inevitably lead to unemployment and recession. But deficits can, and sometimes do, cause inflation, and they absorb savings which otherwise would be dedicated to private investment and the improvement of productivity. I believe that government policy should aim to reduce the size of the deficit relative to the gross national product. However, I expect the process of budget-balancing to be an extended one, and I understand the need to weigh other economic priorities—including taxes on the one hand and spending for national defense and social programs on the other—as that process unfolds. It is obvious that any decision about the size of the deficit involves a judgment as to how much of the national output should go into private investment, national defense, and other key functions.

The deficits confront Congress with several problems. First, they require a multi-year budget plan. They are simply too large for us to expect major progress against them in a single year. Second, they require hard decisions on whether to cut spending, raises taxes, or pursue a policy which combines the two. Additional taxes burden taxpayers, discourage work effort and saving, and distort economic choices, but cuts in spending exact a price as well in roads not built, in research left undone, in armed forces not ready for combat, and in young people left uneducated.

The American economy faces unprecedented risks in the years ahead unless we take steps to reduce the deficits. Closing the gap between revenue and spending must rank among the highest of all governmental priorities.●

INSURING THAT OLDER AMERICANS ARE PROTECTED FROM OVERPAYMENT OF INCOME TAXES

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. BIAGGI. Mr. Speaker, I am pleased to bring to the attention of my colleagues an annual checklist that is prepared by the House Select Committee on Aging which will assist older Americans in the payment of their Federal taxes for 1982. This list is most helpful to seniors who often encounter a number of obstacles each year when filing their tax forms, and points out those items which are often overlooked. This year, the following checklist will be especially useful in light of a number of changes in the new tax laws. In addition, this list includes information on assistance that is provided by the Internal Revenue Service and its local branches. Seniors who encounter special problems should not hesitate to contact their local offices.

For the benefit of my colleagues, I wish to insert the first part of this checklist and will insert the second section tomorrow.

NEW FEATURES FOR 1982 FILING EZ FORM

For 1982 a new simplified return, form 1040 EZ, has been constructed. In order to file this simplified form you must be:

a. single,

b. claim no exemptions for age or blindness,

c. claim no dependents,

d. have income of less than $50,000 that is only from wages, salaries and tips, and from interest of $400 or less.

CHARITABLE CONTRIBUTIONS

You may deduct a part of your charitable contributions even if you do not itemize deductions.

CHILD AND DEPENDENT CARE

The tax credit for child and dependent care expenses has been increased. Also, expenses for care of a disabled dependent or a spouse may include expenses for out-of-home care.

RATE REDUCTION

Individual income tax rates have been reduced. This reduction is included in the Tax Table and Tax Rate Schedules.

ASSISTANCE IN PREPARING FORMS

The Internal Revenue Service (IRS) distributes a number of publications which are designed to assist the Federal taxpayer in the preparation of his tax forms. Moreover, the IRS offers a tax counseling program for older taxpayers and the local office of the IRS may always be contacted by phone to seek assistance in the preparation of your return. The following publications are free and copies may be obtained by using the order form contained in your tax package.

IRS PUBLICATIONS

The IRS offers the following free publications relating to income taxes of particular interest to older taxpayers.

Publication 17, "Your Federal Income Tax".

Publication 505, "Estimated Tax and Withholding".

Publication 554, "Tax Benefits for Older Americans".

Publication 524, "Credit for the Elderly".

Publication 553, "Highlights for 1982 Changes".

Publication 910, "Taxpayer Guide to IRS Information Assistance".

SPECIAL IRS PROGRAMS

The IRS offers a tax counseling for the elderly (TCE) program which assists individuals age 60 and over with the preparation of their Federal tax returns. IRS trained volunteers are available at various neighborhood locations to provide this assistance. In addition, certain volunteer income tax assistance (VITA) preparers have been trained to assist older taxpayers with the preparation of their returns. Your local IRS office will be able to furnish you information concerning where and when these services will be available.

TELEPHONE ASSISTANCE

Beginning in January 1983, IRS will begin a new telephone service called Tele-Tax. This service will provide recorded tax information tapes on over one hundred topics covering such areas as filing requirements, dependents, itemized deductions, and tax credits. Tele-Tax will be available 24 hours a day, 7 days a week to taxpayers using push-button telephones. Brochures with listings of covered topics and telephone numbers for your area will be available in local banks, libraries and other public facilities. Also, telephone inquiries of your local IRS office may be made to obtain over-the-phone taxpayer assistance.

Who must file a Federal tax return is generally determined by your income and your filing status

You must file a return for 1982, even if you owe no tax:	And your income was at least:
1. If you were single, divorced, or married with a dependent child and living apart from your spouse for all of 1982 and were:	
Under age 65	$3,300
Age 65 or over	4,300
2. If you were married filing a joint return and were living with your spouse at the end of 1982 or on the date your spouse died and:	
Both were under 65	5,400
One was age 65 or over	6,400
Both were 65 or over	7,400
3. If you were married filing a separate return or married but you did not share the same household at the end of 1982	1,000
4. If you were a qualifying widow(er) with a dependent child and:	
Under age 65	4,400
Age 65 or over	5,400

5. If you received any advance earned income credit (EIC) payments from your employer(s) during 1982.

6. If you were self-employed and your net earnings from this work were at least $400, you must file a return to pay self-employment tax. You are self-employed if you carry on a trade or business as a sole proprietor, a member of a partnership, an independent contractor, or otherwise. This includes certain part-time work that you do at home or in addition to your regular job. This rule applies regardless of your age; whether or not you are receiving Social Se-

curity benefits; and even if you are otherwise not required to file a Federal tax return.

7. If income tax was withheld from your pay, you should file a return so that you can get a refund of the tax withheld, even if you are not required to file a return.

WITHHOLDING/ESTIMATED TAX

It is important to note that, unless tax is withheld for you by your employer or by the institution which is making pension, annuity or other income payments to you, you must estimate and make quarterly payments meeting your tax liability to the IRS. Typically, it is the responsibility of your employer under the Federal income tax system to withhold income tax from wages, salary and other forms of compensation.

WITHHOLDING FOR PENSIONS AND ANNUITIES

Beginning January 1, 1983, Federal income tax will be withheld from the taxable part of most pension and annuity payments. If you receive periodic pension or annuity payments, you can help make sure that the right amount of tax is withheld by giving the payer of your pension or annuity a Form W-4P, or similar statement, showing your marital status and the number of withholding allowances to which you are entitled. If you do not give the payer a Form W-4P, tax will be withheld as if you are married and claiming three withholding allowances. You may also use this form to tell the payer that you do not want any tax withheld. If you receive a non-periodic distribution, the payer can tell you the amount that will be withheld.

WITHHOLDING FOR INTEREST AND DIVIDENDS

Beginning July 1, 1983, tax will also be withheld from many interest and dividend payments. The amount withheld will be 10 percent of each payment. However, individuals will not be required to withhold tax. Certain other payers may be allowed to delay withholding until 1984. You may choose not to have tax withheld from the interest and dividends you receive if:

(1) Your tax for last year was $600 or less,

(2) Your age 65 or older, and your tax was $1,500 or less,

(3) You filed a joint return for last year, and your tax was $1,000 or less,

(4) Either you or your spouse (or both) is age 65 or older, you filed a joint return last year, and your tax was $2,500 or less, or

(5) You (or you and your spouse) were not required to file an income tax return for last year.

If you qualify as exempt from withholding and you do not want tax withheld, you should give the payer of your interest or dividends an exemption certificate (Form W-6 or other form provided by the payer) so that tax will not be withheld.

Remember, if no tax or not enough tax is withheld from your income, you may need to pay estimated tax.

ESTIMATED TAX REQUIREMENTS

The requirement to estimate and pay tax also applies to income which is not subject to withholding, or income from which not enough tax is being withheld. This includes income from self-employment, alimony, rents, capital gains, and other income from which Federal income tax is not withheld. For these items of income, you must pay estimated tax using Form 1040-ES.

Your estimated tax generally is the total of your expected income tax and self-employment tax minus your expected withholding and credits. Form 1040-ES provides a worksheet for making this computation.

If your estimated tax for 1983 is $300 or more and your estimated gross income not subject to withholding includes more than $500 of taxable income, you must use Form 1040-ES and pay estimated taxes. Installment payments are due: April 15, June 15, September 15, and January 15.

You may incur a tax penalty if you do not meet all of your estimated tax liability. Such a penalty however, will not apply if all payments are made on time and:

(1) The payment represents at least 80 percent of the amount of estimated tax due based on the tax shown on your return or,

(2) The payment is based on one of four exceptions shown on Form 2210, Underpayment of Estimated Tax by Individuals.

TAX TABLE

The tax table enables you to more easily determine your tax liability based upon your taxable income if it is less than $50,000 (line 16, Form 1040A; line 7, Form 1040 EZ; line 37, Form 1040). You must use this table unless you compute your tax using Schedule G (income averaging). In that case you must use the tax rate schedules. The tax table is designed to be used by individuals (other than Schedule G filers) whether or not they itemize their deductions. This is possible because of an adjustment made on the Schedule A and an amount built into the tax table known as the "zero bracket amount." This flat amount (formerly, the standard deduction) is the portion of an individual's income which is not subject to tax. The zero bracket amount is (1) $3,400 for married persons filing jointly, or qualifying widows or widowers; (2) $2,300 for single individuals, or heads of households; and (3) $1,700 for married individuals filing separately.

DEDUCTIONS FOR TWO-EARNER MARRIED COUPLES

Two-earner married couples filing jointly are allowed a deduction based upon the earnings of the spouse with the lesser income. The 1982 deduction is 5 percent of the first $30,000 of income for the lesser income, or a maximum deduction of $1,500. (Beginning in 1983, the deduction will be 10 percent of the first $30,000, for a maximum deduction of $3,000.)

EXEMPTIONS

You are allowed a $1,000 deduction for each exemption shown on your tax return (line 5e, Form 1040A; line 6, Form 1040 EZ; line 6e, Form 1040). You and your spouse are allowed an additional $1,000 exemption if either or both of you are age 65 or older as of the last day of the tax year.

Moreover, you or your spouse may be able to claim a $1,000 blindness exemption (refer to your tax instruction booklet for more details on this exemption). Age and blindness are determined as of the last day of your tax year. This is December 31 for most taxpayers. You are considered age 65 on the day before your 65th birthday. Thus, if your 65th birthday was on January 1, 1983, you can take the extra exemption for age for 1982.

TAX CREDITS

Tax credits are used to reduce the amount of tax you owe. All credits must be taken on Form 1040, with the exception of the credit for contributions to candidates for public office and the earned income credit which may be taken on Form 1040A. No credits may be taken on Form 1040EZ.

CREDIT FOR THE ELDERLY

You may be able to claim this credit and reduce taxes by as much as $375 (if single) or $562.50 (if married filing jointly) if you are: (1) Age 65 or over, or (2) under age 65 and retired under a public retirement system.

For more information, see the instructions for Schedule R & RP.

EARNED INCOME CREDIT

If you have a dependent child who shares your principal residence in the United States, you may be entitled to a special payment or credit of up to $500. This is called the earned income credit. It may come as a refund check or be applied against any taxes owed. Generally, if you reported earned income and had adjusted gross income (line 33, Form 1040 or line 12 Form 1040A) of less than $10,000, you may be able to claim the credit.

Earned income means wages, salaries, tips, strike benefits, other employee compensation, disability pensions, and net earnings from self-employment (generally the amount shown on Schedule SE (Form 1040), line 9). A married couple must file a joint return to be eligible for the credit. Certain married persons living apart with a dependent child may also be eligible to claim the credit.

For more information, see instructions for Form 1040 or 1040A.

CREDIT FOR CHILD AND DEPENDENT CARE EXPENSES

A portion of certain payments made for child and dependent care may be claimed as a credit against tax.

If you maintained a household that included your dependent under age 15 or a dependent or spouse incapable of self-care, you may be allowed a credit for employment related child and dependent care expenses. These expenses must have been paid during the taxable year in order to enable you to work either full or part time, or to attend school full time.

The amount of credit is 30 percent of your qualifying expenses if your adjusted gross income (line 33, Form 1040) is $10,000 or less. The 30 percent rate is reduced by one percent for each additional $2,000 of adjusted gross income (or part of $2,000) until the percentage is reduced to 20 percent for adjusted gross income above $28,000.

The maximum amount of expenses that may be used to compute the credit is $2,400 for one qualifying person and $4,800 for two or more qualifying persons.

See Form 2441 for more information, including a special rule for divorced of separated taxpayers.

RESIDENTIAL ENERGY CREDITS

The residential energy credits were designed to encourage energy saving and the development of renewable energy sources. There are two energy credits, each with its own conditions and limits. These credits are based on: (1) Costs for home energy conservation, and (2) costs for renewable energy source property.

A credit of up to $300 may be claimed for expenditures for energy conservation property installed in or on your principal residence, whether you own or rent it. This credit is equal to 15 percent of the qualified energy conservation expenditures during a taxable year, up to $2,000 of such expenditures. The residence must have been substantially completed by April 20, 1977. Items eligible for the credit are limited to the following: Insulation (fiberglass, cellulose, etc.) for ceilings, walls, floors, roofs, water heaters, etc.; exterior storm (or thermal) windows or doors; or weatherstripping for exterior windows or doors; a furnace replace-

ment burner that reduces the amount of fuel used; a device to make flue openings (for a heating system) more efficient; an electrical or mechanical furnace ignition system that replaces a gas pilot light; an automatic energy-saving setback thermostat; and a meter that displays the cost of energy usage.

For years beginning after 1979, the maximum credit for renewable energy source property is $4,000. This credit is equal to 40 percent of qualified renewable energy source expenditures, up to $10,000 of such expenditures. Equipment used in the production or distribution of heat or electricity from solar, geothermal, or wind energy sources for residential heating, cooling, or other purposes may qualify for this credit.

Examples of items which do not qualify for energy credits are the following: Carpeting, drapes, awnings, shades, wood paneling, fire screens, new or replacement walls (except for insulation inside the walls), exterior siding, heat pumps, wood or peat burning stoves, fluorescent lights, hydrogen fueled residential equipment, equipment using wind energy for transportation, expenditures for a swimming pool used as an energy storage medium, and greenhouses.

For further information, consult the instructions for Form 5695, Residential Energy Credits, and IRS Publication 903, Energy Credits for Individuals.●

THE ALASKAN GAS TURKEYS STRIKE AGAIN: HOW CONSUMERS WILL BE SWINDLED UNLESS CONGRESS ACTS

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. CORCORAN. Mr. Speaker, today I received a copy of an analysis of Energy Secretary Hodel's proposal on natural gas. Secretary Hodel's proposal was transmitted by the President in legislative form to the Congress on February 28. That legislation was introduced on February 28 by Senator McCLURE as S. 615 and yesterday by six of my Energy and Commerce Committee colleagues and me as H.R. 1760.

Mr. Speaker, the analysis to which I refer is entitled "A Preliminary Analysis of Secretary Hodel's Legislative Initiative." My conclusion after reviewing this particular analysis is that the Hodel proposal is even better than I had hoped. The reason is that this particular analysis was prepared by the lawyers for the Alaskan natural gas pipeline. They do not like the Hodel proposal, not at all. They go on and on and on in shrill and phony rhetoric about the impact on the consumer.

But, Mr. Speaker, not all of us will be so easily fooled. If the Hodel proposal is bad for $18 (per mcf.) Alaskan natural gas—which we may have to pay for whether it is ever delivered or not—and bad for further imports of $5 Canadian gas, then it must be good for the American consumer. The Hodel bill is a low-cost gas proposal. It does indeed penalize high-cost gas; the higher the cost, the more it penalizes them.

Mr. Speaker, if I have to pick between the $18 Alaskan gas turkey and increased development of existing, low-cost American gas reserves, the choice for me—as a consuming State representative—is an easy one. I pick the Hodel proposal. It will moderate today's ridiculous gas prices. Compared with how prices will explode under current laws, prices will, I believe, come down under the Hodel proposal.

Between imports—which are roughly $5 from Canada and Mexico and roughly $7 from Algerian liquefied natural gas (LNG)—and domestic prices—which today are $2.50 to $3, on average—the Alaskan gas pipeline sponsors would pick more imports and would impose a total freeze on more domestic production. This means more price increases to the consumer.

What they want, quite frankly, is for this Congress to artificially create, after great harm to our consumers, a spotlight in the market for totally unmarketable gas. They would accomplish this by freezing domestic producer prices, shutting in domestic production, and conspiring to inflate the price that marginal supplies can command.

Mr. Speaker, we cannot allow ourselves or even this fine institution to be so easily misled again. The natural gas bills of our consumers will skyrocket to unconscionable levels if we pick the Alaskan gas pipeline proposal instead of the Hodel proposal or a variation of the Hodel proposal. It is that simple.

Another reason the Alaskan pipeline folks dislike the Hodel proposal is that it puts the pressure of market competition and FERC regulation on the pipelines to only purchase gas which can be marketed. Under the administration bill, producers are encouraged to undercut their competition, to sell for less—less than imports—less than deep gas—less than some new gas. Pipelines are held to their present costs plus inflation. And increases above that amount be subject to regulatory review by FERC and eventually the courts. As someone who has undertaken the initiative and hard work to actually intervene as a party to FERC proceedings, I look forward to this new procedure. I think, frankly, I could win more cases on behalf of consumers. The exact wording of the regulatory review provision in the administration bill may need some revision but, in concept, it is a plus. Perhaps the Alaskan natural gas pipeline sponsors are afraid that their expensive gas will be denied passthrough to consumers by lower cost gas and by FERC, or by the courts. I would worry too, if my fortunes depended on the continuation of the NGPA's automatic passthrough of overpriced gas.

The current market—a buyer's market—may well be the rule rather than the exception under the administration bill. Why does this bother these particular pipelines?

No one wants to buy their $18 Alaskan gas, even if they could deliver it. No one wants to buy their massive quantities of Canadian gas. While Alaskan gas is a distant possibility, these same companies continue to import Canadian gas in larger quantities than the market can absorb—this is largely dictated by promises made by them to the Canadian Government in exchange for the Canadian's support of the first segments of the Alaskan natural gas pipeline.

They need to cut back on their costs somewhere—and they have the lower cost American producers in mind. If the administration bill becomes law, along the general lines of its design today, we would quickly see the fortunes of $18 gas and $5 imported gas fade as much cheaper American gas production comes in to back out these expensive, politically favored supplies.

They cannot win in the market so they want to rig the law in their favor.

In 1981, I said that the special interest, $50 billion Alaskan natural gas pipeline waiver package was potentially the greatest consumer rip-off in the history of the United States. Perhaps I spoke too soon. The single biggest consumer rip-off will occur if we give in again.

Mr. Speaker, I notice that a new movie is now showing in theaters across the country. It is called the Sting Part II. Let us make sure it does not play in the House of Representatives.●

COMPREHENSIVE SMOKING PREVENTION EDUCATION ACT

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. WAXMAN. Mr. Speaker, I am pleased to announce the introduction of H.R. 1824, the "Comprehensive Smoking Prevention Education Act." The legislation is intended to increase public knowledge about a subject the Surgeon General has characterized as "the most important public health issue of our time."

The need for this legislation is clear. An estimated 54 million Americans smoke and the number of young smokers—particularly young women—is frighteningly high.

Cigarette smoking claims the lives of over 300,000 Americans each year. It kills more than six times the number of Americans who die on our Nation's highways. Thousands more are crip-

pled by emphysema or heart attack. Others must undergo painful and debilitating therapy for treatment of diseases like cancer.

We know much more about the health effects of smoking than we did when Surgeon General Luther Terry sounded his warning in 1964. Today, we know that smoking is our Nation's most preventable cause of premature death and illness.

Cigarette smoking is a major cause of cancer of the lung, larynx, oral cavity, and esophagus and is a contributory factor in cancer of the urinary bladder, kidney, and pancreas.

Cigarette smoking is a major cause of chronic bronchitis and emphysema.

Cigarette smoking is associated with one-third of the deaths attributed to cardiovascular disease.

Pregnant women who smoke have an elevated risk of miscarriage, stillbirths, premature births, and birth weight deficiencies.

Cigarette smoking is addictive and is the most widespread example of drug dependence in the United States.

Obviously there are excellent reasons to quit smoking. There are even better reasons for never starting.

Tragically, a significant portion of the public—particularly smokers—are unaware of this information. Numerous opinion polls indicate that large numbers do not believe that they will personally suffer the health consequences of smoking. Others do not know that smoking is addictive or that it contributes to the risk of heart attack.

The level of public ignorance and misunderstanding about the health effects of smoking and the trend of smokers to start at younger and younger ages highlight the need for legislative action. Steps must be taken to make smokers and potential smokers more aware that smoking is a certain and potent killer.

For years, the cigarette industry has sponsored advertising campaigns which attribute healthy, robust lifestyles to smoking. Every day references are made to social and financial success or beautiful, glamorous, rugged lifestyles associated with cigarette use. These techniques represent the cigarette industry's efforts to educate the public by belittling the scientific facts about smoking and health.

H.R. 1824 proposes a new, comprehensive strategy for reducing the incidence of smoking by making Americans aware of the dangers to their health when they light up. The legislation has four major provisions.

The first replaces the current health warning label with three, more specific statements. The current label reads; "Warning: The Surgeon General has determined that cigarette smoking is dangerous to your health." This warning is seriously outdated and has not been revised since 1970. The labels proposed by the legislation are up to date and reflect the current state of scientific knowledge about the relationship between smoking and health. The new labels will appear an equal number of times on cigarette packages and advertising during a 12-month period. Without objection I would ask that a copy of the three warnings be printed in the RECORD at this point.

WARNING: Cigarette Smoking, causes Lung Cancer and Emphysema, is a major cause of Heart Disease, is addictive, and may result in death.

WARNING: Cigarette Smoking by Pregnant Women may result in Miscarriage, Premature Births, or Birth Weight Deficiencies.

SMOKERS: No matter how long YOU have smoked, Quitting Now greatly reduces the risks to your health.

The second requires the disclosure of tar, nicotine, and carbon monoxide content on cigarette packages and advertising.

The third requires that tobacco companies submit a complete list of ingredients used in the manufacture of cigarettes to the Secretary of the Department of Health and Human Services. In recent years, the cigarette manufacturers have increased their reliance on flavor additives of unknown nature and toxicity. While assuring the protection of trade secrets, the provision would permit scientists to begin to assess the human health effects of these substances.

The fourth would specify in statute the Secretary of DHHS's responsibility to increase public knowledge about the health effects of smoking. The Secretary's responsibilities would include: First, sponsorship of research on the effects of smoking on health; second, improved coordination of DHHS research and educational programs with those of other Federal agencies and private sector organizations; third, purchase of broadcast time on radio and TV to disseminate information on smoking and health; and fourth, creation of an Interagency Committee on Smoking and Health.

Mr. Speaker, I am pleased to say that H.R. 1824 has broad support among organizations concerned about public health and disease prevention. Through the commitment and national leadership of organizations like the American Heart Association, American Lung Association, and American Cancer Society smoking prevention has become a major public health priority for the 1980's. The legislation also has the enthusiastic endorsement of the following organizations:

American Academy of Pediatrics; American Alliance for Health, Physical Education, Recreation and Dance; American Association for Respiratory Therapy; American College of Chest Physicians; American College of Obstetricians and Gynecologists; American College of Preventive Medicine; American College of Radiology; American Council on Science and Health; American Medical Student Association; American Public Health Association; American Society of Internal Medicine; Association of State and Territorial Health Officials; National Interagency Council on Smoking and Health.

Mr. Speaker, cigarettes are among the most dangerous drugs in use today. The body of scientific knowledge documenting the adverse health effects of smoking is overwhelming. The linkage between smoking and serious illness or death is unequivocal.

We have been too casual in our efforts to discourage smoking. Late night public service announcements, understaffed public information programs and a generalized, overexposed health warning are inadequate responses to a problem that causes one out of seven deaths in this country.

By making changes in the health warning label, by giving greater visibility to smoking prevention activities at the Federal level and by working closer than ever before with the voluntary health sector, the number of Americans who smoke can be reduced.

I urge Members to join me as cosponsors of this important health initiative.●

H.R. 1657—ADOPTION EXPENSE DEDUCTION

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. LEHMAN of Florida. Mr. Speaker, one of the changes enacted in the passage of the Economic Recovery Tax Act of 1981 now in effect for the 1982 taxable year is a tax deduction for reasonable expenses incurred in the legal adoption of disadvantaged or hard-to-place children who receive public assistance.

I believe that this deduction will result in increased adoptions of children in our severely overburdened foster care system where, more often than not, children are the blameless victims of an inadequate child welfare system. Reducing the numbers of children in our foster home system is undoubtedly a long-range goal of this tax change and will in the long run reduce the costs of foster care, the largest single item in the child welfare budget.

All children deserve stable, caring homes. Because the existing law does not apply to all adoptable children, I have introduced legislation, H.R. 1657, to amend section 222 of the Internal Revenue Code of 1954 which relates to the deduction for adoption expenses. My bill would amend existing law so that the adoption expenses of all chil-

11-059 O-87-43 (Pt. 3)

dren adopted by taxpayers will be deductible.

Adoption expenses mean the reasonable and necessary adoption fees, court costs, attorney fees, and other expenses which are directly related to the legal adoption of a child by the taxpayer and which are not incurred in violation of State or Federal law.

There is a great need for this legislation. At a time when the budget has adversely affected social programs, especially those affecting children, when teenage pregnancies are increasing, and when there are so many Americans who would adopt if given more opportunity to do so, I believe that my bill is a step in the right direction.

Both inside and outside foster care are many children right now awaiting adoption. Helping to break the financial barrier to adoption would mean that more of these children could be more easily adopted. It is estimated that up to one-third of the foster children could be adopted if barriers were removed.

For the adoption of foreign-born children, placing needy children in loving homes will become more accessible for many single people who wish to adopt.

It is time that birth and adoption were placed on equal terms as modes of family formation. Adoption is just another way of having a child and deserves more public support.

I urge my colleagues to join in cosponsoring this legislation. The text of H.R. 1657 follows:

H.R. 1657

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That (a) section 222 of the Internal Revenue Code of 1954 (relating to deduction for adoption expenses) is amended to read as follows:

"SEC. 222. ADOPTION EXPENSES.

"(a) ALLOWANCE OF DEDUCTION.—In the case of an individual, there shall be allowed as a deduction for the taxable year the amount of the adoption expenses paid or incurred by the taxpayer during such taxable year.

"(b) DENIAL OF DOUBLE BENEFIT.—

"(1) IN GENERAL.—No deduction shall be allowable under subsection (a) for any expense for which a deduction or credit is allowable under any other provision of this chapter.

"(2) GRANTS.—No deduction shall be allowable under subsection (a) for any expenses paid from any funds received under any Federal, State, or local program.

"(c) ADOPTION EXPENSES.—For purposes of this section, the term 'adoption expenses' means reasonable and necessary adoption fees, court costs, attorney fees, and other expenses which are directly related to the legal adoption of a child by the taxpayer and which are not incurred in violation of State or Federal law."

(b) Section 62 of such Code (defining adjusted gross income) is amended by inserting after paragraph (16) the following new paragraph:

"(17) ADOPTION EXPENSES.—The deduction allowed by section 222."

(c) The amendments made by this Act shall apply to taxable years beginning after December 31, 1982.●

TRIBUTE TO JOHN BASILONE

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. FLORIO. Mr. Speaker, every war produces those who stand out as individuals who expressed their unique abilities through acts of uncommon courage and valor. The most supreme acts of heroism are recognized with the Medal of Honor.

This recognition by the President in the name of the Congress may only be accorded an individual who "distinguished himself conspicuously by gallantry and intrepidity at the risk of his life above and beyond the call of duty".

New Jerseyite John Basilone distinguished himself not once, but many times, on the field of battle as American forces engaged the enemy in the Pacific some 40 years ago. Basilone's herosim at Guadalcanal was awarded by the presentation of first Congressional Medal of Honor to be received by an enlisted Marine in World War II. Forsaking stateside duty, Sergeant Basilone was reassigned to combat duty at his own request; 38 years ago this month, Basilone died in service to his country. Basilone was posthumously awarded the Navy Cross, the Navy's second highest military decoration, for gallantry displayed as he led his unit through Iwo Jima enemy lines.

It is sad that more people do not remember John Basilone and his uncommon contributions. I support the efforts of Mayor Steve Del Rocco and the people of Raritan, N.J., Basilone's hometown, to gain greater recognition for this special American. Donato Sodano of the New Jersey Army and Navy Union has also been tireless in supporting efforts to honor Basilone.

Perhaps the greatest honor we may bestow upon John Basilone, and the over 1 million other Americans to have died in war, is to remember those who still suffer as a result of having survived war.

Our great task now as a nation is to insure that those who served, and suffered in defense of our liberties, are not denied the respect, benefits, and rights they have earned. I urge my colleagues to join me in this task.

Mr. Speaker, I would like to share John Basilone's story for the benefit of my colleagues.

[From the Sunday Star-Ledger, Feb. 13, 1983]

GREATER RECOGNITION SOUGHT FOR JERSEY WAR HERO

FRIENDS PUSHING STATE TO HONOR MEMORY OF MARINE AT IWO JIMA

(By James Benson)

New Jerseyan John A. Basilone will forever be remembered in United States military annals, but today few residents in his home state know about the heroic Marine who was killed at Iwo Jima.

The Raritan resident was the first enlisted Marine in World War II to win the Congressional Medal of Honor, the nation's highest military decoration, for heroism at Guadalcanal.

Given a stateside tour of duty promoting the sale of war bonds after Guadalcanal, Basilone requested a return to combat.

He was killed by a mortar blast during the invasion of Iwo Jima 38 years go this Saturday, on Feb. 19, 1945, after an amazing display of courage on the battlefield for which he was posthumously awarded the Navy Cross.

He is buried in Arlington National Cemetery, Arlington, Va.

Some people say he should have received a second Medal of Honor for his heroism on Iwo Jima.

Many contend that despite a number of monuments to Basilone erected around the state, he has never been appropriately memorialized in New Jersey.

Now a longtime admirer of Basilone, Donato Sodano of Maplewood, is calling again for "proper recognition" of the sergeant and his deeds.

Sodano took part in memorial ceremonies for Basilone on the anniversary of his death almost every year until 1973. Since then, health problems have forced him to stay home.

"I don't think the state of New Jersey has done enough to honor this outstanding man," remarked Sodano, 75, a retired insurance agent who served in the Army during World War II.

As an official of the New Jersey chapter of a veterans' organization, the Army and Navy Union, Sodano spearheaded a drive in 1950 to have the New Jersey Turnpike, then under construction, named for Basilone.

The Turnpike authority turned down Sodano's group and other veterans' organizations supporting the proposal.

Pike officials said legislation authorizing construction of the superhighway required that it be named as it was, the New Jersey Turnpike.

As a gesture to the vets' groups, the turnpike officials agreed to name the turnpike bridge over the Raritan River in New Brunswick for Basilone.

Sodano and his group were not invited to the dedication of the bridge, he said.

"I intend to confer with our Department of New Jersey Army and Navy Union officials to start a statewide campaign in conjunction with other veteran groups to have the state of New Jersey take some action to accord proper recognition to one of its most illustrious sons and one of our country's outstanding heroes," Sodano said.

October 1942, the month when John Basilone won the Medal of Honor, was a grim and desperate time for Americans struggling to hold the strategic airbase called Henderson Field on the island of Guadalcanal.

The outcome of the first American Pacific offensive of World War II was uncertain as

land, air, and sea battles raged for control of the island.

On Oct. 15 the American Pacific naval commander, Admiral Nimitz, and his staff made an estimate of the situation, according to Guadalcanal historian Herbert Christian Merillat:

"It now appears that we are unable to control the sea in the Guadalcanal area," they concluded. "Thus our supply of the position will only be done at great expense to us. The situation is not hopeless, but it is certainly critical."

On the same day, Merillat wrote, the Marine commander on the island, Gen. Alexander A. Vandegrift, sent a secret message to the region's naval commander, Vice Admiral Robert L. Ghormely, which said that Japanese forces were shelling positions around the airfield "at will" and "enemy surface craft move at will in surrounding waters and shell" the airfield "destructively both day and night." The Americans, Vandegrift said, "will be unable indefinitely to hold these positions if this continues."

A major Japanese counteroffensive to retake the airfield was launched in the final days of October 1942. It failed.

On Oct. 24 and 25, 25-year-old Gunnery Sgt. John A. Basilone was in charge of two sections of heavy machine guns of the 1st Battalion, 7th Regiment, 1st Marine Division.

The 7th Marines held a section of the perimeter south of the airfield that stretched east from the Lunga River across a portion of a ridge known as Lizard Hill. The hill had another name. Marines who fought a desperate engagement there earlier called it "Bloody Ridge."

The area was soon to be a battleground again. On Oct. 24 the Japanese launched an attack against the Bloody Ridge area.

The official citation for Basilone's Medal of Honor states:

"While the enemy was hammering at the Marines' defensive positions, Sergeant Basilone, in charge of two sections of heavy machineguns, fought valiantly to check the savage and determined assault.

"In a fierce frontal attack with the Japanese blasting his guns with grenades and mortar fire, one of Sergeant Basilone's sections, with its gun crews, was put out of action, leaving only two men able to carry on.

"Moving an extra gun into position, he placed it in action, then, under continual fire, repaired another and personally manned it, gallantly holding his line until replacements arrived.

"A little later, with ammunition critically low and the supply lines cut off, Sergeant Basilone, at great risk of his life and in the face of continued enemy attack, battled his way through hostile lines with urgently needed shells for his gunners, thereby contributing in large measure to the virtual annihilation of a Japanese regiment."

Basilone was credited with killing 38 enemy soldiers.

He was taken out of combat and sent home to help sell war bonds. He did this for nearly two years but then, at his request, he was reassigned to combat duty.

In 1976 Basilone was posthumously inducted into the Italian-American National Hall of Fame in Trenton.

In his hometown the sergeant is remembered. A statue depicting the way Basilone probably looked—a machine-gun in his hands—when he fought on Guadalcanal, has been erected in a small park in Raritan. It was sculpted by a grade school friend, Philip Orlando.

Last Nov. 7 borough officials and residents turned out for a parade and memorial service on "John Basilone Day." The event was prompted by letters from Raritan school children to borough officials.

"We hope to make that (the parade and ceremonies) annual," said Raritan Mayor Steve Del Rocco, noting that there have been other memorial services for Basilone in Raritan over the years.

A comrade said of him, "He was the kind of a guy men like to be with either in drink or a battle. Johnny went back into combat because he couldn't stand having his buddies die while he led a soft life stateside."

Thirty-eight years ago this Saturday, Basilone, recently married, was killed "by a bursting mortar shell" on the island of Iwo Jima, according to the citation accompanying the Navy Cross he was awarded posthumously.

The medal was awarded, the citation said, "for extraordinary heroism while serving as a leader of a machine-gun section of Company C, 1st Battalion, 27th Marines, 5th Marine Division, in action against enemy Japanese forces on Iwo Jima in the Volcano Islands."

According to the citation, shortly after Basilone landed, "when his company's advance was held up by the concentrated fire of a heavily fortified Japanese blockhouse, Gunnery Sergeant Basilone boldly defied the smashing bombardment of heavy caliber fire to work his way around the flank and up to a position directly on top of the blockhouse and then, attaching with grenades and demolitions, singlehandedly destroyed the entire hostile strong point and its defending garrison.

"Consistently daring and aggressive as he fought his way over the battle-born beach and up the sloping, gun-studded terraces toward Airfield Number One, he repeatedly exposed himself to the blasting fury of exploding shells and later in the day coolly proceeded to the aid of a friendly tank which had been trapped in an enemy mine field under intense mortar and artillery barrages, skillfully guiding the heavy vehicle over the hazardous terrain to safety, despite the overwhelming volume of hostile fire.

"In the forefront of the assault at all times, he pushed forward with dauntless courage and iron determination until, moving upon the edge of the airfield, he fell, instantly killed by a bursting mortar shell.

"Stouthearted and indomitable, Gunnery Sergeant Basilone, by his intrepid initiative, outstanding professional skill and valiant spirit of self-sacrifice in the face of fanatic opposition, contributed materially to the advance of his company during the early critical period of the assault, and his unwavering devotion to duty throughout the bitter conflict was an inspiration to this comrades and reflects the highest credit upon Gunnery Sergeant Basilone and the United States Naval Service. he gallantly gave his life in the service of his country."

John Basilone, the fifth of 10 children and son of an Italian immigrant, is scarcely remembered today by New Jerseyans outside his hometown.

A bronze plaque honoring Basilone is mounted on granite and sits unnoticed in a small plaza built across from Penn Station in Newark. The monument was sponsored by the Melvin Spitz chapter of Disabled American Veterans in Newark, and other groups.

The bridge of the New Jersey Turnpike which spans the Raritan River in New Brunswick is officially named the Basilone Memorial Bridge, but this is almost unknown to most who speed along the turnpike.

The escort destroyer USS Basilone was named for the hero after the war. It has been mothballed.

For some people who remember John Basilone, however, these memorials are not enough. Not nearly enough.

"If you went out today and asked the average man 'Who was Johnny Basilone?' They don't know who Johnny Basilone was," said Sodano.

"Anything to commemorate his memory I'd go along with," said Mayor Del Rocco. He suggested a renaming of Route 202, which runs through the borough. "John Basilone Drive or something like that. I'd rather see it right down home." But he repeated that he favors any appropriate monument to the hero.

Members of the sergeant's family still live in Raritan. His sister, Mary Basilone, does. She said she supports the idea of a bigger monument to her brother.

"I think they should have made a movie . . . The Marines have his story from the day he was born," she said. "Something should be done."

Her brother was known to friends as "Manilla John" because he had served some four years in the Army, including a tour of duty in the Philippines, before enlisting in the Marines in 1940.

"He was just an adventurous kid" Mary Basilone said. "He wanted to go in the Marines because he heard there was more action," she said.

Jim McEnery of Clifton, who served on Guadalcanal with the 1st Marine Division was a member of the parade committee in last year's observances in Raritan. He agrees that Basilone is not well known.

"I don't think he's as familiar as he should be," said McEnery. "He's an American hero in particular for New Jersey. And I think the people ought to know more about him."

Another admirer of Basilone, William Troy of Morristown, said the sergeant should have received a second Medal of Honor for his acts on Iwo Jima.

A second Basilone sister, Phyllis Basilone Cutter of Florida, agreed.

"It is my personal belief that had he not been awarded the first (Medal of Honor) for his exploits on Guadalcanal," she said, "his heroic deeds on Iwo Jima, would have resulted in another instead of the Navy Cross."●

GEORGE WASHINGTON PARKWAY/SPOUT RUN BOTTLENECK BILL

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. WOLF. Mr. Speaker, I am introducing legislation today which addresses a decade-old problem—a serious and hazardous traffic problem along a distance of just over 1 mile of the George Washington Memorial Parkway which has taken the lives of seven people since 1970.

My bill will improve safety, enhance traffic flow, and decrease motor vehicle emissions along an approximate 1.4 mile-stretch between the Spout Run intersection of the parkway and the Theodore Roosevelt Bridge.

This legislation will direct the National Park Service to construct a third lane, in each direction, between Spout Run and the Theodore Roosevelt Bridge while observing all environmental safeguards on the George Washington Memorial Parkway. The merging of two lanes into one lane on both the George Washington Parkway and the Spout Run interchange result in a bottleneck situation because of the sudden and abrupt transition from four to two lanes. During rush hours this transition contributes to major traffic congestion problems. Traffic volumes are so heavy during morning rush hour, that traffic backs up an average of 2 miles or more on the George Washington Parkway, sometimes as far back as Route 123 in McLean. Spout Run Parkway also bears extensive traffic backups.

This situation requires a Park Service officer to control traffic by physically stopping travel on specific lanes and alternating lane flow. In addition, it creates ideal circumstances for rear-end collisions because of stopping and starting which is particularly troublesome for visitors and tourists unfamiliar with the area roads and traffic management systems.

In 1978, The Washington Post listed the Spout Run intersection with the George Washington Parkway as one of the 10 most hazardous spots in the metropolitan area. Some 69 percent of all traffic accidents in 1981 on the GW Parkway between Boundary Channel at the 14th Street Bridge and Spout Run occurred between the Spout Run intersection and the Theodore Roosevelt Bridge. An average of almost 50 personal injury and property damage accidents a year occur between these two points. I believe my bill to add another lane from Spout Run to the Roosevelt Bridge will reduce these statistics.

The George Washington Parkway serves as a major arterial link for the Washington Metropolitan Area and is traveled by not only area commuters but also visitors to the Nation's Capital. I believe it is essential that the Spout Run bottleneck be eliminated without further delay and before any more lives are lost, persons injured or property damaged. A third lane would improve commuter and visitor travel not only at rush hour, but also during other times of the day and night, especially for those who do not know about the sudden lane-merge situation.

I urge my colleagues to join me in supporting this bill to appropriate the needed funds, estimated at $6 million, to allow the Park Service to take this action authorized under the George Washington Memorial Parkway Act of 1930.

The construction of an additional lane for this small area is an example of a basic relatively low cost and environmentally sound modification that can make a major improvement in traffic flow in Northen Virginia. It will reduce accidents, save energy, and it makes sense.

H.R. 1931

A bill to direct the Secretary of the Interior to construct, between Spout Run Parkway and the approaches to the Theodore Roosevelt Bridge, additional lanes on the George Washington Memorial Parkway, Virginia, for the purposes of alleviating traffic congestion and improving safety

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, to alleviate traffic congestion and improve safety, the Secretary of the Interior shall construct two additional lanes (one in each direction) on the George Washington Memorial Parkway, Virginia, authorized by the first section of the Act of May 29, 1930 (46 Stat. 482), between the intersection of such parkway with Spout Run Parkway and its intersection with the approach roads to the Theodore Roosevelt Bridge.

SEC. 2. There is hereby authorized to be appropriated for fiscal years beginning after September 30, 1983, $6,000,000 to carry out the first section of this Act.●

FUTA TAX EXEMPTION FOR FISHERMEN

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. JONES of North Carolina. Mr. Speaker, today I have introduced H.R. 1895 which seeks to rectify inconsistencies concerning the status of our fishermen and their responsibilities under the Federal Unemployment Tax Act (FUTA). I am pleased to have my colleague, Congressman ED FORSYTHE of New Jersey, cosponsor this legislation.

Many of our commercial fishermen have long considered themselves self-employed. Independent by nature, the fisherman does not receive the fixed salary of a traditional employee. Instead of receiving hourly wages or an annual salary as he works among one or more fishing boats, he receives his remuneration through "a share of the catch."

The 1976 Tax Reform Act permanently exempted owners of fishing vessels from paying Federal withholding income taxes and FICA taxes for the fishermen on their boat if their vessels were manned by fewer than 10 operating crew members and if the crew members' remuneration was only a "share of the catch." At that time, owners of fishing vessels under net 10 tons were exempted from paying FUTA taxes on their crew.

Hence, different stipulations governed FUTA and FICA exemptions available to self-employed fishermen. But with the adoption of the 200-mile fishing zone, fishermen found that larger vessels were safer and more economical to manuever further offshore while not increasing the size of the crew. Consequently, the Congress, through the Economic Recovery Act of 1981, provided that the crew members who were considered self-employed for purposes of FICA were likewise exempted from paying FUTA taxes throughout 1981. Thus, services rendered by operating crew members were exempted for purposes of FUTA and FICA if their remuneration was a share of the boat's catch and if the crew was composed of fewer than 10 operating crew, regardless of boat size.

The problem is that FICA and Federal withholding taxes are permanently exempted while the FUTA exemption must be renewed annually. The Congress has been extending FUTA tax exemptions on a yearly basis since 1981. The Miscellaneous Revenue Act of 1982 extended this exemption through December 31, 1982, but now the FUTA exemption, as of January 1, 1983, has again expired. Without congressional action, vessel owners face the confusing situation of treating crew members as self-employed persons for FICA and Federal withholding taxes, and as employees for purposes of FUTA.

This inconsistency should not be allowed to continue. We need to provide these fishing vessel owners the same considerations under FUTA that they have under FICA. My bill will correct this situation. I propose to make permanent the FUTA exemption for owners of fishing vessels if their boats are manned by a crew of fewer than 10 individuals and if the crew's remuneration is a share of the catch, regardless of boat size.

By treating Federal withholding income taxes, FICA, and FUTA taxes the same for this class of fishermen, we can rectify the existing inconsistency as well as adopt sound public policy.●

CONSEQUENCES OF NUCLEAR WAR

HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. GORE. Mr. Speaker, during September of 1982, the Investigations and Oversight Subcommittee of the Committee on Science and Technology held hearings on the global health and ecological consequences of nuclear war. At that time, prominent scientists

and physicians who have considered the questions of what the Earth would be like after a nuclear war testified as to their findings and conclusions. Frankly, what they had to say was more chilling than what we had imagined to be the case. In short, they described a post-war world crippled by disease and ecological disaster—a world in which those lucky enough to escape the initial toll of the war would find survival to be an increasingly difficult struggle.

What struck us most about the testimony was not the great number of persons who might perish from the post-attack effects of a nuclear war. For, given the 155 to 165 million people who could be killed outright as a result of a major attack against the United States, how can any human being react with anything more than numbness at the prospect that millions more might die during the post-attack ecological aftermath? Rather, what impressed us most was that, for the first time, scientists were telling us that merely being removed from the scene of the attack might not be a sufficient predicate for survival. Instead, what they seemed to be saying is that not only might life after a nuclear war be ominously difficult, but that nature, itself, could conceivably whither under a major nuclear attack.

What are some of the postwar effects foreseen by the scientists who testified? Among the atmospheric effects is the possibility of sun screening from the debris of a nuclear war. As now postulated, the debris could be sufficiently widespread and enduring to prevent photosynthesis and kill crops. Other theorized effects include the possibility that oxides of nitrogen from multiple nuclear blasts could damage the Earth's protective ozone layer allowing blinding levels of ultraviolet radiation to penetrate down to the planet. On land, others foresee the likelihood of widespread, epidemic-level diseases, themselves capable of killing 20 to 30 percent of a war's surviviors. Further, since the subcommittee's hearing, others have predicted equally distressing postwar environmental effects. Among these is the possibility of widespread earthquakes, particularly in an intensive attack scenario such as a counterforce attack against a dense-pack-type missile field.

Because so many of the effects now postulated are the result of chance occurrences or isolated research efforts, it is very difficult to determine whether the theories now being put forward tell the whole story. In addition, though many of the propounded theories can be convincingly modeled, they cannot be conclusively established short of a nuclear war, itself. In my view, these considerations make it extremely important that the theories thus far postulated by subjected to vigorous scientific review, and that they be analyzed as part of a comprehensive and deliberate scientific effort.

To spur on the search for answers in this most serious of scientific inquiries, I recently called for an international research year in which scientists from the West and the East would exhaustively analyze the nuclear aftermath issue. I am pleased to report that such an international research effort is now underway. For the first time, at least three major scientific teams—two of them international and a third sponsored by the U.S. National Academy of Sciences—are being assembled to take the most thorough look to date at the ecological consequences of nuclear war. One of these efforts, the Conference on the Long-Term Worldwide Biological Consequences of Nuclear War is already underway with an international conference called for this fall.

Together, these research teams will examine the nuclear aftermath issue in a more comprehensive manner than has ever before been the case. What they ultimately report should be of paramount interest to every citizen and, in particular, to every leader who has some influence on the future direction of nuclear weaponry.

Unfortunately, the results of studies such as those that are now underway often get shoved aside because of competing demands placed on decision-makers or because of lack of understanding. This, we cannot let happen. We must not allow these studies to be treated as an interesting but, nevertheless, ignorable twist in the labyrinthian debate over the arms race. It is for this reason that Congress should lend its name and stature to these scientific efforts so that none, either on this side or the other side of the ocean, can ignore their import.

What many now suspect, but, which some will not accept absent the strongest scientific evidence, is that mankind's ability to wage a nuclear war and survive in any fashion is now a matter of significant doubt. If the studies now underway provide the keys to such an understanding, they may serve as a basis for persuading the leaders of the United States, the Soviet Union, and the other nuclear-weapon states that a "winnable" nuclear war is a myth and that preparing for such a war is folly, no matter what degree of suffering and death some lunatic might see as an acceptable price to pay in return for "victory."

In addition to recognizing the international year of research that is now underway, Congress and the administration should insure that the results of the several studies are provided the broadest dissemination possible both here and in the Soviet Union. Accordingly, the resolution provides that the results of the various scientific inquiries so widely disseminated to all branches of this Government, to the Government of the Soviet Union and to the governments of all other concerned nations.

In a historic live Russian broadcast that was received on public television in the United States on October 13, 1982, physicians from this country and the Soviet Union candidly discussed the medical horrors that would follow a nuclear war. No lesser treatment should attend the findings reached by the international scientific inquiries that are now underway. Through wide dissemenation of the results reached by the various research teams, Congress can insure that the message which these research efforts have to offer will not go unnoticed.●

ARTICLE BOOSTS BUFFALO

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. NOWAK. Mr. Speaker, the city of Buffalo, which is within the 33d Congressional District I am privileged to represent, has not fared well during this current recession.

Heavily dependent on the auto and steel industries, the community was already in the painful process of transition—from a heavy industrial base to a more diversified light manufacturing, high-technology, service-oriented economy—when this latest recessionary cycle struck. Such an evolution is not easy under any circumstances. Accompanied by a national economic downturn, it has been extremely painful for Buffalo and western New York.

Amid economic misfortune, however, Buffalonians remain proud of their community, proud of their quality of life, and proud of their ability to weather adversity. The force which binds us together is a sense of community, a sense that Buffalo is a unique place, a great place to live.

A former Buffalo resident, now a freelance writer in Washington, Sara Solovich, captured the city's sense of coummunity and flavor in a recent article that appeared in the Washington Post. Her story, which follows, conveys the poignant feelings of a person appreciative of the quality of life unique to the Buffalo area.

[From the Washington Post, Feb. 13, 1983]

HAIL TO THEE, OH BUFFALO!

(I like Buffalo. The lake's polluted. The elms are blighted. The weather is Gothic. The place is full of the phosphorescence of decay.—John Barth.)

(By Sara Solovich)

Hail Buffalo! City of snow, the nation does you wrong. Your houses (cheap!) have enough wainscoting to make Washingtonians climb their $200,000 walls. Your pizzerias deliver. And what pizza! Just the memory of your chicken wings, beer-bat-

tered fish fries and beef on kummelweck makes me weep with hunger. True, your downtown looks like postwar Dresden. But you have neighborhoods where priests still hear confessions in Polish, great bars (more per capita than any other city in the country) and white Christmases.

Now I live in Washington, closeted in an apartment that would fit into my old living room, homesick as I watch a blizzard bring the capital to its knees.

People find it amusing that I once lived in Buffalo, the nation's armpit. A most beloved armpit, I tell them. Being from Buffalo is like being Polish or Jewish: You can poke fun at it yourself, but outsiders watch out. When CBS newsman Morley Safer reviled Buffalo restaurants on the air two years ago as specializing in "greasy, impenetrable eggs, burnt bacon and slow service," the mailbags at CBS headquarters overflowed with more than 2,000 outraged complaints from Buffalonians. Safer, whose boss is from Buffalo, was prodded into making a public apology—in Buffalo—where he tried to undo the damage by explaining that "Buffalo is just one of those buzzwords."

But while the rest of the country chuckles at Johnny Carson's blizzard jokes (and where do you think his suits are made? That's right.), Buffalonians have the last laugh.

I had some friends come down from New York and they were thrilled. They were able to get the books they wanted because they weren't sold out. They were able to go to all the movies they wanted and not wait in line. Some of them are making six figures—and I live much better than they do. They're all envious of me because I live in Buffalo. See, I live in a neighborhood where I can walk around at night. Esthetically, I live like a millionaire. My house would cost half a million in Washington. So I'm not playing in Washington's philharmonic. Believe it or not, the Buffalo Philharmonic is just as good.—Monte Hoffman, cellist, Buffalo Philharmonic Orchestra and 20-year resident of Buffalo.

A millionaire businessman and philanthropist from Buffalo named Max Jacobs once told a reporter that his three favorite cities in the world are Jerusalem, New York and Buffalo—not necessarily in that order. "You think this city is nice?" An 11-year-old boy challenged every Israeli he met during his father's one-year sabbatical in Jerusalem. "You should see Buffalo."

Leaving Buffalo is one of the worst fates that can befall a Buffalonian. I know a federal train inspector, promoted to a prestigious job in New York City, who contemplated quitting before reaching a compromise: he commutes on weekends to Buffalo, much to the disbelief of his coworkers who think they live in the world's greatest city. Last year, a group of Buffalo lawyers exiled to Texas celebrated a Bills-Cowboys game with three pizzas, chicken wings and kosher corned beef all flown in from Buffalo.

I was thinking y'all might call this story 'The Spirit of Buffalo Lives On.' We moan for a good slice of kielbasa. They just don't know what pizza is here. Terrible stuff that tastes like cornmeal. And no one's every heard of chicken wings as an appetizer. And you know what I miss the most? John and Mary's submarines. God, what I'd give for a good hard Italian roll and the onions and the peppers. You know how they fry it up like that? —Larry Wolfish, lawyer, 1982.

I know, Larry.

My husband and I left Buffalo last November after 3½ years—and only because the newspaper that employed us both, the Courier-Express, folded. We were devastated, but it never occured to us that we should abandon our careers for a life in Buffalo. Friends, however, were shocked that we would leave. "You have to leave Buffalo?" one woman asked incredulously, on learning that my husband had accepted a job offer in Washington. "I am so sorry." When I told my dentist, he only grimaced and said, "Good luck, you're going to need it."

Visitors don't always see the attractions of this city. No wonder—its grain and steel mills are largely abandoned and many of the buildings on Main Street are window-smashed and inhabited by pigeons. But these visitors fail to look beyond the obvious—past the eight months of winter and the Chamber of Commerce's frenetic "Talking Proud" campaign ("Four distinct season! Buffalo's air is more than twice as clean as Houston's. Visitor's can sample a different restaurant every night of the week for more than five years without returning to the same place.")

No matter what the chamber says, Buffalo is not a good city to visit. It is meant to be lived in.

It is a city of neighborhoods: Polish, Irish, Black, Italian. It has pockets—big ones—where the English language will get you nowhere. Turn a corner and you'll run into a Polish restaurant serving czarnina, duck blood soup. Turn another, and you'll find one of five houses designed by Frank Lloyd Wright between 1903 and 1908. Mark Twain was once editor of The Buffalo Express, which later merged with the Courier to form my now-defunct newspaper. Though he later described that year-and-a-half as the worst in his life (his wife gave birth to a stillborn child in Buffalo), he retained enough feeling for the place to bequeath the original manuscript of "The Adventures of Huckleberry Finn" to the city's library.

Twain enjoyed rowing on Lake Erie and the Niagara River—so much so that Charles Brady, former chairman of the English Department at Canisius College in Buffalo, says, "I always had the feeling that something of Lake Erie and the Niagara got into the Mississippi of Huckleberry Finn.

The City of Buffalo has 350,000 people, 105,000 fewer than it did in 1970. It was founded in 1800 by Germans and Alsatians (who are generally held accountable for the nasal twang in the classic Buffalo accent—a Buffalonian is from "Buff-low"), incorporated as a city in 1832, and, in between, burned by the British after the Americans burned York, the capital of upper Canada.

Buffalo has sent two men to the White House—Millard Fillmore and Grover Cleveland. William McKinley was assassinated in Buffalo in 1901. It is the home of actress Kathrine Cornell, who opened a new play in Buffalo whenever possible, Buffalo Bob "Howdy Doody" Smith, humorist Mark Russell and funk star Rick James, who maintains an estate in a nearby wealthy suburb.

It is also the home of the roll-top desk, the Pierce-Arrow car (America's short-lived answer to the Rolls-Royce), the air conditioner and the electric chair. The first man to be electrocuted in that chair was from Buffalo. And, in 1896, Main Street, Buffalo became the first street in the United States to be lit with electricity.

Today, anyone with a job can live like a king in Buffalo. Less than $60,000 buys a sturdy Victorian house with stained glass windows, a turret or two, fireplaces, butler's pantry, beamed dining room ceiling and sliding oak doors. One Washington couple was forced to buy a mansion when they moved to Buffalo last year, simply to avoid the capital gains tax from the sale of their Capital Hill townhouse.

There are other amenities. Buffalo has one of the nation's finest modern art collections. Its philharmonic is first-rate. Delaware Park's 367.61 rolling acres were laid out by Frederick Law Olmsted, the designer of New York's Central Park and Buffalo itself was designed by Pierre de L'Enfant, the same engineer who designed Washington, D.C. The public schools' "magnet program" is fast becoming known as one of the country's most successful at creating integrated classrooms. There is a renowned cancer clinic and children's hospital. Its football fans are maniacs; the Bills draw among the largest crowds in the National Football League. When they complain about their city, Buffalonians usually point to the absence of a major league baseball team.

The weather—which is awful—doesn't bother them. Only Caribou, Me., Syracuse, N.Y., Sault Ste. Marie, Mich, Muskegon, Mich., Flagstaff, Ariz. and Lander, Wyo., receive more snow than Buffalo, according to the record books. But when "Best Friends," the movie starring Goldie Hawn and Burt Reynolds, was filmed in Buffalo last February, it was baseball weather outside. The filmmakers had to rent snow-making equipment from nearby ski resorts to meet the demands of the script. When Denver was buried under snow on Chirstmas Eve, it was 64 degrees in Buffalo. Did the national networks, those meticulous chroniclers of every snowflake that falls in the "Blizzard Capital," take note? Nooooo.

Buffalonians eat up the cold. Ice rinks are booked solid 20 hours a day, seven days a week in winter. An inch of snow may close Washington National Airport, but Buffalonians drive through anything. Only once were they forced to walk. That was during the Blizzard of '77, when hundreds of cars were buried under 12-foot drifts and the U.S. Army banned cars from the street.

The blizzard. Buffalonians try to shrug it off. They've even commemorated it with an annual "Blizzard Ball." But the blizzard has sunk into the city's consciousness. Four-wheel drives became mighty popular after the blizzard. Some Buffalonians get testy when the word "blizzard" is mentioned.

The blizzard? The blizzard? What about the blizzard? What about earthquakes and volcanoes out west? Why is their reputation any better than ours? This is something I don't understand. I'll tell you a story. A few years ago, there was a boy outside on the street. He walks by my house and uses the nastiest word, so I say to him, "There's no reason to use language like that." But he says the same four-letter word to me again, so the boy on the porch next door gets up and says to him, "Don't you talk to my aunt like that." And I'm not his aunt, I'm his neighbor. But that's Buffalo.—Josephine Bonda, a Buffalo resident since she arrived from Isnello, Italy, 70 years ago, when she was 4½.

So what's the problem? You say the whole country wouldn't be laughing if Buffalo was such a hot-shot city? You can't stomach the idea that you haven't lived unless you've live in Buffalo?

Well, Buffalo does have problems. Big ones.

It is a city where old friends renew acquaintance on the unemployment line. Joblessness is now 15.5 percent and that doesn't

include an additional 3,900 steelworkers, many of them Buffalo residents, who face permanent layoff sometime this year when Bethlehem Steel ends all steel production in nearby Lackawanna. In the last year, Mobil Oil closed its Buffalo refinery. The death of the Courier-Express put 1,100 people on the street. Two downtown department stores have closed. So have dozens of small businesses.

Soup kitchens and emergency food pantries are flourishing. One sociologist says that one of every three people in the Buffalo area is directly on public assistance or in a family with at least one major wage earner unemployed. That makes welfare the county's only growth industry.

The city is trying to turn itself around. There is about $1 billion in new construction downtown. Half is for a subway along Main Street. The city is betting this will bring the public back to Buffalo's business district. The rest of the money is being spent on waterfront development, a new hotel and two new office buildings.

But the city is bleeding. I'll never forget a walk I took up a deserted Main Street one Saturday afternoon last year. It was a ghost town. For a mile, my only company was a pack of wild dogs.

For the first time, friends wonder if Buffalo will pull out of its slump. They are bewildered. The city has suffered one blow after another. The immediate tragedy is that thousands of people are hungry or out of work. Over the long term, a style of life that people from the big city don't understand is threatened. For Buffalo offers balance. It has backyards. The country is 10 minutes away. One can comfortably raise a family there and still enjoy the cultural advantages of city life.

I can walk the 1½ blocks from my office to the courthouse and say hello to 10 guys I went to school with. That has a value. You can pick up the phone and make an oral arrangement with another attorney—you don't have to have a signed, sworn stipulation to do everything. If your word isn't worth something, that's very soon discovered. The courthouse is just around the corner from the BAC [Buffalo Athletic Club], so I can have a workout during lunch. The BAC is one block from the parking deck, so my little world is pretty comfortable. By the time I get out of the BAC after work, traffic is clear and I suppose the reduced stress level is worth something, too.—Bernard Brodsky, University of Buffalo law school graduate who worked in Washington, Atlanta and Hong Kong before coming home to Buffalo for the "quality of life."

Buffalo is a little big town where real estate agents can drive through familiar territory and identify each house by owner, price tag and present marriage. When my husband and I bought our house, the seller turned out to be buying his new house from our lawyer. To complete the cycle, the lawyer had just bought his new house from a woman who was bidding against us for the same house that we eventually purchased.

This, in a city of 350,000 people. But that's a typical Buffalo story.

Another: When my husband and I lost our jobs last year, my son's nursery school immediately offered him a scholarship. A scholarship for a 2-year-old! That he should have grown up in Buffalo.●

EMERGENCY MATHEMATICS AND SCIENCE EDUCATION ACT, H.R. 1310

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. CORCORAN. Mr. Speaker, I would like to express my support for legislation which the House approved yesterday to assist the development of higher education in mathematics and science in America. As you are well aware, the U.S. currently faces an education crisis within these disciplines. The crisis is evidenced by severe shortages of qualified teachers in these subjects, fewer students taking science and math courses, and fewer skilled technicians and high level personnel emerging from our postsecondary institutions.

We are presently fighting to keep pace with the rapid growth of modern technology, but we are losing the battle. While we sit idly by, our foreign competitors continue to surpass us in areas of technology once associated exclusively with this country.

At the root of this problem is a general shortage of qualified math and science teachers, which has reached critical proportions in some States. Of 45 States responding to a national survey, 43 reported shortages of math teachers, 42 of physics teachers, and 38 of chemistry teachers. Stopgap measures to abate these shortages have resulted in the hiring of essentially underqualified teachers. In the midst of this confusion, skilled math and science teachers continue to be lured away from the classroom by private industry, which offers them significantly higher pay scales. While this exodus occurs, the source of qualified teachers dwindles at an alarming rate. In 1980, only 55 percent of the graduates prepared to teach math actually went into teaching, proof that young people with the necessary background are refusing to enter the teaching profession.

Thus, we have identified the problem. Although there is no definite solution to it, the House yesterday passed what I consider to be a promising proposal. The bill, which Education and Labor Committee Chairman PERKINS introduced, H.R. 1310, the "Emergency Mathematics and Science Education Act," would fund a variety of programs at the elementary, secondary, and postsecondary levels to improve math, science, and foreign language education, increase the supply and strengthen the qualifications of teachers of math and science, and encourage students to pursue teaching careers in math, science, and foreign language. The total authorization level for this program would be $400 million for fiscal year 1984, with an open-ended amount for fiscal year 1985. Under part A of title I, $250 million for math and science grants for elementary and secondary education would be authorized for fiscal year 1984; fiscal year 1985 would be left open ended. These funds would be distributed to States on a formula basis, with 25 percent going to State educational agencies and 75 percent to local educational agencies within the State. The purpose of part A is to improve inservice teacher training in math and science, as well as instructional programs within these disciplines. Part B of title I would provide assistance to postsecondary education through an authorization of $50 million for fiscal year 1984. The primary objective of this approach is to graduate a greater number of math, science, and foreign language teachers committed to teach at the elementary and secondary level; but more can be accomplished. Part B would also improve the math, science, and foreign language curricula at colleges, and provide basic research into the problems of instruction in these disciplines. Furthermore, it would call for the reauthorization of the minority institutions science improvement program at its current $5 million level. A scholarship to encourage students to become math and science teachers would also be authorized under part B. Up to 5,000 undergraduates and graduates would be eligible for the first year after enactment, and up to 10,000 the second year.

Title II of H.R. 1310 authorizes $100 million in each of fiscal years 1984–88 to establish a new engineering and science personnel fund to be administered by the National Science Foundation for the purpose of developing and promoting the quality of technical, scientific, and engineering manpower. The necessity of this provision is obvious if we consider that the United States produces less engineers per capita than the United Kingdom, Japan, and the Soviet Union. The National Science Foundation must report to Congress at least once every 2 years over the life of the fund on all expenditures, which may include grants for research, fellowships, capital equipment, salaries, instrumentation, and other activities. Grants made must receive matching funds from private or other public sector sources.

Undoubtedly, serious deficiencies do exist. However, if we choose to promptly adopt H.R. 1310, then we may well avert disaster later on. By channeling our limited resources into existing training and education programs rather than establishing new and burdensome ones, we enjoy a considerable savings. And by investing in prospective math and science teachers now, we insure the viability of math and science education for the future.

I sincerely believe that this bill will provide American higher education with the momentum necessary to carry us into the high technology era. I am pleased to support this legislation.●

BLACK EDUCATORS—EARNING AN "A" IN EDUCATION

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. PATTERSON. Mr. Speaker, on March 3, 1983, the California Alliance of Black School Educators and the Los Angeles County Office of Education will cosponsor the Fifth Annual Conference on Education and Social Concerns in Los Angeles, Calif. The conference is expected to draw together educators, administrators, and students from throughout the State to address several education issues.

This year, the conference coordinating committee has added a special ceremony to its agenda. The event will mark the induction of the first three members to the Educators' Hall of Fame. Among the distinguished honorees will be Dr. Wilson C. Riles, one of California's most dynamic educators.

As an educator, administrator, negotiator, and innovator, Dr. Riles has devoted his life to education. His range of experience spans from teaching Apache Indian children to advising U.S. Presidents on education policy. Wilson served as supervisor of public instruction in the State of California for 12 years. At a time when controversial issues such as busing, bilingual education, and shrinking revenue sources drew extensive media attention and political pressure, Dr. Riles remained dedicated to offering the highest quality education available to California's young people.

Among his many roles, Wilson Riles served as chairman of the U.S. Office of Education Task Force on Urban Education, president of the Task Force on Urban Educational Opportunities, and president of the National Council on Education Research. He is an educator of exceptional skill, who has made measurable contributions in the field of public education.

I invite my colleagues to join me in congratulating Dr. Riles upon his introduction to the Educators' Hall of Fame. We in California are grateful for the many contributions that he and the other inductees, Dr. Jewell Plummer Cobb and Dr. Benjamin E. Mays, have made to public education. On this day, let us pay tribute to their contributions and encourage their continued participation in education policy.●

MERIT PAY REFORM ACT OF 1983

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. WOLF. Mr. Speaker, I would like to submit, for the RECORD, a copy of H.R. 1841 Merit Pay Reform Act of 1983.

The bill follows:

H.R. 1841

A bill to amend chapter 54 of title 5, United States Code, to reform the merit pay system

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Merit Pay Reform Act of 1983".

PERFORMANCE MANAGEMENT AND RECOGNITION SYSTEM

SEC. 2. (a) Chapter 54 of title 5, United States Code, is amended to read as follows:

"CHAPTER 54—PERFORMANCE RECOGNITION

"Sec.
"5401. Purpose.
"5402. Coverage.
"5403. Performance management and recognition system.
"5404. Cash award program.
"5405. Report.
"5406. Regulations.

"§ 5401. Purpose

"It is the purpose of this chapter to provide for a performance management and recognition system which shall—

"(1) use performance appraisals as the basis for determining basic pay and performance awards;

"(2) within available funds, recognize and reward quality performance by varying levels of performance awards;

"(3) within available funds, provide for training to improve accuracy and fairness in the evaluation of performance;

"(4) regulate the costs of performance awards by establishing funding level restrictions; and

"(5) provide the means to reduce or withhold pay increases for less than fully successful performance.

"§ 5402. Coverage

"(a) This chapter shall apply to any supervisor or manager who is in a position which is in GS-13, 14, or 15 of the General Schedule described in section 5104 of this title and whose responsibilities include supervising the work of one or more professional-level employees. For the purposes of this chapter, managerial or supervisory status shall be determined in accordance with Office of Personnel Management classification standards.

"(b)(1) Upon application under paragraph (3) of this subsection, the President may, in writing, exclude an agency, any unit of an agency, or any class of employees within any such unit from the application of this chapter if the President considers such exclusion to be required as a result of conditions arising from—

"(A) the recent establishment of the agency, unit, or class, or the implementation of a new program,

"(B) an emergency situation, or

"(C) any other situation or circumstance.

"(2) Any exclusion under this subsection shall not take effect earlier than 30 calendar days after the President transmits to each House of the Congress a report describing the agency, unit, or class to be excluded and the reasons therefor.

"(3) An application for exclusion under this subsection of an agency, any unit of an agency, or any class of employees within any such unit shall be filed by the head of the agency with the Office of Personnel Management, and shall set forth reasons why the agency, unit, or class should be excluded from this chapter. The Office shall review the application and reasons, undertake such other review as it considers appropriate to determine whether the agency, unit, or class should be excluded from the coverage of this chapter, and upon completion of its review, recommend to the President whether the agency, unit, or class should be so excluded.

"(4) Any agency, unit, or class which is excluded pursuant to this subsection shall, insofar as practicable, make a sustained effort to eliminate the conditions on which the exclusion is based.

"(5) The Office shall periodically review any exclusion from coverage and may at any time recommend to the President that an exclusion under this subsection be revoked. The President may at any time revoke, in writing, any exclusion under this subsection.

"(c) This chapter shall not apply to individuals employed under the Office of the Architect of the Capitol or the Botanic Garden.

"§ 5403. Performance management and recognition system

"(a) In accordance with the purpose set forth in section 5401 of this title, the Office of Personnel Management shall establish a performance management and recognition system which shall provide for—

"(1) a range of basic pay for each grade to which the system applies, which range shall be limited by the minimum and maximum rates of basic pay payable for each grade under chapter 53 of this title, except as otherwise provided for in this section;

"(2) pay increases within such range, consisting of comparability pay increases and periodic step-increases (under section 5335 of this title), to the extent provided under subsection (c), based upon performance; and

"(3) performance awards, to the extent provided under subsection (d), based upon performance.

"(b) Under regulations prescribed by the Office, the head of each agency shall provide for increases within the range of basic pay for any employee covered by the performance management and recognition system.

"(c)(1) Determinations to provide comparability pay increases under subsection (a)(2) shall, for any pay adjustment period, be made based upon the level of performance of the employee involved, as most recently determined under chapter 43 of this title. If the employee's performance is rated at—

"(A) either of the two levels below fully successful, no comparability increase shall be provided; or

"(B) the fully successful level or either of the two levels above fully successful, the full comparability increase shall be provided.

"(2)(A) For purposes of section 5335 of this title, the performance of an employee under this chapter shall be considered to be

of an acceptable level of competence, within the meaning of subsection (a) of such section, if such employee's most recent rating under chapter 43 of this title was at the fully successful level or either of the 2 levels above fully successful.

"(B) For purposes of section 5335 of this title, and notwithstanding subsection (c) of such section, a determination that the work of an employee under this chapter is not of an acceptable level of competence (as described in subparagraph (A)) shall be subject to review only in accordance with and to the extent provided by procedures established by the head of the agency.

"(d)(1) If the employee's performance is rated above fully successful, the employee may be paid a performance award in accordance with the provisions of this subsection. Any such award shall be in addition to any increase in basic pay provided under subsection (c).

"(2) A performance award under this subsection may be made in such amount as the head of the agency considers appropriate, except that any such award may not exceed an amount equal to 20 percent of basic pay.

"(3)(A) For any fiscal year, the head of any agency may exercise authority under this subsection only to the extent of the funds available for the purposes of this subsection.

"(B) Performance awards under this subsection shall be paid from funds or appropriations available to the agency for pay of employees.

"(C) The funds available for the purposes of this subsection with respect to any agency may not exceed an amount equal to one and one-half percent of the aggregate amount of basic pay which will be payable to the employees of the agency who are covered by the performance management and recognition system for the fiscal year involved. Such amount shall be determined by the Office of Personnel Management before the beginning of such fiscal year.

"(e)(1) The comparability increase, for purposes of subsection (c)(1), shall be an amount equal to the basic pay of the employee involved multiplied by the percentage increase applicable to the grade or level of the position of such employee under section 5305 of this title at the beginning of the pay adjustment period.

"(2) For purposes of determining the comparability increase applicable to an employee under paragraph (1), such employee's rate of basic pay as of the day immediately preceding the pay adjustment period involved shall be used.

"(f) The pay adjustment period in any fiscal year shall be the period beginning on the first day of the first applicable pay period commencing on or after the first day of the month in which an adjustment takes effect under section 5305 of this title and ending at the close of the day preceding the following pay adjustment period.

"(g) Any employee whose position is brought under the performance management and recognition system shall, so long as the employee continues to occupy the position, be entitled to receive basic pay at a rate of basic pay not less than the rate the employee was receiving when the position was brought under the performance management and recognition system.

"(h) Under this section, an employee may be paid less than the minimum rate of basic pay of the grade of the employee's position to the extent that it is the result of a performance evaluation of less than fully successful.

"(i) Under regulations prescribed by the Office, the benefit of advancement through the range of basic pay for a grade shall be preserved for any employee covered by the performance management and recognition system whose continuous service is interrupted in the public interest by service with the armed forces, or by service in essential non-Government civilian employment during a period of war or national emergency.

"(j) For the purpose of section 5941 of this title, rates of basic pay of employees covered by the performance management and recognition system shall be considered rates of basic pay fixed by statute.

"§ 5404. Cash award program

"(a) The head of any agency may pay a cash award to, and incur necessary expenses for the honorary recognition of, any employee covered by the performance management and recognition system who—

"(1) by the employee's suggestion, invention, superior accomplishment, or other personal effort, contributes to the efficiency, economy, or other improvement of Government operations or achieves a significant reduction in paperwork; or

"(2) performs a special act or service in the public interest in connection with or related to the employee's Federal employment.

"(b) The President may pay a cash award to, and incur necessary expenses for the honorary recognition of, any employee covered by the performance management and recognition system who—

"(1) by the employee's suggestion, invention, superior accomplishment, or other personal effort, contributes to the efficiency, economy, or other improvement of Government operations or achieves a significant reduction in paperwork; or

"(2) performs an exceptionally meritorious special act or service in the public interest in connection with or related to the employee's Federal employment.

A Presidential cash award may be in addition to an agency cash award under subsection (a) of this section.

"(c) A cash award to any employee under this section is in addition to the basic pay of the employee, or any performance award paid to such employee, under section 5403 of this title. Acceptance of a cash award under this section constitutes an agreement that the use by the Government of any idea, method, or device for which the award is made does not form the basis of any claim of any nature against the Government by the employee accepting the award, or the employee's heirs or assigns.

"(d) A cash award to, and expenses for the honorary recognition of, any employee covered by the performance management and recognition system may be paid from the fund or appropriation available to the activity primarily benefiting, or the various activities benefiting, from the suggestion, invention, superior accomplishment, or other meritorious efforts of the employee. The head of the agency concerned shall determine the amount to be contributed by each activity to any agency cash award under subsection (a) of this section. The President shall determine the amount to be contributed by each activity to a Presidential award under subsection (b) of this section.

"(e) A cash award under subsection (a) may not exceed 20 percent of the basic pay of the employee involved.

"(f) The President or the head of an agency may pay a cash award under this section notwithstanding the death or separation from the service of an employee, if the suggestion, invention, superior accomplishment, or other meritorious effort of the employee for which the award is proposed was made or performed while the employee was covered by the performance management and recognition system.

"§ 5405. Report

"The Office of Personnel Management shall submit an annual report to the President and each House of Congress evaluating the effectiveness of the performance management and recognition system. Each such report shall be prepared after consultation with the respective heads of a sufficient range of agencies so as to permit an adequate basis for making a meaningful evaluation.

"§ 5406. Regulations

"The Office of Personnel Management shall prescribe regulations to carry out the purpose of this chapter.".

(b)(1) Title 5, United States Code, is amended—

(A) in sections 4501(2)(A), 5332(a), 5334(f), and 5336(c), by striking out "the merit pay system established under section 5402" each place it appears and inserting in lieu thereof "the performance management and recognition system established under section 5403";

(B) in section 5361(5), by striking out "merit pay system" and inserting in lieu thereof "performance management and recognition system"; and

(C) in section 5948(g)(1)(C), by striking out "Merit Pay System" and inserting in lieu thereof "performance management and recognition system".

(2) Section 1602 of title 10, United States Code, and section 5(b) of the General Accounting Office Personnel Act of 1980 (31 U.S.C. 52-4(b)) are each amended by striking out "5401(a)" and inserting in lieu thereof "5401".

PERIODIC STEP-INCREASE CONFORMING AMENDMENT

SEC. 3. Section 5335 of title 5, United States Code, is amended by striking out subsection (e) and inserting in lieu thereof the following:

"(e) This section does not apply to the pay of an individual appointed by the President, by and with the advice and consent of the Senate.

"(f) This section applies to individuals covered by the performance management and recognition system under chapter 54 of this title, as provided in section 5403(c)(2) of this title.".

PERFORMANCE APPRAISAL SYSTEM CONFORMING AMENDMENTS

SEC. 4. (a) Chapter 43 of title 5, United States Code, relating to performance appraisals, is amended by inserting after section 4302 the following new section:

"§ 4302a. Establishment of performance appraisal systems for performance management and recognition system employees

"(a) Each agency shall develop a performance appraisal system for employees covered by the performance management and recognition system established under section 5403 of this title which—

"(1) provides for periodic appraisals of job performance;

"(2) requires that the supervising official consult with the employee before establishing performance standards; and

"(3) uses the results of performance appraisals as a basis for setting the base pay

and performance awards for an employee in accordance with section 5403 of this title.

"(b) Under regulations which the Office of Personnel Management shall prescribe, each such performance appraisal system shall provide for—

"(1) 5 levels of performance ratings as follows:

"(A) 2 levels which are below fully successful;

"(B) a fully successful level; and

"(C) 2 levels which are above fully successful;

"(2) establishing performance standards and critical elements which will, to the maximum extent feasible, permit the accurate evaluation of job performance;

"(3) at the beginning of each appraisal period, communicating to each employee covered by the performance management and recognition system the performance standards and critical elements of the employee's position;

"(4) during the appraisal period, evaluating each such employee on the basis of such standards;

"(5) assisting such employees in improving less than fully successful performance;

"(6) reassigning, reducing in grade, or removing such employees who continually perform below fully successful, after providing an opportunity to provide fully successful performance; and

"(7) making base pay increase and performance award decisions as a result of annual performance appraisals made under this section.

"(c) Appraisals of performance under this section—

"(1) shall take into account individual performance,

"(2) may take into account organizational accomplishment, and

"(3) shall take into account such factors as—

"(A) any improvement in efficiency, productivity, and quality of work or service, including any significant reduction in paperwork;

"(B) cost efficiency;

"(C) timeliness of performance; and

"(D) other indications of the effectiveness, productivity, and quality of performance of the employee or other employees for whom the employee is responsible; and

"(4) shall be subject to review only in accordance with and to the extent provided by procedures established by the head of the agency.

"(d) The Office of Personnel Management may not prescribe, or require agencies to prescribe—

"(1) any preestablished distribution of levels of performance ratings among employees covered under chapter 54 of this title; or

"(2) any specific performance standard or element.".

(b) The table of sections for chapter 43 of title 5, United States Code, is amended by inserting after the item relating to section 4302 the following new item:

"4302a. Establishment of performance appraisal systems for performance management and recognition system employees.".

EFFECTIVE DATE; SAVINGS PROVISIONS; CONTINUATION OF AMENDMENTS

SEC. 5. (a) The amendments made by this Act shall take effect on the first day of the first applicable pay period commencing after the first September 30th following the date of the enactment of this Act.

(b)(1) An employee whose position was covered by the merit pay system immediately before the effective date of this Act but is determined not to be covered by the performance management and recognition system as a result of this Act shall be converted on such effective date to the General Schedule in accordance with regulations issued by the Office of Personnel Management pursuant to section 5334(a) of this title.

(2) The rate of basic pay for any employee whose position was covered by the merit pay system immediately before the effective date of this Act and is determined to be under the performance management and recognition system as a result of this Act shall be at least equal to the rate of basic pay payable for the position held by such employee immediately before the effective date of this Act.

(c)(1) The amendments made by this Act shall continue to have effect unless, during the first period of 60 calendar days of continuous session of the Congress beginning after 5 years after the effective date of such amendments, a concurrent resolution is introduced and adopted by the Congress disapproving the continuation of the performance management and recognition system. Such amendments shall cease to have effect on the first day of the first fiscal year beginning after the date of the adoption of such concurrent resolution.

(2) The continuity of a session is broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 60-day period.●

THE CHILD ABUSE PREVENTION AND TREATMENT AND ADOPTION REFORM ACT AMENDMENTS OF 1983

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. ERLENBORN. Mr. Speaker, one of the greatest human tragedies is the neglect, maltreatment, and abuse of children. The public has become more aware of and deeply disturbed by reports of the growing and senseless incidence of child abuse and neglect. In my view, the ultimate child abuse is when the life of a helpless child is taken—often by a parent, relative, family friend, or one in whose care the child has been placed.

The recent "Bloomington baby" or "Baby Doe" tragedy added a shocking new dimension to the problem. We cannot overlook the intolerable fact that, within health care facilities, at-risk newborns with life-threatening congenital impairments may also be the innocent victims of negligent treatment. Lack of appropriate care and services would be unthinkable, if prescribed for nonhandicapped infants.

There is a compelling need to provide immediate and more effective protections for such newborns. We must insure that they are not denied nutrition, medically indicated treatment, and appropriate general care and social services.

The causes of child abuse and neglect are numerous and complex. The solution of this national social problem will not be a simple one. Nonetheless, through stronger preventive measures that are based on a better understanding of underlying causes, we must continue our efforts to reduce significantly the growing incidence and severity of child abuse and neglect cases.

I am pleased, therefore, to join the distinguished chairman of the Select Education Subcommittee, Mr. MURPHY of Pennsylvania, as an original cosponsor of the Child Abuse Prevention and Treatment and Adoption Reform Act Amendments of 1983. I wish to commend my colleague for his longstanding leadership in this area and to compliment him on his efforts to bring before us a measure that should enjoy strong, bipartisan support.

What are the major provisions incorporated in the 1983 amendments?

One, all activities authorized under title I (child abuse prevention and treatment) and title II (adoption opportunities) of the present act are extended from October 1, 1984 through September 30, 1987;

Two, fiscal year 1984 authorizations of appropriations for title I activities, programs relating to the sexual abuse of children, and title II of the act are set at $18,000,000, $3,000,000, and $2,000,000, respectively. This represents a slight increase over current funding levels. In addition, all authorizations are increased by 5 percent for each of the succeeding fiscal years.

Three, the Secretary of Health and Human Services, through the National Center on Child Abuse and Neglect, is required to conduct a current study of the national incidence and severity of the child abuse, including those cases involving the denial of basic care and services to infants at risk with life-threatening handicapping conditions. Based on the findings of this updated study, the Secretary must submit to the Congress, within 2 years of enactment of this legislation, recommendations for additional legislative or regulatory changes;

Four, the Secretary, by way of the National Center on Child Abuse and Neglect, must provide technical assistance and training to assist States in developing and implementing new or improved procedures to be followed by child protective service agencies, health care facilities, health and allied medical professionals, social service providers, and courts of competent jurisdiction to better insure that nutrition, medically indicated treatment, general care, and appropriate services

are provided to newborns with life-threatening impairments;

Five, states, as a condition for future State grant awards, must have implemented, within 1 year after enactment of the amendments of 1983, procedures designed to more fully protect the rights of such infants. These new or improved State procedures or protocols must include a means by which any interested person may report any known or suspected case of the denial of nutrition, medical treatment, or general care to an infant at risk with life-threatening, congenital impairments;

Six, the definition of "sexual abuse and exploitation" is broadened to make it consistent with the recent Supreme Court decision in *New York* v. *Ferber*.

Seven, title II (adoption opportunities) is amended to require that the Secretary of Health and Human Services review all model adoption legislation and procedures for the purpose of assisting the States in facilitating and expanding adoption opportunities for infants at risk with life-threatening congenital impairments; and

Eight, services and protections assured under section 504 of the Rehabilitation Act of 1973 must be continued.

Building on the existing legislative framework, the Child Abuse Prevention and Treatment and Adoption Reform Act Amendments of 1983 are designed to establish a stronger Federal-State-local partnership to insure that the very special needs of infants like the "Bloomington baby" are fully met. I believe that this measure represents an important, positive, and effective step forward in preventing future "Bloomington baby" tragedies.●

CONSULTING REFORM AND DISCLOSURE ACT OF 1983

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Ms. FERRARO. Mr. Speaker, today I am introducing the Consulting Reform and Disclosure Act of 1983. I believe that the 22-year history of agency mismanagement of consulting services contained in 30 critical General Accounting Office reports demonstrates why this legislation is necessary. In 1980, a GAO report cited serious and pervasive problems in consulting contracts in six civilian agencies. The GAO report which I received in 1981 found that several of the Department of Defense's management support services contracts reviewed "have preempted DOD's prerogative in directing national defense and in management and direction of the Armed Services."

Mr. Speaker, this legislation is necessary because the problems with consulting type contracts have not been corrected. The GAO supports this legislation even though it generally opposes legislative solutions to administrative problems.

When I held a hearing on identical legislation last Congress, the administration refused to testify. Instead it contended that adequate safeguards are "already prescribed by statute or by OMB * * *."

However, at the same time the administration was making this contention, they were pressing for legislation to eliminate statutory requirements for advance budget justification and an Inspector General evaluation of agency progress in instituting management controls over consulting service arrangements.

These two concurrent events emphasize the need for permanent law requiring disclosure of consulting contract information. The best way to eliminate waste is to make sure it is not hidden from the public. That is the purpose of my bill.●

THE 100TH ANNIVERSARY OF THE CIVIL SERVICE SYSTEM

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. FORD of Tennessee. Mr. Speaker, after reading the February 1 issue of the Public Administration Times, I am compelled to speak out on the fortitude and excellence of the civil service system on this, its 100th anniversary. Throughout my years in the U.S. Congress, I have found civil servants to be selfless and dedicated individuals. They are a source of pride for all of us who value the merit system under which they work. In addition to praising the high standards that the merit system inspires, I would also like to take exception to those who by making political appointments and innuendo dare to corrupt the legitimacy, and thereby, the effectiveness of the civil service system.

In the beginning stages, only 10 percent of the Federal workers were a part of the civil service system, which was established by the Pendleton Act of 1883. With succeeding Presidents, their members increased, until civil servants were a full 70 percent of the Government work force by the time of the Great Depression.

The numbers of the civil servants continued to grow during the administration of President Franklin D. Roosevelt, as World War II signaled a greater need for Government workers. Because of this high demand for civil servants during this period, there was pressure to exempt wartime emergency jobs from the existing requirements, but these efforts were resisted.

Throughout the 1950's and 1960's, the Federal civilian work force grew from 2,278,800 to 2,692,600 workers, and increased to a 91.3 percent share of the Federal Government work force.

This constant growth of the civil service system is not only reflected in numbers, however. As our country met the challenges of a changing society—the onslaught of two World Wars, a decade-long depression, and the growing influence of the Federal Government on our lives—so, too, did our Federal employees meet the challenges facing them. The transformation of our society in the past 100 years has inspired unparalleled achievements on the part of our civil servants. These public servants, with their responsiveness to our public needs, and their fine contributions to our governmental system, deserve only our sincerest appreciation and greatest admiration.

In recent times, some political candidates have unfairly attacked the civil servant for being unproductive and unessential. It is unfortunate that these workers are the victims of such unjust criticism. Their critics see only the few who abuse the civil service system, rather than the vast majority of civil servants, who are hardworking and honest individuals.

These same politicians, once in office, have used this power to make political appointments without regard to professional qualifications. These partisan choices have no place in a system where workers are chosen selectively through the use of competitive exams. The stability and strength of this system relies greatly on not only the superior qualifications of the workers, but also on their avowed neutrality. Political appointments corrupt both of these standards, and should not be tolerated.

In closing, I would once again like to acknowledge the great value of the civil service system to our society. Its record of attracting and selecting only the finest and most competent of employees for Government service is unparalleled. I commend the civil service system, and wish it another 100 years of success.●

COATED FABRIC TARIFF

HON. JAMES M. SHANNON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. SHANNON. Mr. Speaker, I am pleased to introduce, on behalf of myself, Mr. MARTIN of North Carolina, Mr. CAMPBELL, and Mr. JENKINS, legislation to restore the traditional tariff treatment of coated fabric. By doing this, we intend to preserve an Ameri-

can industry which contributes well over $1 billion a year to our national product and provides tens of thousands of American jobs.

This legislation is similar to H.R. 7118, which I introduced in the last Congress on September 15, 1982. A number of technical changes have been made, but the intent and impact of this legislation remains the same.

Since the adoption of the "Tariff Schedules of the United States" in 1963, imitation leather and other plastic and rubber-coated, filled and laminated fabrics were classified as textile products for tariff purposes under schedule 3, series 355 of the "Tariff Schedules." Schedule 3 is entitled "Textile Fibers and Textile Products," and series 355 refers specifically to textile materials whether coated or filled.

The recent decision of the Court of Customs and Patent Appeals in *United States* v. *Elbe Products Corp.* (655 F. 2d 1107 (1981)), decided over the objection of the Treasury Department, has eroded the long standing classification of these products. In Elbe Products, the court held that imitation leather products consisting of plastic coating over fabric were properly classified not under schedule 3, series 355, but under schedule 7 ("Specified Products; Miscellaneous and Nonenumerated Products") series 771 (materials "almost wholly of" rubber or plastic).

The Treasury Department has consistently argued against this result, and the Customs Service has consistently classified imitation leather and other coated fabrics under schedule 3. However, as a result of Elbe Products, the Department on March 25, 1982, issued a ruling paper establishing for customs purposes the new rule under which virtually all imitation leather must be reclassified under series 771. Other coated, laminated, or filled textile materials must also be reclassified.

If this reclassification is allowed to stand, the continued existence of our domestic industry, which has long relied on the established tarriff treatment of its products, will be in severe jeopardy.

The fabrics in schedule 3 receive a duty rate as high as 13 percent plus 10 cents a pound. Fabrics reclassified to schedule 7 receive between 3.7 percent and 5.3 percent. In addition, when fabrics are reclassified to schedule 7, imports from developing countries such as Taiwan, Korea, Mexico, Venezuela, and Brazil, become eligible under the generalized system of preferences for duty-free entry to this country. Unless action is taken now to reverse this reclassification, the results for the American industry will be tragic.

Mr. Speaker, our bill is narrowly drawn to achieve no more than a reinstatement of the tariff treatment which these fabrics have traditionally received and on which American manufacturers have relied for decades. I call for its favorable consideration.

H.R. 1910

A bill to correct any misinterpretation in the classification of textile fabrics, articles and materials, coated, filled, or laminated with rubber or plastics

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Headnote 5 of Schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended to read as follows:

"5 (a) Except as otherwise provided in subsection (b) of this headnote, for the purposes of parts 5, 6, and 7 of this schedule and parts 1 (except subpart A), 4, and 12 of schedule 7, in determining the classification of any article which is wholly or in part of a fabric coated or filled, or laminated, with nontransparent rubber or plastics (which fabric is provided for in part 4C of this schedule), the fabric shall be regarded not as a textile material but as being wholly of rubber or plastics to the extent that (as used in the article) the nontransparent rubber or plastics forms either the outer surface of such article or the only exposed surface of such fabric."

(b) Any fabric described in Part 4C of this schedule shall be classified under Part 4C whether or not also described elsewhere in the schedules.

SEC. 2. Subpart C of Part 4 of Schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by:

(a) deleting item (vii) in its entirety from Headnote 1 thereto.

(b) inserting the words "or value" after the word "quantities" in Headnote 2(c) thereto.

SEC. 3. Part 12 of Schedule 7 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by inserting immediately after Headnote 1 of Part 12 headnote the following new headnote:

"2. This part does not cover fabrics, coated or filled, or laminated, with rubber or plastics provided for in part 4C of Schedule 3."

SEC. 4. The amendments made by this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption on or after the date or enactment of this Act.●

FEDERAL MEAT INSPECTION AMENDMENTS OF 1983

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. GUNDERSON. Mr. Speaker, I was pleased to join the gentleman from Vermont (Mr. JEFFORDS) and others yesterday in introducing H.R. 1795, the Federal Meat Inspection Amendments of 1983.

At the time the Wholesome Meat Act was passed in 1967, there were approximately 15,000 nonfederally inspected intrastate plants producing about 15 percent of the Nation's carcass meat and about 35 percent of the processed meat supply. And there was no consistency or uniformity among the States in meat inspection at these plants.

Accordingly the 1967 act created a requirement that State inspection standards be "at least equal to" to those of the Federal program. If a State fails to create or effectively enforce such standards, the Secretary of Agriculture will designate that State for Federal inspection.

Mr. Speaker, almost half of the States today have their own inspection programs that are at least equal to existing Federal standards. Yet, unlike federally inspected meat products, those meat products inspected under State programs cannot travel in interstate commerce.

This limitation works a particular hardship on thousands of small, family-owned meat processing plants located near State borders who simply cannot afford the expensive Federal inspection. These small businesses represent 42 percent of all the meat processors in our country but only market 5 percent of our Nation's processed meat.

Mr. Speaker, we are living in a different time and under different conditions than 15 years ago. There no longer is any dissimilarity between State inspection standards and the Federal requirements. If anything, State standards are more strict.

As such, the time has come to remove this artificial distinction between federally inspected meat products and State inspected meat products so that either one can travel in interstate commerce. And that is exactly what H.R. 1795 would do.

I, therefore, commend the attention of my colleagues to this important legislation. Its passage is, most assuredly, long overdue.●

CONGRESSIONAL LEADERSHIP AND AMERICA'S GOALS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. HUBBARD. Mr. Speaker, I have received an excellent letter from my constituent, William L. Harp, Jr., of Mayfield, Ky., Bill Harp's letter to me contains some perceptive views on various issues and his belief that Congress must assume its leadership role in such areas as income tax restructuring, industry capital investment incentives, and synthetic fuels, among others. I want to share his ideas with my colleagues, and the letter follows:

WILLIAM L. HARP, Jr.,
Mayfield, Ky., January 4, 1983.

CARROLL HUBBARD,
Representative,
Kentucky, First District.

DEAR CARROLL: I am concerned about our nation and the lack of leadership or national goals from Congress. I would like to use you to make my feelings known to your

fellow Congressmen. Please pass along these ideas to the proper committees for their consideration:

1. Congress should consider legislation to encourage private industry through better capital investment incentives so industry can update facilities and systems and become more competitive with worldwide markets.

2. Nationalize railroad right-of-ways. Modernize them and create terminals which would allow the rail system to complement the airlines, trucking, and highway systems. (We subsidize airlines, river traffic, trucking.) The rail system could create thousands of jobs on a permanent basis.

3. Push for the testing and proving methods to manufacture synthetic fuels from coal. Sooner or later, oil will be a thing of the past and we might as well be prepared.

4. Study and put into practice a flat rate tax for individual incomes and limit federal spending to the amount of income estimated from federal revenues.

Carroll, I believe that our nation is waiting for Congress, not the President, to come up with the leadership and goals required to get our economy expanding once more in a controlled manner.

Thank you for your efforts on our behalf as Congressman. I would be interested in hearing if any of these ideas are being or have been considered by Congress. I will watch for a signal from Congress showing that it has assumed its responsibilities and is willing to make proposals that might not necessarily please some of the lobbyists.

Yours truly,

BILL HARP.●

TRIBUTE TO QUINCY JONES

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. DIXON. Mr. Speaker, on March 11-13, 1983, the city of Seattle, Wash., will pay tribute to one of the country's most outstanding black musicians and composers, Mr. Quincy Jones, winner of 11 Grammy Awards. The Congressional Black Caucus is privileged to honor this internationally renowned musician who has set such a fine example of strong commitment to life and an uncompromising quest for excellence in all of his musical endeavors. An example of his selfless commitment will be exhibited this weekend as he will perform two concerts, the proceeds of which will be divided evenly between his alma maters, Garfield High School and Seattle Central Community College.

Well known for his numerous musical scores for famous motion pictures, animated films, and television, I would like to take this occasion to share with my colleagues just a few of his distinguished accomplishments.

Born in 1933 in Chicago and raised in Seattle, Quincy Jones by the age of 14 was playing trumpet for Billie Holiday, as well as composing and arranging with his good friend, Ray Charles. Instead of going on the road with Lionel Hampton at age 15, he was counseled to continue his education and won a scholarship to Berklee College of Music in Boston. Taking a phenomenal 10 courses a day and playing strip joints at nights, he made time for weekend sessions in New York, playing with the jazz greats of the era including Art Tatum, Miles Davis, and Theloniaus Monk. The hub of the jazz scene and the greats of the era became Quincy's classroom and teachers.

In 1951, Quincy Jones produced the first Ray Charles album, as well as the first sessions on the incomparable Cannonball Adderley album; 4 years later, he accepted an invitation from the State Department to arrange and conduct a world tour for the Dizzy Gillespie Orchestra. That tour took him through the Mideast, South Africa, South America, and Europe. While in Europe, Quincy signed with Mercury Records and later became the musical director at Barclay Desques in Paris. In 1961, Quincy was named vice president for artist relations with Mercury Records.

During the closing years of his tenure as the first black vice president at a major label, Quincy began his move into another territory formerly closed to blacks—the world of film scores. He scored his first film, Sidney Lumet's "The Pawnbroker," in 1963 and went on to score a total of 33 major motion pictures.

Quincy went to A&M Records in 1969 with a career total of 15 Grammy nominations and 1 Grammy to his credit. Since then his work has brought in over 50 nominations and 11 awards.

Establishing himself as an internationally known composer, conductor, arranger, and musical artist, Quincy has worked with musicians who include Diana Ross, Frank Sinatra, Duke Ellington, Andy Williams, and Henry Mancini. His Oscar nominations include the score for "In Cold Blood," the music adaptation of "The Wiz," and best songs for "The Eyes of Love" and "For Love of Ivy." He received his first Grammy award in 1963 for the instrumental arrangement of "I Can't Stop Loving You" and has accumulated 10 more over the past 20 years, 5 of which he won in 1982. In July 1982, Quincy was the recipient of the City of Hope's Spirit of Life Award, an award presented annually by the music industry.

The Congressional Black Caucus proudly acknowledges Quincy Jones' 35 years of musical achievement and joins the city of Seattle in commemorating his 50th birthday. Seattle has planned a weekend of music and civic activities sponsored by citizens who wanted to honor one of their distinguished natives while also providing an opportunity to aid two of the city's inner city schools, Garfield High and Seattle Central Community College.

On Saturday, March 12, following a Friday luncheon at which he is honored by State and local civic leaders as well as national entertainers, Mr. Jones will perform a benefit concert at the Paramount Theater. Donating his talents for the evening, Quincy will conduct an orchestra composed of his own musicians as well as some of the best professional musicians in Seattle. On Sunday, March 13, he will conduct a benefit concert primarily for the youth of Seattle.

Proceeds from the two concerts will be divided between Garfield High, which will use the funds to establish a Quincy Jones endowment scholarship fund and to enhance its music program and facilities, and Seattle Central Community College, which will use the funds for student scholarships and emergency student loan programs in Jones' name. The college will also use some of the proceeds to expand its day-care center and tutorial services program.

The members of the Congressional Black Caucus are especially pleased to pay tribute to Quincy Jones in recognition of his 50th birthday and appreciate this opportunity to share with our colleagues some of the outstanding contributions he has made to the music industry and the world.●

INTRODUCTION OF MUSHROOM LABELING BILLS

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. SCHULZE. Mr. Speaker, the U.S. consumer has a right to know what he or she is buying. We all know that it is the informed consumer that makes the best choice. And yet when American consumers purchase a can of mushrooms from their local grocery store, they literally have no idea where on Earth those mushrooms originated.

Chances are good that they were not grown in the United States though. In the last several years, fewer and fewer of the processed mushrooms bought in this country actually originated here. So where do they come from, and what difference does it make anyway?

More and more of the canned mushrooms consumed in this country are grown in the People's Republic of China. In 1979, the PRC exported 263 thousand pounds of canned mushrooms to the United States; in 1982, over 35 million pounds reached our market, well over 100 times the amount of 4 years earlier. This expansion is even more remarkable when one realizes this occurred while an increased duty was in effect on all mushroom imports. The protective tariff resulted from a 1979 International

Trade Commission determination that imports had been a "substantial cause of serious injury" to the domestic mushroom industry.

The result of this brutal incursion into the U.S. market has been to drive American mushroom producers and processors out of business at an unprecedented rate. The PRC is engaging in classic predatory trading behavior with two goals in mind.

The first is to gain hard currency for its own economic expansion at the expense of our own domestic industry. There is no secret about this. Right now the American mushroom industry is engaged in an antidumping action filed with the Department of Commerce, through which it expects to demonstrate that the PRC has repeatedly set its prices below what mushrooms would sell for in China.

Second, the PRC aims to drive out not only American producers, but other foreign competitors as well. Communist China is using all the resources which its state controlled economy commands in order to do so. The clear targets of this policy are the traditional suppliers of mushroom imports, South Korea and Taiwan. In fact, it was American know-how and assistance which helped establish this industry for two of America's most important Asian allies.

What does this mean for American consumers? When mushrooms are grown and processed in this country, they are subject to rigorous health and quality standards. Such is not the case in the PRC. When U.S. Customs agents have randomly examined mushrooms entering this country from the PRC, they have found a variety of foreign matter, which has naturally made the product ineligible for entry into the United States. But not every can which arrives here is inspected, and one must wonder what the American consumer may be consuming. The Chinese are most reluctant to reveal their growing and processing techniques. The Pennsylvania State University possesses one of the most advanced programs on the study of mushroom production, and such critical health factors such as the composition of the mushroom-growing compost used in China are unknown to their specialists. In short, what arrives at our dinner table almost certainly is not up to the stringent standards we demand from our own farmers and processors.

Accordingly, I am today introducing several bills which will provide the consumer with the critical information about the origin of the mushrooms they purchase. H.R. 1908 would amend the Tariff Act of 1930 to require that containers of imported processed mushrooms disclose on their labels, in English, the country in which those mushrooms were grown. Current law requires only that the label identify the country that last processed the mushrooms. The consumer has no way of knowing whether the mushrooms were grown in a country other than that in which they were processed.

H.R. 1909 amends the Federal Food, Drug, and Cosmetic Act to require that containers of mushrooms processed but not grown in the United States disclose on their labels the country in which they were grown. This measure would address the problem of imported mushrooms which are reprocessed after entry into the United States market.

Mr. Speaker, these bills will provide a necessary informational service to the American consumers. I am confident that when they are permitted to be fully aware of the origin of the products they are offered, they will make the wise choice and purchase only quality American-grown mushrooms. I solicit my colleagues' support.●

J. DUDLEY DIGGES

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. HOYER. Mr. Speaker, I know my colleagues would want to join me in sending heartfelt condolences to the family of J. Dudley Digges, who died on Friday, February 25. There was probably no person more respected in the State than Judge Digges, as evidenced by the call of the Maryland Governor to have all flags flown at half mast upon his death—nor was there one more dedicated to the cause of justice, fairness, and equality under the rule of law.

Judge Digges, a life-long resident of Charles County, Md., had a long and distinguished career in the law. After attending St. Johns College in Annapolis and the University of Maryland School of Law, where he graduated in 1936, he joined former Congressman Lansdale Sasscer in the practice of law. In 1949, at the age of 37, he was appointed to the Circuit Court of the Seventh Judicial Circuit where he served until 1969, when then-Governor Marvin Mandel appointed him to the Court of Appeals of Maryland. He only recently retired from this position, in January 1982. Upon that occasion, I had the privilege of honoring him in this body for his outstanding contributions to the State of Maryland.

Judge Digges held the highest ethical principles, and he felt that legal ethics were the underpinning of the judicial system in this country. Many of his opinions were critical of his greatest concern—careless or dishonest lawyers. He extended this concern for the development of a sound, honest, and knowledgeable jurisprudence by sponsoring faculty fellowships at the University of Maryland School of Law for professors of legal ethics.

Judge Digges always presided with distinction, lending his quiet, self-effacing manner to all he did, and in so doing, he gained the respect and admiration of all who came to know him.

Mr. Speaker, Judge Digges was a fine man, and his contributions, not only to the court system of Maryland, but also to the people who found equity and justice in his courtroom, will long be remembered. J. Dudley Digges has left a legacy of public service and public spirit, and the memory of his tremendous dedication to the betterment of our country will always be with us.●

CIGARETTE SAFETY ACT

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. MOAKLEY. Mr. Speaker, the story of the careless use of smoking materials leading to the destruction of life and property happens all too often. The time has come for the Congress to address the No. 1 national cause of residential fire fatalities and injuries—cigarette-related fires.

Today I am reintroducing for the 98th Congress the Cigarette Safety Act of 1983 which seeks to insure that cigarettes have a minimum capacity for igniting smoldering upholstered furniture and mattress fires.

The need for such legislation is obvious. According to the U.S. Fire Administration, in 1981 there were 63,518 smoking-related fires across the country and a resulting 2,144 deaths, 3,819 injuries, and $305 million in property loss. Most of these fires could have been prevented.

The Cigarette Safety Act mandates the Consumer Product Safety Commission to develop a performance standard that will help reduce the potential of cigarette-related fires from occurring based on objective research and studies.

A recently released study prepared by the U.S. Testing Co. and commissioned by the Burn Council found a significant difference between cigarettes currently available on the market. Tested were Sherman's, a New York brand of "natural" cigarettes which have no chemical additives—Sherman's are advertised as not having chemicals, such as salt peter, which are added to make the cigarette burn—More, and Benson & Hedges Menthol 100's.

Under testing procedures developed by the California Bureau of Home Furnishings, Sherman's and More

were found to either self-extinguish or burn their entire length without igniting the mockup upholstered furniture. The Benson & Hedges, however, was inconsistent in its propensity to ignite the upholstered furniture—one specimen ignited the chair assembly into open flame destroying the mockup assembly entirely, 46 minutes into test; three specimens generated an extreme amount of smoke, damage to the mockup assembly was excessive with glowing but no-flame ignition. The last two Benson & Hedges specimens burned their entire length but generated no ignition.

While this study is not conclusive, it does give support to the proposition that there is presently a considerable difference among the present commercially available cigarette brands.

Unfortunately, the cigarette manufacturing companies have not addressed this problem and until they do so, I believe the serious nature of this problem demands immediate congressional action.

In fact, when asked about the results of this testing, David Fishel, a spokesman for R. J. Reynolds, the maker of More noted that the low propensity to ignite furniture and mattress materials was by coincidence and not an intentional act of the manufacturer. According to the New York Times:

When R. J. Reynolds discovered in 1977 that More cigarettes tended to go out between puffs, the company adjusted the chemical composition of the cigarettes' paper to keep it burning.

Still, despite these efforts, More retains a good fire-testing record.

Past research has shown that a freshly lit cigarette will burn for approximately 20 to 45 minutes when placed on a flat surface. This is a reasonable period of time in which burning cigarette must remain in contact with upholstered furniture and mattresses before a fire will result.

Recent work by the National Bureau of Standards' Center for Fire Research indicates that there are cigarette construction characteristics that may reduce ignition propensity. Included in these parameters are: Low diameter—less contact with the substrate; low-packing density—low-fuel load; filter—no increase in airflow at the butt end and, consequently, no increase in heat flux; and high burning rates—short contact on heat source and substrate.

I would like to stress that this is not an antismoking bill. I believe the decision to smoke or not to smoke should be left to the individual. A performance standard should not interfere with an individual's smoking habits but rather address a proven fire hazard. In fact, the cigarette characteristics listed by the National Bureau of Standards as having the potential to reduce ignition propensity are already found in some cigarettes on the market.

We have received widespread support for this legislation from across the country. Groups whose members work daily with fire victims such as the International Association of Firefighters, International Association of Fire Chiefs, American Medical Association, Emergency Department Nurses Association, American Burn Association, and the American Trauma Society support this legislation. We also have the strong support of the Phoenix Society—a support group whose members include those that have been scarred, both physically and mentally, by the terrible effects of cigarette fires.

I believe that this legislation can go a long way in reducing the damage to life and property due to smoking-related fires. For us to simply accept the terrible toll that cigarette fires have on innocent victims is to ignore our responsibilities of protecting the public health and safety. I urge my colleagues to join with me in supporting this much-needed legislation.

A text of the bill follows:

H.R. 1880

A bill to require persons who manufacture cigarettes or little cigars for sale or distribution in commerce to meet performance standards prescribed by the Consumer Product Safety Commission, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Cigarette Safety Act".

DEFINITIONS

SEC. 2. For purposes of this Act, the terms—

(1) "cigarette", "commerce", "United States", and "little cigar" have the meanings prescribed in paragraphs (1), (2), (3), and (7), respectively, of section 3 of the Federal Cigarette Labeling and Advertising Act;

(2) "sale or distribution" includes distribution of samples or any other distribution not for sale;

(3) "Commission" means the Consumer Product Safety Commission; and

(4) "cigarette safety standard" means any performance standard or cigarette safety rule promulgated by the Commission.

FINDINGS

SEC. 3. (a) The Congress finds that—

(1) the United States Fire Administration has determined that the careless use of smoking materials is the leading cause of fire-related death and injury in residences in the United States;

(2) fires caused by cigarettes and the careless use of smoking materials in the United States annually—

(A) kill approximately two thousand three hundred people,

(B) injure approximately five thousand eight hundred people, and

(C) result in property damage amounting to approximately $210,000,000;

(3) laboratory experiments have shown that a cigarette will burn continuously for approximately twenty to forty-five minutes when placed on a flat surface and that this is a reasonable period of time in which a burning cigarette must remain in contact with upholstered furniture and mattresses before a fire will result;

(4) as presently marked, cigarettes and little cigars are a dangerous ignition source which present an unreasonable risk of injury; and

(5) it is feasible and practicable to produce cigarettes and little cigars which do not present an unreasonable risk of injury.

(b) The Congress declares it to be the policy of the United States—

(1) to reduce the loss of life and property in the United States by requiring that cigarettes and little cigars manufactured for sale or distribution in commerce be processed to ensure that such cigarettes or little cigars—

(A) if ignited, will stop burning within a time period designate by the Commission, if such cigarettes or little cigars are not smoked during such period, or

(B) meet some other performance standard promulgated by the Commission to insure that such cigarettes or little cigars do not ignite smoldering upholstered furniture and mattress fires; and

(2) that such processing be accomplished without the addition of any toxic elements to a cigarette or little cigar.

RULEMAKING

SEC. 4. (a)(1) The Commission shall promulgate, within twenty-four months after the date of enactment of this Act, final consumer product safety standards for cigarettes and little cigars which set performance standards ensuring that such cigarettes and little cigars have a minimum capacity for igniting smoldering upholstered furniture and mattress fires.

(2) Performance standards for cigarettes and little cigars shall be developed by the Commission based on objective studies, including studies conducted by the Bureau of Standards of the Department of Commerce.

(b) The Commission shall commence the proceedings for the development of the cigarette safety standards under this Act by the publication in the Federal Register of an advance notice of proposed rulemaking which shall—

(1) state that Congress has declared that a safety standard for cigarettes and little cigars is necessary and that such standard shall be promulgated by the Commission; and

(2) invite interested persons to present their views concerning such standards, orally or in writing, during a period of not less than thirty days immediately following publication of such notice.

(c) Within twelve months after publication of the notice required by subsection (b), the Commission shall publish in the Federal Register general notice of proposed rulemaking under section 553(b) of title 5, United States Code. Such general notice of proposed rulemaking shall include the terms and substance of the proposed cigarette safety standard.

(d) Within twenty-four months after the date of enactment the Commission shall promulgate the standard after interested persons have been given an opportunity to participate in the rulemaking through submission of written data, views, or arguments with an opportunity for oral presentation. A transcript shall be kept of any oral presentation.

(e)(1) In the event the Commission, at any stage of the proceeding before a final standard is published, finds that a standard for cigarettes and little cigars would be techno-

logically impracticable or economically unreasonable, it shall take steps to terminate the proceeding.

(2) Termination of the standard development proceeding shall be accomplished by publication in the Federal Register of a notice announcing the Commission's intention to terminate the proceeding based on a finding, which must be fully supported by detailed reasons, that a standard for cigarettes and little cigars is technologically impracticable or economically unreasonable. Public comment shall be invited on the notice of intent to terminate the proceeding for a period of not less than sixty days. The Commission shall evaluate the comments received and either publish a final notice in the Federal Register terminating the proceeding, or proceed with the next step in the development of the standard.

(3) The Commission shall prepare a report on the final termination of the standard development proceeding and transmit it to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives. Such report shall include the Commission's findings, submitted comments, and rationale supporting the Commission's final determination.

(f)(1) The final rule promulgating the cigarette safety standard shall specify the date such standard is to take effect, not to exceed forty-eight months after the date of enactment of this Act. If the Commission finds that by eighteen months after the date of enactment of this Act that it is unable to issue the rule within twenty-four months of the date of enactment, it shall prepare and transmit a report to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives, outlining the reasons for the extension and designating the additional time period required, not to exceed one year, to issue a rule, and the Commission shall issue a notice of extension in the Federal Register.

(2) For purposes of this Act, the rulemaking provisions of sections 7 and 9 of the Consumer Product Safety Act, and rulemaking sections of any other acts administered by the Commission, shall not apply. Notwithstanding any other provision of law, the Commission shall not be required to make findings pursuant to these sections.

(3) The Commission may by rule prohibit a manufacturer of cigarettes or little cigars from stockpiling such products to which the standard promulgated pursuant to this section applies. For purposes of this paragraph, the term "stockpiling" means manufacturing or importing a product between the date of promulgation of such consumer product safety standard and its effective date at a rate greater than the rate at which such products were produced or imported during the one-year period immediately preceding the date of enactment of this Act.

JUDICIAL REVIEW

SEC. 5. (a) Any person who is adversely affected or aggrieved by the standard promulgated pursuant to this Act may, at any time prior to the sixtieth day after the Commission promulgates the final rule, file a petition with the United States court of appeals for the circuit in which such person resides or has his principal place of business for a judicial review of this rule. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Commission. The Commission shall file in the court the record of the proceedings on which the Commission based its final rule as provided in section 2112 of title 28, United States Code.

(b) If the petitioner applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court that such additional evidence is material and that there was no opportunity to adduce such evidence in the proceeding before the Commission, the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Commission in a hearing or in such other manner, and upon such terms and conditions, as the court deems proper. The Commission may modify its findings as to the facts, or make new findings, by reason of the additional evidence so taken, and it shall file such modified or new findings, and its recommendations, if any, for the modification of the final rule.

(c) Upon the filing of the petition under this section, the court shall have jurisdiction to review the final rule of the Commission, as modified, in accordance with chapter 7 of title 5, United States Code. If the court ordered additional evidence to be taken under subsection (b) of this section, the court shall also review the Commission's final rule to determine if, on the basis of the entire record before the court pursuant to subsections (a) and (b) of this section, it is supported by substantial evidence. If the court finds the final rule is not so supported, the court may require its modification or reversal.

(d) The judgment of the court affirming, setting aside or modifying, in whole or in part, the Commission's final rule shall be final, subject to review by the Supreme Court of the United States upon certiorari or certification, as provided in section 1254 of title 28, United States Code.

(e) Section 11 of the Consumer Product Safety Act and the judicial review section of any other Act administered by the Commission do not apply to judicial review of the Commission's final cigarette safety standard.

REMEDIES

SEC. 6. The cigarette safety standards, as promulgated in a final rule, shall be deemed to be a consumer product safety standard as defined under section 3 of the Consumer Product Safety Act, and shall be subject to all remedial and penalty provisions of the Consumer Product Safety Act.

CONFORMING AMENDMENTS

SEC. 7. Section 3(a)(1)(B) of the Consumer Product Safety Act is amended by adding after the word "products" the following: "except that cigarettes and little cigars are deemed to be consumer products for the purposes of regulating them as an ignition source".

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. For each of the first three fiscal years beginning after the date of enactment of this Act, there are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.●

TO HONOR RUTH BLOOM

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. ACKERMAN. Mr. Speaker, I would like to take this opportunity to offer my congratulations to the Honorable Ruth Bloom who will be receiving the "Woman of Valor Award" from Yeshiva Dov Revel, Forest Hill, N.Y. This award is the highest recognition that the Yeshiva can bestow on a woman.

Ruth Bloom has been one the most distinguished members of my community for many years as demonstrated by her exemplary dedication to the civic, education, and religious institutions. She has served as State committeewoman and district leader in the 28th Assembly District of New York. In addition, Mrs. Bloom has served faithfully on Community School Board 28 and the Youth Committee of Community Board 6 which permits her to take an active and important role in the training of our many young people. Mrs. Bloom has also been faithful to her religious beliefs which have enabled her to share her strong values with other members of her community. Ruth has distinguished herself as a delegate to the Queens Jewish Community Council, past president of the Yeshiva University Women of Queens County, member of the National Board of Emunah Women, and vice chairperson of the Raoul Wallenberg Committee in Queens.

Her work and actions prove that the Yeshiva Dov Revel have selected no finer or more worthy a person as "Woman of Valor."●

REPEAL THE NATURAL GAS POLICY ACT

HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. RALPH M. HALL. Mr. Speaker, today I am proud to endorse legislation which seeks to ease the burden of rising prices being placed on the residential and industrial consumers of natural gas. Also noteworthy is the fact that H.R. 1760, helps to assure that an adequate supply will be available to consumers by providing incentives to producers to explore for new reserves.

The legislation which Secretary Donald Hodel has drawn up is an innovative approach which deserves praise. Many in this body will choose to do nothing and some may even advocate more rigid price controls. To those people I direct your attention to the falling price of oil. I suspect that those who would strike out against this proposal were also the same people who spoke out against the decontrol of oil. Now as the saying goes, "seeing is believing."

Those who support the "do nothing" approach are endorsing the yearly price increases which consumers have

experienced under the Natural Gas Policy Act. The American Gas Association's data shows that since the NGPA has been in force, residential consumers have faced an average increase in the cost of gas of 21 percent every year. Industrial users have faced a 19 percent increase. In my home State of Texas, this trend has been even worse. According to the Texas Railroad Commission's annual report, Texas residential consumers paid 23 percent more for gas in 1981 and it is expected when the numbers are completed that that figure will rise to 25 percent for 1982. So I ask my friends who say the NGPA is working whether they support increasing their constituents gas prices at the current NGPA track record rates.

In closing, I do not endorse the record of the NGPA. To do so would burden the people of Texas with continued unreasonable price increases. The Secretary of Energy has presented to the Congress a workable framework which is truly innovative and should be saluted for his leadership. I look forward to the challenge of fine tuning the bill so that equity can be reached in the natural gas market from the wellhead to the burner tip.●

CHILD ABUSE PREVENTION

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. HERTEL of Michigan. Mr. Speaker, it is estimated that as many as 10,000 children are severely beaten each year, 50,000 to 70,000 are sexually abused, 100,000 are emotionally neglected and another 100,000 are physically, morally, and educationally neglected.

Child abuse and neglect are problems that often go unreported because they usually occur within the confines of one's own home, and can be concealed with clothing or passed off as accidents. The problem is further complicated because courts and legislatures are reluctant to get involved in internal family matters.

The key to child abuse prevention is public awareness; that is why it is important that Congress passes House Joint Resolution 22, "National Child Abuse Prevention Month." An awareness month is an excellent way to inform and educate people across the Nation on the problems of child abuse and neglect. A well-informed public would be instrumental in identifying, treating, and preventing child abuse and neglect.●

THE PASSING OF AN AMERICAN HERO

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. BEREUTER. Mr. Speaker, it is with sadness that I note the passing of another of the Nation's heroes. Richard O. Joyce, a life-long resident and business leader of Nebraska, was also a participant in the B-25 raid on Tokyo led by Col. Jimmy Doolittle in 1942.

As a 22-year-old lieutenant, Joyce was the pilot of 1 of 16 B-25's which took off from an aircraft carrier in the Pacific and brought the war home to the Japanese. Although of little military significance, the raid proved to be a great morale boost for the Nation and its allies, and marked the beginning of our long and costly effort to vanquish the aggressor and restore world peace.

The courage and sense of duty displayed by Joyce and the others who participated in the historic raid should serve as an example of the fighting spirit of the American soldier, sailor, airman, and marine who is dedicated to maintaining freedom throughout the world.

I ask that the obituary of Richard O. Joyce be reprinted in the RECORD for the benefit of my colleagues:

[From the Lincoln (Nebr.) Star, Feb. 14, 1983]

RICHARD JOYCE, AIRPORT AUTHORITY CHAIRMAN, DIES

Richard O. Joyce, president of Henkle and Joyce Hardware Co. and chairman of the Lincoln Airport Authority, died Sunday. He was 62.

Services for Joyce, 1620 Skyline Drive, will be Tuesday at 11 a.m. at Holy Trinity Episcopal Church.

A Lincoln native and graduate of Lincoln High School, Joyce graduated from the University of Nebraska in 1940 with a degree in business administration.

He served in the U.S. Army Air Corp from 1940 to 1945, as a member of then-Col. Jimmy Doolittle's Raiders, participating in the famous Doolittle-led bombing of Tokyo on April 13, 1942.

In an 1980 interview, Joyce described the raid.

Joyce, then a 22-year-old lieutenant, was the pilot of one of 16 Mitchell bombers, specially modified with larger fuel tanks. The plan was for a carrier to sail within 400 miles of Japan and for the Army planes to land at Chinese bases after the raid.

It didn't work. The carrier was spotted by the Japanese 650 miles off the coast. Adm. William Halsey could have scrubbed the plan but allowed Doolittle's Raiders to go ahead, with a critical 250 miles added to their flight plan. They would ditch in the sea after hitting the Japanese capitol.

Joyce's plane was the 10th; it was his first takeoff from a carrier. He flew at 50 feet above the waves, staying under enemy radar.

After dropping his bombs, Joyce lost himself in the clouds to avoid pursuing fighters and headed for the Chinese coast. Bad weather and a heavy tail wind carried the plane far inland. Fourteen hours after takeoff the fuel was gone and the crew bailed out.

Joyce landed on a Chinese mountainside and eventually made his way to an anti-Japanese guerrilla base and three weeks later to Chungking.

The war didn't end there for Joyce. He flew in the China-Burma-India Theater, flying 27 bomber and 11 fighter missions and winning the Distinguished Flying Cross and Chinese Army-Navy Medal. He spent the rest of the war in the United States, training crews for B25s and B26s.

Joyce returned to Lincoln after the war and went into the family's wholesale hardware business. But he kept flying and kept up his interest in aviation. In 1964 he was appointed to the Lincoln Airport Authority.

Besides his work with the Airport Authority, Joyce was a director of the First National Bank of Lincoln and Century Western Corp. of Houston, and was treasurer of both the Lancaster County Red Cross and Lincoln General Hospital Foundation.

He is survived by his wife, Drucilla, three sons, a daughter, step-son and step-daughter.●

REPEATING PAST MISTAKES

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. SWIFT. Mr. Speaker, yesterday we passed H.R. 1699, the Emergency Math and Science Education Act, also known as the Sputnik II bill. I voted for it. It was necessary.

However, there was an element of deja vu in the debate, and I kept thinking of the admonition that those who ignore history are bound to repeat it.

In the years prior to Sputnik, America had permitted its funding of education to slip. The Soviet satellite startled us into realizing that we were not prepared to compete as well as we should be and we responded with an emergency funding of science and math.

Some time later we realized that we were also neglecting the humanities and we brought them along as well.

And then, with the immediate threat gone and our attentions diverted to other problems, we again let our funding of education at the local, State, and Federal level wane.

Yesterday we responded again—even using the term "Sputnik II." I was in high school in the early 1950's. But yesterday it was almost as if I had been in Congress then—voting on the Sputnik I funding of science and math education improvements.

One would hope that we will soon recognize the need for better funding of the humanities as we did before. And we could hope that, this time, we would not let our commitment to sound overall education fade away as other problems push to the forefront.

But with proposals for tuition tax credits, voucher systems, and the like, I am not optimistic. We do ignore the lessons of history and we do repeat our mistakes.●

REAUTHORIZATION OF GENERAL REVENUE SHARING

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. WEISS. Mr. Speaker, Congressman FRANK HORTON and I and a number of our colleagues have introduced a bill today to reauthorize the general revenue sharing program for an additional 5 years. The current revenue sharing authorization will expire on September 30 of this year.

Our bill would make the following changes in the existing program. It would restore the State share on an entitlement basis, and it would increase the total annual allocation by 16 percent, to $7.95 billion, to adjust for the loss in purchasing power of these funds due to inflation since the program's last reauthorization in 1980.

I also hope to introduce a bill to provide countercyclical fiscal assistance to State and local governments when they are adversely affected by serious declines in our national economy. This legislation is in the process of being developed, and I anticipate introducing it shortly.

Mr. Speaker, revenue sharing was originally passed in 1972 to provide discretionary funds to all local general purpose governments, as well as to their State governments as a supplement to the specific purpose categorical grants many of them were then receiving. Revenue sharing was designed to be an entitlement program that would automatically allocate funds to eligible governments for the entire period of the authorization without matching requirements and with a minimum of paperwork. While revenue sharing has never constituted a very sizable percentage of State or local budgets—and that percentage has been steadily declining—these discretionary funds are extremely important in budgets that are otherwise highly restricted.

We also believe it is tremendously important that Congress retain the entitlement feature of this legislation, since it is essential for local and State governments to have advance information on the amounts they will receive before adopting their budgets. Incorporating these funds in the budget process of State and local governments provides the best assurance to Congress that revenue sharing dollars will be wisely spent.

Revenue sharing, as originally conceived, was intended to help correct the imbalance at the State and local levels between growing service needs and limited revenue sources. However, as we know, revenue sharing has steadily lost ground since the program's inception in 1972, both the victim of inflation and as the result of discontinuance since 1980 of the State share.

Except for a small increase voted in 1976, the level of funding has remained constant despite very high inflation rates that have eroded the purchasing power of these dollars. I think this is wrong, and we should do something about it. Accordingly, our bill incorporates a modest 16-percent increase in the funding level of the 1980 reauthorization to compensate for the impact of inflation since that time.

We should also be aware that President Reagan's New Federalism initiatives, since 1981, have brought a reduction in budget authority for grants to State and local governments of $13.4 billion, or 12.7 percent, at the very time these governments have been rocked by the most severe recession since the 1930's.

I am sure the Members of this body are keenly aware that many State and local governments today are in desperate financial straits. They have been buffeted by taxpayer revolts in some instances, by the economic recession—depression would be more accurate a description for some parts of the Nation—and by the reduction of Federal grants.

How have these governments coped with these forces? In general, they have been forced to cut services, reduce their work forces, and increase taxes and user charges. These actions have entailed very painful decisions for our State and local governments.

To cite a few statistics, during the past 2 years 8 States were forced to raise their individual income taxes and 13 States raised their sales taxes. Both of these major taxes were increased in 5 States. In addition, 27 States raised their gasoline or motor vehicle taxes, 16 raised alcoholic beverage taxes, and 11 raised the cigarette tax. Tax increases of this kind are unprecedented in recent history. Obviously, the States and their local governments need and deserve a helping hand from Washington.

Revenue sharing, in my judgment, is an effective way to target Federal assistance, with a minimum of bureaucratic interference and redtape, to our local governments most in need of financial help. These communities include the smaller municipalities that generally do not benefit from categorical grants, and the large urban centers that have high concentrations of low-income people and, consequently, service needs that often exceed their taxing capacities. Revenue sharing has been successful in dealing with these special situations, while providing funds to all general purpose governments to be spent in accordance with local decisions and local priorities.

I think it clear that we must retain and strengthen this program which has been so valuable to our State and local governments during the past decade.

Mr. Speaker, the Intergovernmental Relations and Human Resources Subcommittee, which I am privileged to chair, will begin hearings on March 15 on my bill and other proposals to extend the revenue sharing program. Members wishing to testify are requested to contact the subcommittee office on extension 5-2548 to arrange a convenient time.

The text of the bill follows:

H.R. 1930

A bill to extend and amend the provisions of title 31, United States Code, relating to the general revenue sharing program

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "State and Local Fiscal Assistance Amendments of 1983".

EXTENSION OF PROGRAM

SEC. 2. Section 6701(a)(1) of title 31, United States Code, is amended to read as follows:

"(1) 'entitlement period' means each one-year period beginning on October 1 of 1983, 1984, 1985, 1986, and 1987.".

AUTHORIZATION OF APPROPRIATIONS

SEC. 3. Section 6703(b) of title 31, United States Code, is amended by striking out paragraphs (1) and (2) and inserting in lieu thereof the following:

"(1) $2,648,667,000 for each entitlement period to pay entitlement amounts allocated to State governments for that period under section 6705 of this title; and

"(2) $5,297,333,000 for each entitlement period to pay entitlement amounts allocated to units of general local government for that period under sections 6708, 6709, and 6710 of this title.".

ENTITLEMENT OF STATE GOVERNMENTS TO PAYMENTS

SEC. 4. (a) Section 6702(a) is amended by striking out the first two sentences and inserting in lieu thereof the following: "Each State government and unit of general local government is entitled to an amount equal to any amount allocated to that government under this chapter.".

(b) Section 6705 of title 31, United States Code, is amended to read as follows:

"§ 6705. State government allocations.

"For each entitlement period, the Secretary of the Treasury shall allocate out of the amount authorized for the period under section 6703(b)(1) of this title an amount bearing the same ratio to the amount authorized as the amount allocated to the State under section 6707 of this title bears to the total amount allocated to States under such section.".●

ECONOMIC REPORTS IMPROVE OVERSIGHT

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. KEMP. Mr. Speaker, 2 weeks ago, in an op-ed piece which appeared in the Wall Street Journal, I made reference to an effort by the Subcommittee on Foreign Operations to secure from AID and Treasury a set of reports on the domestic economic policies of nations receiving bilateral or multilateral assistance from the United States. In that piece I expressed some frustration with the length of time it had taken to work out the reporting process and to receive what the subcommittee views as vital information.

I am pleased to report to my colleagues that the wait was well worthwhile. We have received reports on 22 nations, a geographical and economic cross-section of aid recipients. Each report contains a succinct description of the monetary and fiscal policies pursued in the countries and an analysis of the incentive structure for both domestic and foreign investment. These will be of tremendous assistance to the subcommittee, and, I believe, to the administration, in designing and evaluating our economic assistance program.

I compliment the Department of Treasury and the State Department for the effort that has been made and the fine products which we have received. As we complete the coverage of these reports and use them in our oversight work, I am confident that we will develop a very useful tool for improving our work.●

DAVY CROCKETT

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. PAUL. Mr. Speaker, Davy Crockett gave his life for freedom at the Alamo, so we Texans have always considered him one of us, although he was in our State for only a few weeks.

Before coming to Texas, Crockett served as a Member of Congress, and his record was an outstanding one. He cast one wrong vote, but after a distinguished constituent, Horatio Bunce, explained to him why it was unconstitutional, Colonel Crockett never again voted that way.

The vote in question—giving tax money to a group of Georgetown residents who lost their homes in a fire—seems acceptable enough today. After all, the major activity of the U.S. Congress today is taking from one group to give to another.

But the great Davy Crockett—thanks to the wisdom of a constituent—came to see that this was neither moral nor constitutional.

The issue is honesty in Government, and because Crockett's words and actions are so relevant to today's politics, I would like to bring this excerpt from Edward Ellis' "Life of Colonel Davy Crockett" to my colleagues' attention.

The excerpt follows:

NOT YOURS TO GIVE

One day in the House of Representatives, a bill was taken up appropriating money for the benefit of a widow of a distinguished naval officer. Several beautiful speeches had been made in its support. The Speaker was just about to put the question when Crockett arose:

"Mr. Speaker—I have as much respect for the memory of the deceased, and as much sympathy for the sufferings of the living, if suffering there be, as any man in this House, but we must not permit our respect for the dead or our sympathy for a part of the living to lead us into an act of injustice to the balance of the living. I will not go into an argument to prove that Congress has no power to appropriate this money as an act of charity. Every Member upon this floor knows it. We have the right as individuals, to give away as much of our own money as we please in charity; but as Members of Congress we have no right so to appropriate a dollar of the public money. Some eloquent appeals have been made to us upon the ground that it is a debt due the deceased. Mr. Speaker, the deceased lived long after the close of the war; he was in office to the day of his death, and I have never heard that the Government was in arrears to him.

Every man in this House knows it is not a debt. We cannot, without the grossest corruption, appropriate this money as the payment of a debt. We have not the semblance of authority to appropriate it as a charity. Mr. Speaker, I have said we have the right to give as much money of our own as we please. I am the poorest man on this floor. I cannot vote for this bill, but I will give one week's pay to the object, and if every Member of Congress will do the same, it will amount to more than the bill asks."

He took his seat. Nobody replied. The bill was put upon its passage, and, instead of passing unanimously, as was generally supposed, and as, no doubt, it would, but for that speech, it received but few votes, and, of course, was lost.

Later, when asked by a friend why he had opposed the appropriation, Crockett gave this explanation:

"Several years ago I was one evening standing on the steps of the Capitol with some other Members of Congress, when our attention was attracted by a great light over in Georgetown. It was evidently a large fire. We jumped into a hack and drove over as fast as we could. In spite of all that could be done, many houses were burned and many families made houseless, and, besides, some of them had lost all but the clothes they had on. The weather was very cold, and when I saw so many women and children suffering, I felt that something ought to be done for them. The next morning a bill was introduced appropriating $20,000 for their relief. We put aside all other business and rushed it through as soon as it could be done.

"The next summer, when it began to be time to think about the election, I concluded I would take a scout around among the boys of my district. I had no opposition there, but, as the election was some time off, I did not know what might turn up. When riding one day in a part of my district in which I was more a stranger than any other, I saw a man in a field plowing and coming toward the road. I gauged my gait so that we should meet as he came to the fence. As he came up, I spoke to the man. He replied politely, but, as I thought, rather coldly.

"I began: 'Well, friend, I am one of those unfortunate beings called candidates, and—'

"'Yes, I know you; you are Colonel Crockett. I have seen you once before, and voted for you the last time you were elected. I suppose you are out electioneering now, but you had better not waste your time or mine. I shall not vote for you again.'

"This was a sockdolager . . . I begged him to tell me what was the matter.

"'Well, Colonel, it is hardly worth-while to waste time or words upon it. I do not see how it can be mended, but you gave a vote last winter which shows that either you have not capacity to understand the Constitution, or that you are wanting in the honesty and firmness to be guided by it. In either case you are not the man to represent me. But I beg your pardon for expressing it in that way. I did not intend to avail myself of the privilege of the constituent to speak plainly to a candidate for the purpose of insulting or wounding you. I intend by it only to say that your understanding of the Constitution is very different from mine; and I will say to you what, but for my rudeness, I should not have said, that I believe you to be honest. . . . But an understanding of the Constitution different from mine I cannot overlook, because the Constitution, to be worth anything, must be held sacred, and rigidly observed in all its provisions. The man who wields power and misinterprets it is the more dangerous the more honest he is.'

"'I admit the truth of all you say, but there must be some mistake about it, for I do not remember that I gave any vote last winter upon any constitutional question.'

"'No, Colonel, there's no mistake. Though I live here in the backwoods and seldom go from home, I take the papers from Washington and read very carefully all the proceedings of Congress. My papers say that last winter you voted for a bill to appropriate $20,000 to some sufferers by a fire in Georgetown. Is that true?'

"'Well, my friend; I may as well own up. You have got me there. But certainly nobody will complain that a great and rich country like ours should give the insignificant sum of $20,000 to relieve its suffering women and children, particularly with a full and overflowing Treasury, and I am sure, if you had been there, you would have done just as I did.'

"'It is not the amount, Colonel, that I complain of; it is the principle. In the first place, the Government ought to have in the Treasury no more than enough for its legitimate purposes. But that has nothing to do with the question. The power of collecting and disbursing money at pleasure is the most dangerous power that can be entrusted to man, particularly under our system of collecting revenue by a tariff, which reaches every man in the country, no matter how poor he may be, and the poorer he is the more he pays in proportion to his means. What is worse, it presses upon him without his knowledge where the weight centers, for there is not a man in the United States who

can ever guess how much he pays to the Government. So you see, that while you are contributing to relieve one, you are drawing it from thousands who are even worse off than he. If you had the right to give anything, the amount was simply a matter of discretion with you, and you had as much right to give $20,000,000 as $20,000. If you have the right to give to one, you have the right to give to all; and, as the Constitution neither defines charity nor stipulates the amount, you are at liberty to give to any and everything which you may believe, or profess to believe, is a charity, and to any amount you may think proper. You will very easily perceive what a wide door this would open for fraud and corruption and favoritism, on the one hand, and for robbing the people on the other. No, Colonel, Congress has no right to give charity. Individual Members may give as much of their own money as they please, but they have no right to touch a dollar of the public money for that purpose. If twice as many houses had been burned in this county as in Georgetown, neither you nor any other Member of Congress would have thought of appropriating a dollar for our relief. There are about two hundred and forty Members of Congress.

"If they had shown their sympathy for the sufferers by contributing each one week's pay, it would have made over $13,000. There are plenty of wealthy men in and around Washington who could have given $20,000 without depriving themselves of even a luxury of life. The Congressmen chose to keep their own money, which, if reports be true, some of them spend not very creditably; and the people about Washington, no doubt, applauded you for relieving them from the necessity of giving by giving what was not yours to give. The people have delegated to Congress, by the Constitution, the power to do certain things. To do these, it is authorized to collect and pay moneys, and for nothing else. Everything beyond this is usurpation, and a violation of the Constitution.

"So you see, Colonel, you have violated the Constitution in what I consider a vital point. It is a precedent fraught with danger to the country, for when Congress once begins to stretch its power beyond the limits of the Constitution, there is no limit to it, and no security for the people. I have no doubt you acted honestly, but that does not make it any better, except as far as you are personally concerned, and you see that I cannot vote for you.

"I tell you I felt streaked. I saw if I should have opposition, and this man should go to talking, he would set others to talking, and in that district I was a gone fawn-skin. I could not answer him, and the fact is, I was so fully convinced that he was right, I did not want to. But I must satisfy him, and I said to him:

"'Well, my friend, you hit the nail upon the head when you said I had not sense enough to understand the Constitution. I intended to be guided by it, and I thought I had studied it fully. I have heard many speeches in Congress about the powers of Congress, but what you have said here at your plow has got more hard, sound sense in it than all the fine speeches I ever heard. If I had ever taken the view of it that you have, I would have put my head into the fire before I would have given that vote; and if you will forgive me and vote for me again, if I ever vote for another unconstitutional law I wish I may be shot.'

"He laughingly replied: 'Yes, Colonel, you have sworn to that once before, but I will trust you again upon one condition. You say that you are convinced that your vote was wrong. Your knowledge of it will do more good than beating you for it. If, as you go around the district, you will tell people about this vote, and that you are satisfied it was wrong, I will not only vote for you, but will do what I can to keep down opposition, and, perhaps, I may exert some little influence in that way.'

"'If I don't,' said I, 'I wish I may be shot; and to convince you that I am in earnest in what I say I will come back this way in a week or ten days, and if you will get up a gathering of the people, I will make a speech to them. Get up a barbecue, and I will pay for it.'

"'No, Colonel, we are not rich people in this section, but we have plenty of provisions to contribute for a barbecue, and some to spare for those who have none. The push of crops will be over in a few days, and we can then afford a day for a barbecue. This is Thursday; I will see to getting it up on Saturday week. Come to my house on Friday, and we will go together, and I promise you a very respectable crowd to see and hear you.'

"'Well, I will be here. But one thing more before I say good-by. I must know your name.'

"'My name is Bunce.'

"'Not Horatio Bunce?'

"'Yes.'

"'Well, Mr. Bunce, I never saw you before, though you say you have seen me, but I know you very well. I am glad I have met you, and very proud that I may hope to have you for my friend.'

"It was one of the luckiest hits of my life that I met him. He mingled but little with the public, but was widely known for his remarkable intelligence and incorruptible integrity, and for a heart brimful and running over with kindness and benevolence, which showed themselves not only in words but in acts. He was the oracle of the whole country around him, and his fame had extended far beyond the circle of his immediate acquaintance. Though I had never met him before, I had heard much of him, and but for this meeting it is very likely I should have had opposition, and had been beaten. One thing is very certain, no man could now stand up in that district under such a vote.

"At the appointed time I was at his house, having told our conversation to every crowd I had met, and to every man I stayed all night with, and I found that it gave the people an interest and a confidence in me stronger than I had ever seen manifested.

"Though I was considerably fatigued when I reached his house, and, under ordinary circumstances, should have gone early to bed, I kept him up until midnight, talking about the principles and affairs of Government, and got more real, true knowledge of them than I had got all my life before.

"I have known and seen much of him since, for I respect him—no, that is not the word—I reverence and love him more than any living man, and I go to see him two or three times every year; and I will tell you, sir, if every one who professes to be a Christian lived and acted and enjoyed it as he does, the religion of Christ would take the world by storm.

"But to return to my story. The next morning we went to the barbecue, and, to my surprise, found about a thousand men there. I met a good many whom I had not known before, and they and my friend introduced me around until I had got pretty well acquainted—at least, they all knew me.

"In due time notice was given that I would speak to them. They gathered up around a stand that had been erected. I opened my speech by saying:

"'Fellow-citizens—I present myself before you today feeling like a new man. My eyes have lately been opened to truths which ignorance or prejudice, or both, had heretofore hidden from my view. I feel that I can today offer you the ability to render you more valuable service than I have ever been able to render before. I am here today more for the purpose of acknowledging my error than to seek your votes. That I should make this acknowledgment is due to myself as well as to you. Whether you will vote for me is a matter for your consideration only.'

"I went on to tell them about the fire and my vote for the appropriation and then told them why I was satisfied it was wrong. I closed by saying:

"'And now, fellow-citizens, it remains only for me to tell you that the most of the speech you have listened to with so much interest was simply a repetition of the arguments by which your neighbor, Mr. Bunce, convinced me of my error.

"'It is the best speech I ever made in my life, but he is entitled to the credit for it. And now I hope he is satisfied with his convert and that he will get up here and tell you so.'

"He came upon the stand and said:

"'Fellow-citizens—It affords me great pleasure to comply with the request of Colonel Crockett. I have always considered him a thoroughly honest man, and I am satisfied that he will faithfully perform all that he has promised you today.'

"He went down, and there went up from that crowd such a shout for Davy Crockett has his name never called forth before.

"I am not much given to tears, but I was taken with a choking then and felt some big drops rolling down my cheeks. And I tell you now that the remembrance of those few words spoken by such a man, and the honest, hearty shout they produced, is worth more than all the honors I have received and all the reputation I have ever made, or ever shall make, as a Member of Congress.

"Now, sir," concluded Crockett, "you know why I made that speech yesterday.

"There is one thing now to which I will call your attention. You remember that I proposed to give a week's pay. There are in that House many very wealthy men—men who think nothing of spending a week's pay, or a dozen of them, for a dinner or a wine party when they have something to accomplish by it. Some of those same men made beautiful speeches upon the great debt of gratitude which the country owed the deceased—a debt which could not be paid by money—and the insignificance and worthlessness of money, particularly so insignificant such as $10,000, when weighed against the honor of the Nation. Yet not one of them responded to my proposition. Money with them is nothing but trash when it is to come out of the people. But it is the one great thing for which most of them are striving and many of them sacrifice honor, integrity, and justice to obtain it."●

THE SOCIAL SECURITY BILL AS REPORTED BY THE WAYS AND MEANS COMMITTEE

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. STARK. Mr. Speaker, because of the great interest concerning the social security bill reported by the Ways and Means Committee, on which I serve, I am inserting the press release by the committee announcing the committee's action on the social security financing package in the RECORD:

The committee's bill is based upon the recommendations of the National Commission on Social Security Reform and includes as well several miscellaneous and technical amendments to the Social Security Act. A summary of the committee's action on titles I, II and III follows:

TITLE I.—PROVISIONS AFFECTING THE FINANCING OF THE SOCIAL SECURITY SYSTEM

COVERAGE

New Federal employees ($9.3 billion)[1]

Provides for coverage under social security of the following groups: (1) all Federal employees hired on or after January 1, 1984, including those with previous periods of Federal service; (2) legislative branch employees on the same basis, as well as all current employees of the legislative branch who are not participating in the Civil Service Retirement System as of December 31, 1983; (3) all Members of Congress, the President and the vice-President effective January 1, 1984; (4) all new employees of the judicial branch, including judges, on or after January 1, 1984; (5) all elected officials and political appointees of all branches of government, including (in addition to elected officials mentioned above) all sitting Federal judges, and all executive level and senior executive service political appointees, as of January 1, 1984. Salaries of Federal judges under age 70 will be considered wages for purposes of the social security earnings test.

Nonprofit employees ($12.5 billion)

Extends social security coverage on a mandatory basis to all employees of nonprofit organizations as of January 1, 1984. Nonprofit employees age 55 or older affected by this provision would be deemed to be fully insured for social security benefits after acquiring a given number of quarters of coverage, according to a sliding scale set in the law (e.g., 20 quarters would be required for persons age 55 and 56, ranging down to 6 quarters for those age 60 and over).

Prohibit termination by State and local governments ($3.2 billion)

Prohibits state and local governments from terminating coverage for their employees if the termination has not taken effect by the date legislation is enacted, and allows State and local governments which have withdrawn from the social security system to voluntarily rejoin.

[1] All cost estimates are preliminary, subject to revision by the Office of the Actuary, Social Security Administration. The estimates are cumulative for 1983-1989.

COMPUTATION OF BENEFITS

Delay cost-of-living adjustment ($39.4 billion)

Delays the June 1983 cost-of-living adjustment until December (January 1984 check), and provides all subsequent cost-of-living adjustments in December (January checks). The SMI premium would not be adjusted until January 1, 1984. A cost-of-living adjustment would be provided in the January 1984 payment even if the increase in the CPI is less than 3 percent.

Stabilizer

Beginning with 1988, if the fund ratio of the combined OASDI Trust Funds as of the beginning of a year is less than 20.0 percent, the automatic cost-of-living (COLA) adjustment of OASDI benefits would be based on the lower of the CPI increase or the increase in average wages. A "catch-up" benefit payment would be made in a subsequent year whenever trust fund reserves reach at least 32 percent.

Windfall benefits ($0.3 billion)

Modifies the social security benefit formula (substituting 61 percent for the 90 percent in the first bracket of the formula) so as to reduce social security benefits received by workers who are eligible for a pension from noncovered work but who have worked long enough in covered employment to be eligible for social security benefits. This formula would apply only to those reaching age 60 after 1983.

Delayed retirement credit

Gradually increases the delayed retirement credit from 3 pecent to 8 percent per year between 1990 and 2010.

REVENUE PROVISIONS

Taxation of social security (OASDI) benefits for higher-income persons ($27.3 billion)

Includes in taxable income, beginning in 1984, a portion of social security benefits and Tier One benefits payable under the Railroad Retirement Act for taxpayers whose adjusted gross income combined with 50 percent of their benefits exceeds a base amount. The base amount would be $25,000 for an individual, $32,000 for a married couple filing a joint return and zero for married persons filing separate returns. The amount of benefits that could be included in taxable income would be the *lesser* of one-half of benefits or one-half of the excess of the taxpayers' combined income (adjusted gross income plus one-half of benefits) over the base amount.

The proceeds from the taxation of benefits, as estimated by the Treasury Department, would be transferred to the appropriate trust funds.

FICA tax rates (OASDI) ($39.4 billion)

Advances the payroll tax increase scheduled for 1985 to 1984 and part of the increase scheduled for 1990 to 1988, as indicated below. (Conforming changes would be made in the Tier One Railroad Retirement Tax rates.)

EMPLOYER-EMPLOYEE OASDI TAX RATE (EACH)

[In percent]

	Current law	Proposed
1984	5.40	5.70
1985	5.70	5.70
1986	5.70	5.70
1987	5.70	5.70
1988	5.70	6.06
1989	5.70	6.06
1990	6.20	6.20

Tax credit for 1984 FICA taxes

Provides for a one time credit of 0.3 percent of wages to be allowed against 1984 employee FICA and Tier One Railroad Retirement taxes. Appropriations to the Old Age and Survivors and Disability Insurance Trust Funds would be based on a 5.7 percent rate. Conforming changes would be made in Tier One Railroad Retirement Tax rates.

Tax on self-employment income ($18.5 billion)

Beginning in 1984, the OASDHI rates for self-employed persons would be equal to the combined employer-employee OASDHI rate. In addition, self-employed persons would be allowed a SECA tax credit of 2.1 percent of net self-employment income in 1984, 1.8 percent from 1985 through 1988 and 1.9 percent thereafter.

BENEFITS FOR CERTAIN SURVIVING DIVORCED AND DISABLED SPOUSES

Benefits for certain widows, divorced and disabled women (−$1.5 billion)

Four provisions were approved to continue benefits for a surviving divorced or disabled spouse who remarries, to increase benefits for disabled widows and widowers and for widows whose husbands died several years before the widow is eligible for benefits and to allow divorced spouses to draw spouses' benefits at age 62 whether or not the former spouse has retired.

MECHANISMS TO ASSURE CONTINUED BENEFIT PAYMENTS IN UNEXPECTEDLY ADVERSE CONDITIONS

Interfund borrowing

Authorizes interfund borrowing between the OASI, DI and HI trust funds for calendar years 1983-1987, with provision for repayment of the principal and interest of all such loans (including amounts borrowed in 1982) at the earliest feasible time but not later than the end of calendar year 1989.

Fixed monthly tax transfers

Provides for a revision of accounting procedures under which the Treasury would credit to the OASDHI trust funds, at the beginning of each month, the amount of payroll tax revenues that is estimated to be received during the month. These amounts would be invested by the trust funds as all other assets are invested, and the trust fund would pay interest to the general fund on these amounts.

Managing trustee report to the Congress concerning trust fund shortfalls

Requires the Board of Trustees to report immediately to Congress whenever the amount in *any* trust fund is unduly small and to recommend in that report a specific legislative plan to remedy the shortfall. Any plan must be enacted by Congress before taking effect and would go into effect no earlier than 30 days after enactment.

OTHER FINANCING AMENDMENTS

Reimbursement to trust funds for military wage credits and uncashed OASDI checks ($17.2 billion)

Military Wage Credits

Provides for a lump-sum payment to the OASDI trust funds from the General Fund of the Treasury for: (i) The present value of the estimated additional benefits arising from the gratuitous military service wage credits for service before 1957; and (ii) the amount of the combined employer-employee OASDHI taxes on the gratuitous military service wage credits for service approval by

Congress of a repayment plan that must be submitted after 1956 and before 1983.

Uncashed OASDI Checks

Provides for a lump-sum payment to the OASDI trust funds from the General Fund representing the amount of all uncashed benefit checks which have been issued in the past, and requires the implementation of a procedure to credit the trust funds on a regular basis with an amount equal to the value of all OASDI benefit checks which have not been negotiated for a period of six months.

TITLE II.—ADDITIONAL PROVISIONS RELATING TO LONG-TERM FINANCING OF THE SOCIAL SECURITY SYSTEM

Long-range benefit formula and tax rate changes

Reduces initial benefit levels by 5 percent by decreasing the factors in the benefit formula by two-thirds of 1 percent each year for 8 years beginning in the year 2000. Increases the OASDI tax rate by .24 percentage points for employers and employees each in the year 2015.

TITLE III.—MISCELLANEOUS AND TECHNICAL PROVISIONS

The bill also includes a series of miscellaneous and technical provisions relating to cash management, elimination of gender-based distinctions under the social security program, coverage, and other matters.

Trust fund investment procedures

Several changes would be made in the investment procedures of the social security trust funds. Most importantly, a new short-term rate would be added so that the trust funds would be invested at short-term or long-term rates in order to maximize return to the funds.

Social security as a separate function in the unified budget

Displays the OASI, DI, HI and SMI fund operations as a separate function 650 within the budget. Beginning with fiscal year 1988, these trust fund operations would be removed from the unified budget.

SSA as independent agency

Authorizes a feasibility and implementation study with respect to establishing SSA as an independent agency.

Public pension offset

Beginning in July 1983, the amount of a social security beneficiary's public pension offset would be one-third of the public pension.

Elective compensation

Provides that employer contributions to the following elective compensation arrangements will be includible in the FICA wage base: cash or deferred compensation (section 401(k) of the Internal Revenue Code), cafeteria plans (section 125) and tax-sheltered annuities (section 403(b)).

FICA wage base

Provides that the definition of wages subject to the FICA tax would be interpreted solely with reference to the FICA statute, not with reference to income taxes or income tax withholding. An explicit exclusion from FICA tax would be provided for meals and lodging excluded from income tax under section 119 of the Internal Revenue Code.

Simplified employee pensions

Provides that employer contributions to a simplified employee pension (SEP) would be exempt from FICA, but employee contributions would be subject to FICA. Conforming changes would be made in the Social Security Act definition of covered wages.

Income tax credit for elderly and disabled

The present Federal income tax credit for the elderly is increased and combined with the disability income exclusion. The resulting credit would be available for certain individuals under age 65 who have retired on permanent and total disability (to the extent of disability income) and individuals age 65 or over. The credit would no longer be available to those under age 65 who are not disabled and the disability exclusion is repealed. The credit would be 15 percent of a base amount equal to $5,000 for single individuals and $7,500 for joint return. As under present law, the base amount is reduced by amounts of social security or railroad retirement benefits and by one-half of adjusted gross income that exceeds $7,500 for a single return and $10,000 for a joint return.

Deposit rules for employment taxes

Provides more lenient rules for the deposit of FICA taxes and withheld income taxes.

Titles I, II, and III as approved by the committee produce savings and additional social security trust fund revenue through 1989 of $165.3 billion and eliminate the long-term deficit of 2.09 percent of taxable payroll.●

A GIFT OF BLOOD IS THE GIFT OF LIFE

HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. RALPH M. HALL. Mr. Speaker, it is my privilege to draw attention to the wonderful record set by two blood donors in Tyler, Tex., who have given a pint of blood over 100 times.

Sam Hailton and Thornton Robinson have donated over 12½ gallons of blood at Stewart Blood Center the regional blood bank which furnishes blood and blood components to hospitals in 31 counties in east Texas. Of special interest is the fact that Mr. Robinson is continuing to donate blood regularly at age 70.

As volunteer donors, both of these men recognize the need for blood to sustain life of patients who cannot live without infusion of donor-given blood.

The marvelous record set by these two fine men serves as an example of true giving and an inspiration to other men and women in good health to share their life's blood with others.

This gesture is significant, for truly a gift of blood is a gift of life.●

OPTOMETRISTS OFFER SERVICES IN HONOR OF SAVE YOUR VISION WEEK

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. FLORIO. Mr. Speaker, as you are well aware, the U.S. Congress passed a joint resolution in 1963 designating the first full week in March as "Save Your Vision Week."

In accordance with this resolution, the New Jersey Optometric Association and more locally, the West Jersey Optometric Society and Camden Optometric Center are providing programs and free eye/vision screening to the community to further heighten public awareness of the vital role that vision plays in life.

I ask my colleagues to join with me in commending and supporting the many doctors, other health professionals, community leaders, and school leaders for their public service efforts on behalf of improved eye care.●

DISASTER AID FOR SMALL BUSINESSES

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. UDALL. Mr. Speaker, today I am joined by some of my distinguished colleagues who represent districts in the Southwest in introducing legislation which will provide relief to small businesses adversely affected by devaluations of the Mexican peso. My bill would amend the Small Business Act in order to allow small businesses that have experienced nonphysical disasters such as the peso devaluation to apply for low-interest SBA loans. The current economic recession has meant serious economic difficulties for small businesses everywhere. However, for businesses in the Southwest, highly dependent upon border traffic, these hard times have been compounded by the devaluation of the Mexican peso.

This legislation would restore the nonphysical disaster loan program established by the Small Business Act Amendments of 1977 and make it specifically applicable to economic dislocation arising from foreign currency devaluation. In its 1981 budget message the administration requested the termination of the nonphysical disaster loan program. The House voted to restructure the program while the Senate voted to do away with it entirely. In conference, restructuring of the program was agreed to but funding in fiscal year 1982, 1983, and 1984 was barred. In the course of restructuring

the program the eligibility of economic dislocation arising from foreign currency devaluation was dropped. So, even if the current loan program were funded, it would not apply to the disaster which devastates much of the Southwest.

Under the terms of the bill I am introducing, small businesses in a qualified disaster area would be eligible for low-interest loans with rates as low as 8 percent, depending upon the availability of conventional financing. Businesses could borrow up to $100,000 and the payment of all interest and principal would be deferred for 1 year. The loans could be used for working capital and to pay financial obligations which the small business owner could have met had the disaster not occurred. Funding for the program would come from the existing revolving fund for SBA physical disaster loans and be subject to the availability of those funds.

Last year the administration responded to this economic crisis by initiating a $200 million "peso pack" to be directed by the Small Business Administration. There are significant differences between the administration's "peso pack" and the legislation being introduced today. The "peso pack" offers qualifying small businesses regular SBA direct loans and SBA loan guarantees. Businesses applying for such loans can expect to pay an interest rate as high as 12 percent or higher, depending on the prime rate. Also, payment of principal and interest on regular SBA business loans is generally deferred only 3 months. Because of the prohibitive requirements, very few businesses have sought to apply for "peso pack" loans

What is needed in this instance is disaster aid, not the type of SBA business loan that is given in the ordinary course of business. I urge my colleagues to assist in the swift passage of this legislation.●

UNEMPLOYMENT: THE IMPACT ON CHILDREN AND FAMILIES

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. MILLER of California. Mr. Speaker, during the last year, America has witnessed nearly a 50-percent increase in the unemployment rate; a development which is having a profound effect on the lives of millions of Americans. One out of ten Americans is out of work; there have been jobless wage earners in nearly 15 million households; 1 out of every 3 blacks, including 53 percent of black teenagers is unable to find work.

The impact of these figures goes beyond unemployment lines and empty factories. There is a human toll paid by the families and especially the children of jobless workers. Yet, at the very time that the need for basic assistance to the victims of unemployment is growing, a wide range of social services to the needy has been substantially reduced by the action of the Reagan administration and the Congress. As a result, nearly 60 percent of all unemployed families receive no Federal assistance, 82 percent received no food stamps, and fully 60 percent received no unemployment insurance.

Private organizations—charities, churches, and volunteer groups—are overwhelmed by the increased demand for services. Once, in partnership with Federal and State agencies, charities could provide food, clothing, shelter, and counseling to needy and homeless families. Operating on private donations alone, many charities simply cannot muster the resources to meet the demand.

Recent hearings by the Subcommittee on Labor Standards, of which I am the chairman, demonstrated that the cost of our Nation's recession is not just economic. Although many families successfully cope with job loss, testimony heard by the subcommittee presented conclusive evidence about the adverse impact which unemployment is having on vast numbers of families and children.

One need not look beyond the morning paper or the evening news to understand the financial hardships of jobless Americans. Few, however, appreciate the psychological, physical, and social scars left by unemployment on the individual and the family. Studies cited by witnesses before my subcommittee report that when unemployment increased by 1 percent, suicides increase by 4 percent; homicides by 6 percent; heart disease and cirrhosis (due to alcoholism) by 2 percent; and admissions to mental hospitals by over 3 percent.

An estimated 13 million children are the special, and largely invisible, victims of their parents unemployment. Serious decline in school performance, increases in malnutrition, child abuse and domestic violence, and a worsening of parent-child relationships have all been directly linked to increases in the unemployment rate.

For many of those who become unemployed during a recession, the loss of income is compounded by a loss of health care coverage. Although most plans provide some coverage to those who are laid off, 70 percent of today's unemployed have exhausted their benefits or were never eligible for compensation. An estimated 10.7 million people, including spouses and children, lacked health insurance at the end of 1982 because of job loss. Nearly 700,000 children nationally, have become ineligible for medicaid coverage since 1981. In Michigan alone, where unemployment is the highest in the Nation, one-half of a million Blue Cross/Blue Shield participants have been dropped since 1979.

EFFECTS ON THE WORKER

Judson Stone, executive director of the Elkgrove-Schaumberg Mental Health center in Elkgrove, Ill., trained as a child and adolescent therapist, and working with the unemployed for over a decade, has recently conducted extensive studies of the effects of unemployment on children and family stress. Before my subcommittee, he painted a portrait of the jobless worker as one who, without financial and health resources, rapidly loses his identity, dignity, and self-respect. Mr. Stone testified:

> Our culture teaches us that it is our fault if we are unable to find and keep a job. It is amazing how much personal guilt is associated with a lay-off that in no way was controlled by the employee.

These factors plus other events inevitably lead an unemployed person to a feeling of a loss of control over many aspects of individual and family life. Based on interviews with workers standing in unemployment lines, as well as in his work at the mental health center, Mr. Stone concludes:

> As the reality of unemployment sinks in, anxiety, frustration, anger, and depression follow—one often fails to see options in life that are available. What makes the experience worse is that each unemployed person has a tendency to want to disappear and isolate himself and his family—the worker feels he has failed.

Prolonged joblessness confirms the feeling of failure which leads to guilt and the cycle continues. Many eventually find work, but only at considerably lower levels of pay and responsibility than held previously. Mr. Stone stated that, "Most have serious scars to show for the experience."

Similar findings have been reported by Paula Rayman, a sociologist from Brandeis University who surveyed unemployed aircraft workers near Hartford, Conn. Professor Rayman found that of those surveyed, 18 percent reported increased alcoholism, 30 percent reported constant insomnia, and 37 percent reported increased anxiety after losing their jobs.

The problems affecting the individual worker and their family grow more serious the longer the unemployed searches for a job. Many workers who have been out of a job for 3 to 6 months begin to experience anger and to take the frustrations out on their families. By the end of 6 months, unemployment benefits end and the so-called safety net begins to fray. At the end of 10 months, the unemployed worker has lost his social network, affiliations with community institutions, and daily associations with other workers.

The permanent loss of a job is usually far more traumatic than a tempo-

rary layoff where a worker feels he will be recalled after the recession ends. Permanent job loss can mean the shattering of family and ethnic organizations and even communities that were centered around an industry. Looking for work in new and unfamiliar cities may prove unbearable for the worker and his family, who often return, without hope, to their community, seeking the emotional stability of their hometown.

IMPACT ON SPOUSES

The spouse especially feels the trauma of the unemployed. Terry Buss, director of urban studies at Youngstown State University, has reported that the wives of unemployed workers felt more aggressive, helpless, and victimized than the wives whose husbands were employed or retired. Studies have shown that wives of workers who have been unemployed for several months consistently exhibit depression, phobia, paranoia, and physical ailments. In many families, not only is the wife expected to meet the needs of her family with fewer resources but also must provide the major emotional support for her family.

Many of these women are forced into the work force for the first time, confronting not only their new role as breadwinner but also wage and sex discrimination which often accompany female employment. Worried that their husbands may never work again, wives feel compelled to work overtime in order to advance to a better position. Ironically, many of these women fear that their own success may threaten their spouse's morale. The unanticipated role reversal disrupts family and personal routines, and can result in tensions which may manifest themselves in bouts of physical violence.

Barbara Shaw, executive director of the Illinois Coalition Against Domestic Violence, testified about her experiences in domestic violence crisis intervention and the relationship of unemployment to increased spousal abuse. Last year, over 12,000 women and their children sought refuge and assistance from the Coalition, which Ms. Shaw considers a conservative estimate of the total number of abused persons.

Surveys of all the shelters in the Illinois network uncovered dramatic increases in the number of women reporting their abusers' unemployment as a factor in the violence. In fact, 75 percent of abuse victims participating in a recent survey cited their husbands' layoffs as precipitating first-time physical abuse. Ms. Shaw testified that when the Pabst Brewing Co. closed a brewery in Illinois, leaving 600 jobless, the percentage of women whose husbands were unemployed and who stayed at a local shelter for battered women, skyrocketed from 33 to 70 percent. When the Caterpillar Tractor Co. laid off 4,000 workers, the number of women and children staying at another Illinois shelter jumped from 85 to 120 per month for the subsequent 2 months.

Based on her research of the intake reports of women who sought help at the shelter, Ms. Shaw observed, "Women victims are not able or willing to leave their [home] situations because they lack the economic status." David Mills, another witness, reported similar observations by shelter directors in Wisconsin, "Victims were even less willing to leave the abuse situation because of fear that welfare and other supports would not be available," he reported, "the economy and reduced services made victims even more dependent on the abuser."

HEALTH OF MOTHERS AND INFANTS

Dr. Bailus Walker, director of the Michigan Department of Public Health, has conducted extensive studies of the impact of unemployment on the health of mothers and children in Michigan. Dr. Walker describes Michigan as in a state of emergency, with the highest unemployment rate in the Nation and more than 740,000 citizens out of work. Michigan's infant mortality rate increased from 12.8 deaths in 1980 to 13.2 per 1,000 live births in 1981; the most significant jump since World War II. In Detroit, where unemployment reached 20 percent in 1980, some areas report a 100-percent increase in infant mortality in 1 year. Dr. Walker reports that:

Persistently high unemployment combined with an unprecedented reduction in all public services positions Michigan for increase in its infant mortality rate. Poor nutrition, lack of prenatal care, unemployment, and poverty all contribute to the problem. The pervasiveness of the infant death increase in Michigan is certainly consistent with our poor economic conditions.

Helen Mager, a public health nurse from Mahoning County, Ohio, testified that the infant mortality rate has increased in six of the seven Ohio counties hardest hit by unemployment as has the rate of premature births in five of these seven counties. The Children's Defense Fund of Ohio projects that, over the next 3 years, 60,000 children will be born in Ohio to parents whose health insurance has lapsed due to unemployment or underunemployment. This loss, compounded by cutbacks in maternal and child health programs, is likely to continue to jeopardize pregnancy outcome and postnatal services.

WIC clinics, which provide nutritional supplements to high-risk, low-income women and children, were praised by Ms. Mager at the most beneficial Federal program ever given to people. In Mahoning County, where unemployment is 21 percent, the WIC clinics are treating twice the number of people they treated last year. Yet, 80 persons already certified as eligible for the WIC program, must endure a 2-month wait before receiving the benefits of the program. Increased demand is forcing WIC administrators to place more restrictions on eligibility which further eliminates mothers and children in need. "We are telling them", Ms. Mager stated, "the possibility of them ever receiving service is almost nonexistent."

EARLY CHILDHOOD IMPACTS

The long shadow of health depravation due to economic hardship is cast far beyond infancy. Lewis Margolis, a pediatrician at the Health Services Research Center at the University of North Carolina, has, for the past 3 years, been conducting a major study of the long-term health effects of parental unemployment on the health and behavior of children. Dr. Margolis concludes:

If I were to select one stress as the most damaging and disruptive to children, it would be the loss of work by their parents.

He noted that stressful changes for children are brought about by joblessness in the following ways:

Economics—Declines in income inevitably require familes to cut back on necessities for the children such as food, medical care and clothing.

A decline in status—Studies have shown that children are aware of changes in family status as a result of economic hardship and indeed, experience a decline in their self-esteem as well.

Changes in family roles—Unanticipated changes in the way family tasks and responsibilities are assigned disrupt family roles.

Dr. Margolis also noted that "unemployment appears to make children more vulnerable to the usual childhood illnesses such as respiratory infections and gastrointestinal infections." In families of the unemployed, most of whom lack health insurance, the decision to seek health care is a very difficult one. As a result, Dr. Margolis concludes, "many childhood illnesses will go untreated."

In addition to the common childhood illnesses, children in families where the father is unemployed are three times more likely to suffer physical abuse than in families where father is continuously working according to longitudinal studies.

David Mills, director of Wisconsin's Office of Children, Youth and Families documented the relationship between increases in unemployment rates and increased child abuse. Specifically, Mr. Mills found that:

In counties which experienced increases of 3.1 percent and above in actual unemployment rates, the simultaneous average increase in child abuse reporting was 122 percent.

Moreover, 8 out of 10 counties in Wisconsin experiencing decreased unemployment experienced concurrent decreases in child abuse. Summary information of the Wisconsin survey of

counties found that 51 percent of the counties had recorded increases in unemployment rates, 68.6 percent of which also showed increased child abuse.

JUVENILE CRIME

The link between unemployment and the resulting instability in the family extends beyond the home. Testimony from Judge Charles Schudson of Milwaukee's children's court, suggested that unemployment plays a role in the frequency and the severity of crimes committed by youths.

Judge Schudson reports an increase in the incidence of crimes committed by children with no prior history of criminal activity. With alarming frequency, notes Judge Schudson, "these crimes coincide with periods of family stress resulting from a parent's layoff or the end of unemployment compensation. In addition to these crimes of unemployment stress," he points out, "juvenile courts see the repeated and violent crimes by children who seem unresponsive to even the best system of education, counseling, probations, or corrections."

Judge Schudson reports that teenagers who commit crimes have a feeling of "hopelessness." As teens witness the joblessness of their parents, their siblings and their peers, Judge Schudson observes, there is a tendency "to seek the gratification of committing a crime" rather than confront "the reality of a future of hopelessness."

REACHING OUT

A theme which consistently emerged as witnesses testified was the severe shortage of resources in the face of increased demand. The inability of social service agencies to meet the growing needs is due, in a large part, to dramatic reductions in Federal support at the very time the need is rapidly increasing.

Can charities alone make up for Government's shrinking role in providing for the needy? Father William Kelligar, executive director of the United Catholic Social Services in Omaha, Nebr., testified on behalf of the National Conference of Catholic Charities that voluntarism is not enough to care for the physical and emotional needs of the unemployed.

In Metropolitan Omaha, where requests for basic services increased 35 percent in 1982, charities are finding it very difficult to collect enough resources to help these new needy. Omaha churches and volunteers which support food pantries to feed the needy and families of the unemployed managed a 100-percent increase in expenditures but were confronted with double the number of needy seeking help during the past year. But such assistance only scratches the surface, Father Kelligar notes, as the pantries only operate 3 days a week. Summarizing the situation in Omaha, Father Kelligar concludes: "Shelter facilities are strained beyond the bearable limits."

The impact of unemployment, says Father Kelligar, is particularly devastating on the new poor who fear that they may soon join the ranks of the chronic unemployed. Dismissing the Reagan administration's pledge to maintain a safety net for the poor, Father Kelligar stated that—

> Budget cuts have cut to the bone of [of social service programs] * * * not to it, but into it. Social service cuts have gone too far and they have begun to cost more than such cuts can ever be worth in monetary terms.

Today, the House is considering comprehensive emergency jobs legislation to relieve the hardship of unemployment. This proposed legislation will provide employment opportunities, training and essential humanitarian services to relieve the psychological trauma for many unemployed workers and their families.

But this effort is simply not enough. Millions of victims of unemployment have lost far more than their jobs, and it will take far more than a single jobs bill to respond to their needs. Millions have seen their jobs vanish and with them, their financial stability, their health, and their families. Many of the effects of unemployment will last far longer than unemployment itself.

The January 31, 1983, hearing by the Subcommittee on Labor Standards has produced a chronicle of the personal tragedies of unemployment that are affecting millions of men, women, and children across the country. Witnesses pleaded for a more compassionate and comprehensive role for the Federal Government as well as other segments of government and the private sector to help buffer the effects of joblessness.

Yet, once again the Reagan administration has endorsed a budget which cuts food assistance and child nutrition programs, reduces services for high-risk pregnant women, makes further cuts in medical programs for senior citizens, and reduces housing and home heating assistance.

Over the course of the next few weeks, the Congress will prepare the budget for the coming fiscal year, and in doing so, will set crucial national priorities. The record of the human suffering as documented by the hearing record I have presented here, must figure prominently in the development of that budget and those priorities. Rectifying the damages of 2 years of massive job losses, plant closings, lost homes, repossessed farms, and economic depression will require more than a reduction in the unemployment rate.

The test for this Congress, and for the administration, will be to meet those needs, to respond to this national crisis in a fiscally sound manner. We cannot simply initiate excessive spending in an effort to cure complex problems which have been aggravated by the depression. But neither can we consider the tragedies endured by the American families, and especially millions of children, and fail to respond to these legitimate and growing human needs.●

KEY VOTES

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. PEASE. Mr. Speaker, it has become my practice to periodically insert in the CONGRESSIONAL RECORD a list of key votes that I have cast in the U.S. House of Representatives.

The list is arranged in this manner: Each item begins with the number of the bill or resolution that the House was considering and is followed by a summary of the vote. This is followed by my own vote on the issue, whether the matter passed or failed, and the vote outcome.

This list of votes covers the period of June 24, 1982, through the end of the second session of the 97th Congress.

INTRODUCTION

(178) H.R. 6198. Copyright Manufacturing Clause Extension requiring that nondramatic literary works written by authors living in the United States must be printed and bound in the United States or Canada. Yes. Passed 324–86.

(179) H.R. 6682. Urgent Supplemental Appropriations for fiscal year 1982. Attempting to override Presidental veto. Yes. Failed 242–169. (two-thirds majority needed to override veto)

(180) H. Res. 518. House Ethics Investigation. Authorized the House Committee on Standards of Official Conduct to investigate allegations of improper sexual conduct or illegal drug use by members, House officers, or employees. Yes. Passed 407–1.

(181) H.J. Res. 449. Required the President to certify—before granting U.S. aid to El Salvador—that the Salvadoran government investigated the murders of American churchwomen. Yes. Passed 399–1.

(185) H.R. 6685. Urgent Supplemental Appropriations for fiscal year 1982. Repealed Congressional tax benefits approved earlier. Provided $5.4 billion in supplemental budget authority and rescinded $5.8 billion in existing budget authority. Yes. Passed 389–13.

(187) H.R. 5617. Authorized $2.55 billion in fiscal year 1983 and $2.76 billion in fiscal year 1984 for the U.S. Coast Guard. Yes. Passed 348–25.

(188) H. Con. Res. 278. Expressed sense of Congress to maintain current levels of public service jobs for low income and older Americans. Yes. Passed 407–4.

(189) H.R. 5228. Implementing the Convention on Protection of Nuclear Materials which establishes specific categories of crimes and punishments relating to the illegal diversion of nuclear material during shipment. Yes. Passed 396–9.

(190) H.R. 6258. Authorized a 25-percent increase in funding for FY83 for the U.S. Travel and Tourism Administration to promote tourism at a time when other pro-

grams were receiving cuts. No. Failed 241-167. (two-thirds majority needed to pass under suspension of the rules)

(191) H. Con. Res. 310. Sense of Congress that the President should urge the government of Turkey to withdraw its forces from Cyprus. Yes. Passed 405-6.

(192) H.R. 6030. Amendment to reduce Department of Defense Authorization for FY83 for Trident submarine program by $699 million and reduce the number of Tridents from 2 to 1. Yes. Passed 344-65.

(197) H.R. 6030. Amendment to the Department of Defense authorization to provide for FY83 $1.14 billion for procurement of MX missile but delay obligation of $259.9 million to be spent on basing and deployment pending selection of a permanent basing mode. No. Passed 212-209.

(204) H.R. 6030. Amendment to delete $54 million for the production of binary nerve gas and bar any funds in the bill for that purpose. Yes. Passed 251-159.

(206) H.R. 6030. Amendment to the Department of Defense authorization for fiscal year 1983 to delete $4 billion for the procurement of the first 7 of 100 B-1B bombers. Yes. Failed 142-257.

(215) H.R. 6782. Veterans' Disability Benefits. The bill provided a 7.4-percent cost-of-living increase in disability compensation for veterans and their survivors. Yes. Passed 400-0.

(219) H.R. 6030. Amendment to the Department of Defense authorization for fiscal year 1983 to allow state courts, in states that treat marital property as community property, to decide whether to include armed service members' military benefits in the property to be divided by a divorce settlement. Yes. Passed 332-74.

(220) H.R. 6030. Amendment authorizing a 1-year continuation of a defense test program that provides for a price differential on nonweapons contracts to firms located in areas of high unemployment. Yes. Passed 237-170.

(222) H.R. 6030. Amendment prohibiting individuals who failed to register for the draft from receiving any Federal assistance under title IV of the Higher Education Act. Yes. Passed 303-95.

(230) H.R. 6030. Amendment for a 1-percent across-the-board cut in defense spending. Yes. Passed 238-136.

(235) H.R. 6862. Civil Service Reconciliation. A motion to recommit the bill to the Post Office and Civil Service Committee which would have the effect of capping Federal retirement COLA's without requiring members to vote on this issue. No. Failed 160-236.

(244) H.R. 5320. Job Training Partnership Act. Permanent authorization providing employment and training assistance for the disadvantaged, training for displaced workers, the Job Corps, national employment and training programs and labor market information. Yes. Passed 356-52.

(249) H.J. Res. 521. Amendment to Nuclear Weapons Freeze calling for the United States and the U.S.S.R. to achieve nuclear reduction followed by an arms freeze. Opposition indicated support for an immediate freeze. No. Passed 204-202.

(256) H.R. 6892. Amendment to the Food and Agriculture Reconciliation Act for fiscal year 1983 that would have changed the bill's food stamp provisions to authorize a mandatory job search. Failed 181-210.

(264) H.R. 5203. An amendment to the Federal Insecticide, Fungicide, and Rodenticide Act striking provisions in the bill to limit the authority of States to regulate pesticides more strictly than the Federal Government. Yes. Passed 250-154.

(274) H.R. 6100. Amendment to the National Development Invest Act to waive the Davis-Bacon prevailing wage requirements if a contractor submitted a bid for a project funded by this bill that was 10 percent below the next lowest bid. No. Failed 140-237.

(283) H.R. 6323. A substitute amendment to fund the Environmental Protection Agency with $278 million FY83 and $291 million FY84. The previous amendment provided $225.5 million for the EPA in FY83. Yes. Passed 244-153.

(290) H.R. 6955. Adoption of the conference report on the bill to reduce the federal budget for FY83, 84, and 85 by approximately $13.3 billion. A "yea" was a vote supporting the president's position. No. Passed 243-176.

(294) H.R. 6863. Amendment appropriating $350 million in development aid to Caribbean countries. Yes. Passed 281-129.

(295) H.R. 6863. An amendment to the FY82 Supplemental Appropriations to provide $2 million and transfer $25 million for military assistance to Honduras, Somalia, Costa Rica, and Portugal during a time of sharp domestic budget cuts. No. Passed 237-175.

(303) H.R. 4961. Adoption of the conference report on the Tax Equity and Fiscal Responsibility Act raising taxes by $98.3 billion over 3 years to reduce the Federal budget deficit and authorizing an emergency supplemental unemployment program. Yes. Passed 226-207.

(308) H.R. 6307. Amendment to the Resource Conservation and Recovery Act deleting provisions applying the law's regulation to small quantity generators of hazardous waste. No. Failed 148-183.

(311) H.R. 6307. Resource Conservation and Recovery Act expanding and tightening the regulation of hazardous waste and authorizing the appropriation of $105.5 FY83 and $11.5 FY84. Yes. Passed 317-32.

(314) H.R. 5831. Authorized lending limits for FmHA programs for FY83-85 and requiring the Agriculture Department to forego foreclosure and defer repayments on loans under specific conditions in FY83. Yes. Passed 372-39.

(316) H.R. 6863. Overriding a Presidential veto of Supplemental Appropriations which appropriated $14.6 billion for government programs and for pay increases of military and civilian Federal employees. Yes. Passed 301-117.

(331) H.R. 6956. Amendment to prohibit the use of funds provided by the HUD-Independent Agencies Appropriations for FY83 to implement mandatory inspection and maintenance programs for automobile emissions. No. Passed 200-184.

(339) H.R. 562. Urgent Supplemental Appropriations for the Labor Department which provides approximately $1 billion for public service jobs and youth employment training. Yes. Passed 223-169.

(342) H.R. 7019. Amendment to Transportation Department Appropriation for FY83 which would cut $320 million from transportation programs. No. Failed 154-221.

(359) H.J. Res. 599. Continuing Appropriations for FY83 providing funds to operate federal programs through December 15, 1982. No vote indicated opposition to running the government through continuing resolutions. No. Passed 242-161.

(368) H.R. 5540. Amendment to strike all Davis-Bacon prevailing wage law provisions from the Defense Industrial Base Revitalization Act. No. Failed 162-189.

(373) H.R. 3252. Coastal Barrier Resources Act prohibiting the use of Federal financial assistance for the construction of roads, bridges, sewer systems, or other forms of development on undeveloped coastal barriers. Yes. Passed 399-4.

(374) H.R. 5949. Cable Copyright Bill clarifying the rights of cable television operators to retransmit copyright material broadcast by non-cable stations. Yes. Passed 347-53.

(375) H. Con. Res. 409. Expressing Congress' condemnation of the recent massacre of Palestinians in Lebanon and the assassination of President-elect Gemayel and calling for the removal of foreign forces from Lebanon. Yes. Passed 401-1

(379) H.R. 6838. Repeals sanctions against the Soviet Union 90 days after enactment of the bill, provided that the President certifies to Congress that the Soviet Union is not using forced labor on certain construction jobs. Yes. Passed 209-197.

(380) H.R. 5543. Ocean and Coastal Resource Management and Development Fund. Provides Federal revenues from offshore oil and gas leasing to fund State coastal resource management programs and the sea grant college program. Yes. Passed 260-143.

(387) H.J. Res. 350. Amendment to the Constitution requiring Congress to adopt a balanced Federal budget every year, except in time of war, unless a three-fifths majority of Congress agrees to deficit spending. No. Failed 236-187. (two-thirds majority vote required to propose a constitutional amendment)

(389) H.J. Res. 599. Amendment to the continuing resolution increasing the salaries of air traffic controllers 6.6 percent annually, with an amendment permitting the President to rehire former air traffic controllers. Yes. Failed 128-267.

(396) H.R. 3809. Amendment to the Nuclear Waste Policy Act that reduces the power of states to veto the location of a permanent nuclear waste repository within their borders. Yes. Passed 190-184.

(402) H.R. 7205. Labor Health and Human Services and Education Departments Appropriations providing $85.4 billion in new budget authority for these programs. Yes. Passed 330-70.

(403) H.R. 6995. Substitute amendment to the Federal Trade Commission Authorization Act of 1982 which would maintain the jurisdiction of the FTC over the commercial aspects of State-regulated professions. Yes. Failed 195-208.

(420) H.R. 6211. Amendment to the Surface Transportation Assistance Act of 1982 increasing the 4-cents per gallon fuel tax to 9-cents per gallon and increasing truck taxes. Yes. Passed 236-169.

(423) H.R. 7355. Amendment to Department of Defense Appropriations for FY83 deleting procurement funds for five MX missiles. Yes. Passed 245-176.

(427) H.R. 6957. Amendment prohibiting the use of Justice Department funds to require the transportation of students to schools other than those in their neighborhoods. No. Passed 243-153.

(428) H.R. 6957. Amendment reducing funds for the Legal Services Corporation. No. Failed 121-269.

(436) H.J. Res. 429. Resolution encouraging development of state commissions on teacher excellence. Yes. Failed 225-153. (two-thirds majority needed for suspension of the rules.)

(438) H.R. 7044. Mail order Consumer Fraud Protection Act strengthening the in-

vestigative and enforcement authority of the Postal Service to stop mail order fraud. Yes. Passed 320-61.

(439) S. 2059. Ethics in Government Act permitting the continued use of special prosecutors to investigate high-ranking Federal officials. Yes. Passed 347-37.

(441) H.R. 3191. Suspension of rules to permit deductions from taxable income for expenses incurred attending conventions or seminars held on cruise-ships. No. Failed 219-164. (two-thirds majority needed for suspension of the rules)

(445) H.J. Res. 631. Amendment establishing new pay caps for members of Congress and senior Federal executives to $69,800. Without this amendment salaries would have increased automatically to $77,300. Yes. Passed 303-109.

(446) H.J. Res. 631. Amendment continuing the existing pay cap and thereby allowing no salary increases for members of Congress or senior Federal executives. Yes. Failed 208-208.

(447) H.J. Res. 631. Amendment to delete all funds provided in the resolution for the Clinch River Breeder Reactor, except for termination cost. Yes. Passed 217-196.

(450) H.J. Res. 631. Motion killing $5.4 billion to create jobs and retrain displaced workers and provide other services to unemployed. No. Failed 191-215.

(459) H.R. 5133. Fair Practices in Automotive Practices Act. Amendment preventing any provision in the bill from superseding the requirements of existing international treaties, conventions, or agreements on tariffs and trade. No. Passed 195-194.

(460) H.R. 5133. Fair Practices in Automotive Products Act requiring auto manufacturers to use specific levels of American products in vehicles sold in the United States beginning with 1984 model year. Yes. Passed 215-188.

(469) H.R. 7019. Canceling the St. Lawrence Seaway's $110 million Federal debt for original construction cost. Yes. Passed 298-77.

(471) H.R. 632. Citing Anne Gorsuch, Administrator of the Environmental Protection Agency, for contempt of Congress for failure to provide subpoenaed documents relating to EPA's Superfund. Yes. Passed 259-105.

(476) H.R. 7397. Caribbean Basin Economic Recovery Act providing duty-free entry into the United States of certain articles from 28 Caribbean Basin countries and other tax advantages. No. Passed 260-142●

TRUE SPORTSMANSHIP IN OLYMPIC COMPETITION

HON. BALTASAR CORRADA

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1983

● Mr. CORRADA. Mr. Speaker, next year we will be hosts, as American citizens, to thousands of ambassadors of good will from many countries during the 1984 Olympic games to be held in Los Angeles, Calif. I refer to the athletes, delegations, and officials participating in these games.

While this should be a joyous occasion for all of us, I am deeply concerned, as well as several of my colleagues here in Congress, with the designation made by the U.S. Olympic Committee of Mr. Bobby Knight as head coach of the U.S. basketball team.

Mr. Knight has made insulting remarks toward Puerto Ricans in particular and Hispanics in general on too many occasions.

The U.S. Olympic Committee has been insensitive about the serious allegations made against Mr. Knight by responsible persons and organizations such as the Governor of Puerto Rico, the Hispanic Congressional Caucus, the Territorial Congressional Caucus and the National Council of La Raza among others.

Today I am including in the record various documents concerning this matter, specifically a letter from the Governor of Puerto Rico to the U.S. Olympic Committee; the text of a resolution passed by the Puerto Rico House of Representatives; and a series of press articles published in San Juan and in the U.S. mainland on this issue.

These documents should provide all my colleagues with background information on an issue which should deeply concern those of us who really believe that to compete with dignity and true sportsmanship is as important as winning.

OFFICE OF THE GOVERNOR,

San Juan, Puerto Rico, January 21, 1983.

Col. F. DON MILLER,

Secretary General, U.S. Olympic Committee, Colorado Springs, Colo.

DEAR COLONEL MILLER: Although I appreciated receiving your replies of August 10, 1982 and September 27, 1982 to my letter of July 16, 1982, I was of course dismayed to learn that the Executive Board of the U.S. Olympic Committee elected to confirm the nomination of Bobby Knight as coach of the 1984 Olympic basketball team despite my explicit and emphatic recommendation to the contrary.

Now, in reviewing our 1982 correspondence, I am struck by the remarkable irony contained in the concluding sentence of your second and final letter. It reads as follows:

"While I understand the basis for your objections to the appointment of Coach Knight, I hope that you will use your best efforts to prevent the politicizing of the unfortunate situation that surrounded Coach Knight in Puerto Rico at the 1979 Pan American Games now that he has been confirmed as head coach of the 1984 Olympic Basketball Team."

In the months since you wrote those lines, as you undoubtedly are by now aware, only one individual can be characterized as having "politicized" the 1979 situation, and that individual is none other than Mr. Knight himself, as evidenced by a nationally syndicated Hispanic Link newspaper column; I enclose a copy of said column, as it was published in San Juan on December 14, 1982, and am also forwarding herewith some articles which have since appeared in response to that column.

The Olympic Games are still 18 months away, yet incredibly Bobby Knight is already reopening old wounds and setting the stage for severe discord at Los Angeles. His appalling statements at Gary, Indiana (which, to the best of my knowledge, he does not deny having made) demonstrate beyond a shadow of a doubt that his experience in Puerto Rico taught him nothing.

Accordingly, I must today renew, more energetically than ever, my adamant protest at the U.S. Olympic Committee's endorsement of Mr. Knight's participation in the 1984 Olympics.

Bobby Knight is an "Ugly American" and definitely lacks the sportsmanlike qualities and gentlemanly behavior that Olympic participants are supposed to display. He has gratuitously offended 3,200,000 fellow U.S. citizens in Puerto Rico, plus 2,000,000 other Puerto Ricans who reside in various states of the Union.

Politics are not an issue, and neither are personalities. No, the only issues at stake, clearly and unequivocably, are the ones I cited last July: namely, the well-being of the Olympic Movement as a whole, together with the honor and prestige of the United States as host for the Games of the XXIII Olympiad.

Urging that prompt and serious reconsideration of the Knight appointment be initiated at once, I thank you for your attention to this very important matter.

Sincerely,

CARLOS ROMERO-BARCELÓ.

Enclosures.

COMMONWEALTH OF PUERTO RICO

Resolution to repudiate Mr. Bobby Knight's racially-biased and disrespectful statements towards the People of Puerto Rico, most vehemently, and to express the House of Representatives' support of, and solidarity with the efforts being made by the various Hispanic and Puerto Rican organizations to have Mr. Bobby Knight replaced as coach of the United States Basketball Team for the 1984 Olympics, and to urge the United States Olympic Committee to consider this petition favorably

STATEMENT OF MOTIVES

The United States Olympic Committee recently chose Mr. Bobby Knight as coach of the 1984 Olympic Basketball Team. Immediately, a clamor arose, through written communications addressed to Colonel F. Don Miller, Executive Director of the Committee, to dismiss Mr. Knight from that position. The petition was motivated by several grave incidents that were provoked by Mr. Knight, intended to belittle and defame the Puerto Rican people.

The first of these incidents occurred in 1979, during the Pan American Games held in Puerto Rico, when this person slapped a policeman for having called upon him to keep calm and composed. His untoward actions were brought about when he found that the court on which his team was going to practice was already being used by the Brazilian women's team. Mr. Knight was convicted and sentenced for having assaulted the policeman who called him to order. Mr. Knight has not served the sentence, and when questioned about the lawsuit against him, Mr. Knight referred disrespectfully to Puerto Rico's judicial system.

The latest incident occurred recently, during a talk given in Gary, Indiana, when Mr. Knight demonstrated all his prejudices and scorn of the Puerto Rican people by making a contemptible and indecorous statement in connection with his anatomical gluteal region.

Therefore, it is quite evident that Mr. Corrada del Rio's petition for the dismissal of Mr. Bobby Knight from the position to which he has been appointed, is fully justified. It is also evident, in the light of Mr.

Knight's conduct, that this is a human being who lacks the qualities of nobility and chivalry which should be present in those who serve as ambassadors of good will in the realm of sports.

Mr. Knight's actions have been so censurable that they have moved other people and entities to request his immediate dismissal as coach of the United States Olympic Team.

For the above reasons, the House of Representatives expresses its support of and its solidarity with the efforts being made by the Resident Commissioner of Puerto Rico in Washington, Mr. Baltasar Corrada del Río, to have Mr. Bobby Knight dismissed as coach of the United States Basketball Team for the 1984 Olympics, and, at the same time, urges the United States Olympic Committee to consider this petition favorably.

Be it resolved by the House of Representatives of Puerto Rico:

Section 1. To express the most vehement repudiation of Mr. Bobby Knight's racially-biased and disrespectful statements toward the People of Puerto Rico.

Section 2. To express the support of this Body, and its solidarity with the efforts being made by Hispanic and Puerto Rican organizations to have Mr. Bobby Knight dismissed as coach of the United States Basketball Team for the 1984 Olympics, and, at the same time, to urge the United States Olympic Committee to consider this petition favorably.

Section 3. To deliver a copy of this Resolution to the Puerto Rico Olympic Committee, and to the News Media for its publication, and to send it to the Resident Commissioner of Puerto Rico in Washington, the Honorable Baltasar Corrada del Río, and to Colonel F. Don Miller, Executive Director of the United States Olympic Committee, after being duly translated into English.

Section 4. This Resolution shall take effect immediately after its approval.

[From the San Juan Star, Dec. 14, 1982]

OPEN LETTER TO INDIANA'S BOBBY KNIGHT

(By Carmelo Melendez)

My name is of no consequence to you at this moment, but after you read this letter, I expect that you will scratch your head and utter something like, "What's a (expletive) Puerto Rican doing in northwest Indiana?"

For your information, there are many Puerto Ricans living throughout Indiana, as well as all over this country of ours.

I live in Merrillville, Indiana, with my wife, Elsa (who is also Puerto Rican), and our two daughters. Oh, by the way, my wife is an alumna of Indiana University, where you have gained national fame as coach of one of the nation's top college basketball teams.

Recently, along with 900 others, my wife and I attended the Methodist Hospital dinner-dance in Gary, where (for a substantial four-figure fee), you delivered the keynote address.

I am a member of the Board of Trustees for the Methodist hospitals which invited you. Remember the night? Two of our community's outstanding citizens were honored for their humanitarian contributions to people of all ethnic backgrounds.

When you spoke, my wife and I listened courteously, even to your final remarks—remarks which upset both of us so much that when we got home, we wrote them down independently to make certain that our ears weren't deceiving us.

As a somewhat grim joke, the master of ceremonies had just presented you with a one-way ticket to San Juan, Puerto Rico—a reminder of the day 3½ years ago when you fled the island. Then you told your story:

"When I travel I usually sit on the aisle of the plane because of my size. But when I boarded the plane then—to my wife's surprise—I sat by the window. And when the plane was taxiing onto the runway and taking off, I stood up, unzipped my pants, lowered my shorts, and turned my bare ass, placed it on the window of that plane—because that's the last thing I wanted those people to see of me."

As one of those people (there are 5 million of us spread throughout the U.S.), I wondered whatever possessed you to conclude your remarks with such a venomous insult.

What happened in Puerto Rico to make you so bitter and disrespectful?

To try to find the answer, I spent an evening at the library reviewing the newspaper articles covering your visit in the summer of 1979. You coached the victorious United States team in the Pan American Games. Throughout the article, you were depicted as impolite and belligerent. You were reprimanded for unsportsmanlike conduct by the International Basketball Association. You were ejected from one of the games.

Then, according to the New York Times accounts, you punched a police officer named Jose de Silva in the jaw when he was attempting to write down your name.

In later court testimony, you were accused of referring to a team of Brazilian women players as "dirty people," shouting "to hell with all those people," and telling the police officer, "Get your dirty hands off me, nigger."

You weren't in court to hear that, of course. When you were convicted in San Juan District Court of assaulting a police officer, you had long since left the island. And, important man that you are, there was no way that you would extradicted from Indiana to face the 6-month sentence imposed on you. Two governors saw to that.

Mr. Knight, do you know what would happen instantly—faster than it takes to travel the length of the basketball court—if a Puerto Rican chose to punch a police officer in the jaw in Bloomington, Indiana? I think we all know what would happen.

After my visit to the library, I was more baffled than ever about your behavior the other evening. But I'm much more dismayed by the recent United States Olympic Committee decision certifying your nomination as coach of the U.S. basketball team for the 1984 Olympic Games in Los Angeles.

The Olympic torch is too valuable a world symbol to entrust in your hands.

Your image will mirror not just back on yourself, as it did on the airplane. Your intolerance will diminish the torch's glow and tarnish the games' legacy for tomorrow's children. With the whole world watching, your obscenities will reflect directly on all Americans, including me and my family.

Please, Mr. Knight, tell the Olympic Committee that you're occupied elsewhere in 1984.

[From the San Juan Star, Dec. 28, 1982]

LA RAZA TO FIGHT KNIGHT'S OLYMPIC APPOINTMENT

(By Harry Turner)

WASHINGTON.—The National Council of La Raza, perhaps the most influential of all Hispanic organizations in Washington, has joined the fight to keep Bobby Knight from being appointed coach of the U.S. Olympic basketball team.

Raul Yzaguirre, president of La Raza, in addition to calling for Knight's removal from consideration as coach, wrote to the Indiana University basketball coach and demanded an apology to all Hispanic and black Americans.

In a letter to the U.S. Olympic Committee, Yzaquirre said Knight's "blatant racism and vindictiveness against a significant segment of the U.S. population cannot be tolerated.

"We support the principle that coaching ability should be the basis for selection of individuals involved in the Olympic Games. At the same time, however, we are even more aware and supportive of the symbolism inherent in an individual's selection to participate in the Games.

"Persons who engage in obscene gestures and hurl racist epithets can hardly be considered role models for our youth."

The remarks by Knight that caused Yzaguirre's anger reportedly occurred at a recent dinner in Gary, Ind., where Knight was the keynote speaker.

Knight, who had had an altercation in Puerto Rico when he was coaching the U.S. team in the Pan American Games in 1979, told the audience, as a joke, that when he left San Juan he took a window seat and as the plane was leaving, lowered his pants and placed his bare buttocks against the window "because that's the last thing I wanted those people to see of me."

In his letter to the U.S. Olympic Committee, Yzaguirre also cited some racist remarks made in Puerto Rico by Knight in 1979, and said, "These racist comments are intolerable. If we do not vehemently protest the racism and bigotry we see around us, we will condone by our silence what we should condemn by our words and actions."

After getting into a dispute in Puerto Rico in 1979, Knight was actually arrested, but he left the island before his trial came up and he refused to return.

Although Gov. Romero refused to try to extradite Knight, he also urged the U.S. Olympic Committee not to appoint Knight coach of the 1984 basketball team.

OLYMPICS OFFICIAL MAY JOIN MOVE TO BAR BOBBY KNIGHT

(By Harry Turner)

WASHINGTON.—The nation's Hispanic community has an ally in a key position in its fight to block the appointment of Bobby Knight as basketball coach of the U.S. Olympics team.

He is Gil Vazquez, a well-known Los Angeles businessman who is on the board of the Los Angeles Olympics Organizing Committee and is also a member of the organization's Executive Planning Committee.

The National Council of La Raza, perhaps the most influential of all Hispanic organizations in Washington, has asked Vazquez, who is also on La Raza's board, to lead the fight against Knight's appointment.

Contacted Thursday in Los Angeles, Vazquez said he has not yet received the material on the Knight case sent him by La Raza and therefore hadn't made up his mind what to do.

But Vazquez said that if he becomes convinced that Knight has made racist remarks, he will use his influence with the other Olympics Organizing Committee board members and with the Hispanic community in general to try to block the appointment.

"It would be difficult to condone that kind of behavior," Vazquez said in the telephone inteview. However, he emphasized that he wants to hear both sides of the controversy before taking any possible action.

Knight, basketball coach at Indiana University, had his first run-in with Hispanics in 1979 when he was basketball coach of the U.S. team in the Pan American Games in Puerto Rico.

Knight got into an altercation with a Puerto Rican policeman and was arrested, but not before making some allegedly racist remarks. He left Puerto Rico before his court case came up and subsequently refused to return. Gov. Romero declined to try to extradite him.

Knight renewed the controversy when he spoke at a recent dinner in Gary, Ind. Knight told the audience as a joke that when he boarded the plane to leave San Juan he lowered his pants and placed his bare buttocks against the window "because that's the last thing I wanted those people to see of me."

[From the Washington Post, Jan. 7, 1983]

THE WRONG COACH

Why has the U.S. Olympic Committee appointed Bob Knight of Indiana University to coach the 1984 basketball team? True, Coach Knight wins games like few others ever have. But his record is marred by numerous unsportsmanlike outbursts on and off the basketball court—roughing up players and spectators, making crude comments about the competition, and the like.

The most troubling incident occurred while Mr. Knight was representing this country once before at the 1979 Pan American games in Puerto Rico. He assaulted a local police officer. There was testimony that he referred to a Brazilian women's team as "dirty people." After he left Puerto Rico, he was convicted in absentia of misdemeanor assault and sentenced to six months and $500. The governor declined to seek extradition, but if Mr. Knight happens to return to the island he could be arrested as a fugitive.

Recently, Mr. Knight made a public appearance during which he was jokingly reminded of the 1979 events. He then told an incredibly tasteless story, presumably false, about leaving Puerto Rico at the time and exposing his bare behind in the plane window "because that's the last thing I wanted those people to see of me". A Chicago journalist Carmelo Melendez, happened to be in the audience and wrote up the incident for the Hispanic Link News Service.

Surely there is reason here to disqualify Mr. Knight from representing this country at international events, no matter how good he is at coaching basketball players. In 1979, his action did much to divert attention from his team's victory and from the 262 medals won by other U.S. teams. He embarrassed the country in a manner that even enthusiastic sports fans should not dismiss as playful machismo. His reported behavior ran counter to ideals recognized in this country and in the Olympic games as being more important than scoring points. The 1984 Olympic basketball team needs a different coach.

USOC SAID NOT INTENDING TO FIRE KNIGHT

[From the San Juan Star, Jan. 14, 1983]

(By Harry Turner)

WASHINGTON.—A U.S. Olympic Committee spokesman said Thursday the committee has no intention of firing Bobby Knight, despite a mounting campaign by the nation's Hispanic community against the basketball coach.

The spokesman, Mike Moran, said the committee is "in full support" of Knight as this country's basketball coach in the 1984 Olympic Games.

Moran, assistant director of communications for the Olympic Committee, said the original incident in Puerto Rico in 1979 that began Knight's troubles was "exaggerated."

Moran said he and Don Miller, executive director of the committee, were in Puerto Rico during the 1979 Pan American Games and they feel Knight was "not guilty as charged."

During the Pan American Games, Knight, coach of the U.S. basketball team, got into an altercation with a Puerto Rican policeman. He was arrested but left the island before he could be brought to trial.

A warrant was issued for Knight's arrest, but Gov. Romero declined to extradite the Indiana University coach. Even so, Romero is one of those trying to get Knight dismissed as the Olympic coach.

The incident that caused the controversy surrounding Knight to flare up again occurred at a recent dinner in Gary, Ind., at which Knight was a speaker.

Knight told the audience that when his plane left Puerto Rico in 1979 he lowered his pants and stuck his buttocks against the window because "that's the last thing I wanted those people to see of me."

This remark caused The Washington Post, Resident Commissioner Baltasar Corrada del Rio and the National Council of La Raza, an influential Hispanic organization, to demand Knight's dismissal.

Moran, reached at the U.S. Olympic Committee headquarters in Boulder, Colo., said committee members weren't aware of the latest incident.

But he implied that it would take a lot to cause the committee to dismiss Knight, whom he described as "the best coach we could find."

Moran said, however, that procedures do exist to fire Olympic coaches and that any charges would have to be brought before the organization's Games Preparation Committee.

The next move may come from the National Council of La Raza, which is leading the drive against Knight.

La Raza's board chairman, Gil Vazquez, a Los Angeles businessman, is a member of the Los Angeles Olympics Organizing Committee and presumably has some influence within the organization.

Vazquez has said he is prepared to join the fight against Knight if he becomes convinced the coach has demonstrated anti-Hispanic behavior.●
